Correction

27 September 2022 09:30

We have corrected an error in our estimates of Public sector net borrowing in the financial year ending (FYE) 2021 in Table 8.

The previous version contained incorrect data for the FYE 2021 for Local Government. The incorrect amount for Local Government net borrowing was a surplus of £0.9 billion. It should have been a surplus of £2.4 billion. Public sector net borrowing (excluding Public Sector Banks) was therefore overstated by £1.5 billion (or 0.5%) in this period: PSNB ex was previously reported as £314.3 billion, but has now been corrected to £312.8 billion. No other time periods were affected.

The public sector data for the FYE 2021 presented in Table 14 have also been corrected. In addition, the amounts for the FYE 2021 in Figure 1, Figure 5 and Figure 6 have been corrected. No other time periods were affected.

This happened because of a data processing error. We apologise for any inconvenience caused.

1 . Other pages in this release

Other commentary from the latest public sector finances data can be found on the following pages:

- [Recent and upcoming changes to public sector finance statistics: August 2022](#)
- [Public sector finances borrowing by sub-sector dataset](#)
- [UK government debt and deficit: March 2022](#)

2 . Main points

- Public sector net borrowing excluding public sector banks (PSNB ex) was £11.8 billion in August 2022; £2.6 billion less than in August 2021 but £6.5 billion more than in pre-coronavirus (COVID-19) August 2019, when it was £5.3 billion.
- Central government current (or day-to-day) expenditure of £73.2 billion in August 2022 was largely unchanged compared with August 2021, with a £1.5 billion increase in debt interest payable, a £1.7 billion increase in payment for goods and services and a £1.1 billion increase in net social benefit payments being offset by reductions elsewhere, including a £3.4 billion reduction in subsidy payments.
- Central government debt interest payable was £8.2 billion in August 2022, £1.5 billion more than in August 2021 and the highest August figure since monthly records began in April 1997; the volatility in interest payable is largely because of the effect of Retail Prices Index (RPI) changes on index-linked gilts.
- Central government receipts were £69.6 billion in August 2022, which was £5.6 billion more than in August 2021; of this, tax receipts were £51.4 billion, which was an increase of £3.9 billion compared with August 2021.
- PSNB ex was £58.2 billion in the financial year to August 2022; this was £21.4 billion less than in the same period last year but £30.4 billion more than in the financial year to August 2019, pre-coronavirus pandemic.
- Central government net cash requirement (excluding UK Asset Resolution Ltd and Network Rail) was £4.9 billion in August 2022, which was £3.6 billion less than the £8.5 billion cash deficit in August 2021; this brought the total to £29.4 billion in the financial year to August 2022.
- Public sector net debt excluding public sector banks (PSND ex) was £2,427.5 billion at the end of August 2022, or around 96.6% of gross domestic product (GDP), which was an increase of £195.2 billion or 1.9 percentage points of GDP compared with August 2021.
- Public sector net debt excluding public sector banks and the Bank of England (PSND ex BoE) was £2,107.4 billion at the end of August 2022, or around 83.8% of GDP, which was an increase of £113.8 billion but a reduction of 0.8 percentage points of GDP compared with August 2021.

3 . Borrowing in August 2022

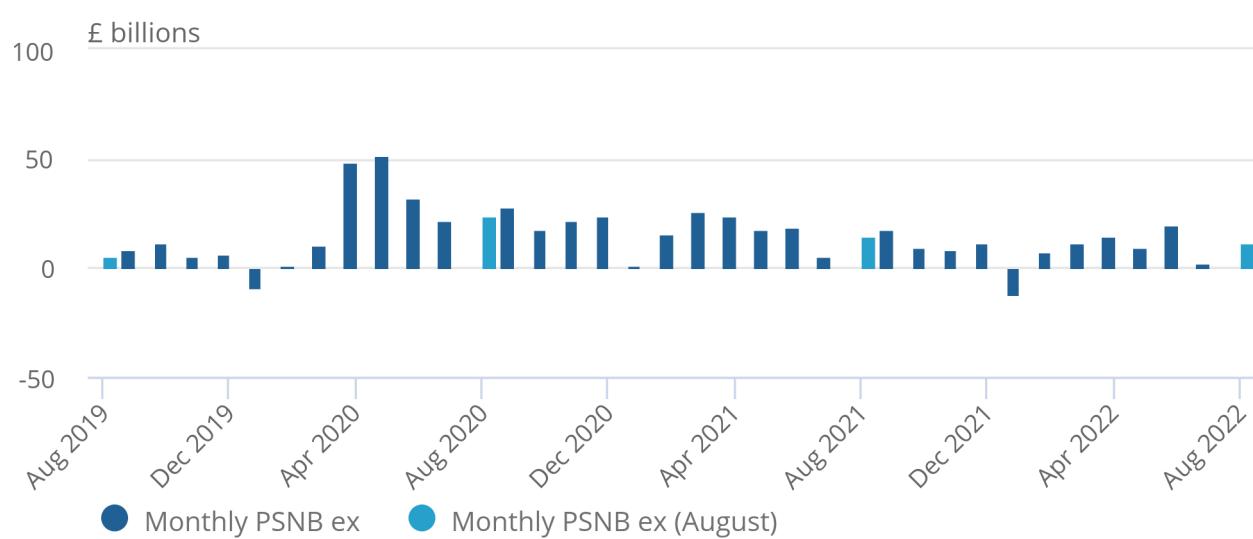

In August 2022, initial estimates show that the public sector spent more than it received in taxes and other income. This required it to borrow £11.8 billion, which was £5.8 billion more than the £6.0 billion forecast by the Office for Budget Responsibility (OBR).

Figure 1: The £11.8 billion borrowed in August 2022 was £2.6 billion less than in August 2021 but £6.5 billion more than in pre-coronavirus (COVID-19) August 2019

Central government receipts

Central government receipts in August 2022 were estimated to have been £69.6 billion, which was £5.6 billion more than in August 2021. Of these receipts, tax revenue increased by £3.9 billion to £51.4 billion.

Table 2: Central government current receipts
Central government receipts compared with the same month a year earlier, UK, August 2022

	August (£ billion)		Change on a year ago

Source: Office for National Statistics – Public sector finances

Notes

1. L&P – Land and Property.
2. Other taxes on income and wealth include Capital Gains Tax receipts and balancing residual items that are often negative.
3. Figures may not sum because of rounding.

In the most recent months, tax receipts recorded on an accrued basis are subject to some uncertainty. This is because many taxes such as value added tax (VAT), corporation tax and Pay As You Earn (PAYE) income tax contain some forecast cash receipts data and are liable to revision when actual cash receipts data are received.

The forecasts underlying our current tax estimates reflect the expectations published in the [Office for Budget Responsibility's \(OBR\) Economic and fiscal outlook – March 2022](#) and the subsequent monthly profiles published on 12 May 2022.

Central government expenditure

Central government bodies spent £73.2 billion on current (or day-to-day) expenditure in August 2022, which was £0.1 billion more than in August 2021.

Table 3: Central government expenditure

2. Procurement – Purchase of Goods and Services.
3. This cost includes the expenditure by the Department of Health and Social Care (DHSC), devolved administrations and other departments in response to the coronavirus pandemic. It also includes the NHS Test and Trace programme and the cost of vaccines.
4. Current and capital transfers between central government and local government are based on administrative data supplied by HM Treasury and have no impact at the public sector level.
5. Value added tax (VAT) and gross national income-based contributions to the EU budget.
6. Payments under the Withdrawal Agreement.
7. Coronavirus Job Retention Scheme (CJRS). Scheme closed in September 2021.
8. Self-Employment Income Support Scheme (SEISS). Scheme closed in September 2021.
9. Figures may not sum because of rounding.

Interest payable on central government debt

Since mid-2021, the cost of servicing central government debt has increased considerably. These rising costs do not principally reflect recent increases in the level of government debt, nor is the change in servicing costs driven by large increases in the interest – or coupon – payments by government. Instead the recent high levels of debt interest payable are largely a result of higher inflation, with the interest payable on index-linked gilts rising in line with the Retail Prices Index (RPI).

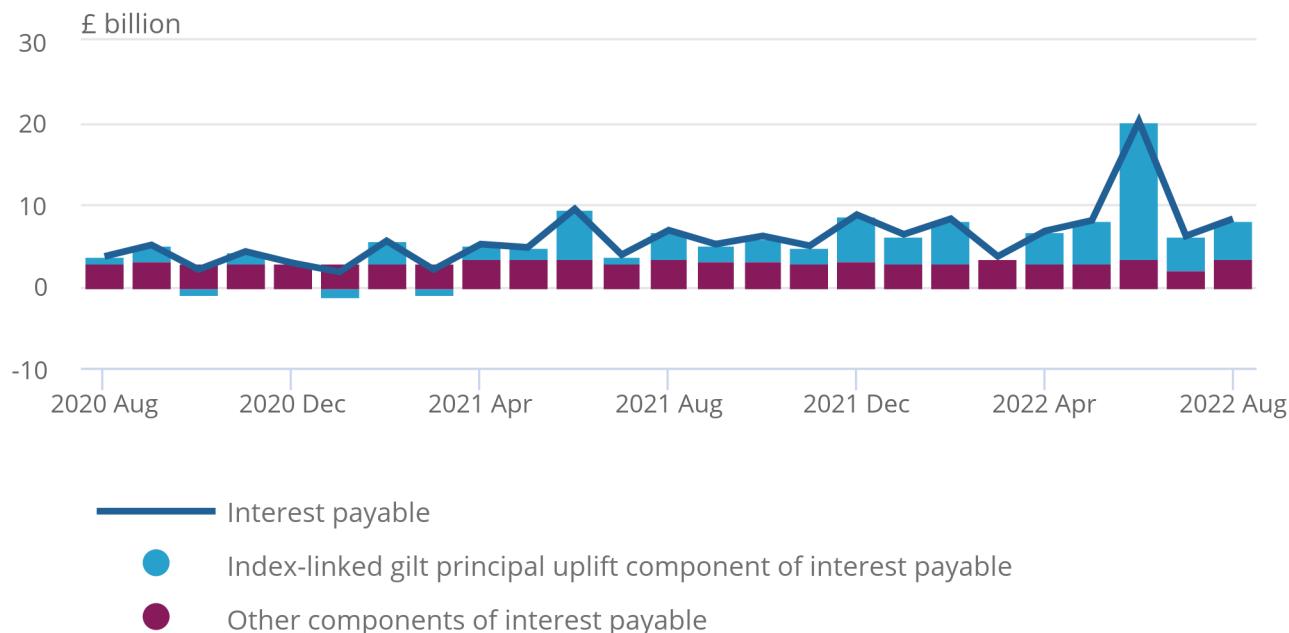

In August 2022, the interest payable on central government debt was £8.2 billion, of which £4.7 billion reflected the impact of the RPI.

Figure 3: The interest payable on index-linked gilts rises and falls with the Retail Prices Index (RPI), adding volatility to central government debt interest costs

Central government debt interest payable, £ billions, UK, August 2020 to August 2022

Figure 3: The interest payable on index-linked gilts rises and falls with the Retail Prices Index (RPI), adding volatility to central government debt interest costs

Central government debt interest payable, £ billions, UK, August 2020 to August 2022

Source: Office for National Statistics – Public sector finances

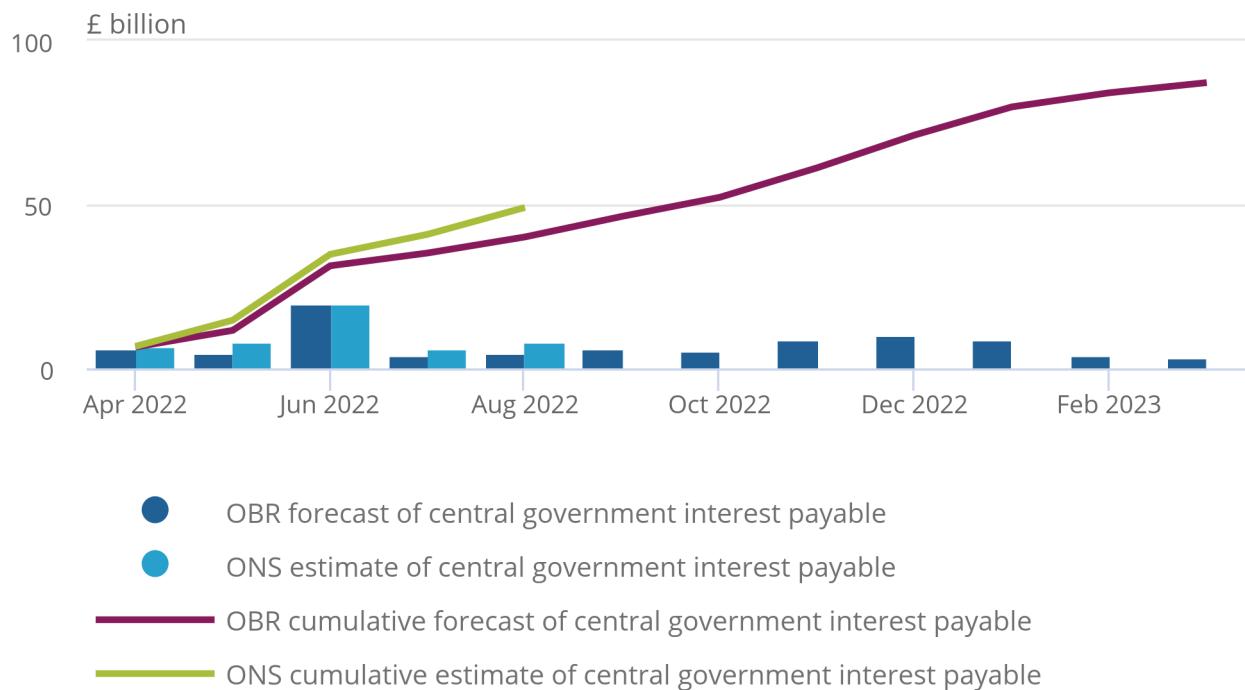

The inflation-linked portion of interest payable on most index-linked gilts is calculated using a three-month lagged RPI. In August 2022, we reference the RPI movement between May and June 2022. RPI increases in the most recent months will be reflected in our interest estimates for future months.

Figure 4: The Office for Budget Responsibility (OBR) estimates that the debt interest payable on central government's outstanding debt will be £87.2 billion for the current financial year

Forecast and estimated debt payables, £ billions, UK, April 2022 to March 2023

Figure 4: The Office for Budget Responsibility (OBR) estimates that the debt interest payable on central government's outstanding debt will be £87.2 billion for the current financial year

Forecast and estimated debt payables, £ billions, UK, April 2022 to March 2023

Source: Office for National Statistics – Public sector finances and Office for Budget Responsibility (OBR)

Notes:

1. This chart uses forecast data published in the [Economic and fiscal outlook – March 2022](#) and the subsequent monthly profiles published on 12 May 2022.

While any RPI uplift will affect accrued expenditure (as used in the calculation of borrowing), it will not be wholly and immediately reflected in the central government net cash requirement. These movements are reflected in the government's liabilities, which will be realised as the existing stock of index-linked gilts is redeemed.

On 18 July 2022, we published a [methodology article explaining The calculation of interest payable on government gilts](#).

4 . Borrowing in the financial year to August 2022

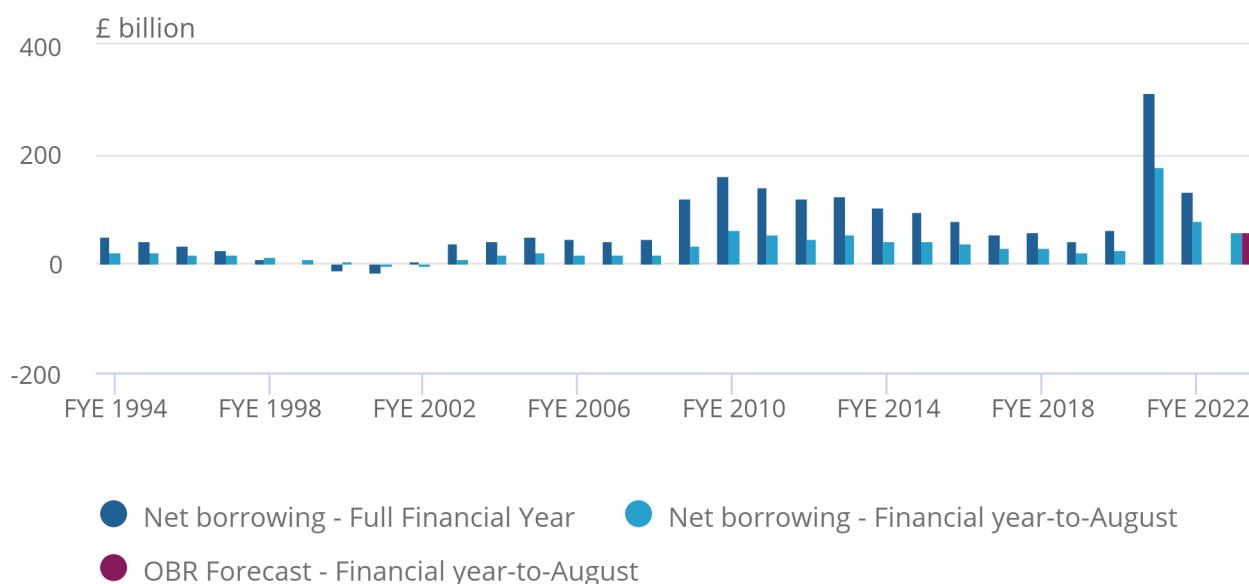

Public sector net borrowing excluding public sector banks (PSNB ex) was £58.2 billion in the financial year (FY) to August 2022, £21.4 billion less than in the same period last year.

Figure 5: Borrowing in the financial year-to-August 2022 was £0.2 billion more than the £58.0 billion forecast by the Office for Budget Responsibility (OBR)

Public sector current budget deficit

The public sector current budget deficit is the gap between current expenditure and current receipts on an accrued basis, having taken account of depreciation. The current budget deficit can be thought of as borrowing to fund day-to-day spending, as it excludes the capital expenditure (or net investment) present in the wider net borrowing measure.

Table 5: Public sector current budget deficit

Central government expenditure

Central government bodies spent £386.6 billion on current (or day-to-day) expenditure in the FY to August 2022, which was £4.6 billion more than in the same five-month period last year.

In April 2022, we recorded the [Council Tax rebate](#) in England as a payable tax credit from central government to households. This payment was recorded within the Other Expenditure category in Table 7, and the additional expenditure increased central government and subsequently public sector net borrowing by £3.0 billion in April 2022.

8. Financial year-to-date refers to the months April to August.,Figures may not sum because of rounding.

5 . Borrowing in the financial year ending March 2022

The public sector borrowed £133.7 billion in the financial year ending (FY) March 2022. This was £5.9 billion more than the £127.8 billion forecast by the Office for Budget Responsibility (OBR) in its [Economic and fiscal outlook -- March 2022](#). However, this was less than half of the £314.3 billion borrowed in the FYE March 2021.

Notes

1. Public Sector Net Borrowing ex – net borrowing excluding public sector banks.
2. Financial year refers to the months April to March.,Figures may not sum because of rounding.

The coronavirus (COVID-19) pandemic has had a substantial impact on the economy as well as public sector borrowing. Expressed as a ratio of UK gross domestic product (GDP), borrowing in the FYE March 2021 was 14.7%, which was the highest for 75 years. Latest estimates indicate that this ratio fell by 9.1 percentage points to 5.6% over the 12 months to March 2022.

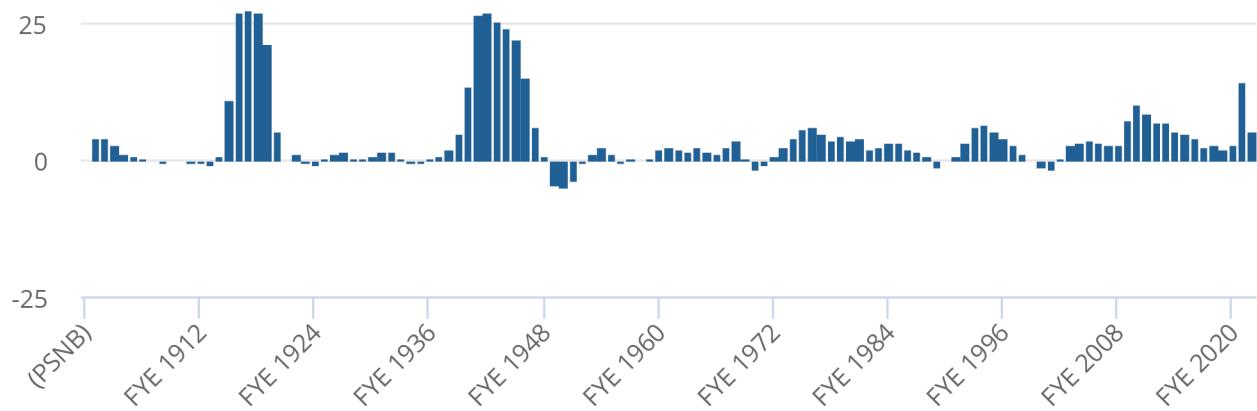

Figure 6: Borrowing in the financial year ending (FYE) March 2022 was around a third of that in the FYE March 2021 when expressed as a ratio of gross domestic product (GDP)

Notes:

1. This chart uses historical data published in the [Public finances databank 2022-23](#).

6 . Central government net cash requirement

The central government net cash requirement (CGNCR), excluding UK Asset Resolution Ltd and Network Rail, is the amount of cash needed immediately for the UK government to meet its obligations. To obtain cash, the UK government sells financial instruments, gilts or Treasury Bills.

The amount of cash required will be affected by changes in the timing of payments to and from central government, but it does not depend on forecast tax receipts in the same way as our accrued (or national accounts-based) measures of borrowing.

The CGNCR consequently contains the timeliest information and is less susceptible to revision than other statistics in this release.

However, as for any cash measure, the CGNCR does not reflect the overall amount for which the government is liable or the point at which any liability is incurred – it only reflects when cash is received and spent.

Table 9: Central government net cash requirement on own account

Notes

1. Financial year-to-date refers to the months April to August.
2. Figures may not sum because of rounding

7 . Debt

Public sector net debt excluding public sector banks (PSND ex) was £2,427.5 billion at the end of August 2022, which was an increase of £195.2 billion compared with August last year.

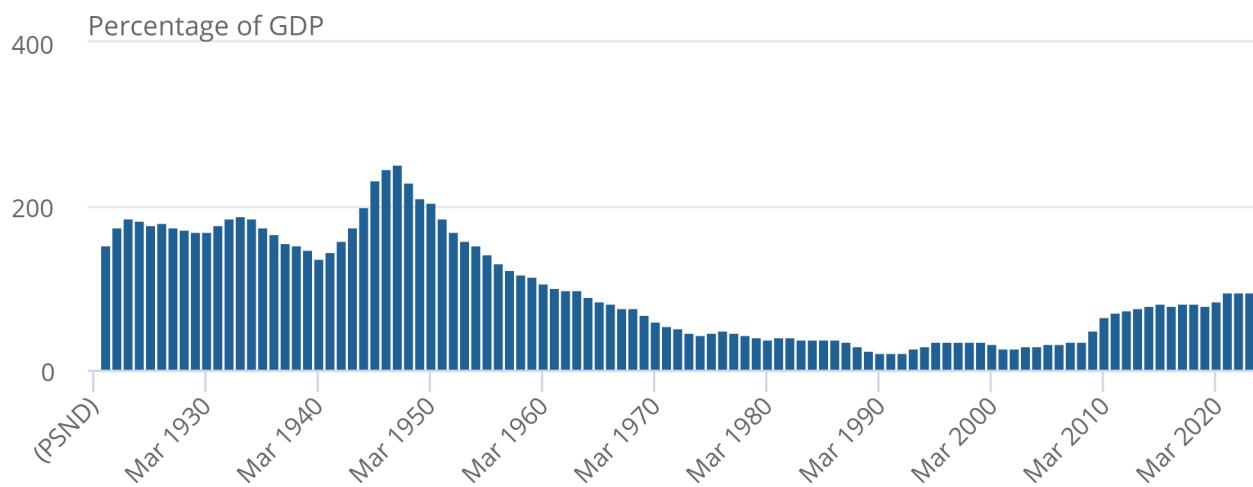

The extra funding required by government over the course of the coronavirus (COVID-19) pandemic, combined with reduced cash receipts and a fall in gross domestic product (GDP), have all helped to push public sector net debt at the end of August 2022 to 96.6% of GDP.

Figure 7: Debt has reached levels last seen in the early 1960s

Figure 7: Debt has reached levels last seen in the early 1960s

Public sector net debt excluding public sector banks, percentage of GDP, UK, financial year ending (FYE) 1921 to August 2022

Source: Office for Budget Responsibility and Office for National Statistics – Public sector finances

Notes:

1. This chart uses historical data published in the [Public finances databank 2022-23](#).

Debt is largely made up of gilts (or bonds) issued to investors by central government. Of the £2,062.9 billion gilts in circulation at the end of August 2022:

- £1,519.4 billion are conventional gilts that pay a fixed interest rate
- £543.5 billion are index-linked gilts that pay an interest rate pegged to the Retail Prices Index (RPI) and are recorded at their redemption value

These gilts are auctioned by the [Debt Management Office \(DMO\) in accordance with its financing remit](#), on behalf of central government.

The Bank of England's contribution to debt

The Bank of England's (BoE) contribution to public sector net debt is largely a result of its quantitative easing activities. These include both the gilt-purchasing activities and corporate bond holdings of the Asset Purchase Facility Fund (APF) and loans made under Term Funding Schemes (TFS).

In February 2022, the [BoE announced that it will no longer be replenishing the gilt stock](#) of the APF. Following a £3.2 billion gilt redemption in July 2022, the APF's gilt holdings currently stand at £731.7 billion (at redemption value).

It is important to understand that this £731.7 billion (conventional) gilt holding is not recorded directly as a component of public sector net debt. Instead, in August 2022, we record the £112.1 billion difference between the £843.8 billion of reserves created to purchase gilts (at market value) and the £731.7 billion redemption value of the gilts purchased.

Table PSA9A in [our Public sector finances tables 1 to 10: Appendix A](#) presents the impact of both APF and TFS as a part of the BoE's contribution to public sector net debt.

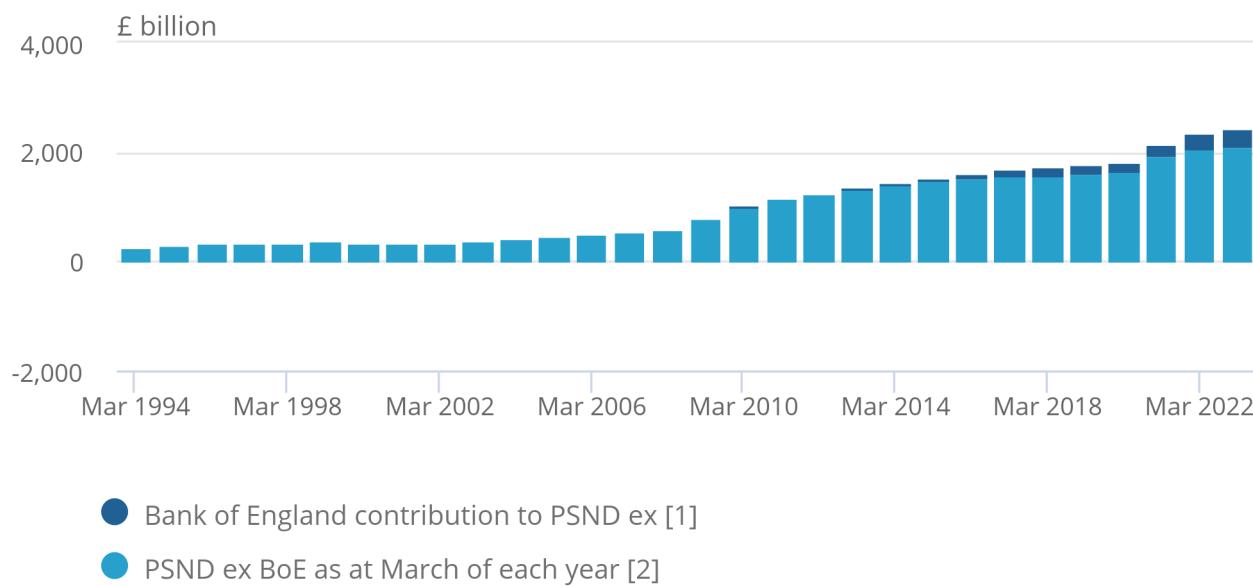

Our public sector net debt excluding the public sector banks and the Bank of England (PSND ex BoE) measure removes the debt impact of these schemes along with the other transactions relating to the normal operations of the BoE. Standing at £2,107.4 billion at the end of August 2022 (or around 83.8% of GDP), PSND ex BoE was £320.2 billion (or 12.8 percentage points of GDP) less than PSND ex.

Figure 8: The Bank of England contributed £320.2 billion to public sector net debt at the end of August 2022

Public sector net debt excluding public sector banks, UK, March 1994 to the end of August 2022

Figure 8: The Bank of England contributed £320.2 billion to public sector net debt at the end of August 2022

Public sector net debt excluding public sector banks, UK, March 1994 to the end of August 2022

Source: Office for National Statistics – Public sector finances

Notes:

1. Includes Asset Purchase Facility (APF), which includes the Term Funding Scheme (TFS) and TFS incentives for small and medium-sized enterprises (TFSME).
2. Public sector net debt excluding public sector banks (PSND ex) is the combination of PSND ex Bank of England (BoE) plus the BoE's contribution to PSND ex.
3. Public sector net debt excluding public sector banks (PSND ex) shown at the end of each financial year (March), unless otherwise stated.

Public sector net financial liabilities

Public sector net financial liabilities excluding public sector banks (PSNFL ex) provides a more comprehensive measure of the public sector balance sheet. It captures a wider range of financial assets and liabilities than recorded in PSND ex, such as the assets held under the TFS, which fall outside the boundary of PSND ex.

PSNFL ex was £2,084.0 billion at the end of August 2022 (or around 82.9% of GDP), which was £343.6 billion (or 13.7 percentage points of GDP) less than PSND ex.

Table PSNFL 3, published as a part of [our Public sector finances tables 1 to 10: Appendix A](#), provides a reconciliation between the latest measures of PSND ex and PSNFL ex.

8 . Revisions

The data for the latest months of every release contain a degree of forecasts. Subsequently, these are replaced by improved forecasts, as further data are made available, and finally by outturn data.

3. Full financial year refers to the months April 2021 to March 2022.
4. Figures may not sum because of rounding.

Annual data updates

Our regular annual updates of data for Network Rail, Pool Re, public sector funded pensions, student loans and capital consumption also take effect this month.

Of these, the updates for public sector funded pensions estimates have the most noticeable impact. Although the pensions figures have been revised from April 2020 to date, the impact on the financial year ending March 2022 is the most material, reducing public sector borrowing by £8.0 billion and increasing net debt at the end of March 2022 by £5.0 billion.

Revisions to net borrowing (PSNB ex) in the financial year-to-July 2022

Since [our last public sector finances publication on 19 August 2022](#), we have reduced our estimate of borrowing in the financial year-to-July 2022 by £8.6 billion.

Central government accounts for the largest part of this revision and has been revised down by £3.9 billion over this period, driven by stronger than previously estimated receipts and by lower than previously estimated spending. Notable changes include:

- an upwards revision to business rates of £1.3 billion, resulting from [our review of their recording in the public sector finances introduced this month](#)
- a reduction in central government net investment of £1.1 billion, largely arising from our annual update of student loans data
- an upwards revision to central government interest payable of £1.0 billion, in part arising from our new treatment of leases, as described in our [Looking ahead -- developments in public sector finance statistics: 2022](#) article

Other, smaller updates account for the remaining impact on central government borrowing.

Local government borrowing accounts for around £2.7 billion of the fall in public sector net borrowing (PSNB ex) over this period. Previously, our local government data were based on the latest official forecasts published by the Office for Budget Responsibility (OBR) in their [Economic and fiscal outlook -- March 2022](#). This month, we have included local authority budget data for England, Scotland and Wales that we have used to improve our initial estimates.

This month, we have also reduced the borrowing of the public sector (funded) pensions sub-sector by £1.6 billion, having revised our forecasts for the financial year-to-July based on our annual data update for the financial years ending March 2021 and March 2022.

Rewvisions to net borrowing (PSNB ex) in the financial year ending (FYE) March 2022

Since [our last public sector finances publication on 19 August 2022](#), we have reduced our estimate of public sector borrowing in the FYE March 2022 by £10.4 billion.

This month, we have reduced central government borrowing by £2.8 billion.

We have increased our previous estimates of central government interest payable by £2.6 billion, of which £1.1 billion was because of our annual update of Network Rail data and £1.6 billion was because of our new treatment of central government leases introduced for the first time this month.

As well as increasing debt interest payable, the change to our recording of leases reduced our previous estimate of expenditure on goods and services by £1.9 billion over the same twelve-month period.

We have reduced our previous estimate of central government net investment by £3.1 billion, largely because of our annual update of student loans data.

This month, we have also reduced the borrowing of the public sector (funded) pensions sub-sector by £8.0 billion. Substantial revisions to our pensions data are not uncommon as we replace our initial estimates annually.

Tables 12 and 13 show the revisions to central government receipts and expenditure in the financial year-to-July 2022 and FYE March 2022 since our last publication.

Rewvisions to earlier periods are a result of our annual updates introduced this month, as explained in Section 9, and their impacts on public sector net borrowing (excluding public sector banks) are summarised in Table 14.

Revisions to public sector net debt excluding public sector banks (PSND ex)

This month, we have increased our previous estimate of the level of public sector net debt excluding public sector banks at the end of July 2022 by £28.7 billion from that published on 19 August 2022. This increase was largely the result of the new treatment of central government leases introduced for the first time this month, which added £20.7 billion to government gross debt.

The remaining £8.0 billion increase is a combination of improvements to our recording of public corporations' data, as described in [Recent and upcoming changes to public sector finance statistics: August 2022](#),and our annual update to public sector pensions data.

Table 15 summarises the impact on public sector net debt (excluding public sector banks) of both the leases and public corporations changes introduced this month.

9 . Changes to public sector finance statistics planned for September 2022

In accordance with our transparency strategy and to provide predictability to users, where possible, we aim to package together methodological changes at a single point in the year.

This section presents information on the changes outlined in our [Looking ahead – developments in public sector finance statistics: 2022 article](#), which were implemented this month. These include improvements in the recording of:

- public corporations' data
- central government leases
- national non-domestic rates

Our article, [Recent and upcoming changes to public sector finance statistics: August 2022](#), explains these changes in some detail.

These methodology changes were accompanied by our regular annual data updates, including improvements to our previously published capital consumption, public sector pensions, Pool Re and student loans data.

Estimates of how our developments have affected the fiscal aggregates are presented in Tables 14 and 15, for financial years. [Changes to public sector finance statistics: Appendix L](#) provides a more detailed assessment of these impacts.

10 . Public sector finances data

[Public sector finances tables 1 to 10: Appendix A](#)

Dataset | Released 21 September 2022

The data underlying the public sector finances statistical bulletin are presented in the tables PSA 1 to 10.

[Large impacts on public sector fiscal measures excluding banking groups: Appendix B](#)

Dataset | Released 21 September 2022

Large events that affect current public sector net borrowing excluding public sector banks (PSNB ex), and public sector net debt excluding public sector banks (PSND ex) from the period May 2000 onwards. Impacts are shown for the components of public sector net borrowing, net cash requirement and net debt.

[Public sector finances revisions analysis on main fiscal aggregates: Appendix C](#)

Dataset | Released 21 September 2022

Revisions analysis for central government receipts, expenditure, net borrowing and net cash requirement statistics for the UK over the last five years.

[Public sector current receipts: Appendix D](#)

Dataset | Released 21 September 2022

A breakdown of UK public sector income by latest month, financial year-to-date and full financial year, with comparisons with the same period in the previous financial year.

[International Monetary Fund's Government Finance Statistics framework in the public sector finances: Appendix E](#)

Dataset | Released 21 September 2022

Presents the balance sheet, statement of operations and statement of other economic flows for the public sector, compliant with the Government Finance Statistics Manual 2014: GFSM 2014 presentation.

[Revisions to the first reported estimate of public sector net borrowing: Appendix F](#)

Dataset | Released 21 September 2022

Summarises revisions to the first estimate of UK public sector borrowing (excluding public sector banks) by sub-sector. Revisions are shown at 6 and 12 months after year end.

[Changes to public sector finance statistics: Appendix L](#)

Dataset | Released 21 September 2022

Presents the impact of the methodology and data changes introduced in September 2022 on our headline public sector measures.

11 . Glossary

Public sector

In the UK, the public sector consists of six sub-sectors: central government, local government, public non-financial corporations, public sector pensions, the Bank of England (BoE) and public financial corporations (or public sector banks).

Public sector banks

Unless otherwise stated, the figures quoted in this bulletin exclude public sector banks, currently only the NatWest Group (formerly the Royal Bank of Scotland (RBS) Group).

Public sector current budget deficit

Public sector current budget deficit is the gap between current expenditure and current receipts on an accrued basis, having taken account of depreciation.

The current budget is in surplus when receipts are greater than expenditure.

Public sector current expenditure

Current expenditure measures reflect the cost of the public sector's day-to-day activities. For example, central government's provision of services and grants, payment of social benefits and the payment of the interest on its outstanding debt.

Public sector debt interest to revenue ratio

The debt interest to revenue ratio (DIR) represents the proportion of net interest paid (gross interest paid less interest received) by the public sector (excluding public sector banks), compared with the non-interest receipts it receives in a given period.

Public sector net borrowing

Public sector net borrowing excluding public sector banks (PSNB ex) measures the gap between revenue raised (current receipts) and total spending (current expenditure plus net investment (capital spending minus capital receipts)). PSNB is often referred to by commentators as "the deficit".

Public sector net cash requirement

The public sector net cash requirement (PSNCR) represents the cash needed to be raised from the financial markets over a period of time to finance its activities.

The amount of cash required will be affected by changes in the timing of payments to and from the public sector rather than when these liabilities were incurred. However, it does not depend on forecast tax receipts in the same way as our accrued (or national accounts) based measures of borrowing.

PSNCR may be similar to borrowing for the same period and close, but not identical, to the changes in the level of net debt between two points in time.

Public sector net debt

Public sector net debt excluding public sector banks (PSND ex) represents the amount of money the public sector owes to private sector organisations (including overseas institutions) and is often referred to by commentators as "the national debt".

Public sector net investment

Public sector net investment is the sum of all capital spending, mainly net acquisitions of capital assets and capital grants, less the depreciation of the stock of capital assets.

Public sector net financial liabilities

Public sector net financial liabilities excluding public sector banks (PSNFL ex) is a comprehensive measure of the public sector balance sheet, capturing a wider range of financial assets and liabilities than recorded in PSND ex.

Total managed expenditure

Total managed expenditure (TME) covers all current and capital spending carried out by the public sector, including depreciation. This is equal to public sector current expenditure, plus public sector net investment, plus depreciation.

12 . Measuring the data

Comparing our data with official forecasts

The independent Office for Budget Responsibility (OBR) is responsible for the production of official forecasts for the government. These forecasts are usually produced twice a year, in spring and autumn.

Table 16: Latest public sector finances estimates compared with official Office for Budget Responsibility forecasts for the financial year ending (FYE) March 2023, UK

£ billion unless otherwise stated

	Provisional estimate August 2022	OBR forecast ¹ August 2022	Difference	OBR forecast ¹ FYE March 2023
Net Borrowing	11.8	6.0	5.8	99.1
Net Debt	2,427.5	2,389.3	38.2	2,453.4
Net Debt % of GDP	96.6	95.5	1.1	95.5

Source: Office for Budget Responsibility and Office for National Statistics – Public sector finances

Notes

1. These tables use the Economic and fiscal outlook – March 2022 and the subsequent monthly profiles published on 12 May 2022.
2. Bank of England.
3. All public sector measures in this table exclude public sector banks.
4. Figures may not sum because of rounding.

Table 17: Latest public sector finances estimates compared with official Office for Budget Responsibility forecasts for the financial year ending (FYE) March 2022, UK

£ billion unless otherwise stated

	Provisional estimate FYE March 2022	OBR forecast ¹ FYE March 2022	Difference
Net Borrowing	133.7	127.8	5.9
Current budget deficit	78.6	89.5	-10.9
Net Debt	2,372.6	2,329.7	42.9
Net Debt % of GDP	96.8	95.6	1.2

Energy Bills Support Scheme

The Energy Bills Support Scheme (EBSS) is a government scheme giving households in Great Britain (with a domestic electricity contract) £400 towards the cost of their energy bills.

On 31 August 2022, the Office for National Statistics (ONS) announced that [the EBSS has been classified as a current transfer payment from government to households](#).

This additional central government expenditure will increase public sector net borrowing over a six-month period between October 2022 and March 2023.

Energy Price Guarantee scheme

On 8 September 2022, the UK government announced a number of new plans to help manage the cost of energy prices for households and businesses across the UK. This includes an Energy Price Guarantee scheme, which will include the temporary removal of green levies on energy bills and cap household energy bills at an average £2,500 for the next two years.

We will review and classify these support measures in due course.

Energy profits levy

On 26 May 2022, the UK government announced [a new levy on the profits of oil and gas companies](#) in the UK and the UK Continental Shelf, intended to help fund cost-of-living support.

We have classified this levy as a tax on the profits of oil and gas companies operating in the UK and the UK Continental Shelf. The first payment received will be accrued back to be reported as close as possible to the commencement date of 26 May 2022.

We will implement this classification as soon as is practical.

Coronavirus (COVID-19) loan guarantee schemes

In its [Economic and fiscal outlook – March 2022](#), the OBR estimated that a reduction on calls on the government's coronavirus loan guarantee schemes would reduce net borrowing by £4.4 billion in the financial year ending (FYE) March 2022. We will include any impact arising from a change in expected calls when sufficiently reliable data become available.

13 . Strengths and limitations

To supplement this release, we publish an accompanying [public sector methodological guide](#) and [Public sector finances Quality and Methodology Information](#) outlining the strengths, limitations, and appropriate uses of the public sector finances dataset.

Local government and public corporations

In recent years, planned local government expenditure initially reported in local authority budgets has been systematically lower than final outturn current expenditure reported in the audited accounts and higher than that reported in final outturn capital expenditure. We therefore include adjustments to increase or decrease the amounts reported at the budget stage.

For the financial year ending (FYE) 2022, we include:

- a £0.4 billion downward adjustment to Wales's capital expenditure
- a £3.5 billion upward adjustment to England's current expenditure on goods and services

We apply a further £2.0 billion downward adjustment to budget forecast current expenditure on benefits in the FYE 2022, to reflect the most recently available data for housing benefits.

For the FYE 2023, we include:

- a £0.8 billion downward adjustment to Scotland's capital expenditure
- a £0.4 billion downward adjustment to Wales's capital expenditure
- a £4.0 billion upward adjustment to England's current expenditure on goods and services

We apply a further £1.8 billion downward adjustment to budget forecast current expenditure on benefits in the FYE 2023, to reflect the most recently available data for housing benefits.

Public corporations' data in the most recent periods are initial estimates, largely based on the [Office for Budget Responsibility \(OBR\)'s Economic and fiscal outlook – March 2022](#), with adjustments being applied as needed.

Relationship between columns: 1=2+4+7 ; 11=2+3+6+9+10 ; 13=11+12

1 Previously known as the borrowing requirement of the sector concerned

2 BoE includes Bank of England Asset Purchase Facility Fund and Special Liquidity Scheme

Figures derived from Bank of England accounts and ONS estimates

Figures for most recent months are ONS estimates

3 Excluding public sector banks

4 NCR = Net Cash Requirement

5 Funded public sector pensions only

6 Public Sector

7 Central Government

General Government NCR (series RUUI) =1+5

PSA7C Central Government Net Cash Requirement

£ million

Relationships between columns 1+3+4=5 ; 2+3+4=6 ; 6+7+8=5

1 NRAM = Northern Rock Asset Management, B&B = Bradford and Bingley.

2 NCR = Net Cash Requirement

3 Does not include Net Cash Requirement to Central Government

4 Negative NCR reflects change in financing as from 2014/15 new financing requirements of Network Rail were met through core central government borrowing and are therefore included in main CGNCR.

PSA7D Central Government Net Cash Requirement on own account (receipts and outlays on a cash basis)

Relationships between columns 1+6+7=8; 9+10+11=12; 12-8=13

1 Comprises payments into the Consolidated Fund and all payovers of NICs excluding those for Northern Ireland.

2 Income tax includes capital gains tax and is gross of any tax credits treated by HM Revenue and Customs (HMRC) as tax deductions.

3 UK receipts net of personal pension rebates; gross of Statutory Maternity Pay and Statutory Sick Pay.

4 Payments into Consolidated Fund.

5 Including some elements of expenditure not separately identified.

6 Mainly comprises privatisation proceeds.

7 Net of certain receipts, and excluding on-lending to local authorities and public corporations.

8 A much more detailed breakdown of tax receipts is available from HMRC at www.gov.uk/government/organisations/hm-revenue-customs

9 NCR = Net Cash Requirement. Without Northern Rock Asset Management & Bradford and Bingley.

10 Gross of tax credits. Includes diverted profit tax.

REC3 Reconciliation of Central Government Net Cash Requirement and Changes in Net Debt

Relationship between columns 14=1+2+3+4+5+6+7+8+9+10+11+12

1 Excluding Northern Rock Asset Management (NRAM), Bradford & Bingley (B&B) and Network Rail (NR) - although cash flows relating to NRAM and B&B are included from October 2014 and for NR from April 2015

2 All adjustments reflect differences between when, and at what value, liabilities and assets are scored in net debt and their related cash flows

3 Includes gilts that are transferred to central government (such as those previously held by the Royal Mail Pension Plan) as well as timing differences where cash flows and debt movements were recorded in adjacent months

4 Includes the impact of imputed finance leases as well as the reclassifications of London Continental Railway and the reorganisation of the Housing Revenue Account

Relationship between columns : 2+3=1, 2+3+4+5+6+7+8+9-10-11-12=13

1 Bank of England comprises Banking Department and Issue Department. Banking Department plus Issue Department assets and liabilities measured after consolidation of Issue Department deposit held at Banking Department.

2 Prior to September 2021, consists of total quantity of assets purchased by the APF by the creation of central bank reserves on a settled basis (YWWB9R9). From September 2021 this is calculated using APF purchase of gilts (YWWB9T9) plus APF purchase of corporate bonds (YWWZJ5J).

3 Prior to September 2021, consists of total quantity of assets purchased by APF by the creation of central bank reserves on a settled basis (YWWB9R9), less APF holdings of corporate bonds (YWWZJ5J). From September 2021 APF gilt purchases are sourced directly from Bank of England website (YWWB9T9).

4 Up to the 19th January 2019, Term Funding Scheme was within the Asset Purchase Facility. From 19th January 2019, TFS was transferred to the Bank of England balance sheet.

5 Term Funding Scheme (SME) is the TFS with additional incentives for small and medium-sized enterprises which started 15th April 2020 and appears on the Bank of England Balance sheet.

6 These series can be derived from the BoE Annual Report and Accounts covering both the Banking and Issue Department liabilities and assets.

7 Includes: insurance, pension, standardised guarantee schemes and other accounts receivable/payable.

8 Nominal and market values of APF transactions in gilts are recorded on Bank of England website. Gilts are recorded at face presentation is face (or redemption) value.

9 Consolidation of gilts issued by central government but held by Banking & Issue Department of BoE.

10 HM Treasury estimates based on management information. Estimates for February 2015 to February 2016 based on annual report data only.

1 ONS estimates of the interest received by APF from central government, largely on its gilt holdings.

2 ONS estimates of the interest paid by APF to Bank of England on the loan. Calculated using the Bank of England base rate. From August 2022 the base rate has been set at 1.75 percent.

3 Dividends paid to HM Treasury consolidate between the central government and Bank of England and so are public sector borrowing neutral.

Worksheet PSA10: Public sector transactions by sub-sector and economic category, UK, not seasonally adjusted

This worksheet contains one table.

Some cells in this table are black indicating that some transactions do not exist in all subsectors

Time period covered by this presentation April 2021 to March 2022

Transactions	Central government (£ million)	Local government (£ million)	General government (£ million)	Public corporations (£ million)	Public sector funded pension schemes (£ million)	Bank of England (£ million) [note 6]	Public sector excluding public sector banks (£ million)	Public sector banks (£ million) [note 129]	Public sector including public sector banks (£ million)
