Dear Karen

Thank you for sending me the Review of the Framework for Labour Market Statistics.

The Final Report addresses very well the need for, and structure of, a conceptual framework for labour market statistics - a labour accounting system. In addition the Review's recommendations - 28 in all - have concentrated on the quality of particular labour market indicators and topics. The report covers comprehensively all significant aspects of labour market statistics. I am therefore pleased to approve it's publication as a National Statistic.

I would like to thank the team for all the work involved in the production of the report.

Your sincerely

Len Cook
