1 . Main points

- The Consumer Prices Index including owner occupiers' housing costs (CPIH) rose by 3.9% in the 12 months to January 2025, up from 3.5% in December 2024.
- On a monthly basis, CPIH was little changed in January 2025, compared with a 0.4% fall in January 2024.
- The Consumer Prices Index (CPI) rose by 3.0% in the 12 months to January 2025, up from 2.5% in the 12 months to December 2024.
- On a monthly basis, CPI fell by 0.1% in January 2025, compared with a 0.6% fall in January 2024.
- The largest upward contribution to the monthly change in both CPIH and CPI annual rates came from transport, and food and non-alcoholic beverages; the largest downward contribution to both came from housing and household services.
- Core CPIH (excluding energy, food, alcohol and tobacco) rose by 4.6% in the 12 months to January 2025, up from 4.2% in December 2024; the CPIH goods annual rate rose from 0.7% to 1.0%, while the CPIH services annual rate rose from 5.4% to 5.8%.
- Core CPI (excluding energy, food, alcohol and tobacco) rose by 3.7% in the 12 months to January 2025, up from 3.2% in December 2024; the CPI goods annual rate rose from 0.7% to 1.0%, while the CPI services annual rate rose from 4.4% to 5.0%.

2 . Consumer price inflation rates

Figure 1: Annual CPI inflation rate highest since March 2024

CPIH, owner occupiers' housing (OOH) costs component and CPI annual inflation rates, UK, January 2015 to January 2025

Figure 1: Annual CPI inflation rate highest since March 2024

CPIH, owner occupiers' housing (OOH) costs component and CPI annual inflation rates, UK, January 2015 to January 2025

Source: Consumer price inflation from the Office for National Statistics

The Consumer Prices Index including owner occupiers' housing costs (CPIH) rose by 3.9% in the 12 months to January 2025, up from 3.5% in December 2024 (Figure 1).

On a monthly basis, CPIH was little changed in January 2025, compared with a 0.4% fall in January 2024.

The owner occupiers' housing costs (OOH) component of CPIH rose by 8.0% in the 12 months to January 2025, unchanged from the 12 months to December 2024. This is the joint-highest annual rate since February 1992 in the constructed historical series. OOH costs rose by 0.4% on the month, the same rate as a year earlier.

The Consumer Prices Index (CPI) rose by 3.0% in the 12 months to January 2025, up from 2.5% in December 2024.

On a monthly basis, CPI fell by 0.1% in January 2025, compared with a 0.6% fall in January 2024.

The main drivers of the annual inflation rate for CPIH and CPI are the same where they are common to both measures. However, the OOH component accounts for approximately 17% of the CPIH and is the main driver for differences between the CPIH and CPI inflation rates. This makes CPIH our most comprehensive measure of inflation. We cover this in more detail in [Section 4: Latest movements in CPIH inflation](#) and provide a commentary on the CPI in [Section 5: Latest movements in CPI inflation](#). We also cover both CPIH and CPI in [Section 3: Notable movements in prices](#), though the figures reflect CPIH.

3 . Notable movements in prices

Table 2: CPIH annual and monthly inflation rates by division
UK January 2024, December 2024, and January 2025

	CPIH 12-month rate (%)		CPIH 1-month rate (%)	
	Dec 2024	Jan 2025	Jan 2024	Jan 2025
CPIH All items	3.5	3.9	-0.4	0.0
Food and non-alcoholic beverages	2.0	3.3	-0.4	0.9
Alcohol and tobacco	5.3	4.9	2.2	1.8
Clothing and footwear	1.1	1.8	-3.9	-3.3

Figure 2: Upward contributions to the change in annual CPIH inflation from six divisions, led by transport

Contributions to change in the annual CPIH inflation rate, UK, between December 2024 and January 2025

Figure 2: Upward contributions to the change in annual CPIH inflation from six divisions, led by transport

Contributions to change in the annual CPIH inflation rate, UK, between December 2024 and January 2025

Source: Consumer price inflation from the Office for National Statistics

Notes:

- 1. Individual contributions may not sum to the total because of rounding.
- 2. More information on the contents of each division can be found in Table 3 in our accompanying [Consumer price inflation dataset](#).

Figure 2 shows the contributions from the 12 divisions to the change in the annual Consumer Prices Index including owner occupiers' housing costs (CPIH) inflation rate between December 2024 and January 2025. These sum to the change in the annual rate between the latest two months, that is, the rise from 3.5% to 3.9%.

The increase in the rate into January 2025 reflected upward contributions from six divisions and downward contributions from five divisions. The largest upward contribution came from transport and the largest downward contribution came from housing and household services.

Transport

Overall prices in the transport division rose by 1.7% in the year to January 2025, compared with a fall of 0.6% in the year to December 2024 (Figure 3). On a monthly basis, prices fell by 0.5% in January 2025, compared with a fall of 2.8% a year ago.

Figure 3: Annual transport inflation at strongest rate since February 2023

Transport, motor fuels, and air fares annual inflation rates, UK, January 2015 to January 2025

Figure 3: Annual transport inflation at strongest rate since February 2023

Transport, motor fuels, and air fares annual inflation rates, UK, January 2015 to January 2025

Source: Consumer price inflation from the Office for National Statistics

The change in the annual rate was mainly the result of upward effects from air fares and from motor fuels, partially offset by a downward effect from secondhand cars.

Figure 4: Monthly fall of air fare prices into January 2025 was the smallest January fall since January 2020

Air fares price indices rebased to January each year, UK, January 2020 to January 2025

Figure 4: Monthly fall of air fare prices into January 2025 was the smallest January fall since January 2020

Air fares price indices rebased to January each year, UK, January 2020 to January 2025

Source: Consumer price inflation from the Office for National Statistics

Air fares tend to rise into December and fall into January (figure 4). However, in December 2024 and January 2025, this pattern was less pronounced than in previous years. The monthly rise in December 2024 was the third-lowest December rise since monthly price collection began in 2001, and part of the reason for this lower-than-usual growth may be because the return date for the European flights in December 2024's index was Christmas Eve, and the return date for long-haul flights was New Year's Eve.

The weaker growth into December 2024 led to a smaller fall than normal into January 2025. Air fares fell by 19.0% on the month in January 2025, up from negative 38.9% a year ago. This was the smallest January fall since January 2020 and is what led to the large positive change in contribution to the annual rate of CPIH between December 2024 and January 2025.

The average price of petrol rose by 0.8 pence per litre between December 2024 and January 2025 to stand at 137.1 pence per litre, down from 139.9 pence per litre in January 2024. Diesel prices rose by 1.5 pence per litre in January 2025 to stand at 144.1 pence per litre, down from 148.3 pence per litre in January 2024. These movements resulted in overall motor fuel prices falling by 2.2% in the year to January 2025, up from a fall of 5.0% in the year to December 2024.

Prices of secondhand cars fell by 0.4% in January 2025, compared with a monthly rise of 1.5% a year ago. On an annual basis, prices fell by 0.9% in the year to January 2025, compared with a rise of 1.0% in the year to December 2024.

Food and non-alcoholic beverages

Food and non-alcoholic beverage prices rose by 3.3% in the year to January 2025, up from 2.0% in December 2024.

Prices for this division rose by 0.9% in January 2025, up from a monthly fall of 0.4% a year ago. The annual rate of 3.3% in January 2025 compares with 7.0% to January 2024.

There were upward contributions to the change in the annual rate of inflation between December 2024 and January 2025 in 7 of the 11 food and non-alcoholic beverages classes. This is because prices rose this year but either fell or rose at a slower rate between the same two months last year. The contributions came from:

- meat (0.04 percentage points (pp))
- bread and cereals (0.03pp)
- fish (0.01pp)
- milk, cheese and eggs (0.01pp)
- sugar, jam, honey, syrups, chocolate and confectionery (0.01pp)
- coffee, tea and cocoa (0.01pp)
- mineral waters, soft drinks and juices (0.01pp)

The other four classes were little changed.

Further details on the items that provided notable upward and downward contributions to the change in the annual rate can be found in our [Consumer price inflation detailed briefing note](#).

Education

The annual inflation rate for education was 7.5% in the year to January 2025, up from 5.0% in December 2024. On a monthly basis, prices rose by 2.4% in January 2025, but did not change a year ago.

The only item that changed price in the education division was private school fees, where prices rose by 12.7% on the month but did not change a year ago. A contributing factor to the rise in private school fees may have been education and boarding services provided by private schools becoming subject to VAT at the standard rate of 20%.

Housing and household services

The annual inflation rate for housing and household services was 5.6% in the year to January 2025, down from 6.0% in December 2024. On a monthly basis, prices rose by 0.5% in January 2025, compared with a rise of 0.9% a year ago.

The 0.4 percentage-point decrease in the annual rate between December 2024 and January 2025 was mainly the result of downward effects from gas (a decrease of 0.07pp) and electricity (a decrease of 0.05pp). Gas prices rose by 1.3% between December 2024 and January 2025 having risen by 6.8% a year ago. Electricity prices rose by 1.2% between December 2024 and January 2025, having risen by 4.0% a year ago.

Owner occupiers' housing (OOH) costs rose by 8.0% in the year to January 2025, the same rate as in December 2024. The latest figure is the joint-highest since February 1992 when the rate was 8.6% in the constructed historical series.

4 . Latest movements in CPIH inflation

Figure 5: CPIH core annual inflation rate at highest rate since March 2024

CPIH goods, services and core annual inflation rates, UK, January 2015 to January 2025

Figure 5: CPIH core annual inflation rate at highest rate since March 2024

CPIH goods, services and core annual inflation rates, UK, January 2015 to January 2025

Source: Consumer price inflation from the Office for National Statistics

Figure 5 shows the annual inflation rates for the Consumer Prices Index including owner occupiers' housing costs (CPIH) series for all goods and all services, together with CPIH excluding energy, food, alcohol and tobacco (often referred to as core CPIH). The CPIH inflation rate is added for comparison.

The CPIH all services index rose by 5.8% in the year to January 2025, up from 5.4% in December 2024. This is the highest rate since August 2024, and the largest upward contributions to the change in the annual rate came from transport services (particularly passenger transport by air) and miscellaneous and other services (particularly education).

The CPIH all goods index rose by 1.0% in the year to January 2025, up from 0.7% in the 12 months to December. This is the highest rate since February 2024 and the largest upward contributions to the change in the annual rate came from food and non-alcoholic beverages (particularly meat, and bread and cereals) and non-energy industrial goods (particularly motor fuels).

The core CPIH annual inflation rate was 4.6% in the year to January 2025, up from 4.2% in December 2024. This is the highest rate since March 2024.

Figure 6: Contribution to the annual CPIH rate from transport largest since February 2023

Contributions to the annual CPIH inflation rate, UK, January 2023 to January 2025

Figure 6: Contribution to the annual CPIH rate from transport largest since February 2023

Contributions to the annual CPIH inflation rate, UK, January 2023 to January 2025

Source: Consumer price inflation from the Office for National Statistics

Notes:

1. Individual contributions may not sum to the total because of rounding.
2. More information on the contents of each division can be found in Table 3 in our accompanying [Consumer price inflation dataset](#).

Figure 6 shows the extent to which the distinct categories of goods and services have contributed to the overall annual CPIH inflation rate over the last two years. The contribution of each category to the annual rate depends on the price movement in that category as well as its weight, which is updated annually.

The largest upward contributions to the annual CPIH inflation rate in January 2025 came from the housing and household services, restaurants and hotels, and recreation and culture divisions.

The contribution from the transport division was the largest since February 2023.

Figure 7: Contribution from owner occupiers' housing costs grew stronger for the 13th consecutive month

Contributions of housing components to the annual CPIH inflation rate, UK, January 2015 to January 2025

Figure 7: Contribution from owner occupiers' housing costs grew stronger for the 13th consecutive month

Contributions of housing components to the annual CPIH inflation rate, UK, January 2015 to January 2025

Source: Consumer price inflation from the Office for National Statistics

Notes:

1. Individual contributions may not sum to the total because of rounding.

Figure 7 shows the contribution of owner occupiers' housing costs (OOH) and Council Tax to the annual CPIH inflation rate in the context of wider housing-related costs. The Consumer Prices Index (CPI) differs from the CPIH because it does not include these two components.

OOH's contribution rose from 1.30 to 1.31 percentage points between December 2024 and January 2025. This was the 13th consecutive month that the contribution from OOH grew stronger.

5 . Latest movements in CPI inflation

While the Consumer Prices Index including owner occupiers' housing costs (CPIH) is our lead and most comprehensive measure of consumer price inflation, the Consumer Prices Index (CPI) is based on a harmonised methodology developed by Eurostat and allows for international comparisons to be drawn. For more information on the use cases for our consumer price inflation statistics, please refer to our [Measuring changing prices and costs for consumers and households: December 2023 article](#).

Figure 8 shows annual CPI inflation for the UK against the European Union (EU) average and selected Group of Seven (G7) countries. While the UK CPI is produced on a comparable basis with EU countries, the United States Harmonised Index of Consumer Prices (HICP) measure differs in some respects (see Footnote 1 of Figure 8). The UK's CPI inflation rate of 3.0% was above the first (or "flash") estimates of inflation for France (1.8%) and Germany (2.8%) in the 12 months to January 2025.

Figure 8: UK inflation above estimate for France and Germany

CPI compared with selected G7 and EU annual inflation rates, January 2015 to January 2025

Figure 8: UK inflation above estimate for France and Germany

CPI compared with selected G7 and EU annual inflation rates, January 2015 to January 2025

Source: Consumer price inflation from the Office for National Statistics, Eurostat, and the US Bureau of Labor Statistics

Notes:

1. There are some differences in the definition of the US Harmonised Index of Consumer Prices (HICP) that may limit comparison; more information is available on the [US Bureau of Labor Statistics R-HICP homepage](#).
2. January 2025 data for France and Germany are flash estimates and are not final; the final HICP dataset, including the EU27 aggregate for January 2025, is published on Monday 24 February 2025. The latest Euro area inflation estimates can be found on the [Eurostat website](#).

Table 3: CPI annual and monthly inflation rates by division
UK January 2024, December 2024, and January 2025

	CPI 12-month rate (%)		CPI 1-month rate (%)	
	Dec 2024	Jan 2025	Jan 2024	Jan 2025

Figure 9: CPI core annual inflation rate was last higher in April 2024

CPI goods, services and core annual inflation rates, UK, January 2015 to January 2025

Figure 9: CPI core annual inflation rate was last higher in April 2024

CPI goods, services and core annual inflation rates, UK, January 2015 to January 2025

Source: Consumer price inflation from the Office for National Statistics

Figure 9 shows the annual inflation rates for the CPI all goods and all services series, together with CPI excluding energy, food, alcohol and tobacco (often referred to as core CPI). The headline CPI inflation rate is added for comparison.

The CPI all services index rose by 5.0% in the year to January 2025, up from 4.4% in December 2024. The rate was last higher in August 2024.

The CPI all goods index rose by 1.0% in the year to January 2025, up from 0.7% in the year to December 2024. This is the highest rate since February 2024.

The core CPI annual inflation rate was 3.7% in the year to January 2025, up from 3.2% in December 2024. This is the highest rate since April 2024.

As with the all-items annual inflation rates, the drivers of CPIH and CPI goods and services inflation are the same (with the exception of owner occupiers' housing costs (OOH) and Council Tax, which are excluded from CPI). The drivers are discussed in more detail in [Section 4: Latest movements in CPIH inflation](#).

Figure 10: Upward contributions to the change in annual CPI inflation from six divisions, led by transport

Contributions to change in the annual CPI inflation rate, UK, between December 2024 and January 2025

Figure 10: Upward contributions to the change in annual CPI inflation from six divisions, led by transport

Contributions to change in the annual CPI inflation rate, UK, between December 2024 and January 2025

Source: Consumer price inflation from the Office for National Statistics

Notes:

1. Individual contributions may not sum to the total because of rounding.
2. More information on the contents of each division can be found in Table 4 in our accompanying [Consumer price inflation dataset](#).

Figure 10 shows how each of the main groups of goods and services contributed to the change in the annual CPI inflation rate between December 2024 and January 2025.

The rise in the annual CPI rate into January 2025 reflected upward contributions from six divisions, partially offset by a downward contribution from five divisions. The largest upward contributions came from transport, food and non-alcoholic beverages, and education.

Although the sizes of the contributions differ from CPIH, the main drivers to the change are the same where they are common to both measures.

Figure 11: Positive contributions to annual CPI from 10 divisions, led by recreation and culture, and restaurants and hotels

Contributions to the annual CPI inflation rate, UK, January 2023 to January 2025

Figure 11: Positive contributions to annual CPI from 10 divisions, led by recreation and culture, and restaurants and hotels

Contributions to the annual CPI inflation rate, UK, January 2023 to January 2025

Source: Consumer price inflation from the Office for National Statistics

Notes:

1. Individual contributions may not sum to the total because of rounding.

Figure 11 shows the extent to which the distinct categories of goods and services have contributed to the overall annual CPI inflation rate over the last two years.

The CPIH includes extra housing components not included in the CPI. This can result in the largest contributions to the annual CPI and CPIH inflation rates coming from different divisions. In January 2025, the largest-contributing division to CPI was recreation and culture (0.54 percentage point contribution to the CPI rate) whereas the largest-contributing division to CPIH was housing and household services. OOH had a large upward contribution to housing and household services in CPIH, but is excluded from CPI.

6 . Data on consumer price inflation

[Consumer price inflation tables](#)

Dataset | Released 19 February 2025

Measures of monthly UK inflation data including the Consumer Prices Index including owner occupiers' housing costs (CPIH), Consumer Prices Index (CPI) and Retail Prices Index (RPI). These tables complement the consumer price inflation time series dataset. Please note that from the publication on Wednesday 26 March onwards we will be publishing fewer tables to avoid duplication and to remove discontinued series. Table 58 in this month's release details which tables will no longer be published and provides alternative sources for where the content in those tables can be found.

[Consumer price inflation time series](#)

Dataset MM23 | Released 19 February 2025

Comprehensive database of time series covering measures of inflation data for the UK including the CPIH, CPI and RPI.

[Consumer price inflation detailed briefing note](#)

Dataset | Released 19 February 2025

The consumer price inflation detailed briefing note contains details of the items contributing to the changes in the CPIH, details of any notable movements, a summary of the reconciliation of CPIH and RPI, and the outlook, which looks ahead to next month's release.

[Contributions to the 12-month rate of CPI\(H\) by import intensity](#)

Dataset | Released 19 February 2025

A time series of the contributions to the CPIH and CPI annual rates broken down by the import intensity of household purchases.

[Consumer price inflation item indices and price quotes](#)

Dataset | Released 19 February 2025

Price quote data (for locally collected items only) and item indices that underpin consumer price inflation statistics are published, giving user access to the detailed data that are used in the construction of the UK's inflation figures.

Please see information about the move from sample items to broader consumption segments in [Section 8: Data sources and quality](#).

7 . Glossary

Annual inflation rate

The most common approach to measuring inflation is the 12-month or annual inflation rate, which compares prices for the latest month with the same month a year ago. In any given month, the annual rate is determined by the balance between upward and downward price movements across the range of goods and services included in the index.

Consumer price inflation

Consumer price inflation is the rate at which the prices of goods and services bought by households rise or fall. It is estimated by using price indices. For an overview of the range of indices available and their uses, please see our [Consumer price indices, a brief guide: 2017](#) and our [Measuring changing prices and costs for consumers and households: December 2023 article](#).

CPIH

The Consumer Prices Index including owner occupiers' housing costs (CPIH) is the most comprehensive measure of inflation. It extends the Consumer Prices Index (CPI) to include a measure of the costs associated with owning, maintaining and living in one's own home, known as owner occupiers' housing costs (OOH), along with Council Tax. Both are substantial expenses for many households and are not included in the CPI.

CPI

The CPI is a measure of consumer price inflation produced to international standards and is based on European regulations for the [Harmonised Index of Consumer Prices](#). The CPI is the inflation measure used in the government's target for inflation.

The CPI is produced at the same level of detail as the CPIH in our [accompanying dataset](#) and [accompanying data time series](#).

Owner occupiers' housing (OOH) costs

OOH costs are the costs of housing services associated with owning, maintaining and living in one's own home.

RPI

The Retail Prices Index (RPI) does not meet the required standard for designation as an [accredited official statistic](#). In recognition that it continues to be widely used in contracts, we continue to publish the RPI, its subcomponents, and RPI excluding mortgage interest payments (RPIX). To view the all-items RPI, please see the [data time series section of the inflation and price indices area of our website](#). The annual RPI inflation rate was 3.6% in January 2025.

The UK Statistics Authority (The Authority) and HM Treasury launched a consultation in 2020 on The Authority's proposal to address the shortcomings of the RPI. From 2030 (at the earliest), as outlined in [The Authority's response to the consultation](#), the CPIH methods and data sources will be introduced into the RPI. Additionally, the supplementary and lower-level indices of the RPI will be discontinued.

8 . Data sources and quality

Classification Of Individual Consumption According to Purpose (COICOP)

The Classification of Individual Consumption According to Purpose (COICOP) is the classification that underpins some of the main statistics produced by the Office for National Statistics (ONS). The [classification has seen a substantial update \(PDF, 2.51MB\)](#) in recent years, to reflect changes in household expenditure patterns since its inception in the late 1990s. The UK currently uses the version of COICOP introduced in 1999.

We will ensure that the new classification is implemented in a comprehensive and reliable manner that considers other ONS priorities around the transformation of our main statistics. To meet this objective, we will aim to introduce the new classification (COICOP 2018) as soon as possible, as part of our wider plans to implement the updated System of National Accounts (SNA25). However, this is likely to be later than the date for implementation in some other countries. We will share our implementation plan in due course.

For further information please contact cpi@ons.gov.uk.

Passenger transport by air

While we already publish a monthly index for passenger transport by air, from 26 March 2025, we will also publish annual price indices and weights split by domestic flights, European flights and long-haul flights.

Alternative data sources

We are undertaking a programme of transformation across our consumer price statistics, including identifying new sources, improving methods and developing systems. More information about the project and our ongoing transformation plans can be found in our [Transformation of consumer price statistics: August 2024 article](#), released on 6 August 2024. We also published our [updated development plan](#) to outline the rationale for our priorities and their potential impact.

We also plan to introduce improved imputation methods, consumption segments and Northern Ireland private rental price statistics as part of our ongoing improvements. These method changes will be introduced into our headline measures (CPI, CPIH, and RPI) from February 2025 (to be published on 26 March 2025) and the Household Costs Indices from February 2025 (to be published on 29 May 2025). We have published an [impact analysis](#) to provide users with indicative improvements to our consumer price statistics from January 2019 to June 2024.

As usual, we welcome your feedback on our work by email to cpi@ons.gov.uk.

Weights for 2025 consumer price inflation statistics

In line with usual practice at the start of each year, the expenditure weights used in compiling the Consumer Prices Index including owner occupiers' housing costs (CPIH) and the Consumer Prices Index (CPI) have been calculated using updated spending information. The first update of weights has been implemented in this month's indices, with the second update of weights along with the usual basket update to follow in the February index. We will publish an [article explaining updates to CPI weights](#) and an [article explaining the update to the CPI basket of goods and services](#) on 18 March 2025.

Owing to the unprecedented events of the last few years and the larger changes seen in spending patterns in 2021, 2022 and 2023, in the years immediately preceding 2024, we adjusted the spending data so that the resulting weights were more reflective of the year immediately before use in consumer price inflation. More information is available in our [Consumer price inflation, updating weights articles](#).

Since the final coronavirus (COVID-19) lockdown occurred in 2021, we reverted to our standard methodology and used unadjusted spending data to produce the 2024 CPIH and CPI weights. The weights for the Retail Prices Index (RPI) were not adjusted for changed spending patterns in 2021 to 2023. We will now continue to use the unadjusted spending data for ongoing weights updates.

In line with the improvements introduced last year, we now use unrounded weights in compiling CPIH and CPI. The weights prior to 2024 for the CPI and CPIH were rounded to integers as parts per thousand of the all items indices at the class level (4-digit COICOP). The RPI will continue to be based on integer weights.

Households and the cost of living

To assist individuals in understanding how the rise in inflation affects their expenditure, we have produced a [personal inflation calculator](#). The calculator allows users to enter the amount they spend across either a reduced or a wide range of categories, to produce an estimate of their personal inflation based on those spending patterns.

Our [shopping prices comparison tool](#) shows how the average prices of items have changed over time. However, please note the shopping prices comparison tool will not update with February 2025 data on 26th March 2025. This is to allow us to update the tool to account for the changes we plan to bring in as part of the planned improvements to our consumer price statistics. For more information on the improvements we plan to introduce from February 2025 (published in March 2025) please see [Impact analysis on transformation of UK consumer price statistics - Office for National Statistics](#).

Please also note that from next month table 55 in our [Consumer price inflation dataset](#), which provides a time series of prices for petrol and for diesel, will no longer be published as this series has been discontinued. However, historic average prices will still be available using the CDID explorer function on the website using CZML for diesel and CZMK for petrol.

On 28 November 2024, we published our quarterly [Household Costs Indices \(HCIs\) for UK household groups bulletin](#). The HCIs reflect how different types of households experience changing prices and differ from CPIH and CPI, which are based on recognised economic principles, and which provide an aggregate measure of inflation for household spending in the UK.

The HCIs are [official statistics in development](#) and this release included new estimates for July to September 2024. It was not possible for this latest release to update the weights for 2024 in line with the standard methodology for consumer prices. This is because of delays in processing the underlying survey data and the need for further ongoing quality assurance. Instead, the most recent estimates have been compiled using the weights for February to December 2023. We aim to update the weights in the second quarter (April to June) of 2025.

Consumer price inflation historical estimates, UK, 1950 to 1988

On 18 May 2022, we published our [Consumer price inflation, historical estimates, UK, 1950 to 1988 – methodology](#) and our [Consumer price inflation, historical estimates and recent trends, UK: 1950 to 2022 article](#). These include new estimates of CPIH and improved estimates of CPI for the period 1950 to 1988. These estimates (published in response to user need for a longer series) are indicative and are for analytical purposes only. They are not intended for official use and do not constitute part of the [accredited official statistic](#) series.

Previously, in December 2018, we published our [Consumer Prices Index including owner occupiers' housing costs \(CPIH\) historical series: 1988 to 2004 article](#). This series is also not an accredited official statistic, reflecting the historical uncertainty around the backcasts.

Moving from sample items to broader consumption segments

Please note that the move from sample items to broader consumption segments (see the [impact analysis article](#) we published in January 2025) means there will be an impact on the individual price quotes and lower level indices we publish from March 2025. These outputs will be updated and presented in an improved format to help users transition to the use of consumption segments and other methodological changes we are making in 2025.

We have published an updated Glossary edition of our [Consumer price inflation item indices and price quotes dataset](#) this month, which sets out the changes that will be made from March 2025.

Methodology information

The consumer price indices are normally based on prices collected from outlets around the country, supplemented by information collected centrally over the internet and by phone. The figures in this publication use data collected on or around 14 January 2025.

Our [Consumer price indices, a brief guide](#) gives an overview of consumer price statistics, while our [Consumer prices indices technical manual](#) covers the concepts and methodologies underpinning the indices in more detail.

Our [CPIH Compendium](#) provides a comprehensive source of information on the CPIH, focusing on the approach to measuring owner occupiers' housing costs.

Our [Users and uses of consumer price inflation statistics: July 2018 update](#) includes information on the users and uses of these statistics, and the characteristics of the different measures of inflation in relation to potential use.

Strengths and limitations

We illustrated our approach to [Measuring changing prices and costs for consumers and households](#) most recently in December 2023 using three "use cases", and described how they relate to the measures published and under development.

The three cases refer firstly to the Consumer Prices Index including owner occupiers' housing costs (CPIH) as our lead measure of inflation based on economic principles. They also refer to the Household Costs Indices (HCIs) as a set of measures that reflect the change in costs and prices experienced by different households, and the Retail Prices Index (RPI) as a legacy measure that is required to meet existing user needs. Our [Shortcomings of the RPI as a measure of inflation article](#) describes the issues with the RPI.

Accredited official statistics

These accredited official statistics were independently reviewed by the Office for Statistics Regulation in July 2017. They comply with the standards of trustworthiness, quality and value in [the Code of Practice for Statistics](#) and should be labelled "accredited official statistics".

Key: - zero or negligible

1 From the release of January consumer price inflation data on 16 February 2016, CPIH and CPI indices have been re-referenced and published with 2015=100. Full historic series for each of the re-referenced indices are available for users to view or download. Regular re-referencing of indices is methodological good practice as it avoids rounding issues that can arise from small index values. Please note that re-referencing does not impact on published inflation rates, although when using the indices to calculate inflation rates, it is important to use indices that are referenced on the same year. Re-referencing does not impact on RPI. For more information, please contact cpi@ons.gsi.gov.uk.

2 The Retail Prices Index and its derivatives do not meet the required standards for designation as National Statistics. A full report can be found at <http://www.statisticsauthority.gov.uk/>.

3 The series CPIY, CPI-CT and CPIHY were discontinued in January 2022, with the final estimates referring to price change in the period December 2021.

1 As a direct result of the reduced availability of products due to the coronavirus (COVID-19) pandemic, some series are based on less than half of the number of quotes used in February 2020 (the most recent 'normal' collection). To identify which series are affected please consult

the latest Consumer price inflation tables which can be located here: <https://www.ons.gov.uk/economy/inflationandpriceindices/datasets/consumerpriceinflation>, which includes notation to reflect the reduced coverage.

1 As a direct result of the reduced availability of products due to the coronavirus (COVID-19) pandemic, some series are based on less than half of the number of quotes used in February 2020 (the most recent 'normal'

collection). To identify which series are affected, please consult the latest Consumer price inflation tables which can be located here: <https://www.ons.gov.uk/economy/inflationandpriceindices/datasets/consumer-priceinflation>, which includes notation to reflect the reduced coverage.

1 From the release of January consumer price inflation data on 16 February 2016, CPIH and CPI indices have been re-referenced and published with 2015=100. Full historic series for each of the re-referenced indices are available for users to view or download. Regular re-referencing of indices is methodological good practice as it avoids rounding issues that can arise from small index values. Please note that re-referencing does not impact on published inflation rates, although when using the indices to calculate inflation rates, it is important to use indices that are referenced on the same year. Re-referencing does not impact on RPI. For more information, please contact cpi@ons.gsi.gov.uk.

2 More detailed CPIH, CPI and RPI data are available at: <http://www.ons.gov.uk>.

1 From the release of January consumer price inflation data on 16 February 2016, CPIH & CPI indices have been re-referenced and published with 2015=100. Full historic series for each of the re-referenced indices are available for users to view or download. Regular re-referencing of indices is methodological good practice as it avoids rounding issues that can arise from small index values. Please note that re-referencing does not impact on published inflation rates, although when using the indices to calculate inflation rates, it is important to use indices that are referenced on the same year. Re-referencing does not impact on RPI. For more information, please contact cpi@ons.gsi.gov.uk.

2 More detailed CPIH, CPI and RPI data are available at: <http://www.ons.gsi.gov.uk>.

1 For further information on the composition of the indices shown, see 'The Consumer Prices Index: Goods and Services Indices and Special Aggregates', which can be downloaded from: <http://webarchive.nationalarchives.gov.uk/20160105160709/http://ons.gov.uk/>

2 The coverage of this special aggregate has changed extensively since January 2000, when Social protection was first included and extensions to the Education and Health divisions also took effect. Health was further extended with effect from January 2001.

3 Energy includes electricity, gas and other fuels, and fuels and lubricants.

Key: - zero or negligible

1 Comprises 'Electricity, gas and other fuels' (group 04.5) and 'Fuels and lubricants' (class 07.2.2).

2 Comprises all other goods elements of the CPI.

3 For further information on all of these services components, see 'The Consumer Prices Index: Goods and Services Indices and Special Aggregates', which can be downloaded from: <http://webarchive.nationalarchives.gov.uk/20160105160709/http://ons.gov.uk/>

Key: - zero or negligible .. Not available

1 Published as the CPI in the UK.

2 Aggregate for European Union with 27 Member States.

Following user requests, on 10 April 2018 Eurostat began to publish in its database an aggregate for the EU with 27 Member States for around 50 most in-demand indicators, such as population, GDP growth rate and unemployment.

3 Data for the former EU28 aggregate.

For reference periods February 2020 or later, Eurostat no longer calculates or publishes the former EU 28 aggregate. This means that the final time periods for which the EU28 aggregate is published are January 2020, fourth quarter 2019 or the year 2019 depending on the frequency of the dataset. Eurostat will maintain historic data for EU28 in the database and will update as revisions are received.

4 The coverage of the Monetary Union Indices of Consumer Prices (MUICP) was extended to include Greece with effect from Jan 2001 and Slovakia from Jan 2009.

5 Following the end of the transition period, we have ceased to publish the Harmonised Index of Consumer Prices (HICP) international comparisons for EU countries in this table. The international comparisons will continue to be available on the Eurostat website. <https://ec.europa.eu/eurostat/web/main/data/database>

Key: - zero or negligible

1 An error was identified in the dataset underpinning the 2019 RPI weights covering the period February to June 2019. In line with the consumer price inflation statistics revision policy RPI was not revised. The corrected weights have been used for the July 2019 RPI onwards. Users should note there is a discontinuity between June's and July's index levels, which have been calculated using differing weights.

2 The Retail Prices Index and its derivatives do not meet the required standards for designation as National Statistics. A full report can be found at <http://www.statisticauthority.gov.uk>.

3 As a direct result of the reduced availability of products due to the coronavirus (COVID-19) pandemic, some series are based on less than half of the number of price quotes used in February 2020 (the most recent 'normal' collection). To identify which series are affected, please the latest Consumer price inflation tables which can be found here: <https://www.ons.gov.uk/economy/inflationandpriceindices/datasets/consumerpriceinflation>, which includes notation to reflect the reduced coverage.

4 Index date for January: 14 January 2025

Key: - zero or negligible

1 All components of the RPI are included in the above breakdown with the exception of mortgage interest payments, council tax and depreciation.

2 Including fuel oil.

3 The 'other goods' category comprises DIY materials, coal & solid fuels, household goods, clothing & footwear, personal articles, chemists goods, purchase of motor vehicles and leisure goods.

4 The 'utilities' category comprises water, electricity, gas, postage, telephone charges and rail fares.

5 The 'shop services' category comprises catering, repairs & maintenance charges, domestic services, personal services, maintenance of motor vehicles, TV licence & rentals and entertainment & recreation charges.

6 The 'non-shop services' category comprises dwelling insurance & ground rent, fees and subscriptions, vehicle tax and insurance, bus & coach fares, other travel costs, foreign holidays and UK holidays.

7 The Retail Prices Index and its derivatives do not meet the required standards for designation as National Statistics. A full report can be found at: <http://www.statisticsauthority.gov.uk/>.

8 An error was identified in the dataset underpinning the 2019 RPI weights covering the period February to June 2019. In line with the consumer price inflation statistics revision policy RPI was not revised. The corrected weights have been used for the July 2019 RPI onwards. Users should note there is a discontinuity between June's and July's index levels, which have been calculated using differing weights.
