1 . Main points

- The Consumer Prices Index including owner occupiers' housing costs (CPIH) rose by 3.7% in the 12 months to February 2025, down from 3.9% in the 12 months to January.
- On a monthly basis, CPIH rose by 0.4% in February 2025, compared with a rise of 0.6% in February 2024.
- The Consumer Prices Index (CPI) rose by 2.8% in the 12 months to February 2025, down from 3.0% in the 12 months to January.
- On a monthly basis, CPI rose by 0.4% in February 2025, compared with a rise of 0.6% in February 2024.
- The largest downward contribution to the monthly change in both CPIH and CPI annual rates came from clothing, with a further large downward effect in CPIH from housing and household services.
- Core CPIH (excluding energy, food, alcohol and tobacco) rose by 4.4% in the 12 months to February 2025, down from 4.6% in the 12 months to January; the CPIH goods annual rate slowed from 1.0% to 0.8%, while the CPIH services annual rate eased slightly from 5.8% to 5.7%.
- Core CPI (excluding energy, food, alcohol and tobacco) rose by 3.5% in the 12 months to February 2025, down from 3.7% in the 12 months to January; the CPI goods annual rate slowed from 1.0% to 0.8%, while the CPI services annual rate was unchanged at 5.0%.

2 . Consumer price inflation rates

Table 1: CPIH, OOH component and CPI index values, and annual and monthly rates
UK, February 2024 to February 2025

		CPIH Index (UK, 2015 = 100)	CPIH 12- month rate (%)	CPIH 1- month rate (%)	CPI Index (UK, 2015=100)	CPI 12- month rate (%)	CPI 1- month rate (%)	OOH Index (UK, 2015=100)	OOH 12- month rate (%)

Figure 1: Annual CPIH and CPI inflation rates eased in February 2025

CPIH, owner occupiers' housing (OOH) costs component and CPI annual inflation rates, UK, February 2015 to February 2025

Figure 1: Annual CPIH and CPI inflation rates eased in February 2025

CPIH, owner occupiers' housing (OOH) costs component and CPI annual inflation rates, UK, February 2015 to February 2025

Source: Consumer price inflation from the Office for National Statistics

The Consumer Prices Index including owner occupiers' housing costs (CPIH) rose by 3.7% in the 12 months to February 2025, down from 3.9% in the 12 months to January (Figure 1).

On a monthly basis, CPIH rose by 0.4% in February 2025, compared with a rise of 0.6% in February 2024.

The owner occupiers' housing (OOH) costs component of CPIH rose by 7.5% in the 12 months to February 2025, down from 8.0% in the 12 months to January. This is the first time the annual rate has slowed since November 2023. OOH costs rose by 0.4% on the month, compared with a 0.9% increase a year earlier.

The Consumer Prices Index (CPI) rose by 2.8% in the 12 months to February 2025, down from 3.0% in the 12 months to January.

On a monthly basis, CPI rose by 0.4% in February 2025, compared with a rise of 0.6% in February 2024.

The main drivers of the annual inflation rate for CPIH and CPI are the same where they are common to both measures. However, the OOH component accounts for approximately 17% of the CPIH and is the main driver for differences between the CPIH and CPI inflation rates. This makes CPIH our most comprehensive measure of inflation. We cover this in more detail in [Section 4: Latest movements in CPIH inflation](#) and provide a commentary on the CPI in [Section 5: Latest movements in CPI inflation](#). We also cover both CPIH and CPI in [Section 3: Notable movements in prices](#), though the figures reflect CPIH.

3 . Notable movements in prices

Table 2: CPIH annual and monthly inflation rates by division
UK, February 2024, January 2025, and February 2025

	CPIH 12-month rate (%)		CPIH 1-month rate (%)	
	Jan 2025	Feb 2025	Feb 2024	Feb 2025
CPIH All items	3.9	3.7	0.6	0.4
Food and non-alcoholic beverages	3.3	3.3	0.2	0.2
Alcohol and tobacco	4.9	5.7	0.2	1.0
Clothing and footwear	1.8	-0.6	2.1	-0.3
Housing and household services	5.6	5.3	0.6	0.3
of which owner occupiers' housing costs	8.0	7.5	0.9	0.4
Furniture and household goods	0.5	0.2	1.3	1.1
Health	5.0	5.1	0.2	0.3
Transport	1.7	1.8	0.8	0.8
Communication	5.9	7.3	-1.1	0.2
Recreation and culture	3.8	3.4	0.5	0.1
Education	7.5	7.5	0.0	0.0
Restaurants and hotels	3.3	3.4	1.0	1.1
Miscellaneous goods and services	2.8	3.0	0.0	0.3
All goods	1.0	0.8	0.6	0.4
All services	5.8	5.7	0.6	0.5
CPIH exc food, energy, alcohol and tobacco (core CPIH)	4.6	4.4	0.7	0.4

Figure 2: Clothing and footwear, and housing and household services led the downward contributions to change in annual CPIH inflation

Contributions to change in the annual CPIH inflation rate, UK, between January and February 2025

Figure 2: Clothing and footwear, and housing and household services led the downward contributions to change in annual CPIH inflation

Contributions to change in the annual CPIH inflation rate, UK, between January and February 2025

Source: Consumer price inflation from the Office for National Statistics

Notes:

- 1. Individual contributions may not sum to the total because of rounding.
- 2. More information on the contents of each division can be found in Table 3 in our accompanying [Consumer price inflation dataset](#).

Figure 2 shows the contributions from the 12 divisions to the change in the annual Consumer Prices Index including owner occupiers' housing costs (CPIH) inflation rate between January and February 2025. These sum to the change in the annual rate between the latest two months, that is, the easing from 3.9% to 3.7%.

The slowing in the rate into February 2025 reflected downward contributions from four divisions and upward contributions from five divisions. The largest downward contributions came from clothing and footwear, housing and household services, and recreation and culture.

There were no large, offsetting upward contributions. Alcohol and tobacco prices rose by 5.7% in the 12 months to February 2025, up from 4.9% previously. Duty on non-draught alcohol increased from 1 February 2025 as announced in the Autumn Budget 2024. There was also a small upward contribution from communication, where the price of mobile phone applications (apps) rose this year but fell a year ago.

Clothing and footwear

Overall prices for clothing and footwear fell by 0.6% in the 12 months to February 2025, compared with a rise of 1.8% in the 12 months to January (Figure 3). The February figure was the first negative annual rate since October 2021.

Figure 3: First negative annual inflation rate for clothing and footwear since October 2021

CPIH, and clothing and footwear annual inflation rates, UK, February 2015 to February 2025

Figure 3: First negative annual inflation rate for clothing and footwear since October 2021

CPIH, and clothing and footwear annual inflation rates, UK, February 2015 to February 2025

Source: Consumer price inflation from the Office for National Statistics

The easing in the annual rate was mainly the result of a large downward effect from garments for women, with small downward effects coming from a range of women's clothing items. There were additional small downward effects from children's clothing, and other clothing and clothing accessories, such as hats and women's scarves.

On a monthly basis, prices fell by 0.3% in February 2025 compared with a rise of 2.1% a year ago. Prices normally rise in February as the spring product ranges start to enter the shops following the new year sales period. This is the first price fall between January and February since 2021 when sales patterns were affected by the coronavirus (COVID-19) pandemic. The fall reflects an increase in the incidence of discounting in the dataset between January and February this year. Normally there is a decrease between these months.

Figure 4: Clothing and footwear prices fell in February 2025

Clothing and footwear price indices (January of each year = 100), UK, January 2021 to February 2025

Figure 4: Clothing and footwear prices fell in February 2025

Clothing and footwear price indices (January of each year = 100), UK, January 2021 to February 2025

Source: Consumer price inflation from the Office for National Statistics

Figure 4 shows the seasonal price movements for clothing and footwear over the latest five years, setting January equal to 100 in each year.

Housing and household services

The annual inflation rate for housing and household services was 5.3% in February 2025, down from 5.6% in January. On a monthly basis, prices rose by 0.3% in February 2025, compared with a rise of 0.6% a year ago.

The easing in the annual rate between January and February 2025 reflected downward effects from owner occupiers' housing (OOH) costs and, to a lesser extent, actual rentals for housing. OOH costs rose by 7.5% in the year to February 2025, down from 8.0% in January. The January figure was unchanged from December 2024, and together they were the joint-highest observed since February 1992, when the rate was 8.6% in the constructed historical series.

Actual rentals for housing rose by 7.4% in the 12 months to February 2025, down from 7.8% in the 12 months to January. On a monthly basis, rents rose by 0.3% in February 2025 compared with 0.6% a year earlier. The effect came from private rentals.

Recreation and culture

Overall prices in the recreation and culture division rose by 3.4% in the 12 months to February 2025, down from 3.8% in the 12 months to January. On a monthly basis, prices rose by 0.1% in February 2025, compared with a rise of 0.5% a year ago.

The slowing of the annual rate was the result of relatively small downward effects from a variety of the more detailed classes. The largest came from cultural services (particularly from live music admission prices) and recording media. The downward effects were partially offset by an upward contribution from data processing equipment, where prices rose this year but fell a year ago, particularly for computer software.

4 . Latest movements in CPIH inflation

Figure 5: CPIH goods, services and core annual inflation rates each eased in February 2025

CPIH goods, services and core annual inflation rates, UK, February 2015 to February 2025

Figure 5: CPIH goods, services and core annual inflation rates each eased in February 2025

CPIH goods, services and core annual inflation rates, UK, February 2015 to February 2025

Source: Consumer price inflation from the Office for National Statistics

Figure 5 shows the annual inflation rates for the Consumer Prices Index including owner occupiers' housing costs (CPIH) series for all goods and all services, together with CPIH excluding energy, food, alcohol and tobacco (often referred to as core CPIH). The CPIH inflation rate is added for comparison.

The CPIH all services index rose by 5.7% in the 12 months to February 2025, down slightly from 5.8% in the 12 months to January. There were large downward contributions to the change in the annual rate from housing services, principally from owner occupiers' housing (OOH) costs, and from package holidays and accommodation. These were partially offset by some smaller upward contributions, the largest coming from catering services.

The CPIH all goods index rose by 0.8% in the 12 months to February 2025, down from 1.0% in the 12 months to January. The largest downward contribution to the change in the annual rate came from non-energy industrial goods, principally from clothing and footwear goods.

The core CPIH annual inflation rate was 4.4% in February 2025, down from 4.6% in January.

Figure 6: Positive contributions to the annual CPIH rate from 11 divisions, led by housing and household services

Contributions to the annual CPIH inflation rate, UK, February 2023 to February 2025

Figure 6: Positive contributions to the annual CPIH rate from 11 divisions, led by housing and household services

Contributions to the annual CPIH inflation rate, UK, February 2023 to February 2025

Source: Consumer price inflation from the Office for National Statistics

Notes:

1. Individual contributions may not sum to the total because of rounding.
2. More information on the contents of each division can be found in Table 3 in our accompanying [Consumer price inflation dataset](#).

Figure 6 shows the extent to which the distinct categories of goods and services have contributed to the overall annual CPIH inflation rate over the last two years. The contribution of each category to the annual rate depends on the price movement in that category as well as its weight, which is updated annually.

The largest upward contributions to the annual CPIH inflation rate in February 2025 came from the housing and household services, restaurants and hotels, and recreation and culture divisions.

The only downward contribution came from clothing and footwear.

Food and non-alcoholic beverage prices rose by 3.3% in the 12 months to February 2025, unchanged from the previous month. Increases and decreases in prices for food categories offset each other leading to no change in the rate. The monthly increase, at 0.2% in February 2025, was the same as in February 2024.

Figure 7: Contribution from owner occupiers' housing costs eased for the first time in 14 months

Contributions of housing components to the annual CPIH inflation rate, UK, February 2015 to February 2025

Figure 7: Contribution from owner occupiers' housing costs eased for the first time in 14 months

Contributions of housing components to the annual CPIH inflation rate, UK, February 2015 to February 2025

Source: Consumer price inflation from the Office for National Statistics

Notes:

1. Individual contributions may not sum to the total because of rounding.

Figure 7 shows the contribution of owner occupiers' housing (OOH) costs and Council Tax to the annual CPIH inflation rate in the context of wider housing-related costs. The Consumer Prices Index (CPI) differs from the CPIH because it does not include these two components.

The contribution of OOH slowed from 1.31 to 1.23 percentage points between January and February 2025. The contribution had previously risen for 13 consecutive months. OOH was the main influence behind the reduced contribution from housing and household services to the annual CPIH inflation rate in February 2025.

5 . Latest movements in CPI inflation

While the Consumer Prices Index including owner occupiers' housing costs (CPIH) is our lead and most comprehensive measure of consumer price inflation, the Consumer Prices Index (CPI) is based on a harmonised methodology developed by Eurostat and allows for international comparisons to be drawn. For more information on the use cases for our consumer price inflation statistics, please refer to our [Measuring changing prices and costs for consumers and households: December 2023 article](#).

Figure 8 shows annual CPI inflation for the UK against the European Union (EU) average and selected Group of Seven (G7) countries. While the UK CPI is produced on a comparable basis with EU countries, the United States Harmonised Index of Consumer Prices (HICP) differs in some respects (see Footnote 1 of Figure 8). The UK's CPI inflation rate of 2.8% was above France (0.9%), Germany (2.6%), and the EU average (2.7%) in the 12 months to February 2025.

Figure 8: UK inflation above that of the EU, France and Germany

CPI compared with selected G7 and EU annual inflation rates, February 2015 to February 2025

Figure 8: UK inflation above that of the EU, France and Germany

CPI compared with selected G7 and EU annual inflation rates, February 2015 to February 2025

Source: Consumer price inflation from the Office for National Statistics, Eurostat, and the US Bureau of Labor Statistics

Notes:

1. There are some differences in the definition of the US HICP that may limit comparison; more information is available on the [US Bureau of Labor Statistics R-HICP homepage](#).
2. The latest Euro area inflation estimates can be found on the [Eurostat website](#).
3. The international data in this figure are sometimes revised.

Table 3: CPI annual and monthly inflation rates by division
UK, February 2024, January 2025, and February 2025

	CPI 12-month rate (%)		CPI 1-month rate (%)	
	Jan 2025	Feb 2025	Feb 2024	Feb 2025
CPI All items	3.0	2.8	0.6	0.4
Food and non-alcoholic beverages	3.3	3.3	0.2	0.2
Alcohol and tobacco	4.9	5.7	0.2	1.0
Clothing and footwear	1.8	-0.6	2.1	-0.3
Housing and household services	2.1	1.9	0.4	0.2
Furniture and household goods	0.5	0.2	1.3	1.1
Health	5.0	5.1	0.2	0.3
Transport	1.7	1.8	0.8	0.8
Communication	5.9	7.3	-1.1	0.2
Recreation and culture	3.8	3.4	0.5	0.1
Education	7.5	7.5	0.0	0.0
Restaurants and hotels	3.3	3.4	1.0	1.1
Miscellaneous goods and services	2.8	3.0	0.0	0.3
All goods	1.0	0.8	0.6	0.4
All services	5.0	5.0	0.6	0.5
CPI exc food, energy, alcohol and tobacco (core CPI)	3.7	3.5	0.6	0.4

Source: Consumer price inflation from the Office for National Statistics

Figure 9: CPI goods and core annual inflation rates eased in February 2025 while the CPI services rate was unchanged

CPI goods, services and core annual inflation rates, UK, February 2015 to February 2025

Figure 9: CPI goods and core annual inflation rates eased in February 2025 while the CPI services rate was unchanged

CPI goods, services and core annual inflation rates, UK, February 2015 to February 2025

Source: Consumer price inflation from the Office for National Statistics

Figure 9 shows the annual inflation rates for the CPI all goods and all services series, together with CPI excluding energy, food, alcohol and tobacco (often referred to as core CPI). The headline CPI inflation rate is added for comparison.

The CPI all services index rose by 5.0% in the 12 months to February 2025, unchanged from the 12 months to January. The CPI all goods index rose by 0.8% in the 12 months to February 2025, down from 1.0% in the 12 months to January. Core CPI rose by 3.5% in the 12 months to February 2025, down from 3.7% in the 12 months to January.

As with the all-items annual inflation rates, the drivers of CPIH and CPI goods and services inflation are the same (with the exception of owner occupiers' housing (OOH) costs and Council Tax, which are excluded from CPI). The drivers are discussed in more detail in [Section 4: Latest movements in CPIH inflation](#).

Figure 10: Clothing and footwear led the downward contributions to change in annual CPI inflation

Contributions to change in the annual CPI inflation rate, UK, between January and February 2025

Figure 10: Clothing and footwear led the downward contributions to change in annual CPI inflation

Contributions to change in the annual CPI inflation rate, UK, between January and February 2025

Source: Consumer price inflation from the Office for National Statistics

Notes:

- 1. Individual contributions may not sum to the total because of rounding.
- 2. More information on the contents of each division can be found in Table 4 in our accompanying [Consumer price inflation dataset](#).

Figure 10 shows how each of the main groups of goods and services contributed to the change in the annual CPI inflation rate between January and February 2025.

The easing in the annual CPI rate into February 2025 reflected downward contributions from four divisions, partially offset by upward contributions from five divisions. The largest downward contribution came from clothing and footwear.

Although the sizes of the contributions differ from CPIH, the main drivers to the change are the same where they are common to both measures.

Figure 11: Positive contributions to the annual CPI rate from 11 divisions, led by restaurants and hotels, and recreation and culture

Contributions to the annual CPI inflation rate, UK, February 2023 to February 2025

Figure 11: Positive contributions to the annual CPI rate from 11 divisions, led by restaurants and hotels, and recreation and culture

Contributions to the annual CPI inflation rate, UK, February 2023 to February 2025

Source: Consumer price inflation from the Office for National Statistics

Notes:

1. Individual contributions may not sum to the total because of rounding.
2. More information on the contents of each division can be found in Table 4 in our accompanying [Consumer price inflation dataset](#).

Figure 11 shows the extent to which the distinct categories of goods and services have contributed to the overall annual CPI inflation rate over the last two years.

The CPIH includes extra housing components not included in the CPI. This can result in the largest contributions to the annual CPI and CPIH inflation rates coming from different divisions. In February 2025, the largest-contributing division to CPI was restaurants and hotels (0.50 percentage point contribution to the CPI rate) whereas the largest-contributing division to CPIH was housing and household services (1.57 percentage points). OOH costs had a large upward contribution to housing and household services in CPIH but are excluded from CPI.

6 . Data on consumer price inflation

[Consumer price inflation tables](#) Dataset | Released 26 March 2025 Measures of monthly UK inflation data including the Consumer Prices Index including owner occupiers' housing costs (CPIH), Consumer Prices Index (CPI) and Retail Prices Index (RPI). These tables complement the consumer price inflation time series dataset. Please note that from the publication on 26 March 2025, we are publishing fewer tables to avoid duplication and to remove discontinued series. The final page of the tables, titled "Dropped reference tables look-up", details which tables are no longer published and provides alternative sources for where the content in those tables can be found.

[Consumer price inflation time series](#) Dataset MM23 | Released 26 March 2025 Comprehensive database of time series covering measures of inflation data for the UK including the CPIH, CPI and RPI.

[Consumer price inflation detailed briefing note](#) Dataset | Released 26 March 2025 The consumer price inflation detailed briefing note contains details of the items contributing to the changes in the CPIH, details of any notable movements, a summary of the reconciliation of CPIH and RPI, and the outlook, which looks ahead to next month's release.

[Consumer price inflation consumption segment indices and price quotes](#) Dataset | Released 26 March 2025 Price quote data (for locally collected data only) and consumption segment indices that underpin consumer price inflation statistics are published, giving user access to the detailed data that are used in the construction of the UK's inflation figures. Note that this dataset was previously called the consumer price inflation item indices and price quotes dataset.

[Contributions to the 12-month rate of CPI\(H\) by import intensity](#) Dataset | Released 26 March 2025 A time series of the contributions to the CPIH and CPI annual rates broken down by the import intensity of household purchases.

7 . Glossary

Annual inflation rate

The most common approach to measuring inflation is the 12-month or annual inflation rate, which compares prices for the latest month with the same month a year ago. In any given month, the annual rate is determined by the balance between upward and downward price movements across the range of goods and services included in the index.

Consumer price inflation

Consumer price inflation is the rate at which the prices of goods and services bought by households rise or fall. It is estimated by using price indices. For an overview of the range of indices available and their uses, please see our [Consumer price indices, a brief guide: 2017](#) and our [Measuring changing prices and costs for consumers and households: December 2023 article](#).

CPIH

The Consumer Prices Index including owner occupiers' housing costs (CPIH) is the most comprehensive measure of inflation. It extends the Consumer Prices Index (CPI) to include a measure of the costs associated with owning, maintaining and living in one's own home, known as owner occupiers' housing (OOH) costs, along with Council Tax. Both are significant expenses for many households and are not included in the CPI.

CPI

The CPI is a measure of consumer price inflation produced to international standards and is based on European regulations for the [Harmonised Index of Consumer Prices](#). The CPI is the inflation measure used in the government's target for inflation.

The CPI is produced at the same level of detail as the CPIH in our [accompanying dataset](#) and [accompanying data time series](#).

Owner occupiers' housing (OOH) costs

OOH costs are the costs of housing services associated with owning, maintaining and living in one's own home.

RPI

The Retail Prices Index (RPI) does not meet the required standard for designation as an [accredited official statistic](#). In recognition that it continues to be widely used in contracts, we continue to publish the RPI, its subcomponents, and RPI excluding mortgage interest payments (RPIX). To view the all-items RPI, please see the [data time series section of the inflation and price indices area of our website](#). The annual RPI inflation rate was 3.4% in February 2025.

The UK Statistics Authority (The Authority) and HM Treasury launched a consultation in 2020 on The Authority's proposal to address the shortcomings of the RPI. From 2030 (at the earliest), as outlined in [The Authority's response to the consultation](#), the CPIH methods and data sources will be introduced into the RPI. Additionally, the supplementary and lower-level indices of the RPI will be discontinued.

8 . Data sources and quality

Alternative data sources

We are undertaking a programme of transformation across our consumer price statistics, including identifying new sources, improving methods and developing systems. More information about the project and our ongoing transformation plans can be found in our [Transformation of consumer price statistics: August 2024 article](#), released on 6 August 2024. We also published our [Consumer prices development plan: updated August 2024](#) to outline the rationale for our priorities and their potential impact.

As part of the development, from the 26 March 2025 publication of the February 2025 figures, we have introduced improved imputation methods, consumption segments and improved Northern Ireland private rental price statistics. These changes will also be introduced into the Household Costs Indices from February 2025 (to be published on 29 May 2025). We have published an [impact analysis on transformation of UK consumer price statistics](#) to provide users with indicative impacts of the improvements from January 2019 to June 2024.

As usual, we welcome your feedback on our work by email to cpi@ons.gov.uk.

Moving from sample items to broader consumption segments

The "All items" Consumer Prices Index (CPI) and Consumer Prices Index including owner occupiers' housing costs (CPIH) series incorporate price information from a wide range of goods and services. From March 2025 onwards, the process for aggregating this detailed information has changed, as a necessary step towards incorporating larger and more granular datasets into CPI.

Goods and services are allocated into "consumption segments" for different categories of expenditure. In some cases, we have currently defined these consumption segments to correspond to one "item" for which the Office for National Statistics (ONS) tracks prices over time. However, in cases where more comprehensive source data are available, or expected to be available in the future, a consumption segment will typically include much more than just one item. For simplicity we continue to refer to "items" in the statistical bulletin and detailed briefing note. More detailed methodological information is available in our [Consumer Prices Indices Technical Manual](#).

Please note that the move from sample items to broader consumption segments means there is an impact on the individual price quotes and lower-level indices we publish from March 2025. These outputs have been updated and presented in an improved format to help users transition to the use of consumption segments and other methodological changes we are making in 2025.

We have published an [updated glossary](#) (XLSX, 25KB) which sets out the changes made from March 2025.

Weights for 2025 consumer price inflation statistics

In line with usual practice at the start of each year, the expenditure weights used in compiling the CPIH and CPI have been calculated using updated spending information. The first update of weights was implemented with the January indices. The second update has been introduced, along with the usual basket update, in the February indices. We published [Consumer price inflation, updating weights: 2025](#) and [Consumer price inflation basket of goods and services: 2025](#) on 18 March 2025.

The 2025 weights for CPIH and CPI were calculated using national accounts household final consumption expenditure (HHFCE) data for 2023. This is in line with our standard methodology of using data lagged by two years. It differs from the approach used in 2021, 2022 and 2023, when there were large changes seen in spending patterns because of the coronavirus (COVID-19) pandemic. Over those years, we adjusted the spending data so that the resulting weights were more reflective of the year immediately before use in consumer price inflation. More information is available in our [Consumer price inflation, updating weights articles](#).

The weights for the Retail Prices Index (RPI) have also been updated for 2025 in line with the practice followed both before and during the pandemic period, with no additional adjustment to the spending data because of any coronavirus effects.

In line with the improvements introduced last year, we now use unrounded weights in compiling CPIH and CPI. The weights prior to 2024 for the CPI and CPIH were rounded to integers as parts per thousand of the all-items indices at the class level (4-digit Classification of Individual Consumption According to Purpose). The RPI continues to be based on integer weights.

Passenger transport by air

While we previously published a monthly index for passenger transport by air, from 26 March 2025 we are also publishing annual price indices and weights split by domestic flights, European flights and long-haul flights. These are being released in the [user requested data section of our website](#).

Classification Of Individual Consumption According to Purpose (COICOP)

The Classification of Individual Consumption According to Purpose (COICOP) is the classification that underpins some of the main statistics produced by the ONS. The [classification has seen a substantial update \(PDF, 2.51MB\)](#) in recent years, to reflect changes in household expenditure patterns since its inception in the late 1990s. The UK currently uses the version of COICOP introduced in 1999.

We will ensure that the new classification is implemented in a comprehensive and reliable manner that considers other ONS priorities around the transformation of our main statistics. To meet this objective, we will aim to introduce the new classification (COICOP 2018) as soon as possible, as part of our wider plans to implement the updated System of National Accounts (SNA25). However, this is likely to be later than the date for implementation in some other countries. We will share our implementation plan in due course.

For further information please contact cpi@ons.gov.uk.

Households and the cost of living

To assist individuals in understanding how the rise in inflation affects their expenditure, we have produced a [personal inflation calculator](#). The calculator allows users to enter the amount they spend across either a reduced or a wide range of categories, to produce an estimate of their personal inflation based on those spending patterns.

Our [shopping prices comparison tool](#) shows how the average prices of items have changed over time. However, please note the shopping prices comparison tool has not been updated with February 2025 data on 26 March 2025. This is to allow us to update the tool to account for the changes we are bringing in as part of the planned improvements to our consumer price statistics. For more information on the improvements we are introducing from February 2025 (published in March 2025) please see our [Impact analysis on transformation of UK consumer price statistics](#).

Please also note that table 55 in our [Consumer price inflation dataset](#), which provided a time series of prices for petrol and diesel, is not being published from 26 March and the series have been discontinued. Historic average prices will still be available from the time series explorer function on our website using the four-character identifiers CZMK for petrol and CZML for diesel.

On 27 February 2025, we published our quarterly [Household Costs Indices \(HCIs\) for UK household groups bulletin](#). The HCIs reflect how different types of households experience changing prices and differ from CPIH and CPI, which are based on recognised economic principles, and which provide an aggregate measure of inflation for household spending in the UK.

The HCIs are [official statistics in development](#) and this release included new estimates for October to December 2024. It was not possible for this latest release to update the weights for 2024 in line with the standard methodology for consumer prices. This is because of delays in processing the underlying survey data and the need for further ongoing quality assurance. Instead, the most recent estimates have been compiled using the weights for February to December 2023. We aim to update the weights in the second quarter (April to June) of 2025.

Consumer price inflation historical estimates, UK, 1950 to 1988

On 18 May 2022, we published our [Consumer price inflation, historical estimates, UK, 1950 to 1988 - methodology](#) and [Consumer price inflation, historical estimates and recent trends, UK: 1950 to 2022 article](#). These include new estimates of CPIH and improved estimates of CPI for the period 1950 to 1988. These estimates (published in response to user need for a longer series) are indicative and are for analytical purposes only. They are not intended for official use and do not constitute part of the [accredited official statistic](#) series.

Previously, in December 2018, we published our [Consumer Prices Index including owner occupiers' housing costs \(CPIH\) historical series: 1988 to 2004 article](#). This series is also not an accredited official statistic, reflecting the historical uncertainty around the backcasts.

Methodology information

The consumer price indices are normally based on prices collected from outlets around the country, supplemented by information collected centrally over the internet and by phone. The figures in this publication use data collected on or around 18 February 2025.

Our [Consumer price indices, a brief guide](#) gives an overview of consumer price statistics, while our [Consumer prices indices technical manual](#) covers the concepts and methodologies underpinning the indices in more detail.

Our [CPIH Compendium](#) provides a comprehensive source of information on the CPIH, focusing on the approach to measuring owner occupiers' housing costs.

Our [Users and uses of consumer price inflation statistics: July 2018 update](#) includes information on the users and uses of these statistics, and the characteristics of the different measures of inflation in relation to potential use.

Strengths and limitations

We illustrated our approach to [Measuring changing prices and costs for consumers and households](#) most recently in December 2023 using three "use cases", and described how they relate to the measures published and under development.

The three cases refer firstly to the CPIH as our lead measure of inflation based on economic principles. They also refer to the HCIs as a set of measures that reflect the change in costs and prices experienced by different households, and the RPI as a legacy measure that is required to meet existing user needs. Our [Shortcomings of the RPI as a measure of inflation article](#) describes the issues with the RPI.

Accredited official statistics

These accredited official statistics were independently reviewed by the Office for Statistics Regulation in July 2017. They comply with the standards of trustworthiness, quality and value in the [Code of Practice for Statistics](#) and should be labelled "accredited official statistics".

Key: - zero or negligible

1 From the release of January consumer price inflation data on 16 February 2016, CPIH and CPI indices have been re-referenced and published with 2015=100. Full historic series for each of the re-referenced indices are available for users to view or download. Regular re-referencing of indices is methodological good practice as it avoids rounding issues that can arise from small index values. Please note that re-referencing does not impact on published inflation rates, although when using the indices to calculate inflation rates, it is important to use indices that are referenced on the same year. Re-referencing does not impact on RPI. For more information, please contact cpi@ons.gsi.gov.uk.

2 The Retail Prices Index and its derivatives do not meet the required standards for designation as National Statistics. A full report can be found at <http://www.statisticsauthority.gov.uk/>.

3 The series CPIY, CPI-CT and CPIHY were discontinued in January 2022, with the final estimates referring to price change in the period December 2021.

1 As a direct result of the reduced availability of products due to the coronavirus (COVID-19) pandemic, some series are based on less than half of the number of quotes used in February 2020 (the most recent 'normal' collection). To identify which series are affected please consult

the latest Consumer price inflation tables which can be located here: <https://www.ons.gov.uk/economy/inflationandpriceindices/datasets/consumerpriceinflation>, which includes notation to reflect the reduced coverage.

1 As a direct result of the reduced availability of products due to the coronavirus (COVID-19) pandemic, some series are based on less than half of the number of quotes used in February 2020 (the most recent 'normal'

collection). To identify which series are affected, please consult the latest Consumer price inflation tables which can be located here: <https://www.ons.gov.uk/economy/inflationandpriceindices/datasets/consumer-priceinflation>, which includes notation to reflect the reduced coverage.

1 From the release of January consumer price inflation data on 16 February 2016, CPIH and CPI indices have been re-referenced and published with 2015=100. Full historic series for each of the re-referenced indices are available for users to view or download. Regular re-referencing of indices is methodological good practice as it avoids rounding issues that can arise from small index values. Please note that re-referencing does not impact on published inflation rates, although when using the indices to calculate inflation rates, it is important to use indices that are referenced on the same year. Re-referencing does not impact on RPI. For more information, please contact cpi@ons.gsi.gov.uk.

2 More detailed CPIH, CPI and RPI data are available at: <http://www.ons.gov.uk>.

1 From the release of January consumer price inflation data on 16 February 2016, CPIH & CPI indices have been re-referenced and published with 2015=100. Full historic series for each of the re-referenced indices are available for users to view or download. Regular re-referencing of indices is methodological good practice as it avoids rounding issues that can arise from small index values. Please note that re-referencing does not impact on published inflation rates, although when using the indices to calculate inflation rates, it is important to use indices that are referenced on the same year. Re-referencing does not impact on RPI. For more information, please contact cpi@ons.gsi.gov.uk.

2 More detailed CPIH, CPI and RPI data are available at: <http://www.ons.gsi.gov.uk>.

1 For further information on the composition of the indices shown, see 'The Consumer Prices Index: Goods and Services Indices and Special Aggregates', which can be downloaded from: <http://webarchive.nationalarchives.gov.uk/20160105160709/http://ons.gov.uk/>

2 The coverage of this special aggregate has changed extensively since January 2000, when Social protection was first included and extensions to the Education and Health divisions also took effect. Health was further extended with effect from January 2001.

3 Energy includes electricity, gas and other fuels, and fuels and lubricants.

Key: - zero or negligible .. Not available

1 Published as the CPI in the UK.

2 Aggregate for European Union with 27 Member States.

Following user requests, on 10 April 2018 Eurostat began to publish in its database an aggregate for the EU with 27 Member States for around 50 most in-demand indicators, such as population, GDP growth rate and unemployment.

3 Data for the former EU28 aggregate.

For reference periods February 2020 or later, Eurostat no longer calculates or publishes the former EU 28 aggregate. This means that the final time periods for which the EU28 aggregate is published are January 2020, fourth quarter 2019 or the year 2019 depending on the frequency of the dataset. Eurostat will maintain historic data for EU28 in the database and will update as revisions are received.

4 The coverage of the Monetary Union Indices of Consumer Prices (MUICP) was extended to include Greece with effect from Jan 2001 and Slovakia from Jan 2009.

5 Following the end of the transition period, we have ceased to publish the Harmonised Index of Consumer Prices (HICP) international comparisons for EU countries in this table. The international comparisons will continue to be available on the Eurostat website. <https://ec.europa.eu/eurostat/web/main/data/database>

Key: - zero or negligible

1 An error was identified in the dataset underpinning the 2019 RPI weights covering the period February to June 2019. In line with the consumer price inflation statistics revision policy RPI was not revised. The corrected weights have been used for the July 2019 RPI onwards. Users should note there is a discontinuity between June's and July's index levels, which have been calculated using differing weights.

2 The Retail Prices Index and its derivatives do not meet the required standards for designation as National Statistics. A full report can be found at <http://www.statisticsoffice.gov.uk>.

3 As a direct result of the reduced availability of products due to the coronavirus (COVID-19) pandemic, some series are based on less than half of the number of price quotes used in February 2020 (the most recent 'normal' collection). To identify which series are affected, please the latest Consumer price inflation tables which can be found here: <https://www.ons.gov.uk/economy/inflationandpriceindices/datasets/consumerpriceinflation>, which includes notation to reflect the reduced coverage.

4 Index date for February: 18 February 2025

Key: - zero or negligible

1 All components of the RPI are included in the above breakdown with the exception of mortgage interest payments, council tax and depreciation.

2 Including fuel oil.

3 The 'other goods' category comprises DIY materials, coal & solid fuels, household goods, clothing & footwear, personal articles, chemists goods, purchase of motor vehicles and leisure goods.

4 The 'utilities' category comprises water, electricity, gas, postage, telephone charges and rail fares.

5 The 'shop services' category comprises catering, repairs & maintenance charges, domestic services, personal services, maintenance of motor vehicles, TV licence & rentals and entertainment & recreation charges.

6 The 'non-shop services' category comprises dwelling insurance & ground rent, fees and subscriptions, vehicle tax and insurance, bus & coach fares, other travel costs, foreign holidays and UK holidays.

7 The Retail Prices Index and its derivatives do not meet the required standards for designation as National Statistics. A full report can be found at: <http://www.statisticsauthority.gov.uk/>.

8 An error was identified in the dataset underpinning the 2019 RPI weights covering the period February to June 2019. In line with the consumer price inflation statistics revision policy RPI was not revised. The corrected weights have been used for the July 2019 RPI onwards. Users should note there is a discontinuity between June's and July's index levels, which have been calculated using differing weights.
