

Statistical bulletin

Construction output in Great Britain: December 2024, new orders and Construction Output Price Indices, October to December 2024

Short-term measures of output by the construction industry in December 2024, contracts awarded for new construction work in Great Britain and a summary of the Construction Output Price Indices (OPIs) in the UK for Quarter 4 (Oct to Dec) 2024.

1 . Main points

- Construction output is estimated to have increased by 0.5% in Quarter 4 (Oct to Dec) 2024 compared with Quarter 3 (July to Sept) 2024; this came solely from an increase in new work (1.2%), as repair and maintenance fell by 0.4%.
- Monthly construction output is estimated to have fallen by 0.2% in volume terms in December 2024; this came solely from a fall in repair and maintenance (1.8%) as new work grew by 1.1%.
- At the sector level, five out of the nine sectors fell in December 2024; the main contributors to the monthly decrease were non-housing repair and maintenance, and private housing repair and maintenance, which fell by 1.8% and 1.4%, respectively.
- Total construction new orders fell by 2.4% (£231 million) in Quarter 4 2024 compared with Quarter 3 2024; this quarterly decrease came solely from infrastructure new work and private industrial new work, which fell by 23.5% (£496 million) and 19.7% (£197 million), respectively.
- Annual construction output increased by 0.4% in 2024 compared with 2023; this is the fourth consecutive year of annual growth.
- The annual rate of construction output price growth was 3.0% in the 12 months to December 2024.

2 . Construction output in December 2024

Quarterly construction output is estimated to have grown by 0.5% in Quarter 4 (Oct to Dec) 2024. This was driven by growth in November 2024, up by 0.6% (revised from 0.4%), and followed no growth (0.0%) in October 2024 (revised from a fall of 0.3%).

Monthly construction output is estimated to have fallen by 0.2% in volume terms in December 2024.

Source: Construction output and employment data from the Office for National Statistics

Anecdotal evidence received from returns for our [Monthly Business Survey for Construction and Allied Trades \(MBS\)](#) suggested a negative effect of seasonal weather decreasing output. The Met Office confirmed in their [Monthly climate summary \(PDF, 5.9MB\)](#) that December 2024 saw unsettled weather, with Storm Darragh bringing heavy rain and gales.

Detailed growth rates

Table 1: Construction output main figures, Great Britain, December 2024
Seasonally adjusted, chained volume measure, £ million and percentage change

Type of work	Value £ million	Most recent month on the previous month	Most recent month on year	Most recent three- months on three- months	Most recent three- months on year
Total all work	17,744	-0.2	1.5	0.5	0.9
Total all new work	9,971	1.1	1.9	1.2	-0.7
Total repair and maintenance	7,773	-1.8	1.0	-0.4	2.9
New housing					
Public	436	-3.5	-19.9	-7.8	-14.9
Private	3,241	2.3	6.2	1.3	3.9
Other new work

Quarter-on-quarter construction output growth in Quarter 4 2024

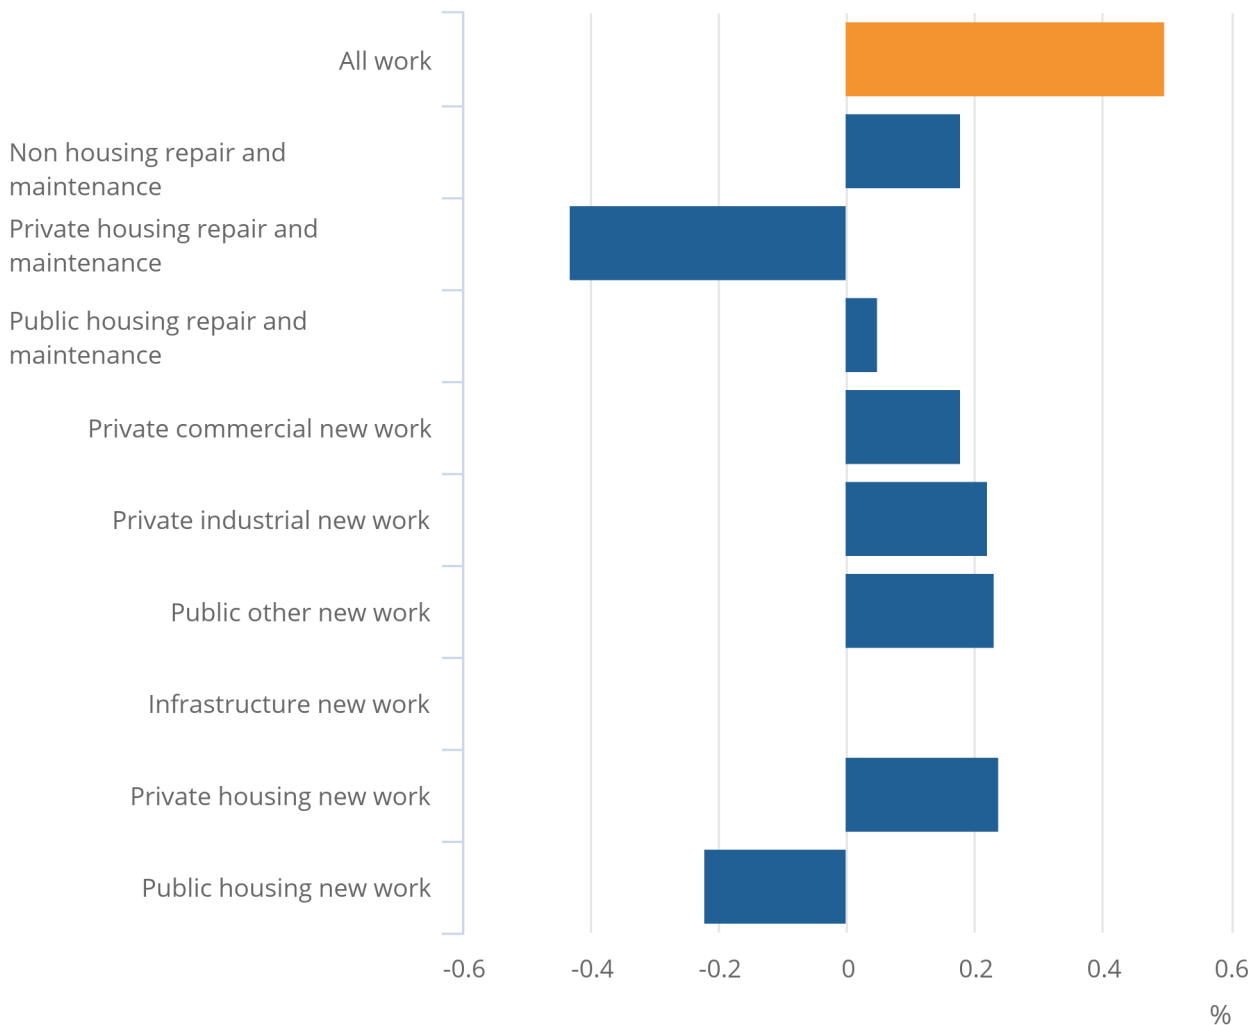

Construction output grew by 0.5% (£241 million) in Quarter 4 2024. The quarterly growth came solely from an increase in new work (1.2%), as repair and maintenance fell by 0.4%.

Figure 2: All work saw a rise in Quarter 4 2024 (0.5%)

Contributions to quarterly growth (Quarter 4 (Oct to Dec) 2024 compared with Quarter 3 (July to Sept) 2024) chained volume measure, seasonally adjusted, Great Britain, percentage points

Figure 2: All work saw a rise in Quarter 4 2024 (0.5%)

Contributions to quarterly growth (Quarter 4 (Oct to Dec) 2024 compared with Quarter 3 (July to Sept) 2024) chained volume measure, seasonally adjusted, Great Britain, percentage points

Source: Construction output and employment data from the Office for National Statistics

Notes:

1. Please note that sector estimates may not sum because of rounding.

Of the nine sectors, six saw increases in Quarter 4 2024, with the largest contributors being private new housing and public other new work. These sectors grew by 1.3% (£127 million) and 4.3% (£121 million), respectively.

Figure 3: The quarterly data series saw three periods of consecutive growth

Quarter-on-quarter contributions to all work growth, chained volume measure, seasonally adjusted, Great Britain, Quarter 1 (Jan to Mar) 2021 to Quarter 4 (Oct to Dec) 2024

Figure 3: The quarterly data series saw three periods of consecutive growth

Quarter-on-quarter contributions to all work growth, chained volume measure, seasonally adjusted, Great Britain, Quarter 1 (Jan to Mar) 2021 to Quarter 4 (Oct to Dec) 2024

Notes:

1. Please note that sector estimates may not sum because of rounding.

Month-on-month construction output growth in December 2024

The 0.2% fall in construction output in December 2024 represents a decrease of £40 million in monetary terms compared with November 2024, with five out of the nine sectors seeing falls on the month. The volume in December 2024 was £17,744 million.

Figure 4: All work saw a fall on the month in December 2024 (0.2%) with five out of the nine sectors showing decreases

Contributions to monthly growth (December 2024 compared with November 2024), chained volume measure, seasonally adjusted, Great Britain, percentage points

Figure 4: All work saw a fall on the month in December 2024 (0.2%) with five out of the nine sectors showing decreases

Contributions to monthly growth (December 2024 compared with November 2024), chained volume measure, seasonally adjusted, Great Britain, percentage points

Source: Construction output and employment data from the Office for National Statistics

Notes:

1. Please note that sector estimates may not sum because of rounding.

Non-housing repair and maintenance, and private housing repair and maintenance were the largest negative contributors to the monthly decrease in December 2024, decreasing by 1.8% (£74 million) and 1.4% (£41 million), respectively.

Year-on-year change in construction output in 2024

Total annual construction output increased by 0.4% in 2024 compared with 2023. This is the fourth consecutive year of annual growth.

The annual increase in 2024 was solely because of a rise in repair and maintenance, which rose by 8.5%, as new work decreased by 5.3%.

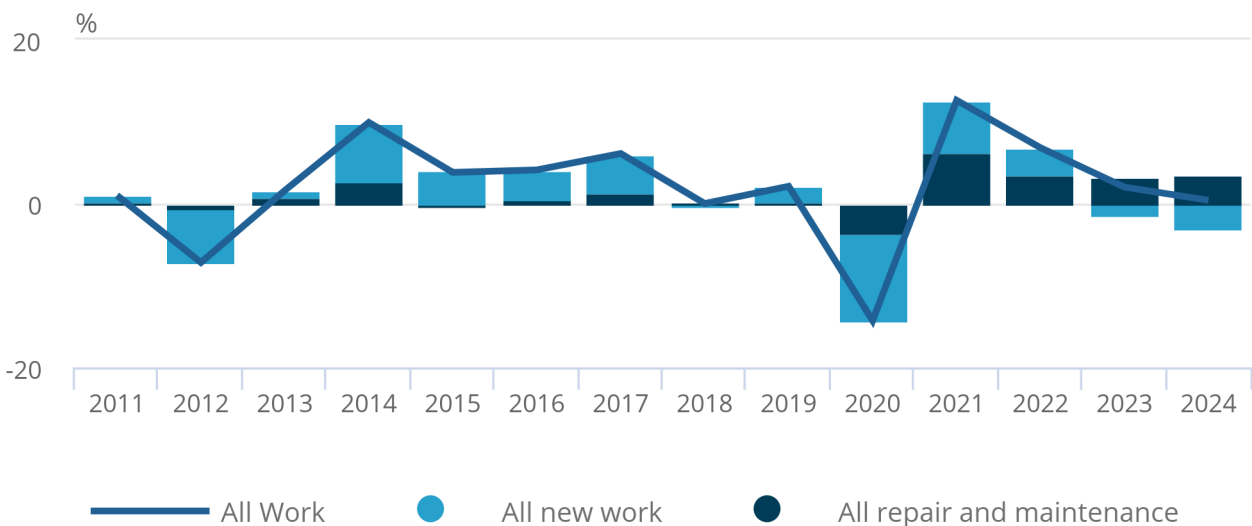

At the sector level, four of the nine sectors saw an increase in annual growth in 2024. Non-housing repair and maintenance, and private housing repair and maintenance were the largest positive contributors, growing by 8.5% and 7.0%, respectively. The main negative contributor to annual growth was infrastructure new work, which fell by 9.3%.

Figure 5: Annual growth saw an increase in 2024, coming solely from an increase in repair and maintenance (8.5%), as new work fell by 5.3%

Year-on-year contributions to all work growth, chained volume measure, seasonally adjusted, Great Britain, 2011 to 2024

Source: Construction output and employment data from the Office for National Statistics

3 . New orders in the construction industry in Quarter 4 2024

In Quarter 4 (Oct to Dec) 2024, total construction new orders decreased by 2.4% (£231 million) compared with Quarter 3 (July to Sept) 2024. This follows a decrease of 23.7% in Quarter 3 2024 compared with Quarter 2 (Apr to June) 2024.

Quarter 4 2024 showed the lowest level of total construction new orders (£9,268 million) since Quarter 2 2020 (£6,024 million). More information can be found in our [New orders in the construction industry dataset](#).

Other new orders (that is, non-housing) was the sole contributor to the decrease in Quarter 4 2024, falling by 9.1% (£671 million). This came from infrastructure new orders, which fell by 23.5% (£496 million) and was driven by decreases in electricity, harbours and railways. The other contributor to the fall in other new work was private industrial new orders, which decreased by 19.7% (£197 million).

Housing new orders saw an increase of 21.2% (£442 million). This came predominantly from private new housing, which increased by 24.0% (£438 million). Public new housing also increased by 1.6% (£4 million).

Figure 6: Total new orders saw a decrease (2.4%) in Quarter 4 2024 compared with Quarter 3 2024

Dataset | Released 13 February 2025

Customise My Data (CMD) is our new way of providing filterable, explorable data suitable to individual user needs.

6 . Glossary

Construction output estimates

Construction output estimates are monthly estimates of the amount of output chargeable to customers for building and civil engineering work done in the relevant period, excluding Value Added Tax (VAT) and payments to subcontractors.

Seasonally adjusted estimates

Seasonally adjusted estimates are derived by estimating and removing calendar effects (for example, leap years such as 2020) and seasonal effects (for example, decreased activity at Christmas because of site shutdowns) from the non-seasonally adjusted estimates.

Value estimates

The value estimates reflect the total value of work that businesses have completed over a reference month.

Volume estimates

The volume estimates are calculated by taking the value estimates and adjusting to remove the impact of price changes.

7 . Data sources and quality

Quality and methodology

More quality and methodology information (QMI) is available in:

- our [Construction output QMI](#)
- our [Construction output price indices \(OPIs\) QMI](#)
- our [New orders in construction QMI](#)

Reasons for revisions to construction output in this release

This release contains revisions to construction output estimates from January 2024 onwards, and is consistent with the [National Accounts Revisions Policy](#). Revisions in this release are a result of:

- revisions in the nominal data; this includes revisions to the survey data
- revisions to seasonal adjustment factors, which are re-estimated every month and reviewed annually
- revisions to the input series for the Construction Output Price Indices (OPIs)

For further information on the revisions profile, see our [Output in the construction industry revisions triangle \(one-month growth\) dataset](#) and our [Output in the construction industry revisions triangle \(three-month growth\) dataset](#).

Subnational and subsector construction output

Data on new orders supplied by Barbour ABI are used to model the breakdown of the overall output figures for Great Britain into the lower level and regional data. This is shown in Tables 1 and 2 of our [Output in the construction industry: subnational and subsector dataset](#). More detail is available in our [Quality assurance of administrative data used in construction statistics methodology](#).

Bias adjustment

Typically, since the move to monthly gross domestic product (GDP) estimates, an adjustment to address any bias in survey responses for construction output is applied to the early construction output monthly estimates. We show this in our [Improvements to construction statistics: Addressing the bias in early estimates of construction output, June 2018 article](#).

Response rates for December 2024 showed improvement compared with levels in recent years since the coronavirus (COVID-19) pandemic. The survey turnover response rate for December 2024 was 73.9%. This follows a response rate of 76.0% in November and 66.3% in October. We have continued not to apply a bias adjustment since May 2020 while we review this approach. More information on our response rates is available in our [Output in the construction industry dataset](#).

Differences with monthly GDP construction estimates

In Blue Book 2021, we introduced a new framework to improve how we produce volume estimates of GDP for balanced years as part of the supply use process. This was explained in our [Producing an alternative approach to GDP using experimental double deflation estimates article](#). This framework included the implementation of double-deflated industry-level gross value added (GVA) for the first time. This improvement was reflected in the [GDP quarterly national accounts, UK: April to June 2021 bulletin and dataset](#) and [GDP monthly estimate, UK: August 2021 bulletin](#) for the first time.

As a result, volume estimates in the monthly GDP and construction outputs releases will differ for the period 1997 to 2020. This is because the construction publication measures the volume of construction work (output), while the GDP series measures GVA (that is, output minus intermediate consumption). Construction estimates will align, but on a growth basis from January 2021 onwards.

Information and indicative effects of this change to industry-level GVA volume can be found in our [Impact of double deflation on industry chain volume measure annual estimates article](#) and our [Impact of Blue Book 2021 changes on quarterly volume estimates of gross domestic product by industry article](#).

Accredited official statistics

These accredited official statistics were independently reviewed by the [Office for Statistics Regulation](#) in March 2019. They comply with the standards of trustworthiness, quality and value in the [Code of Practice for Statistics](#) and should be labelled "accredited official statistics".

Users of these data should note that there may be instances where the period on period growths for the same component differ between tables. This is due to the growth rates being calculated at a higher precision than 1 dp within the production system. This accuracy is truncated when transferred into the published tables.

1A.M CONSTRUCTION OUTPUT: VOLUME SEASONALLY ADJUSTED INDEX NUMBERS BY SECTOR

Index 2022 = 100

Users of these data should note that there may be instances where the period on period growths for the same component differ between tables. This is due to the growth rates being calculated at a higher precision than 1 dp within the production system. This accuracy is truncated when transferred into the published tables.

Users of these data should note that there may be instances where the period on period growths for the same component differ between tables. This is due to the growth rates being calculated at a higher precision than 1 dp within the production system. This accuracy is truncated when transferred into the published tables.

CONSTRUCTION OUTPUT: VOLUME NON-SEASONALLY ADJUSTED INDEX NUMBERS BY SECTOR

Index 2022 = 100

Users of these data should note that there may be instances where the period on period growths for the same component differ between tables. This is due to the growth rates being calculated at a higher precision than 1 dp within the production system. This accuracy is truncated when transferred into the published tables.

Users of these data should note that there may be instances where the period on period growths for the same component differ between tables. This is due to the growth rates being calculated at a higher precision than 1 dp within the production system. This accuracy is truncated when transferred into the published tables.

Users of these data should note that there may be instances where the period on period growths for the same component differ between tables. This is due to the growth rates being calculated at a higher precision than 1 dp within the production system. This accuracy is truncated when transferred into the published tables.

2B.Q CONSTRUCTION OUTPUT: VOLUME NON-SEASONALLY ADJUSTED BY SECTOR

£ million

Users of these data should note that there may be instances where the period on period growths for the same component differ between tables. This is due to the growth rates being calculated at a higher precision than 1 dp within the production system. This accuracy is truncated when transferred into the published tables.

Users of these data should note that there may be instances where the period on period growths for the same component differ between tables. This is due to the growth rates being calculated at a higher precision than 1 dp within the production system. This accuracy is truncated when transferred into the published tables.

4A.Q CONSTRUCTION OUTPUT: VALUE SEASONALLY ADJUSTED

CURRENT PRICES BY SECTOR

£ million

Users of these data should note that there may be instances where the period on period growths for the same component differ between tables. This is due to the growth rates being calculated at a higher precision than 1 dp within the production system. This accuracy is truncated when transferred into the published

Users of these data should note that there may be instances where the period on period growths for the same component differ between tables. This is due to the growth rates being calculated at a higher precision than 1 dp within the production system. This accuracy is truncated when transferred into the published tables.

4Q CONSTRUCTION OUTPUT: VALUE NON-SEASONALLY ADJUSTED CURRENT PRICES BY SECTOR

£ million

Users of these data should note that there may be instances where the period on period growths for the same component differ between tables. This is due to the growth rates being calculated at a higher precision than 1 dp within the production system. This accuracy is truncated when transferred into the published tables.

Users of these data should note that there may be instances where the period on period growths for the same component differ between tables. This is due to the growth rates being calculated at a higher precision than 1 dp within the production system. This accuracy is truncated when transferred into the published tables.

3MOYSA CONSTRUCTION OUTPUT: VOLUME SEASONALLY ADJUSTED PERCENTAGE CHANGE 3 MONTHS ON SAME PERIOD A YEAR EARLIER

Users of these data should note that there may be instances where the period on period growths for the same component differ between tables. This is due to the growth rates being calculated at a higher precision than 1 dp within the production system. This accuracy is truncated when transferred into the published tables.
