

UK Trade, November 2012

Coverage: UK

Date: 09 January 2013

Geographical Area: UK

Theme: Economy

November 2012

- Seasonally adjusted, the UK's deficit on trade in goods and services was estimated to have been £3.5 billion in November, compared with a deficit of £3.7 billion in October.
- There was a deficit of £9.2 billion on goods, partly offset by an estimated surplus of £5.7 billion on services.
- Excluding oil and erratic items, the deficit on trade in goods was £22.3 billion in the three months to November. This was £0.9 billion less than the preceding three months and £1.4 billion less than the deficit in the three months to November 2011.
- Export prices (excluding oil and erratics) fell by 0.9% in the latest three months; import prices fell by 0.7% in the same period.

Key Figures

Summary

The deficit on trade in goods continues to be partially offset by an estimated surplus on trade in services.

The figures for exports of goods have been variable during 2012. This was particularly marked between March and July and may reflect in part the changed pattern of public holidays for the Diamond Jubilee. Imports of goods have shown less variability. These movements have caused the deficit on trade in goods itself to vary from month to month this year, with no clear pattern. However, taking the first eleven months of 2012 together, the deficit has been running at an average of £8.9 billion a month. This is higher (in current prices) than the first eleven months of 2011 when the deficit averaged £8.4 billion.

Trade volumes have generally risen over the past year, while prices have declined. Excluding oil and erratics, the volumes of exports and imports of goods were 1.4% and 0.3% higher respectively in the three months to November 2012 than a year earlier. Export prices (excluding oil and erratics) fell by 3.3% over this period, while import prices fell by 2.7%.

There has, however, been a shift in the pattern of the UK's trade over this period. In volume terms (excluding oil and erratics) exports of goods to the European Union (EU) were 3.7% lower in the three months to November than a year earlier, while exports to the rest of the world rose 6.8%.

In comparison, import volumes (excluding oil and erratics) from the EU rose 1.8% in the three months to November compared with a year earlier, while imports from the rest of the world fell by 1.7%.

By commodity group, the prices of exports were lower for every group in the three months to November compared with a year earlier. With the exception of food, beverages and tobacco, which was unchanged, the price of imports were also lower for every group. In terms of movement in the three months to November compared with a year earlier, there was a fall of 7.5% in the price of exports of basic materials and also notable falls in the export and import of semi-manufactures commodities.

Value of UK Trade in Goods

In November, the UK's deficit on trade in goods was £9.2 billion; £0.3 billion lower than in October.

Total exports increased by £0.7 billion (2.9%) to £24.8 billion and total imports rose by £0.4 billion (1.1%) to £34.0 billion. At the commodity level:

Table 2: Change in Key Commodity Value, November 2012 Compared with October 2012

	Exports (£m)	Imports (£m)
Oil (see section on 'trade in oil')	+201	+277
Cars	-3	-40
Consumer goods other than cars	-29	-74

In the three months ending November 2012, the deficit on trade in goods was £27.1 billion, compared with a deficit of £27.0 billion in the three months ending August 2012.

Total exports decreased by £0.9 billion (1.2%) to £73.6 billion and total imports decreased by £0.8 billion (0.8%) to £100.7 billion. At the commodity level:

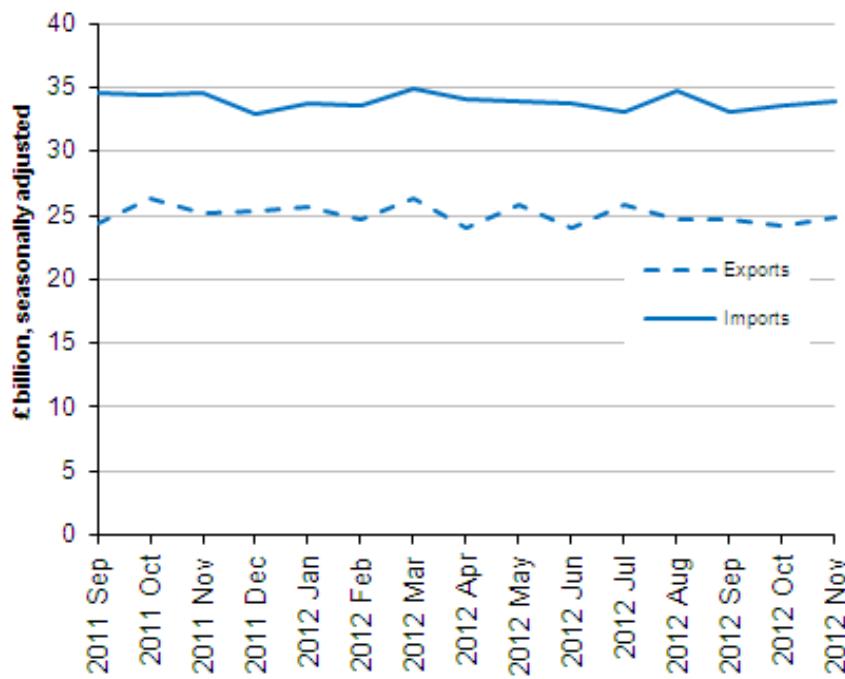

Table 3: Change in Key Commodity Value, September 2012 - November 2012 Compared with June 2012 - August 2012

Trade in Goods - EU Analysis

In November, the deficit on trade in goods with EU countries fell by £0.3 billion to £4.6 billion.

Exports to the EU rose by £1.1 billion (8.9%) to £13.2 billion and imports from the EU rose by £0.7 billion (4.3%) to £17.8 billion. At the commodity level:

Table 4: Change in Key Commodity Value (EU), November 2012 Compared with October 2012

Trade in Goods - Non-EU Analysis

In November, the deficit on trade in goods with non-EU countries increased by less than £0.1 billion to remain at £4.5 billion.

Exports to non-EU countries decreased by £0.4 billion (3.1%) to £11.6 billion and imports from non-EU countries decreased by £0.4 billion (2.1%) to £16.1 billion. At the commodity level:

Table 6: Change in Key Commodity Value (Non-EU), November 2012 Compared with October 2012

Trade in Goods - One Month Geographical Analysis

November 2012 Compared with October 2012

Within EU countries, exports to Germany increased by £0.6 billion and exports to the Netherlands and Sweden increased by £0.2 billion. Among non-EU countries, exports to Switzerland increased by £0.3 billion, whereas exports to South Korea and the USA decreased by £0.2 billion.

Within EU countries, imports from the Netherlands and Germany rose by £0.3 billion. Among non-EU countries, imports from Nigeria rose by £0.2 billion and imports from Japan rose by £0.1 billion. Imports from Israel and the USA fell by £0.3 billion and imports from Kuwait and Switzerland fell by £0.2 billion.

Table 8: Change in Monthly Trade with Significant Partner Countries, November 2012 Compared with October 2012

		Exports (£m)		Imports (£m)		1-Month Change	
		November 2012 Value	1-Month Change	November 2012 Value	1-Month Change		
1	Germany	3,151	+593	1	Germany	4,605	+289

Trade in goods – Three Month Geographical Analysis

Three Months Ending November 2012 Compared with Three Months Ending August 2012

Within EU countries, exports to Germany increased by £0.5 billion. Among non-EU countries, exports to South Korea fell by £0.4 billion.

Within EU countries, imports from the Netherlands rose by £0.8 billion and imports from Belgium & Luxembourg rose by £0.3 billion. Imports from Denmark and the Irish Republic fell by £0.3 billion.

Among non-EU countries, imports from Switzerland and Nigeria increased by £0.5 billion, imports from South Africa increased by £0.4 billion and imports from Israel increased by £0.3 billion. Imports from China fell by £0.7 billion and imports from Norway fell by £0.4 billion.

Table 9: Change in Three Monthly Trade with Significant Partner Countries, September 2012 - November 2012 Compared with June 2012 - August 2012

		Exports (£m)			Imports (£m)		
		November 2012 Value	3-Month Change		November 2012 Value	3-Month Change	
1	USA	10,026	+125	1	Germany	13,293	+72
2	Germany	8,215	+506	2	Netherlands	8,385	+754

Export and Import Prices for Trade in Goods (Not Seasonally Adjusted)

In November, export prices fell by 0.3% and import prices rose by 0.1%, compared with October. Excluding the oil price effect, export prices remained unchanged, but import prices rose by 0.3%.

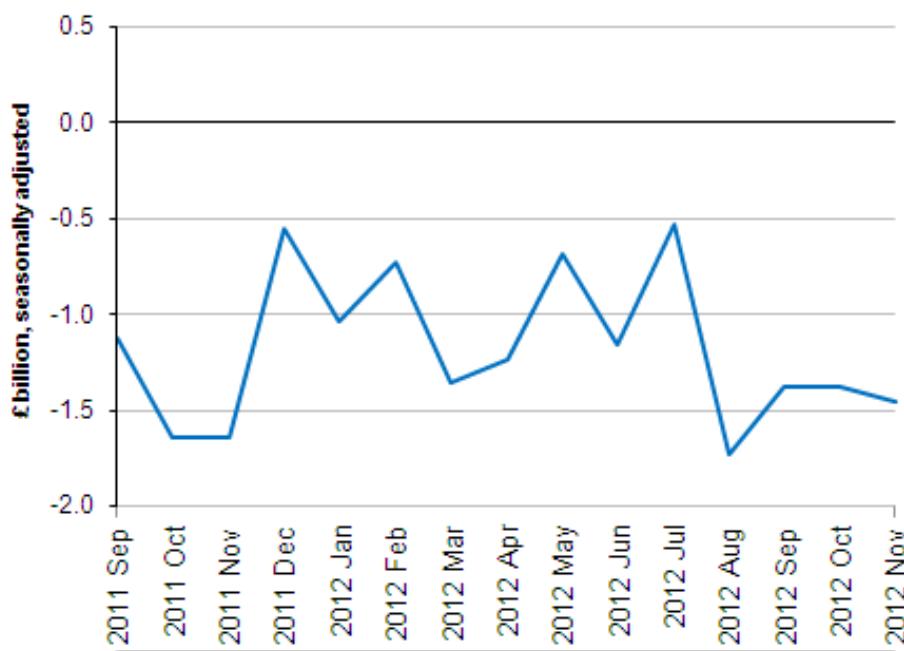

In the three months ending November 2012, export prices rose by 0.1% and import prices also rose by 0.1%. This led to no change in the terms of trade. Excluding the oil price effect, export prices fell by 0.9% and import prices fell by 0.8%.

Trade in Oil

In November, the balance on trade in oil was in deficit by £1.5 billion, compared with a deficit of £1.4 billion in October. Oil exports rose by £0.2 billion to £2.9 billion and oil imports rose by £0.3 billion to £4.4 billion.

In the three months ending November 2012, the balance on trade in oil was in deficit by £4.2 billion, compared with a deficit of £3.4 billion in the three months ending August 2012. Oil exports fell by £1.4 billion to £8.6 billion and oil imports fell by £0.6 billion to £12.8 billion.

Trade in Services

Note: Most components of Trade in Services are collected quarterly and the latest period for which reasonable quality estimates are available is the third quarter of 2012. In order to provide a more complete picture of trade, the latest available data has been extrapolated into November

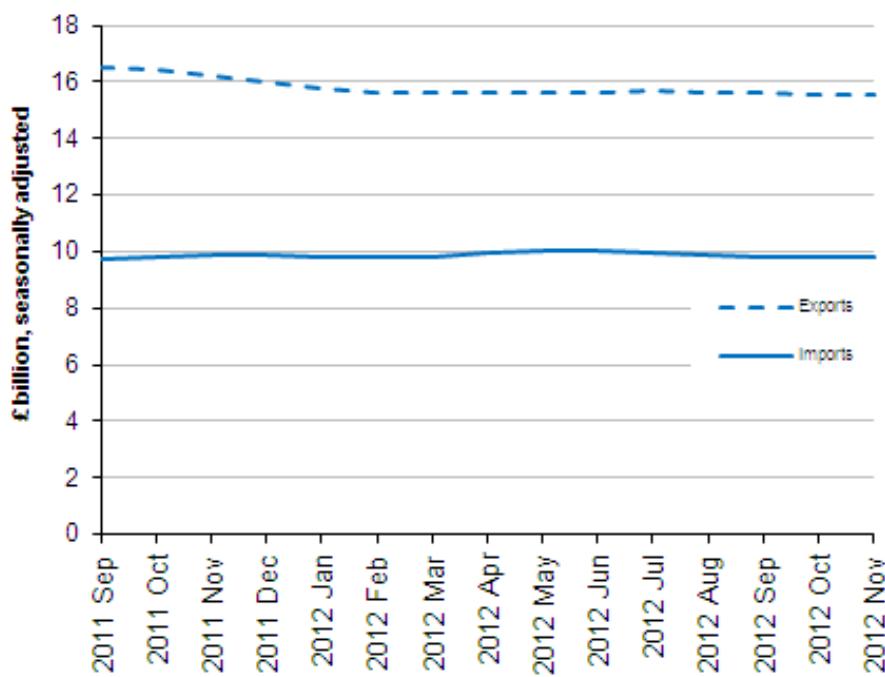

In November, the UK's estimated surplus on trade in services was £5.7 billion.

Exports in November 2012 were estimated to have been £15.5 billion and imports £9.8 billion.

In the three months ending November 2012, the estimated surplus on trade in services was £17.3 billion.

Total exports were £46.7 billion and total imports were £29.4 billion.

Records Sheet

The UK Trade record information for [November 2012 \(40.5 Kb Excel sheet\)](#) can be accessed at the ONS Website.

Background notes

1. What's New?

Revisions

This release conforms to the standard revisions policy for National Accounts. In this release, periods from January 2011 are open for revision.

MRETS Consultation

The Office for National Statistics (ONS) currently publishes a Statistical Bulletin each month giving the latest figures on overseas trade in goods and services and, around three working days later, the Monthly Review of External Trade Statistics (MRETS). A review has shown that MRETS now contains little that is not available with the Bulletin. The remaining gap will be closed in the next three months. The consultation ([consultation document](#)) is now complete. Users views are being collated and the results will be published in the near future.

2. Missing Trader Intra-Community (MTIC) Fraud

Users should also be aware that for some data prior to April 2012, the monthly data does not sum precisely to the quarters for the MTIC series due to rounding.

3. UK Trade designated as National Statistics

The United Kingdom Statistics Authority has designated these statistics as National Statistics, in accordance with the Statistics and Registration Service Act 2007 and signifying compliance with the [Code of Practice for Official Statistics](#).

Designation can be broadly interpreted to mean that the statistics:

- meet identified user needs;
- are well explained and readily accessible;
- are produced according to sound methods, and
- are managed impartially and objectively in the public interest.

Once statistics have been designated as National Statistics it is a statutory requirement that the Code of Practice shall continue to be observed.

4. Special Events

An article outlining the [ONS policy on special events](#) is available.

5. Code of Practice for Official Statistics

National Statistics are produced to high professional standards set out in the [Code of Practice for Official Statistics](#). They undergo regular quality assurance reviews to ensure that they meet customer needs. They are produced free from any political interference. © Crown copyright 2012.

6. Short Guide to UK Trade

Ever since statistics on exports and imports of goods were first collected in 1697 UK trade has been one of the country's key economic indicators.

All information included in the monthly UK Trade Statistical Bulletin is on a Balance of Payments (BoP) basis and is seasonally adjusted unless otherwise specified. The release contains tables showing the total value of trade in goods together with index numbers of volume and price, figures analysed by broad commodity group (values and indices) and according to geographical area (values only). In addition the Trade statistical bulletin also includes early monthly estimates of the value of trade in services.

Data appearing in the UK Trade statistical bulletin are also used as a direct input into the quarterly Balance of Payments and National Accounts.

Interpreting the data

Monthly commodity movements for Food, beverages and tobacco, Basic materials, Fuels other than oil, and Erratics (Ships, Aircraft, Precious stones, and Silver) are only detailed in this Statistical Bulletin where they are equal to or exceed £200 million (£400 million for three monthly comparisons).

Monthly country movements are only detailed in this Statistical Bulletin where they are equal to or exceed £0.1 billion (£0.3 billion for three monthly comparisons).

In months where quarterly and three monthly ending percentage changes for index data coincide there may be small differences between the data for methodological reasons. Quarterly data are the indexed form of an underlying constant price (for volume indices) or consistent quantity (for price indices) series. Three month ending data are the average of the index data in that period.

VAT Missing Trader Intra Community (MTIC) fraud

Import figures for trade in goods include adjustments to allow for the impact of VAT MTIC fraud.

The adjustments to trade in goods relate only to part of the carousel version of VAT MTIC fraud. This fraud leads to under recording of imports as fraudsters import goods from the EU, which they then sell on before disappearing without paying VAT on that sale. The goods are eventually exported. Such exports are declared and are therefore already reflected in the UK's trade in goods statistics.

Changes to the pattern of trading associated with MTIC fraud can make it difficult to analyse trade by commodity group and by country as changes in the impact of activity associated with this fraud affect both imports and exports. However, the MTIC trade adjustments are added to the EU import estimates derived from Intrastat returns as it is this part of the trading chain that is not generally recorded. In particular, adjustments affect trade in capital goods and intermediate goods - these categories include mobile phones and computer components, which are still the most widely affected goods.

International convention determines that the treatment of the impact is to adjust imports upwards by the relevant amounts of missing declarations (non-response). However, users may wish to interpret short term movements in imports excluding that part of the fraudulent activity that is not included in the import estimates, and for this purpose an analysis of the import figures with the VAT MTIC adjustments excluded is shown in Table 13.

Definitions and explanations

A glossary of terms is published in the [UK Balance of Payments Pink Book 2012](#).

Use of the data

UK Trade is a key economic indicator due to the importance of international trade to the UK economy. It is also a very timely statistic, providing an early indicator of what is happening more generally in the economy.

In addition, it is a major component of two other key economic statistics – UK Gross Domestic Product (GDP) and the UK Balance of Payments. This means that there is a threefold potential for UK Trade statistics to inform the Government's view of the UK economy, as well as the views of others, such as economists, City analysts, academics, the media, and international organisations.

Notes on tables

Rounding:

The sum of constituent items in tables do not always agree exactly with the totals shown due to rounding.

Symbols:

- .. Not applicable
- Nil or less than half the final digit shown.

7. Methods

Composition of the data

Detailed methodological notes are published in the [UK Balance of Payments \(Pink Book\)](#).

Seasonal adjustment

Seasonal adjustment aims to remove effects associated with the time of the year or the arrangement of the calendar so that movements within a time series may be more easily interpreted.

Deflation

It is common for the value of a group of financial transactions to be measured in several time periods. The values measured will include both the change in the volume sold and the effect of the change of prices over that year. Deflation is the process whereby the effect of price change is removed from a set of values.

Chain-linked indices (chained volume measures) which are indexed to form the volume series in this bulletin differ from fixed base indices in that the growth from one year to the next is estimated by weighting the components using the contribution to value of trade in the immediately preceding year (effectively re-basing every year). This series of annually re-weighted annual growths is then 'chain-linked' to produce a continuous series.

The implied price deflators derived by comparing current price data to chained volume measures data are not the same as the price indices published in this statistical bulletin because the former are current weighted while the latter are base (2009) weighted.

Changes in trade associated with VAT MTIC fraud mean that comparisons of volume and prices (both including and excluding trade associated with VAT MTIC fraud) should be treated with a great deal of caution.

A [paper \(384.4 Kb Pdf\)](#), Statistics on Trade in Goods (GSS Methodological Series No. 36) describing the adjustments that need to be applied to conform to IMF definitions for Balance of Payments and the division of responsibility between ONS and HMRC is available on the ONS website.

The [Overseas Trade Statistics \(OTS\)](#) data used as inputs to this statistical bulletin are collected and published by Her Majesty's Revenue and Customs (HMRC) on an International Merchandise Trade Statistics (IMTS) basis.

8. Quality

Basic quality information

Accuracy: Trade in goods figures for the most recent months are provisional and subject to revision in the light of (a) late trader data, revisions to trade prices and revised estimates of trading associated with VAT MTIC fraud, and (b) revisions to seasonal adjustment factors which are re-estimated every month.

Trade in services estimates have been derived from a number of monthly and quarterly sources. For components where no monthly data are available, estimates have been derived on the basis of recent trends. The results should be used with appropriate caution, as they are therefore likely to be less reliable than those for trade in goods. More details of the data sources, estimation methodology and reliability of the monthly estimates of trade in services were set out in Economic Trends (January 1996 and September 1997).

Reliability: Revisions to data provide one indication of the reliability of key indicators. The table below shows summary information on the size and direction of the revisions which have been

made to the data covering a five year period. A statistical test has been applied to the average revision to find out if it is statistically significantly different from zero. An asterisk (*) shows that the test is significant. An [article](#) explaining the past revisions performance for UK Trade statistics and what is being done to improve the first published estimates was published on 9 May 2005 on the ONS website.

Table 12: Revisions Analysis, UK Trade, November 2012

£million	Revisions between first publication and estimates twelve months later		
	Value in latest period	Average over the last 5 years (mean revision)	Average over the last 5 years without regard to sign (average absolute revision)
Total trade exports (IKBH)	40322	756	1011
Total trade imports (IKBI)	43788	266	642
Total trade balance (IKBJ)	-3466	489	618

(30 Kb)

The table covers estimates of UK trade first published from January 2007 (for November 2007) to December 2011 (for October 2011). [Revisions spreadsheets](#) giving these estimates and the calculations behind the averages in the table is available on the ONS website.

An [article \(2.33 Mb Pdf\)](#) analysing past revisions to quarterly balance of payments current account data was published in the May 2007 edition of Economic & Labour Market Review. It is available on the ONS website.

More [information about revisions](#) material in this Statistical Bulletin can be found on the ONS website.

9. Coherence

EU enlargement and country coverage: Two more countries joined the EU from 1 January 2007. These countries were Bulgaria and Romania. In addition, the coverage of the Economic and Monetary Union (EMU) countries was extended to include Slovenia. In order to enable users

to make long-run comparisons, data for the new definition EU and non-EU was produced from January 1998 onwards for value, and from January 1999 onwards for volume and price indices. At the same time data for the old definitions were no longer maintained. There are additional series for country groupings on the old definitions.

The coverage of EMU countries was extended to cover Cyprus and Malta from July 2008, Slovakia from January 2009, and Estonia from January 2011. Some EU and non-EU breakdowns of commodity data for Chained Volume Measures which are available from the Statbase® service may be less reliable than the current price data. Please consult Stephen Curtis on 01633 456626 if you are considering using them.

Data have been combined for the United States and Puerto Rico, and for Dubai, Abu Dhabi, and Sharjah (the United Arab Emirates) from January 2009 onwards. Estimates are separately available for the United States and Dubai up until the end of 2008 on request.

10. Summary quality report

A [Summary Quality Report \(91.3 Kb Pdf\)](#) for this Statistical Bulletin and associated data can be found on the ONS website.

11. National Accounts revisions policy

[National Accounts revision policy \(32.9 Kb Pdf\)](#) can be found on the ONS website.

12. Revisions

Revisions Table 14R shows revisions to the main aggregates since the last Trade Statistical Bulletin of 6 December 2012. The revisions to trade in goods from October 2012 reflect revised data from Her Majesty's Revenue and Customs and other data suppliers, revised estimates of trading associated with VAT MTIC fraud, later survey data on trade prices and a re-assessment of seasonal factors.

13. Publication policy

Details of the policy governing the release of new data are available from the [Media Relations Office](#). Also available is a list of the organisations given [pre-publication access \(24.5 Kb Pdf\)](#) to the contents of this bulletin.

14. Accessing data

Supplementary commodity data for this Statistical Bulletin ([Monthly Review of External Trade Statistics \(1.9 Mb Pdf\)](#)); and quarterly data analysed by industry according to the Classification of Product by Activity 08 ([UK Trade in Goods Analysed in Terms of Industries \(397.6 Kb Pdf\)](#)) are also available free of charge as PDF files.

The complete run of data in the tables of this Statistical Bulletin are also available to view and download in other electronic formats free of charge using the [ONS Time Series Data](#) website

service. Users can download the complete Statistical Bulletin in a choice of zipped formats, or view and download their own selections of individual series.

15. Follow ONS on [Twitter](#) and receive up to date information about our statistical releases.
16. Like ONS on [Facebook](#) to receive our updates in your newsfeed and to post comments on our page.
17. Watch our videos at [YouTube](#).

1 These are provisional estimates subject to fluctuations when new or amended data become available.

2 Growth rates are derived from monthly, quarterly and annual indices measures. Due to rounding of these indices to one decimal place, discrepancies occur for 3 month on 3 month comparisons, relative to quarterly growth rates for the corresponding periods.

3 These are defined as ships, aircraft, precious stones and silver.

[†] Earliest date for revisions to trade in goods is October 2012.

1 Trade in petroleum and petroleum products. These figures differ from those published by the Department of Energy and Climate Change which are compiled from different sources and are on a time of shipment basis.

2 The average value per tonne may reflect not only changes in price but also changes in the commodity mix.

[†] Earliest date for revisions to trade in goods is October 2012.

1 These are provisional estimates subject to fluctuations when new or amended data become available.

2 The weights shown are in proportion to the total value of trade in 2009 and are used to combine the volume indices to calculate the totals for 2010 onwards. For 2009 and earlier, totals are calculated using the equivalent weights for the previous year (eg totals for 2009 use 2008 weights).

3 These are defined as precious stones and silver in semi-manufactures, and as ships and aircraft in finished manufactures.

† Earliest date for revisions to trade in goods is October 2012.

Same 3 months last year								-4.0	-5.2	-2.8	-2.2	-3.1

1 These are provisional estimates subject to fluctuations when new or amended data become available.

2 The weights shown are in proportion to the total value of trade in 2009 and are used to combine the volume indices to calculate the totals for 2010 onwards. For 2009 and earlier, totals are calculated using the equivalent weights for the previous year (eg totals for 2009 use 2008 weights).

3 These are defined as precious stones and silver in semi-manufactures, and as ships and aircraft in finished manufactures.

† Earliest date for revisions to trade in goods is October 2012.
