

Statistical bulletin

Business investment in the UK: April to June 2016 revised results

Estimates of short-term indicators of investment in non-financial assets; business investment and asset and sector breakdowns of total gross fixed capital formation.

Release date: 30 September 2016

Next release: 25 November 2016

Notice

30 September 2016

Following a quality review it has been identified that the methodology used to estimate elements of purchased software within gross fixed capital formation (GFCF) has led to some double counting from 1997 onwards. When this issue is amended in The Blue Book 2017 it will reduce the level of GFCF across the period by around 1.1% per year. The average impact on quarter-on-quarter GFCF growth is negative 0.02% and the average impact on quarter-on-quarter GDP growth is 0.00%.

1. Main points

Gross fixed capital formation (GFCF), in volume terms, was estimated to have increased by 1.6% to £78.1 billion between Quarter 1 (Jan to Mar) 2016 and Quarter 2 (Apr to June) 2016.

Between Quarter 1 2016 and Quarter 2 2016, business investment, in volume terms, was estimated to have increased by 1.0%, from £43.4 billion to £43.8 billion; revised up 0.5 percentage points from the previously estimated 0.5% increase.

Between Quarter 2 2015 and Quarter 2 2016, GFCF was estimated to have increased by 1.0%, from £77.3 billion to £78.1 billion.

Business investment was estimated to have decreased by 0.8% between Quarter 2 2015 and Quarter 2 2016, from £44.2 billion to £43.8 billion. This is unrevised from the previous estimate.

In line with the National Accounts Revisions Policy, the earliest period being revised in this release is Quarter 1 2015.

2. Future changes

Introduction of theme days

From January 2017 we are improving the way we publish economic statistics, with related data grouped together under new "theme" days. This will increase the coherence of our data releases and involve minor changes to the timing of certain publications. For more information see Changes to publication schedule for economic statistics.

Changes to GFCF estimation system

We are currently redeveloping the GFCF estimation system in line with the 5-year strategy for the <u>UK National Accounts</u>, 2015 to 2020 published in July 2015 and recommendations from the Bean Review. As a result we will be introducing some methodological changes to the new GFCF system, including improved deflation and seasonal adjustment methodology. We will be publishing more information on the impact of these changes on the GFCF dataset prior to its introduction ahead of Blue Book 2017.

Purchased software

Following a quality review it has been identified that the methodology used to estimate elements of purchased software within gross fixed capital formation (GFCF) has led to some double counting from 1997 onwards. When this issue is amended in The Blue Book 2017 it will reduce the level of GFCF across the period by around 1.1% per year. The average impact on quarter-on-quarter GFCF growth is negative 0.02% and the average impact on quarter-on-quarter GDP growth is 0.00%.

3. About this release

The estimates in this release are short-term indicators of investment in non-financial assets in the UK, such as dwellings, transport equipment, machinery, buildings and intellectual property products. This release covers not only business investment, but asset and sector breakdowns of total gross fixed capital formation (GFCF), of which business investment is one component.

Business investment is net investment by private and public corporations. These include investments in:

- transport
- information and communication technology (ICT) equipment
- other machinery and equipment
- cultivated assets
- intellectual property products (IPP, which includes investment in software, research and development, artistic originals and mineral exploration)
- buildings and other structures

It does not include investment by central or local government, investment in dwellings, or the costs associated with the transfer of non-produced assets (such as land). A full sector and asset hierarchy can be found in the background notes. Business investment is not an internationally recognised concept and therefore it should not be used to make international comparisons.

All investment data referred to in this bulletin are estimates of seasonally adjusted chained volume measures.

4. Gross fixed capital formation and business investment

Figures 1 and 2 show that in Quarter 2 (Apr to June) 2016, gross fixed capital formation (GFCF) increased by £1.2 billion (1.6%) compared with Quarter 1 (Jan to Mar) 2016. This increase follows 2 consecutive decreases for GFCF of 1.3% in Quarter 4 (Oct to Dec) 2015 and 0.1% in Quarter 1 2016. GFCF in Quarter 2 2016 was £78.1 billion, 1.0% higher than Quarter 2 2015 (Figure 2).

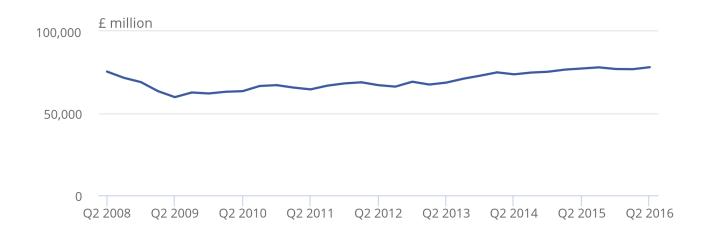

The GFCF increase in Quarter 2 2016 was mainly caused by general government investment, which increased by £0.9 billion compared with the previous quarter. The majority of growth in general government came from investment in other buildings and structures.

The general government increase has been partially offset by falls in private sector cost of ownership transfer on non-produced assets (£0.2 billion). As described in the Quarter 2 2016 Business investment provisional release, this fall in transfer costs follows an increase of 4.5% in Quarter 1 2016. The Bank of England's Summary of Business Conditions published in May 2016 suggested this increase could be a result of the bringing forward of buy-to-let purchases, ahead of the introduction of the rise in Stamp Duty on additional properties in April 2016.

Notes:

- 1. Q1 = Quarter 1 (Jan to Mar).
- 2. Q2 = Quarter 2 (Apr to June).
- 3. Q3 = Quarter 3 (July to Sept).
- 4. Q4 = Quarter 4 (Oct to Dec).
- 5. The data in this chart covers Quarter 2 (Apr to June) 2008 to Quarter 2 (Apr to June) 2016.

Business investment in Quarter 2 2016 was £43.8 billion (Figure 3), an increase of 1.0% (Figure 4) when compared with the previous quarter. This was mainly due to an increase in investment in transport equipment. Business investment is now 7.0% above the pre-economic downturn peak of Quarter 1 (Jan to Mar) 2008 (£40.9 billion). As illustrated in Figures 3 and 4, business investment in Quarter 2 2016 saw positive growth quarter-on-quarter following 2 consecutive periods of contraction, in Quarter 4 (Oct to Dec) 2015 and Quarter 1 2016.

- 4. Q4 = Quarter 4 (Oct to Dec).
- 5. The data in this chart covers Quarter 2 (Apr to June) 2008 to Quarter 2 (Apr to June) 2016.

5. Summary tables

Table 1 shows that in Quarter 2 (Apr to June) 2016, gross fixed capital formation (GFCF) increased by an estimated 1.6% to £78.1 billion when compared with Quarter 1 (Jan to Mar) 2016. The largest level increase was seen in general government which rose by £0.9 billion (7.6%) to £12.3 billion; its highest level since Quarter 1 2014. The second largest level increase was in business investment which rose by £0.4 billion (1.0%) followed by private sector dwellings which rose by £0.1 billion (0.8%). These were partially offset by a decrease of £0.2 billion (negative 4.2%) in private sector cost of ownership transfer on non-produced assets.

Between Quarter 2 2015 and Quarter 2 2016, the largest level increases were seen by general government (£0.6 billion), private sector costs of ownership transfer on non-produced assets (£0.4 billion) and private sector dwellings (£0.1 billion). These were partially offset by a decrease of £0.4 billion for business investment. The decrease in business investment of 0.8% was the second consecutive quarter on same quarter a year ago fall. The last time there were consecutive falls in business investment, quarter on same quarter a year ago, was when business investment fell for 6 quarters between Quarter 4 (Oct to Dec) 2008 and Quarter 1 2010.

Table 1: Total gross fixed capital formation in the UK by institutional sector, Quarter 2 (Apr to June) 2016

	% change	% change	£ million	£ million	£ million
	Most recent quarter on previous quarter	Most recent quarter on same quarter a year earlier	recent	Level change from previous quarter	Level change on same quarter a year earlier
Gross fixed capital formation	1.6	1.0	78,108	1,209	791
Business investment	1.0	-0.8	43,798	430	-363
General government	7.6	4.8	12,349	871	568
Public corporations dwellings	0.6	9.6	1,101	7	96

Private sector dwellings	0.8	0.8	15,746	125	132
Private sector cost of ownership transfer on non-produced assets	-4.2	7.6	5,282	-230	372

Source: Office for National Statistics

Notes:

1. ** Series may not sum to totals due to rounding.

Table 2 shows that in asset terms, the largest level increase, quarter-on-quarter, in Quarter 2 2016 was in transport equipment, which grew by £0.7 billion (14.9%) to £5.4 billion. The second largest increase was for information and communication technology (ICT) equipment and other machinery and equipment which increased by £0.3 billion (2.1%). The third largest increase was for dwellings which rose by £0.1 billion (0.8%).

Between Quarter 2 2015 and Quarter 2 2016, transport equipment saw the largest level increase, growing by £0.8 billion (17.3%). This is the highest level of investment in transport assets since the beginning of the series in Quarter 1 1997. Dwellings was the only other asset to increase quarter on same quarter a year ago, having grown by £0.2 billion (1.4%) to £16.9 billion in Quarter 2 2016. These increases were partially offset by decreases in other buildings and structures and transfer costs which decreased by £0.1 billion (0.6%).

Table 2: Total gross fixed capital formation in the UK by asset, Quarter 2 (Apr to June) 2016

	% change	% change	£ million	£ million	£ million
	Most recent quarter on previous quarter	Most recent quarter on same quarter a year earlier	Most recent level **	Level change from previous quarter	Level change on same quarter a year earlier

Notes:

6. Revisions to gross fixed capital formation (GFCF) and business investment

Data in this release have been revised from Quarter 1 (Jan to Mar) 2015 to Quarter 2 (Apr to June) 2016 in line with the National Accounts Revisions Policy.

The main causes of revisions in the data are:

- later responses to the Quarterly Acquisitions and Disposals of Capital Assets Survey (QCAS) for Quarter 1 2016 and Quarter 2 2016
- revised data for government estimates of investment (all quarters) which are expected at this point in the reporting cycle
- normal changes to the seasonally adjusted series following the addition of an extra data point

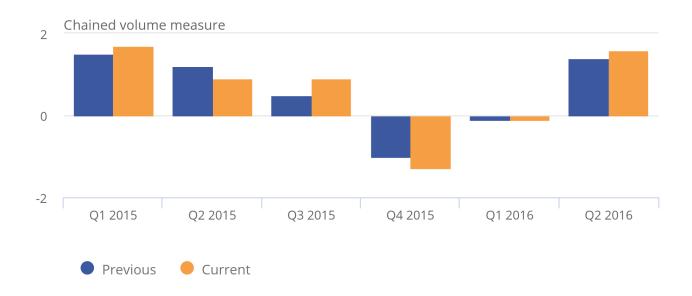

Figure 5 shows quarterly growth of GFCF at the provisional compared with the revised estimates.

^{1. **} Series may not sum to totals due to rounding.

Figure 5: Quarterly gross fixed capital formation growth of GFCF compared with previously published GFCF growth, chained volume measure, seasonally adjusted

Figure 5: Quarterly gross fixed capital formation growth of GFCF compared with previously published GFCF growth, chained volume measure, seasonally adjusted

Reference year: 2013 Coverage: UK

Source: Office for National Statistics

Notes:

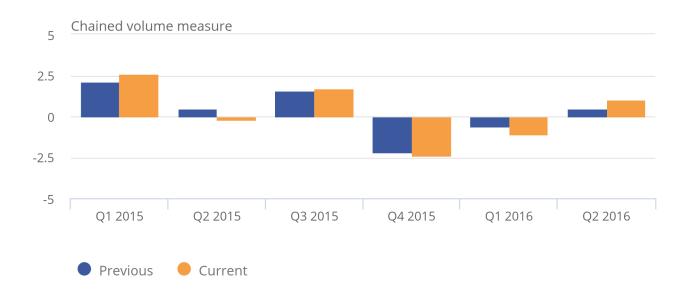

- 1. Q1 = Quarter 1 (Jan to Mar).
- 2. Q2 = Quarter 2 (Apr to June).
- 3. Q3 = Quarter 3 (July to Sept).
- 4. Q4 = Quarter 4 (Oct to Dec).
- 5. The data in this chart covers Quarter 1 (Jan to Mar) 2015 to Quarter 2 (Apr to June) 2016.

Figure 6 shows quarterly growth of business investment compared with the previously published estimate. Business investment for Quarter 1 2016 was revised down mainly due to later QCAS survey data. The lower level of business investment in Quarter 1 2016 is the main reason for the upwards revision to growth in Quarter 2 2016. The revisions in 2015 are mainly due to changes in the seasonal profile of the data.

Figure 6: Quarterly growth of business investment compared with previously published business investment growth, chained volume measure, seasonally adjusted

- 3. Q3 = Quarter 3 (July to Sept).
- 4. Q4 = Quarter 4 (Oct to Dec).
- 5. The data in this chart covers Quarter 1 (Jan to Mar) 2015 to Quarter 2 (Apr to June) 2016.

7. Economic background

Gross fixed capital formation (GFCF) grew by 1.0% in the year to Quarter 2 (Apr to June) 2016 following a 0.3% increase in Quarter 1 (Jan to Mar) 2016, marking 13 consecutive periods of quarter on same quarter a year ago growth. However, the rate of growth in GFCF has slowed consistently since 2014. Quarter on same quarter a year ago growth averaged 6.8% in 2014; falling to 3.4% in 2015 and 0.7% in 2016.

The increase in GFCF quarter on same quarter a year ago was mainly driven by investment by the general government sector, which contributed 0.7 percentage points to overall GFCF growth. In contrast, business investment made an offsetting negative contribution to GFCF growth over the same period (negative 0.5 percentage points). An important factor to consider when looking at business investment is the availability or supply of lending. In the most recent <u>Bank of England's Credit Conditions Review</u> the supply of lending to companies was reported to be unchanged in Quarter 2 2016. Over the same period, credit demand fell for large firms but increased for small and medium sized enterprises.

Developments in the housing market can also be important for investment and wider activity. Investment in residential dwellings (the new construction and repair of homes) grew by 0.8% in Quarter 2 2016 on a quarter-on-quarter basis and by 1.4% on the same quarter a year ago basis. This follows recent trends in the construction industry; for example, new build housing from the private sector increased by 8.4% on a same quarter a year ago basis (Construction output in Great Britain: July 2016 and New Orders Quarter 2 (Apr to June) 2016). Over the same period, house prices as measured by the Office for National Statistics also rose by 8.5%.

On an asset basis, the quarter on same quarter a year ago increase in GFCF was mainly driven by transport equipment, which contributed 1.0 percentage point to the growth, while other buildings and structures made the largest negative contribution to GFCF (negative 0.2 percentage points).

8. Where to find more of our data

We also publish <u>additional analyses</u> of GFCF, business investment and the Quarterly Acquisitions and Disposals of Capital Assets Survey, which have been created in response to user requests. For enquiries about user-requested data email <u>gcf@ons.gsi.gov.uk</u>.

9. Adjustments and response rates

Adjustments

Large capital expenditure tends to be reported later in the data collection period than smaller capital expenditure. This means that larger expenditures are often included in the revised (month 3) results, but are not reported in time for the provisional (month 2) results, leading to a tendency towards upwards revisions in the later estimates for business investment and gross fixed capital formation (GFCF). Following investigation of the impact of this effect, from Quarter 3 (July to Sept) 2013, in the revised estimate a bias adjustment was introduced to GFCF and its components.

A bias adjustment of £0.5 billion has been included in the revised (month 3) release for Quarter 2 (Apr to June) 2016. This has been revised down from £1.0 billion since the Quarter 2 2016 provisional estimate. This adjustment will be reassessed in line with previous revisions and will be updated when Quarter 2 2016 is next revised in the Quarter 3 (July to Sept) 2016 revised release.

To try and improve the quality of the response from our respondents, clearer instructions were added to the Quarterly Survey of Capital Expenditure. These updates are outlined in the provisional Quarter 1 2015 business investment release. Feedback from some respondents indicated that they had been misreporting their asset breakdown and were correcting this on the new questionnaire. We found that some respondents were reporting new construction work (NCW) as other capital equipment (OCE). From Quarter 1 2015, respondents to the survey are now reporting more in NCW at the expense of OCE. To remain consistent with the previous data, we have made some adjustments to the assets in the current price series in Quarter 1 2015, Quarter 2 2015, Quarter 3 2015, Quarter 4 (Oct to Dec) 2015, Quarter 1 2016 and Quarter 2 2016. These adjustments are shown in Table 3.

Table 3: Adjustments made to buildings and other machinery to account for improved survey information, UK, Quarter 1 (Jan to Mar) 2015 to Quarter 2 (Apr to June) 2016

Period	Adjustment to buildings (£ billion)	Adjustment to machinery (£ billion)
Q1 2015	-1.5	1.5
Q2 2015	-2.1	2.1
Q3 2015	-1.9	1.9
Q4 2015	-1.9	1.9

10. Quality and methodology

The <u>Business investment Quality and Methodology Information</u> document contains important information on:

- the strengths and limitations of the data
- the quality of the output, including the accuracy of the data and how it compares with related data
- uses and users
- · how the output was created

11. Background notes

1. Understanding the data

Short guide to business investment

Gross fixed capital formation (GFCF) is used in the compilation of the UK National Accounts' expenditure approach to the measurement of GDP in the <u>second estimate of gross domestic product (GDP)</u> at month 2 and the <u>Quarterly National Accounts (QNA)</u> at each calendar quarter. It is an estimate of net capital expenditure by both the public and private sectors. Examples of capital expenditure include spending on plant and machinery, transport equipment, software, new dwellings and other buildings, and major improvements to existing buildings and structures, such as roads. The additional assets, research and development and military weapons systems

were introduced in the <u>Quarter 2 (Apr to June) 2014 revised results release</u>, published November 2014, consistent with the European System of Accounts 2010 and with the UK Annual National Accounts (Blue Book) 2014.

Business investment estimates are a short-term indicator of net capital expenditure by businesses within the UK, at current prices and chained volume measures, both seasonally and not seasonally adjusted. Business investment is one component of GFCF. Business investment estimates exclude expenditure on dwellings and the costs associated with the transfer of ownership of non-produced assets, and capital expenditure by local and central government.

Interpreting the data

When making comparisons it is recommended that you focus on chained volume, seasonally adjusted estimates as these show underlying movements rather than seasonal movements, and have the effect of changes in prices removed.

Use of the data

Estimates from this release are used by the Office for National Statistics (ONS) in the c <u>ompilation of the UK National Accounts</u>, and by the Bank of England and Her Majesty's Treasury to monitor economic performance and to inform monetary and fiscal policy decisions. Business investment is also used by other government departments, such as the Department for Business, Energy and Industrial Strategy. In addition, these estimates are frequently used by the business, education and research communities, the media and the general public.

2. Definitions and explanations

Current price (CP): Current prices are the actual or estimated recorded monetary value over a defined period. They show the value for each item expressed in terms of the prices of that period.

Deflation and chained volume measure (CVM): Investment is measured across several time periods. The values measured will include both the change in the volume of investment and the effect of the change of prices over the period. Deflation is the process whereby the effect of price change is removed from a set of values.

Deflation can be done simply by dividing a current price estimate by a deflator, which measures the movement in prices. Doing this creates a constant price series. For deflators to accurately measure the movement in prices they need to accurately reflect changing investment habits. We do this by rebasing deflators.

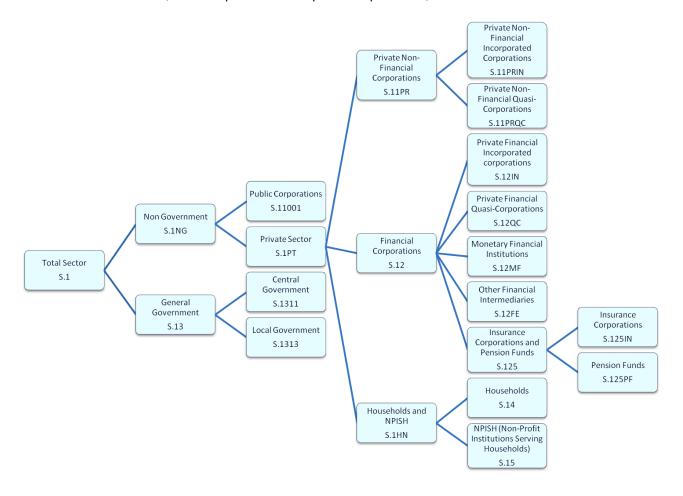

Rebasing deflators has a significant effect on a constant price series and would cause significant revisions to the investment data. To avoid this it has been the standard to not rebase deflators annually. This, however, means the deflators are not accurately measuring price changes.

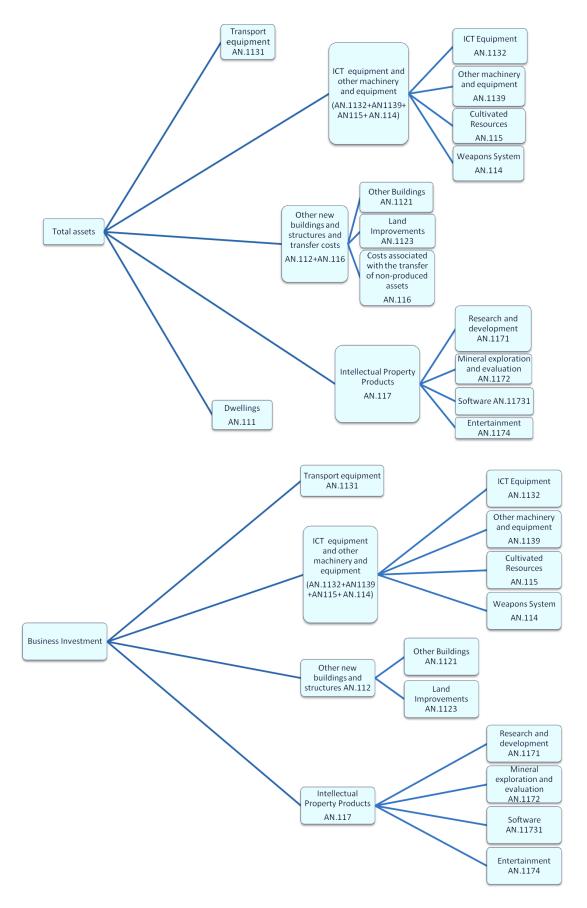

To resolve this we estimate volumes using chained volume measures, which are derived by linking together (compounding) movements in volumes; calculated using the prices of the previous financial year; and applying the movements to the current price estimates of the reference year. This allows us to remove both the effect of prices and rebasing.

Seasonally adjusted (SA): Seasonal adjustment aids interpretation by removing effects associated with the time of the year or the arrangement of the calendar, which could obscure movements of interest.

Asset and sector hierarchies: The diagrams show the institutional and sector hierarchies for GFCF, as set out by the European System of Accounts 2010. The asset hierarchy for business investment is also set out. Business investment is not an internationally defined concept, and the UK's estimates cannot be compared with those of other countries due to definitional differences.

A full list of sector codes, for example S.11001 = public corporations, is available in the datasets.

3. Changes to the Quarterly Survey of Capital Expenditure in Quarter 1 (Jan to Mar) 2015

In Quarter 1 (Jan to Mar) 2015, we moved to the Quarterly Acquisitions and Disposals of Capital Assets Survey (QCAS) from the Quarterly Survey of Capital Expenditure (CAPEX). This is outlined in the Business investment, Quarter 4 (Oct to Dec) 2014 revised results bulletin and in Changes to the Annual Business Survey, the Quarterly

<u>Survey of Capital Expenditure and the Survey into Business Spending on Capital Items, in 2015</u> (published 22 August 2014). The main reason was to move to the updated European System of Accounts (ESA) 2010 manual which provides international guidance for national accounts.

The main changes to the survey are:

- adding new questions to improve the quality of our estimates and to meet the latest European legislation requirements (ESA 2010)
- removing the lower limit of £500 for the value of reported assets, so all relevant assets (even those below businesses' Asset Register threshold) can be reported
- including small tools used in production in the definition of GFCF
- improving the questionnaire's layout (including new sections and headings), to make completing the questionnaire easier

The data from the new questions will not be included in estimates of GFCF and its components until 2017, when there will be 2 years of data available for quality assurance.

4. British Nuclear Fuels Ltd (BNFL)

In April 2005, nuclear reactors were transferred from British Nuclear Fuels Ltd (BNFL) to the Nuclear Decommissioning Authority (NDA). BNFL is classified as a public corporation in National Accounts and the NDA as a central government body. The capital formation estimates in this release reflect this transfer from the public corporations manufacturing category. The value of the transfer was negative £15.6 billion. The negative value reflects the fact that the reactors are at the end of their productive lives and have large decommissioning and clean-up liabilities. This shows up as a prominent trough in Quarter 2 (Apr to June) 2005 in the general government series and a complementary peak in Quarter 2 of the business investment series, which includes investment by public corporations (except dwellings and transfer costs). A more detailed explanation about the transfer can be found in the December 2006 Business investment release.

5. Other relevant sources of data

International business investment comparisons are not available on a like-for-like basis, as the compilation of European statistics on business investment differs from the data provided within this release. However, European estimates of business investment provided by Eurostat, the European statistical office, can be found on the Eurostat website.

Business investment in the UK accounts for over half of total gross fixed capital formation (GFCF).

The GSS Business Statistics – interactive user guide is an interactive tool to help you find what business and economic statistics are available, and choose the right data for your needs.

We publish the following statistical releases, which provide complementary information on UK business and economic performance:

- <u>Profitability of UK companies</u> quarterly data on capital employed by private non-financial corporations (PNFCs); contains annual, net and gross rates of return (expressed as percentages) on capital used by PNFCs
- Quarterly national accounts includes UK data on GFCF and changes in inventories
- <u>UK Economic Accounts</u> quarterly detailed estimates of national product, income and expenditure, UK Sector Accounts and UK Balance of Payments, including data on GFCF
- <u>UK National Accounts: the Blue Book</u> annual publication of the UK National Accounts, including data on GFCF
- Retail sales monthly estimate of UK retail sales
- <u>UK manufacturers' sales by product (PRODCOM)</u> annual output by manufacturers

- <u>Labour market statistics</u> monthly data on employment, unemployment, economic inactivity, claimant count, average earnings, labour productivity, vacancies and labour disputes
- Business demography annual statistics on UK business births, deaths and survival

6. Feedback

We welcome your feedback on the business investment release and data. Please contact gcf@ons.gsi.gov.uk. You can also engage in discussion about business investment, and, share information with other users or producers of financial and economic statistics by visiting the Financial and Economic Statistics User Group on the Royal Statistical Society's StatisUserNet discussion forum.

7. Accessing data

To see a time series of the data please use the time series datasets on our website.

8. Code of Practice for Official Statistics

National Statistics are produced to high professional standards set out in the Code of Practice for Official Statistics. They undergo regular quality assurance reviews to ensure that they meet customer needs. They are produced free from any political interference.

Gross fixed capital formation - by sector and asset

Following a quality review of the Intellectual Property Products (IPP) asset in Gross Fixed Capital Formation (GFCF), analysis has shown that elements in the estimates of purchased software have been double counted from 2001 and this double counting has also uncovered a discrepancy in the modelled data prior to 2001. Both these issues will be amended for Blue Book 17 and will have an impact on estimates of GFCF and consequently GDP and UK Economic Accounts. The affected CDIDs are listed in the table below:

Series code	Description of series	GFCF sector and asset tables impacted	Seasonality	Price basis	Type of series
EQDO	Intellectual property products	G1	Seasonally adjusted (SA)	Chained volume measure (CVM)	Level

¹ Not including expenditure on dwellings, land and existing buildings and costs of ownership transfer of non-produced assets

Please note that assets and sectors may not sum to their respective totals due to rounding. In addition, annual seasonally adjusted totals may not equal their non-seasonally adjusted equivalents. These differences are well within the range of the uncertainty on the estimates.

² Remaining investment by public corporations included within business investment

³ New dwellings and improvements to dwellings, excludes the value of land underlying

New Owenings and improvements to uwenings, excludes the Table 2 in the Mellings (AN.111) dother buildings and structures (AN.112) consist of buildings other than dwellings, other structures and land improvements. Also included are the costs of ownership transfer on non-produced assets (AN.116)
 Includes cultivated biological resources (AN.115) and weapons (AN.114)

⁶ The sector (S) and asset (AN) codes quoted are based on those published in the European system of accounts - ESA 2010 plus additional codes for non-ESA 2010 concepts. eg BUS INV = BUSINESS INVESTMENT

Q1 refers to Quarter 1 (January to March), Q2 refers to Quarter 2 (April to June), Q3 refers to Quarter 3 (July to September), Q4 refers to Quarter 4 (October to December)

Chained volume measure, seasonally adjusted, percentage change latest quarter on previous quarter

£ million (Reference Year 2013)

 $^{1\} Not\ including\ expenditure\ on\ dwellings,\ land\ and\ existing\ buildings\ and\ costs\ of\ ownership\ transfer\ of\ non-produced\ assets$

6 The sector (S) and asset (AN) codes quoted are based on those published in the European system of accounts - ESA 2010 plus additional codes for non-ESA 2010 concepts. eg BUS INV = BUSINESS INVESTMENT

Q1 refers to Quarter 1 (January to March), Q2 refers to Quarter 2 (April to June), Q3 refers to Quarter 3 (July to September), Q4 refers to Quarter 4 (October to December)

Please note that assets and sectors may not sum to their respective totals due to rounding. In addition, annual seasonally adjusted totals may not equal their non-seasonally adjusted equivalents. These differences are well within the range of the uncertainty on the estimates.

² Remaining investment by public corporations included within business investment

³ New dwellings and improvements to dwellings, excludes the value of land underlying dwellings (AN.111) $\,$

⁴ Other buildings and structures (AN.112) consist of buildings other than dwellings, other structures and land improvements. Also included are the costs of ownership transfer on non-produced assets (AN.116)

⁵ Includes cultivated biological resources (AN.115) and weapons (AN.114)

Chained volume measure, seasonally adjusted, percentage change latest quarter on corresponding quarter of previous year

¹ Not including expenditure on dwellings, land and existing buildings and costs of ownership transfer of non-produced assets

6 The sector (S) and asset (AN) codes quoted are based on those published in the European system of accounts - ESA 2010 plus additional codes for non-ESA 2010 concepts. eg BUS INV = BUSINESS INVESTMENT

Q1 refers to Quarter 1 (January to March), Q2 refers to Quarter 2 (April to June), Q3 refers to Quarter 3 (July to September), Q4 refers to Quarter 4 (October to December)

Please note that assets and sectors may not sum to their respective totals due to rounding. In addition, annual seasonally adjusted totals may not equal their non-seasonally adjusted equivalents. These differences are well within the range of the uncertainty on the estimates.

² Remaining investment by public corporations included within business investment 3 New dwellings and improvements to dwellings, excludes the value of land underlying

dwellings (AN.111)
4 Other buildings and structures (AN.112) consist of buildings other than dwellings, other

structures and land improvements. Also included are the costs of ownership transfer on non-produced assets (AN.116)

5 Includes cultivated biological resources (AN.115) and weapons (AN.114)

Chained volume measure, not seasonally adjusted, level

£ million (Reference Year 2013)

¹ Not including expenditure on dwellings, land and existing buildings and costs of ownership transfer of non-produced assets

6 The sector (S) and asset (AN) codes quoted are based on those published in the European system of accounts - ESA 2010 plus additional codes for non-ESA 2010 concepts. eg BUS INV = BUSINESS INVESTMENT

Q1 refers to Quarter 1 (January to March), Q2 refers to Quarter 2 (April to June), Q3 refers to Quarter 3 (July to September), Q4 refers to Quarter 4 (October to December)

Please note that assets and sectors may not sum to their respective totals due to rounding. In addition, annual seasonally adjusted totals may not equal their non-seasonally adjusted equivalents. These differences are well within the range of the uncertainty on the estimates.

² Remaining investment by public corporations included within business investment 3 New dwellings and improvements to dwellings, excludes the value of land underlying

dwellings (AN.111)
4 Other buildings and structures (AN.112) consist of buildings other than dwellings, other structures and land improvements. Also included are the costs of ownership transfer on non-produced assets (AN.116)
5 Includes cultivated biological resources (AN.115) and weapons (AN.114)

Chained volume measure, not seasonally adjusted, percentage change latest quarter on corresponding quarter of previous year

£ million (Reference Year 2013)

 $^{{\}bf 1}\ {\bf Not\ including\ expenditure\ on\ dwellings,\ land\ and\ existing\ buildings\ and\ costs\ of\ ownership}$ transfer of non-produced assets

² Remaining investment by public corporations included within business investment

³ New dwellings and improvements to dwellings, excludes the value of land underlying $\,$

⁴ Other buildings and structures (AN.112) consist of buildings other than dwellings, other structures and land improvements. Also included are the costs of ownership transfer on

non-produced assets (AN.116)
5 Includes cultivated biological resources (AN.115) and weapons (AN.114)

⁶ The sector (S) and asset (AN) codes quoted are based on those published in the European system of accounts - ESA 2010 plus additional codes for non-ESA 2010 concepts. eg BUS INV = BUSINESS INVESTMENT

Q1 refers to Quarter 1 (January to March), Q2 refers to Quarter 2 (April to June), Q3 refers to Quarter 3 (July to September), Q4 refers to Quarter 4 (October to December)

Please note that assets and sectors may not sum to their respective totals due to rounding. In addition, annual seasonally adjusted totals may not equal their non-seasonally adjusted equivalents. These differences are well within the range of the uncertainty on the estimates.

Gross Fixed Capital Formation by sector and type of asset Current price, seasonally adjusted, level

¹ Not including expenditure on dwellings, land and existing buildings and costs of ownership transfer of non-produced assets

Please note that assets and sectors may not sum to their respective totals due to rounding. In addition, annual seasonally adjusted totals may not equal their non-seasonally adjusted equivalents. These differences are well within the range of the uncertainty on the estimates.

² Remaining investment by public corporations included within business investment 3 New dwellings and improvements to dwellings, excludes the value of land underlying

dwellings (AN.111)
4 Other buildings and structures (AN.112) consist of buildings other than dwellings, other structures and land improvements. Also included are the costs of ownership transfer on non-produced assets (AN.116)
5 Includes cultivated biological resources (AN.115) and weapons (AN.114)

⁶ The sector (S) and asset (AN) codes quoted are based on those published in the European system of accounts - ESA 2010 plus additional codes for non-ESA 2010 concepts. eg BUS INV = BUSINESS INVESTMENT

Q1 refers to Quarter 1 (January to March), Q2 refers to Quarter 2 (April to June), Q3 refers to Quarter 3 (July to September), Q4 refers to Quarter 4 (October to December)

Current price, seasonally adjusted, percentage change latest quarter on corresponding quarter of previous year

¹ Not including expenditure on dwellings, land and existing buildings and costs of ownership

transfer of non-produced assets

² Remaining investment by public corporations included within business investment 3 New dwellings and improvements to dwellings, excludes the value of land underlying

dwellings (AN.111)
4 Other buildings and structures (AN.112) consist of buildings other than dwellings, other structures and land improvements. Also included are the costs of ownership transfer on non-produced assets (AN.116)
5 Includes cultivated biological resources (AN.115) and weapons (AN.114)

⁶ The sector (S) and asset (AN) codes quoted are based on those published in the European system of accounts - ESA 2010 plus additional codes for non-ESA 2010 concepts. eg BUS INV = BUSINESS INVESTMENT

Q1 refers to Quarter 1 (January to March), Q2 refers to Quarter 2 (April to June), Q3 refers to Quarter 3 (July to September), Q4 refers to Quarter 4 (October to December)

Current price, not seasonally adjusted, percentage change latest quarter on previous quarter

£ million

¹ Not including expenditure on dwellings, land and existing buildings and costs of ownership

transfer of non-produced assets
2 Remaining investment by public corporations included within business investment

³ New dwellings and improvements to dwellings, excludes the value of land underlying dwellings (AN.111)

⁴ Other buildings and structures (AN.112) consist of buildings other than dwellings, other structures and land improvements. Also included are the costs of ownership transfer on non-produced assets (AN.116)

⁵ Includes cultivated biological resources (AN.115) and weapons (AN.114)

⁶ The sector (S) and asset (AN) codes quoted are based on those published in the European system of accounts - ESA 2010 plus additional codes for non-ESA 2010 concepts. eg BUS INV = BUSINESS INVESTMENT

Q1 refers to Quarter 1 (January to March), Q2 refers to Quarter 2 (April to June), Q3 refers to Quarter 3 (July to September), Q4 refers to Quarter 4 (October to December)

Please note that assets and sectors may not sum to their respective totals due to rounding. In addition, annual seasonally adjusted totals may not equal their non-seasonally adjusted equivalents. These differences are well within the range of the uncertainty on the estimates.
