

Statistical bulletin

GDP monthly estimate, UK: April 2019

Gross domestic product (GDP) measures the value of goods and services produced in the UK. It estimates the size of and growth in the economy.

1 . UK gross domestic product (GDP) grew by 0.3% in the three months to April 2019

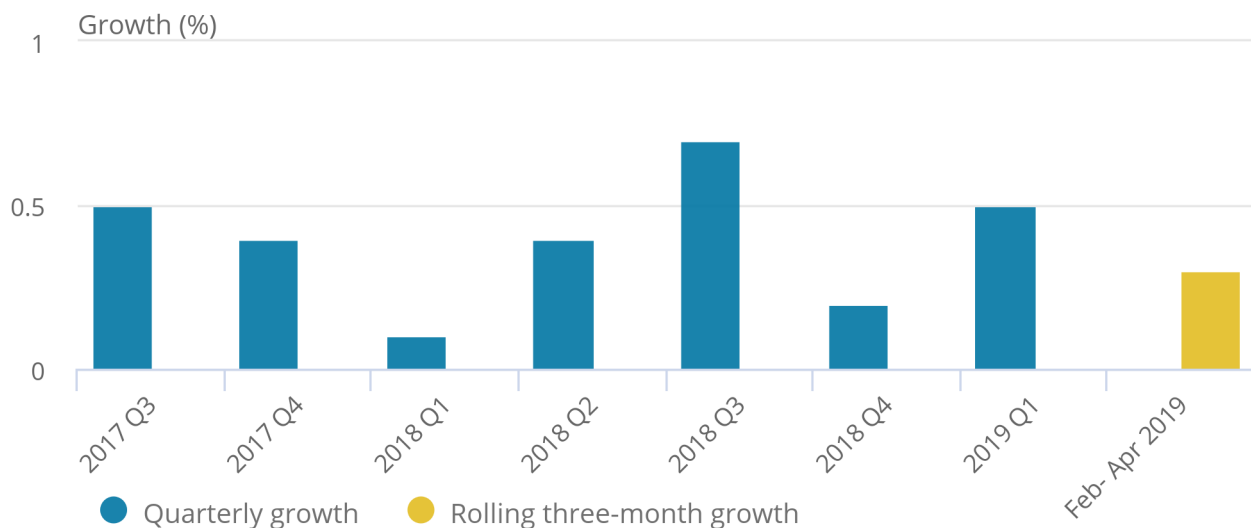

Please take the time to complete our [survey on the new GDP publication model](#), which was introduced in July 2018.

Figure 1: Rolling three-month growth slowed to 0.3% in April 2019 after increasing by 0.5% in Quarter 1 (January to March) 2019

UK GDP growth, Quarter 3 2017 until February to April 2019

Figure 1: Rolling three-month growth slowed to 0.3% in April 2019 after increasing by 0.5% in Quarter 1 (January to March) 2019

UK GDP growth, Quarter 3 2017 until February to April 2019

Source: Office for National Statistics – GDP monthly estimate

Notes:

1. Q1 refers to Quarter 1 (Jan to Mar), Q2 refers to Quarter 2 (Apr to June), Q3 refers to Quarter 3 (July to Sept), Q4 refers to Quarter 4 (Oct to Dec).
2. Rolling three-month estimates are calculated by comparing GDP in a three-month period with GDP in the previous three-month period. For example, GDP in February to April compared with the previous November to January.

Commenting on today's GDP figures, Head of GDP Rob Kent-Smith said:

“GDP growth showed some weakening across the latest 3 months, with the economy shrinking in the month of April mainly due to a dramatic fall in car production, with uncertainty ahead of the UK’s original EU departure date leading to planned shutdowns.

“There was also widespread weakness across manufacturing in April, as the boost from the early completion of orders ahead of the UK’s original EU departure date has faded.”

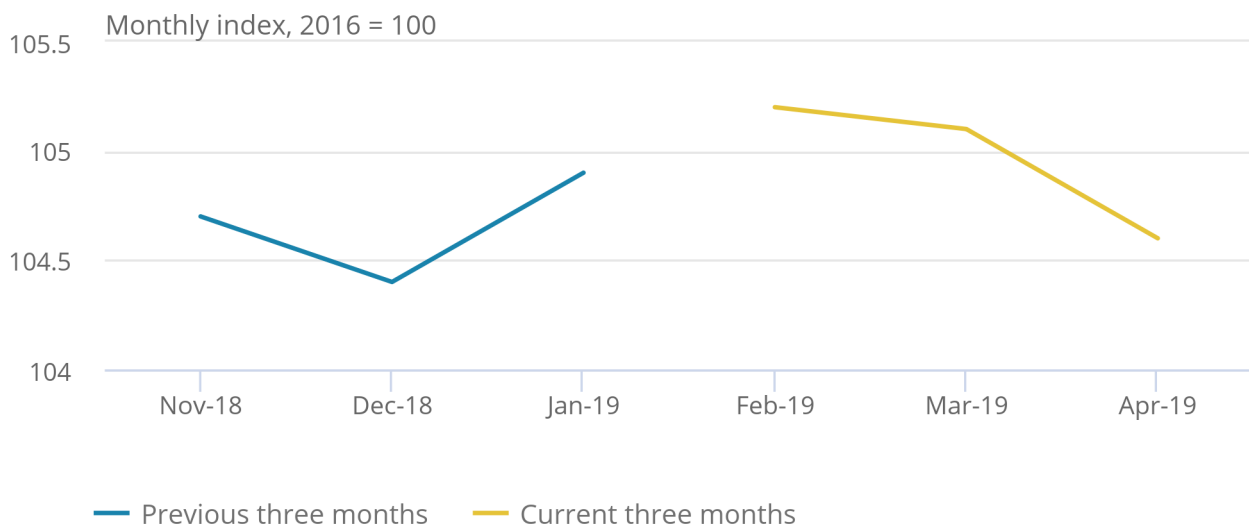

More information on the fall in car manufacturing can be found in [Section 5](#).

Figure 2: Despite two consecutive negative monthly growths in March and April 2019, rolling three-month growth increased

Monthly index, November 2018 to April 2019, 2016 = 100

Figure 2: Despite two consecutive negative monthly growths in March and April 2019, rolling three-month growth increased

Monthly index, November 2018 to April 2019, 2016 = 100

Source: Office for National Statistics – GDP monthly estimate

The rolling three-month growth of 0.3% in April 2019 may appear inconsistent with the month-on-month growths of negative 0.1% in March and negative 0.4% in April. However, the monthly indices in Figure 2 show that high growth into February 2019 raised output significantly above the level of output seen in the months November 2018 to January 2019. Despite the declines in March and April, the average output of the current three months is still above that of the previous three months.

2 . All main sectors contributed positively to GDP growth in the three months to April 2019

Table 1: The services sector was the largest contributor to GDP growth, while manufacturing was the second-largest

	Contribution to growth
Index of Services	0.16pp
Index of Production	0.09pp
Index of Production, of which manufacturing	0.11pp
Construction	0.02pp

Source: Office for National Statistics – GDP monthly estimate

The services sector had a positive contribution to rolling three-month growth in April 2019, increasing by 0.2%. The production sector increased by 0.7%, within which manufacturing grew by 1.2%, making it the second-largest contributor to rolling three-month growth. Construction also had a positive contribution, growing by 0.4% in the three months to April 2019.

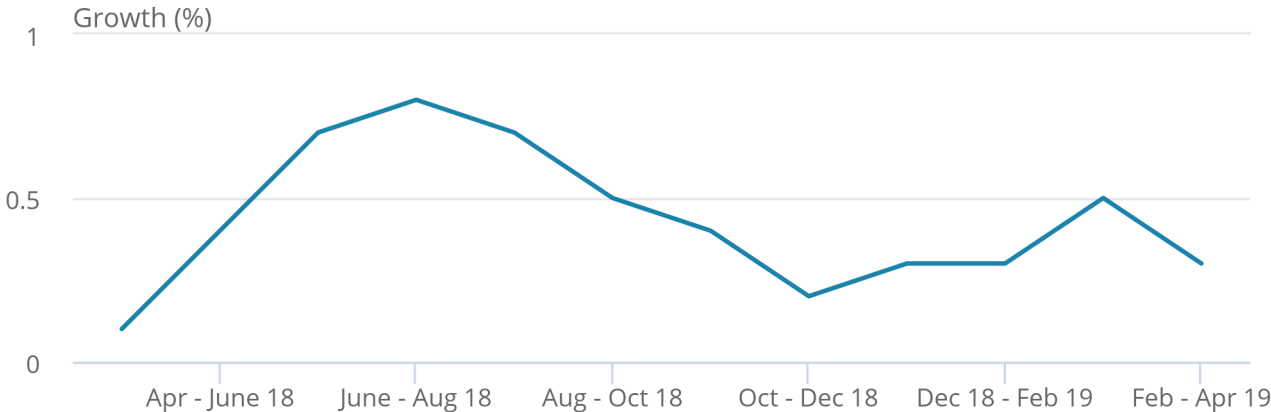

3 . Rolling three-month growth was 0.3% in the three months to April 2019

Figure 3: Rolling three-month growth returned to a moderate rate in April 2019

Growth, three-months on previous three-months, UK, March to May 2018 until February to April 2019

Figure 3: Rolling three-month growth returned to a moderate rate in April 2019

Growth, three-months on previous three-months, UK, March to May 2018 until February to April 2019

Source: Office for National Statistics – GDP monthly estimate

Notes:

- 1. Rolling three-month estimates are calculated by comparing GDP in a three-month period with GDP in the previous three-month period. For example, GDP in February to April compared with the previous November to January.

Rolling three-month growth was 0.3% in April 2019, down from 0.5% in March, but on par with growth rates at the start of 2019.

Rolling three-month growth is based on output gross value added (GVA) and so there will be discrepancies in the time series with our quarterly estimates of GDP, which include information on the expenditure and income approaches to measuring GDP.

4 . GDP contracted by 0.4% in April 2019

Table 2: Breakdown of GDP growth rates by month

	February 2019	March 2019	April 2019
GDP	0.2%	-0.1%	-0.4%
Index of Services	0.2%	-0.1%	0.0%
Index of Production	0.6%	0.7%	-2.7%
Manufacturing	1.0%	0.9%	-3.9%
Construction	0.5%	-1.9%	-0.4%
Agriculture	-0.6%	-0.1%	0.0%

Source: Office for National Statistics – GDP monthly estimate

Monthly GDP growth was negative 0.4% in April 2019, as the production sector and manufacturing sub-sector contracted.

The monthly growth rate for GDP is volatile and so it should be used with caution and alongside other measures, such as the three-month growth rate, when looking for an indicator of the longer-term trend of the economy. However, it is useful in highlighting one-off changes that can be masked by three-month growth rates.

5 . The production sector increased by 0.7% in the three months to April 2019

Rolling three-month growth in the production sector was 0.7% in April 2019, while manufacturing increased by 1.2%. Within manufacturing, the two largest positive contributors to growth were manufacture of food products and pharmaceutical products. Monthly growth in production was negative 2.7% in April, driven by manufacturing, which contracted by 3.9%.

As seen in Figure 4, the most notable movement in April was the decline in manufacture of transport equipment. Output in this industry has been weak since October 2018 and contracted by 13.4% in April 2019. This pulled manufacturing and overall production output down, although the indices for these series were only slightly below the levels seen throughout the past 12 months.

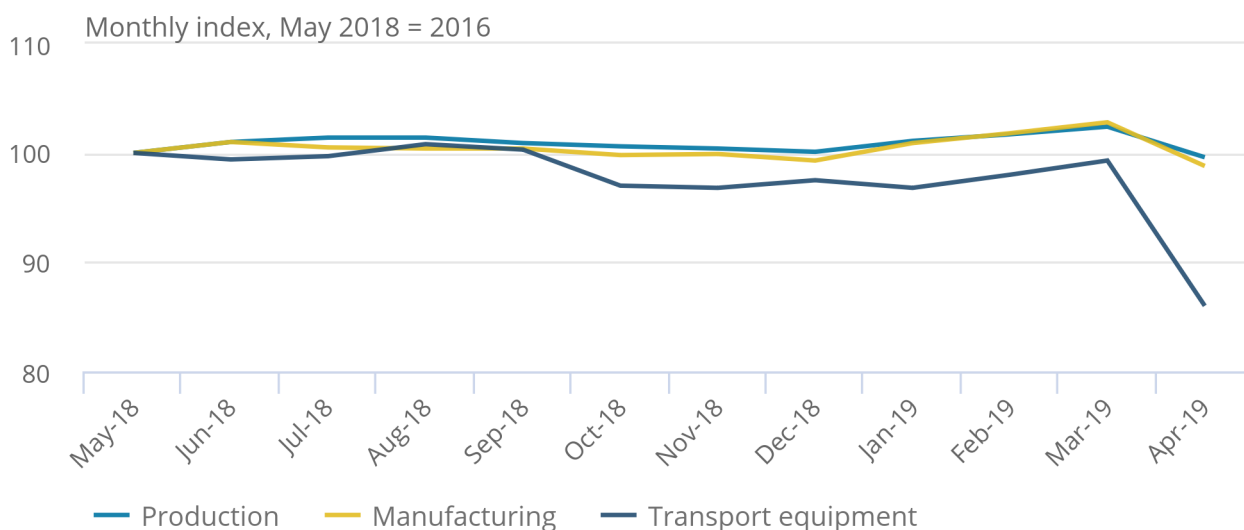

The decline in transport equipment was due largely to a fall of 24.0% in car manufacturing, as firms planned shutdowns around the originally-intended departure date from the European Union. These data are consistent with that reported by the [Society of Motor Manufacturers and Traders](#) (SMMT), which found that car manufacturing was 44.5% lower in April 2019 than in April 2018. Manufacture of chemicals, pharmaceutical products and basic metals were also notably negative in April.

Figure 4: Output in manufacture of transport equipment fell dramatically in April 2019

Monthly index, May 2018 to April 2019, May 2018 = 100

Figure 4: Output in manufacture of transport equipment fell dramatically in April 2019

Monthly index, May 2018 to April 2019, May 2018 = 100

Source: Office for National Statistics – GDP monthly estimate

Strong growth in manufacturing in February and March 2019 was consistent with an increase in activity ahead of the UK’s originally-intended departure date from the European Union. The weaker picture in April 2019 was in line with a fall back from early completion of orders in the first quarter of 2019. However, we are unable to quantify the effect of this. This monthly fall in manufacturing is in line with the [IHS Markit/CIPS PMI for April 2019 \(PDF, 147KB\)](#).

6 . The services sector had its lowest rolling three-month growth since April 2018, at 0.2%

Figure 5: Output in information and communication has risen strongly in the past year, closely followed by wholesale and retail trade

Three-month index, March to May 2018 until February to April 2019, March to May 2018 = 100

Figure 5: Output in information and communication has risen strongly in the past year, closely followed by wholesale and retail trade

Three-month index, March to May 2018 until February to April 2019, March to May 2018 = 100

Source: Office for National Statistics – GDP monthly estimate

Rolling three-month growth in the services sector was 0.2% in April 2019. This was the lowest rolling three-month growth since April 2018. Growth was driven by wholesale and retail trade, within which retail trade was particularly strong, contributing 0.09 percentage points to headline GDP growth. Another large driver to growth was information and communication.

As seen in Figure 5, output in these sub-sectors has performed strongly over the past year, rising above the output level of the services sector as a whole. However, the rate of growth in these two sub-sectors has slowed from a stronger three months to March figure, contributing to the slowing services sector growth seen in the three months to April.

Month-on-month growth in the services sector was flat in April 2019. There was a large positive growth in information and communication in this month, however, this was in part offset by a contraction in professional, scientific and technical activities.

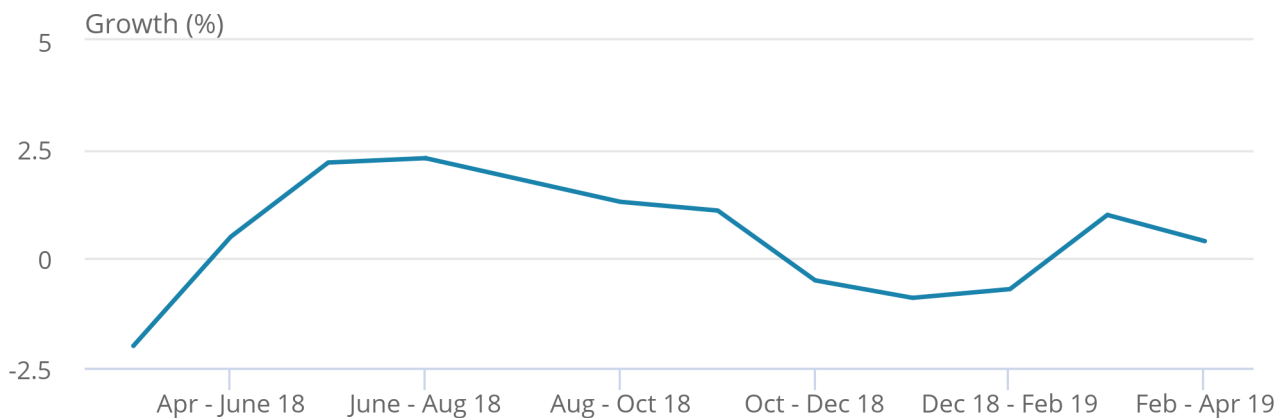

7 . The construction sector increased by 0.4% in the three months to April 2019

Figure 6: Rolling three-month growth in construction fell back slightly from high growth in March 2019

Growth, three-month on previous three-months, March to May 2018 until February to April 2019

Figure 6: Rolling three-month growth in construction fell back slightly from high growth in March 2019

Growth, three-month on previous three-months, March to May 2018 until February to April 2019

Source: Office for National Statistics – GDP monthly estimate

Notes:

1. Rolling three-month estimates are calculated by comparing GDP in a three-month period with GDP in the previous three-month period. For example, GDP in February to April compared with the previous November to January.

Rolling three-month growth in the construction sector was 0.4% in April 2019. This was driven by strong growth in infrastructure.

Month-on-month growth in construction was negative 0.4%. The largest negative contributor to monthly growth was private housing repair and maintenance.

8 . Things you need to know about this release

[Revisions in June Quarterly National Accounts](#): in a change to our published revisions policy, the June Quarterly national accounts (QNA) release will be open for revisions in Quarter 1 (January to March) 2019 only.

9 . Quality and methodology

The [Gross domestic product \(GDP\) Quality and Methodology Information report](#) contains important information on:

- the strengths and limitations of the data and how it compares with related data
- uses and users of the data
- how the output was created
- the quality of the output including the accuracy of the data

1 The GVA output is designated as a National Statistic.

2 Indices reflect values measured at basic prices, which exclude "taxes less subsidies on products".

3 Estimates cannot be regarded as accurate to the last digit shown.

4 Any apparent inconsistencies between the index numbers and the percentage changes shown in these tables are due to rounding.

5 A complete run of data is available on the ONS website.

6 Monthly data from the construction survey are only available from January 2010, therefore the data prior to this period are derived using statistical methods from the available quarterly data, and should therefore be treated with some caution.

1 The GVA output is designated as a National Statistic.

2 Indices reflect values measured at basic prices, which exclude "taxes less subsidies on products".

3 Estimates cannot be regarded as accurate to the last digit shown.

4 Any apparent inconsistencies between the index numbers and the percentage changes shown in these tables are due to rounding.

5 A complete run of data is available on the ONS website.

6 Monthly data from the construction survey are only available from January 2010, therefore the data prior to this period are derived using statistical methods from the available quarterly data, and should therefore be treated with some caution.

Sources: For further information on these data please telephone 01633 456724 or E-mail gdp@ons.gov.uk

1 The GVA output is designated as a National Statistic.

2 Estimates cannot be regarded as accurate to the last digit shown.

3 Any apparent inconsistencies between the index numbers and the percentage changes shown in these tables are due to rounding.

4 Monthly data from the construction survey are only available from January 2010, therefore the data prior to this period are derived using statistical methods from the available quarterly data, and should therefore be treated with some caution.

CONTRIB 1 Monthly GDP based on GVA (Gross Value Added) ¹
Contributions to growth of gross value added at basic prices ^{2,3,4}

seasonally adjusted 2016=100

Section	Industry sections (SIC2007)																						
	Total GVA at basic prices	Agriculture, forestry and fishing	Total production industries	Mining & quarrying	Manufacturing	Electricity gas, steam and air	Water supply, sewerage etc	Construction	Total service industries	Wholesale and retail: repair of motor vehicles and motorcycles	Transport and storage	Accommodation and food service activities	Information and communication	Financial and insurance activities	Real estate activities	Professional, scientific and technical activities	Administrative and support activities	Public administration and defence	Education	Human health and social work activities	Arts, entertainment and recreation	Other service activities	Activities of households as employers, undifferentiated goods and services
