Release date:
12 August 2020

Next release:
11 September 2020

Table of contents

1 . Main points

- Total services output decreased by 19.9% for Quarter 2 (Apr to June) 2020, compared with Quarter 1 (Jan to Mar) 2020, the largest fall since records began in January 1997; this was led by accommodation and food service activities, which fell by a record 86.7%, contributing negative 2.8 percentage points.

- There was a rise of 7.7% in the Index of Services between May 2020 and June 2020; of the 50 services industries, 47 grew between May and June 2020, though most remain substantially below their February 2020 level.

- The largest contribution to monthly growth was wholesale and retail trade and repair of motor vehicles and motorcycles, rising by 27.0%; of the 7.7% growth in services, 1.7 percentage points came from wholesale and retail trade and repair of motor vehicles and motorcycles.

- Services output between the three months to June 2019 and the three months to June 2020 decreased by 21.2%, the largest contraction in three months compared with the same three months of the previous year since records began in January 1997.

- The coronavirus (COVID-19) pandemic had a significant negative impact on output of the services industries during June 2020; for further and detailed analysis of the effect on our monthly Index of Services estimate, please see our article Coronavirus and the impact on output in the UK economy, UK: June 2020 , published today (12 August 2020).

2 . Index of Services data

Index of Services time series
Dataset | Dataset ID: IOS1 | Released 12 August 2020
Monthly movements in output for the services industries: distribution, hotels and restaurants; transport, storage and communication; business services and finance; and government and other services.

Monthly Business Survey turnover of services industries
Dataset | Released 12 August 2020
Monthly Business Survey services industries' total turnover; current price and non-seasonally adjusted, UK.

Index of Services, main components and sectors to four decimal places
Dataset | Released 12 August 2020
Monthly historical movements in output for services and their industry components, by chained volume indices of gross value added, UK.

Index of Services revisions triangles
Dataset | Released 12 August 2020
Monthly chained volume indices in gross value added for services and its main components.

All data related to the Index of Services are available on the Related data page.

3 . Measuring the data

Data sources and collection

The Index of Services (IoS) is compiled using data from several different sources:

- ONS: Monthly Business Survey (43.3%)

- ONS: Retail Sales Inquiry (6.6%)

- ONS: Government Expenditure (20.7%)

- ONS: Households' Expenditure (15.5%)

- ONS: Finance Expenditure (9.1%)

- Other (4.8%)

The Monthly Business Survey (MBS) data are published alongside this release in MBS turnover in services industries.

Data relating to the retail industry are broadly comparable with Retail sales, Great Britain: June 2020, published on 24 July 2020.

For further information on what is included within Other, please see the GDP(o) data sources catalogue.

Percentage of each data source is based on their gross value added weight. The GDP(o) methods and sources pages provide more information on the data that underpin these statistics; of particular note is the GDP(o) data sources catalogue.

From February 2018, Value Added Tax (VAT) data have also been included across 64 production industries for small- and medium-sized businesses. For more information, see VAT turnover data in national accounts: background and methodology.

Quality and methodology

More quality and methodology information on strengths, limitations, appropriate uses, and how the data were created is available in the Index of Services QMI.

Leaving the EU

As the UK leaves the EU, it is important that our statistics continue to be of high quality and are internationally comparable. During the transition period, those UK statistics that align with EU practice and rules will continue to do so in the same way as before 31 January 2020.

After the transition period, we will continue to produce our national accounts statistics in line with the UK Statistics Authority's Code of Practice for Statistics and in accordance with internationally agreed statistical guidance and standards.

The Withdrawal Agreement outlines a need for UK gross national income (a fundamental component of the national accounts, which includes gross domestic product (GDP)) statistics to remain in line with those of other EU countries until the EU budgets are finalised for the years in which we were a member. To ensure comparability during this cycle, the national accounts will continue to be produced according to European System of Accounts (ESA) 2010 definitions and standards.

Coronavirus (COVID-19)

We are aware of the upcoming challenges relating to the pandemic. However, the Monthly Business Survey is fully online, meaning that business owners can log on from any location and submit their data at an appropriate time. Most other data in the Index of Services come from within the Office for National Statistics (ONS) and therefore will be less impacted than survey data.

Our latest data and analysis on the impact of the coronavirus (COVID-19) on the UK economy and population is now available on a new webpage. This will be the hub for all special virus-related publications, drawing on all available data.

The ONS has released a public statement on the coronavirus (COVID-19) and the production of statistics. Specific queries must be directed to the Media Relations Office.

4 . Related links

Coronavirus and the impact on output in the UK economy, UK: June 2020
Article | Released 12 August 2020
Analysis of monthly growth for the production, services and construction industries in the UK economy between May and June 2020, highlighting the early impact from the coronavirus (COVID-19) pandemic.

A comparison between official estimates of UK output and diffusion indices
Article | Released 21 October 2019
The level of correlation between Office for National Statistics (ONS) data and IHS Markit and Chartered Institute of Procurement and Supply Purchasing Managers' Indices.

GDP monthly estimate, UK: June 2020
Bulletin | Released 12 August 2020
Gross domestic product (GDP) measures the value of goods and services produced in the UK. It estimates the size of and growth in the economy and includes the Index of Production (IoP), Index of Services (IoS) and construction output in Great Britain.

Services sector performance, UK: 2008 to 2018
Article | Released 2 April 2019
The article details the changes that have taken place in the UK services sector from 2008 to 2018. It also looks at the differences between public sector-dominated sectors and the rest of the Index of Services (IoS) and compares the growth of individual IoS sectors in more detail.

Index of Production, UK: June 2020
Bulletin | Released 12 August 2020
Movements in the volume of production for the UK production industries: manufacturing, mining and quarrying, energy supply, and water and waste management.
