1 . Main points

- The Consumer Prices Index including owner occupiers' housing costs (CPIH) rose by 2.8% in the 12 months to June 2026, down from 3.0% the previous month.
- On a monthly basis, CPIH rose by 0.2% in June 2026, compared with a rise of 0.3% in June 2025.
- The Consumer Prices Index (CPI) rose by 2.6% in the 12 months to June 2026, down from 2.8% the previous month.
- On a monthly basis, CPI rose by 0.1% in June 2026, compared with a rise of 0.3% in June 2025.
- Transport, and food and non-alcoholic beverages made the largest downward contributions to the monthly change in both CPIH and CPI annual rates.
- Core CPIH (CPIH excluding energy, food, alcohol and tobacco) rose by 2.8% in the 12 months to June 2026, unchanged from the 12 months to May; the CPIH goods annual rate slowed from 2.0% to 1.7%, while the CPIH services annual rate was unchanged, at 3.6%.
- Core CPI (CPI excluding energy, food, alcohol and tobacco) rose by 2.6% in the 12 months to June 2026, unchanged from the 12 months to May; the CPI goods annual rate slowed from 2.0% to 1.7%, while the CPI services annual rate eased from 3.7% to 3.6%.

2 . Consumer price inflation rates

Table 1: CPIH, OOH component and CPI index values, and annual and monthly rates
UK, June 2025 to June 2026

	CPIH Index (UK, 2015 = 100)	CPIH 12-month rate (%)	CPIH 1-month rate (%)	CPI Index (UK, 2015=100)	CPI 12-month rate (%)	CPI 1-month rate (%)	OOH Index (UK, 2015=100)	OOH 12-month rate (%)

CPIH, owner occupiers' housing (OOH) costs component and CPI annual inflation rates, UK, June 2016 to June 2026

Figure 1: CPIH and CPI annual inflation rates were last lower in late 2024

CPIH, owner occupiers' housing (OOH) costs component and CPI annual inflation rates, UK, June 2016 to June 2026

Source: Consumer price inflation from the Office for National Statistics

The Consumer Prices Index including owner occupiers' housing costs (CPIH) rose by 2.8% in the 12 months to June 2026, down from 3.0% the previous month (Figure 1). The 12-month rate for June was the lowest recorded since September 2024, when it was 2.6%.

On a monthly basis, CPIH rose by 0.2% in June 2026, compared with a rise of 0.3% in June 2025.

The Consumer Prices Index (CPI) rose by 2.6% in the 12 months to June 2026, down from 2.8% the previous month. The 12-month rate was also 2.6% in March 2025 and it was last lower in December 2024, when it was 2.5%.

On a monthly basis, CPI rose by 0.1% in June 2026, compared with a rise of 0.3% in June 2025.

The main drivers of the annual inflation rate for CPIH and CPI are the same where they are common to both measures. However, the owner occupiers' housing (OOH) costs component accounts for approximately 18% of the CPIH and is the main driver for differences between the CPIH and CPI inflation rates.

This makes CPIH our most comprehensive measure of inflation. We cover this in more detail in [Section 4: Latest movements in CPIH inflation](#) and provide a commentary on the CPI in [Section 5: Latest movements in CPI inflation](#). We also cover both CPIH and CPI in [Section 3: Notable movements in prices](#), though the figures reflect CPIH.

3 . Notable movements in prices

Table 2: CPIH annual and monthly inflation rates by division
UK, June 2025, May 2026, and June 2026

	CPIH 12-month rate (%)		CPIH 1-month rate (%)	
	May 2026	June 2026	June 2025	June 2026
CPIH All items	3.0	2.8	0.3	0.2
Food and non-alcoholic beverages	2.2	1.7	0.3	-0.2
Alcohol and tobacco	2.4	2.1	0.5	0.1

Figure 2: Transport, particularly motor fuels, led the downward contributions to change in CPIH annual inflation

Contributions to change in the CPIH annual inflation rate, UK, between May and June 2026

Figure 2: Transport, particularly motor fuels, led the downward contributions to change in CPIH annual inflation

Contributions to change in the CPIH annual inflation rate, UK, between May and June 2026

Source: Consumer price inflation from the Office for National Statistics

Notes:

1. Individual contributions may not sum to the total because of rounding.
2. More information on the contents of each division can be found in Table 3 of our [Consumer price inflation dataset](#).

Figure 2 shows the contributions from the 12 divisions to the change in the annual Consumer Prices Index including owner occupiers' housing costs (CPIH) inflation rate between May and June 2026. These sum to the change in the annual rate, from 3.0% to 2.8%, between these months.

The decrease in the 12-month rate between May and June 2026 reflected downward contributions from five divisions, partially offset by upward contributions from three divisions. The largest downward contribution came from transport, particularly motor fuels. There were no large, offsetting upward contributions.

Transport

Prices in the transport division rose overall by 5.7% in the 12 months to June 2026, down from 6.8% the previous month (Figure 3). On a monthly basis, prices fell by 0.3% in June 2026, compared with a rise of 0.7% a year ago.

Figure 3: Transport inflation rate slowed in June 2026

CPIH, transport and motor fuels 12-month inflation rates, UK, June 2016 to June 2026

Figure 3: Transport inflation rate slowed in June 2026

CPIH, transport and motor fuels 12-month inflation rates, UK, June 2016 to June 2026

Source: Consumer price inflation from the Office for National Statistics

The largest downward effect behind the slowing in the transport annual rate came from motor fuels, particularly diesel.

The average price of diesel fell by 10.7 pence per litre between May and June 2026, compared with a fall of 0.6 pence per litre between May and June 2025. The average price stood at 176.4 pence per litre in June 2026.

Petrol prices fell by 2.1 pence per litre in June 2026, compared with a fall of 0.5 pence per litre in June 2025. The average price stood at 155.3 pence per litre in June 2026. This is the first time petrol prices have eased since the start of the conflict in the Middle East, on 28 February 2026.

These movements resulted in overall motor fuel prices rising by 21.3% in the 12 months to June 2026, compared with a rise of 24.6% in the 12 months to May, which was the highest recorded rate since September 2022.

Within transport, there was a smaller downward effect from vehicle maintenance and repair. Prices fell by 0.2% in June 2026, compared with a rise of 2.0% in June 2025. The movements were caused by price changes for roadside recovery services.

Food and non-alcoholic beverages

Food and non-alcoholic beverage prices rose by 1.7% in the 12 months to June 2026, down from 2.2% the previous month (Figure 4). The annual rate in June was the lowest since August 2024, when it was 1.3%. On a monthly basis, food and non-alcoholic beverage prices fell by 0.2% in June 2026, compared with a rise of 0.3% a year ago.

Figure 4: Food and non-alcoholic beverages inflation rate was at its lowest since August 2024

CPIH, and food and non-alcoholic beverages 12-month inflation rates, UK, June 2016 to June 2026

Figure 4: Food and non-alcoholic beverages inflation rate was at its lowest since August 2024

CPIH, and food and non-alcoholic beverages 12-month inflation rates, UK, June 2016 to June 2026

Source: Consumer price inflation from the Office for National Statistics

There were small downward effects behind the change in the annual rate from 5 of the 11 detailed classes. The largest of these effects came from sugar, jam, syrups, chocolate and confectionery, for which prices of chocolate fell by more in June 2026 than June 2025. This class made a downward contribution of 0.02 percentage points to the change in the CPIH inflation rate.

Other slightly smaller downward effects came from oils and fats (particularly margarine and other vegetable oils), meat (particularly beef), dairy, and vegetables. Prices of oils and fats, and dairy, fell in June 2026, compared with a price rise and little change a year ago, respectively. Meat and vegetable prices rose in June 2026 but by less than in June 2025.

The other six detailed classes within food and non-alcoholic beverages had little effect on the change in the headline rate. These were bread and cereals, fish, fruit, other food products, hot beverages, and soft drinks.

Clothing and footwear

Clothing and footwear prices fell by 0.5% in the 12 months to June 2026, compared with a rise of 0.2% the previous month.

On a monthly basis, prices fell by 1.2% in June 2026, compared with a smaller fall of 0.4% in June 2025. Prices tend to fall in June as the summer sales season begins, and the movements reflect changes in the proportion of discounted prices in the datasets. This proportion rose between May and June this year by more than the rise seen over the same period a year ago.

4 . Latest movements in CPIH inflation

Figure 5: Core CPIH annual inflation was unchanged in June 2026

CPIH goods, services and core annual inflation rates, UK, June 2016 to June 2026

Figure 5: Core CPIH annual inflation was unchanged in June 2026

CPIH goods, services and core annual inflation rates, UK, June 2016 to June 2026

Source: Consumer price inflation from the Office for National Statistics

Figure 5 shows the 12-month inflation rates for the Consumer Prices Index including owner occupiers' housing costs (CPIH) series for all goods and all services, together with CPIH excluding energy, food, alcohol and tobacco (often referred to as core CPIH). The CPIH inflation rate is added for comparison.

The core CPIH annual inflation rate was 2.8% in June 2026, the same rate as in April and May. These are the joint lowest rates since September 2021.

The CPIH all-goods index rose by 1.7% in the 12 months to June 2026, down from 2.0% the previous month. There were large downward contributions to the change in the annual rate from energy, particularly motor fuels and domestic heating oil, and from food, alcoholic beverages and tobacco.

The CPIH all-services index rose by 3.6% in the 12 months to June 2026, unchanged from the 12 months to May. The upward and downward contributions to the change in the annual rate were small and offset one another. The largest downward contribution came from services for personal transport equipment, and the largest upward contribution came from package holidays and accommodation.

Figure 6: Housing and household services contributed the most to the CPIH annual inflation rate for 24 consecutive months, starting from July 2024

Contributions to the CPIH annual inflation rate, UK, June 2024 to June 2026

Figure 6: Housing and household services contributed the most to the CPIH annual inflation rate for 24 consecutive months, starting from July 2024

Contributions to the CPIH annual inflation rate, UK, June 2024 to June 2026

Source: Consumer price inflation from the Office for National Statistics

Notes:

1. Individual contributions may not sum to the total because of rounding.
2. More information on the contents of each division can be found in Table 3 of our [Consumer price inflation dataset](#).

Figure 6 shows the extent to which the distinct categories of goods and services have contributed to the overall annual CPIH inflation rate over the last two years. The contribution of each category to the annual rate depends on the price movement in that category and its weight, which is updated annually.

The largest positive contribution to the CPIH annual inflation rate came from housing and household services. The division has made the largest contribution for the last 24 months, starting from July 2024. However, its contribution has eased from a recent high in April 2025, and was unchanged between May and June 2026. The contributions in the latest two months were jointly the smallest since June 2024.

The contribution from food and non-alcoholic beverages has also broadly eased over recent months. It was 0.15 percentage points in June 2026, the smallest since August 2024.

Similarly, the contribution from alcohol and tobacco has eased over the last year. It was 0.06 percentage points in June 2026, the smallest since July 2021, when it was also 0.06 percentage points. The contribution was last smaller in March 2020.

In contrast, the contribution from restaurants and hotels has risen to 0.49 percentage points in June 2026, the largest contribution since October 2024.

Figure 7: Annual contribution from owner occupiers' housing costs rose slightly between May and June 2026, the first rise since January 2025

Contributions of housing components to the CPIH annual inflation rate, UK, June 2016 to June 2026

Figure 7: Annual contribution from owner occupiers' housing costs rose slightly between May and June 2026, the first rise since January 2025

Contributions of housing components to the CPIH annual inflation rate, UK, June 2016 to June 2026

Source: Consumer price inflation from the Office for National Statistics

Notes:

1. Individual contributions may not sum to the total because of rounding.

Figure 7 shows the contributions from owner occupiers' housing (OOH) costs and Council Tax to the annual CPIH inflation rate in the context of wider housing-related costs. The Consumer Prices Index (CPI) differs from the CPIH because it does not include these two components.

The annual contribution from OOH costs rose slightly, to 0.58 percentage points, in June 2026. This was the first rise between months since January 2025 and followed 16 consecutive decreases. Although the current contribution was larger than the previous month's, it was smaller than the recent high of 1.31 percentage points in January 2025.

The annual contribution from electricity, gas and other fuels was negative 0.17 percentage points in June 2026, unchanged from May. An easing in the contribution from domestic heating oil was offset by smaller upward contributions from classes such as electricity.

5 . Latest movements in CPI inflation

While the Consumer Prices Index including owner occupiers' housing costs (CPIH) is our most comprehensive measure of consumer price inflation, the Consumer Prices Index (CPI) is based on a harmonised methodology developed by Eurostat. This enables international comparisons to be drawn. It is also used to set the operational inflation target for UK monetary policy, and to uprate working-age benefits and tax credits. More information on the use cases for our consumer price inflation statistics can be found in our [Measuring changing prices and costs for consumers and households: December 2023 article](#).

Figure 8 shows annual CPI inflation for the UK compared with the EU average and selected G7 countries. While the UK CPI is produced on a comparable basis with EU countries, the US Harmonised Index of Consumer Prices (HICP) differs in some respects. More information is available in Note 1 to Figure 8.

The UK's CPI annual inflation rate of 2.6% was lower than the EU rate (2.9%) but higher than that for France (2.0%) and Germany (2.4%) in June 2026.

Figure 8: UK inflation rate was lower than the EU's but higher than Germany's and France's

UK annual CPI inflation rate compared with selected G7 and EU rates, June 2016 to June 2026

Figure 8: UK inflation rate was lower than the EU's but higher than Germany's and France's

UK annual CPI inflation rate compared with selected G7 and EU rates, June 2016 to June 2026

Source: Consumer price inflation from the Office for National Statistics, Eurostat, and the US Bureau of Labor Statistics

Notes:

1. There are some differences in the definition of the US Harmonised Index of Consumer Prices (HICP) that may limit comparison. More information is available on the [US Bureau of Labor Statistics R-HICP homepage](#). The latest available figure is for December 2024.
2. The Euro area inflation estimates for June 2026 can be found in the [Eurostat Data Browser](#).
3. The international data in this figure are sometimes revised.

Table 3: CPI annual and monthly inflation rates by division
UK, June 2025, May 2026, and June 2026

	CPI 12-month rate (%)		CPI 1-month rate (%)	
	May 2026	June 2026	June 2025	June 2026
CPI All items	2.8	2.6	0.3	0.1
Food and non-alcoholic beverages	2.2	1.7	0.3	-0.2
Alcohol and tobacco	2.4	2.1	0.5	0.1
Clothing and footwear	0.2	-0.5	-0.4	-1.2
Housing and household services	1.2	1.2	0.1	0.0
Furniture and household goods	-0.1	-0.2	0.4	0.3
Health	2.4	2.5	0.3	0.4

Figure 9: CPI goods and services inflation rates eased in June 2026, while the core CPI rate was unchanged

CPI goods, services and core annual inflation rates, UK, June 2016 to June 2026

Figure 9: CPI goods and services inflation rates eased in June 2026, while the core CPI rate was unchanged

CPI goods, services and core annual inflation rates, UK, June 2016 to June 2026

Source: Consumer price inflation from the Office for National Statistics

Figure 9 shows the 12-month inflation rates for the CPI all-goods and all-services series, together with CPI excluding energy, food, alcohol and tobacco (often referred to as core CPI). The headline CPI inflation rate is added for comparison.

The core CPI annual inflation rate was 2.6% in June 2026, unchanged from May.

The CPI all-goods index rose by 1.7% in the 12 months to June 2026, down from 2.0% the previous month.

The CPI all-services index rose by 3.6% in the 12 months to June 2026, down slightly from 3.7% the previous month.

As with the all-items annual inflation rates, the drivers of CPIH and CPI goods and services inflation are the same (except for owner occupiers' housing (OOH) costs and Council Tax, which are excluded from CPI). The drivers are discussed in more detail in [Section 4: Latest movements in CPIH inflation](#).

Figure 10: Transport, particularly motor fuels, led the downward contributions to change in CPI annual inflation

Contributions to change in the CPI annual inflation rate, UK, between May and June 2026

Figure 10: Transport, particularly motor fuels, led the downward contributions to change in CPI annual inflation

Contributions to change in the CPI annual inflation rate, UK, between May and June 2026

Source: Consumer price inflation from the Office for National Statistics

Notes:

- 1. Individual contributions may not sum to the total because of rounding.
- 2. More information on the contents of each division can be found in Table 4 of our [Consumer price inflation dataset](#).

Figure 10 shows how each of the main groups of goods and services contributed to the change in the CPI annual inflation rate between May and June 2026.

The rate's slowing in June 2026 reflected downward contributions from six divisions, partially offset by upward contributions from three divisions. The largest downward contribution came from transport, particularly motor fuels. There were no large, offsetting upward contributions.

Though the sizes of the contributions differ from CPIH, the main drivers to the change are the same where they are common to both measures.

Figure 11: Contribution from food and non-alcoholic beverages to the CPI annual inflation rate was the smallest since August 2024

Contributions to the CPI annual inflation rate, UK, June 2024 to June 2026

Figure 11: Contribution from food and non-alcoholic beverages to the CPI annual inflation rate was the smallest since August 2024

Contributions to the CPI annual inflation rate, UK, June 2024 to June 2026

Source: Consumer price inflation from the Office for National Statistics

Notes:

1. Individual contributions may not sum to the total because of rounding.
2. More information on the contents of each division can be found in Table 4 of our [Consumer price inflation dataset](#).

Figure 11 shows the extent to which the distinct categories of goods and services have contributed to the overall annual CPI inflation rate over the last two years.

The CPIH includes extra housing components not included in the CPI. This can sometimes result in the largest contributions to the annual CPI and CPIH inflation rates coming from different divisions. In June 2026, the largest contributing division to CPI was transport (0.80 percentage point contribution to the CPI rate), while the largest contributing division to CPIH was housing and household services (0.84 percentage point contribution to the CPIH rate). OOH costs made a large upward contribution to housing and household services in CPIH, but these are excluded from CPI.

6 . Data on consumer price inflation

[Consumer price inflation tables](#)

Dataset | Released 22 July 2026

Measures of monthly UK inflation data including the Consumer Prices Index including owner occupiers' housing costs (CPIH), Consumer Prices Index (CPI) and Retail Prices Index (RPI). These tables complement the consumer price inflation time series dataset.

[Consumer price inflation time series](#)

Dataset MM23 | Released 22 July 2026

Comprehensive database of time series covering measures of inflation data for the UK including CPIH, CPI and RPI.

[Consumer price inflation detailed briefing note](#)

Dataset | Released 22 July 2026

The consumer price inflation detailed briefing note contains details of the items contributing to the changes in the CPIH, details of any notable movements, a summary of the reconciliation of CPIH and RPI, and the outlook, which looks ahead to next month's release.

[Consumer price inflation consumption segment indices and price quotes](#)

Dataset | Released 22 July 2026

Price quote data (for locally collected data only) and consumption segment indices (that underpin consumer price inflation statistics), giving users access to the detailed data that are used in the construction of the UK's inflation figures. From publication in March 2026, this dataset no longer includes price quote data for food and non-alcoholic beverages, and alcohol and tobacco. More information is included in [Section 8: Data sources and quality](#).

[Contributions to the 12-month rate of CPI\(H\) by import intensity](#)

Dataset | Released 22 July 2026

A time series of the contributions to the CPIH and CPI annual rates broken down by the import intensity of household purchases.

[Consumer price inflation, historical data, UK, 1950 to 1988](#)

Dataset | Released 18 May 2022

Data tables of historical estimates modelled for the CPIH and CPI over the period 1950 to 1988. Data in these tables are not accredited official statistics and are provided for indicative purposes only.

7 . Glossary

Annual inflation rate

The most common approach to measuring inflation is the 12-month or annual inflation rate, which compares prices for the latest month with the same month a year ago. In any given month, the annual rate is determined by the balance between upward and downward price movements across the range of goods and services included in the index.

Consumer price inflation

Consumer price inflation is the rate at which the prices of goods and services bought by households rise or fall. It is estimated by using price indices. For an overview of the range of indices available and their uses, please see our [Consumer price indices, a brief guide: 2026 article](#) and our [Measuring changing prices and costs for consumers and households: December 2023 article](#).

CPIH

The Consumer Prices Index including owner occupiers' housing costs (CPIH) is the most comprehensive measure of inflation. It extends the Consumer Prices Index (CPI) to include a measure of the costs associated with owning, maintaining and living in one's own home, known as owner occupiers' housing (OOH) costs, along with Council Tax. Both are substantial expenses for many households and are not included in the CPI.

CPI

The CPI is a measure of consumer price inflation produced to international standards, and it is based on European regulations for the [Harmonised Index of Consumer Prices](#). The CPI is the inflation measure used in the government's target for inflation.

The CPI is produced at the same level of detail as the CPIH in our accompanying [Consumer price inflation dataset](#) and in our accompanying [Consumer price inflation time series](#).

Owner occupiers' housing costs

OOH costs are the costs of housing services associated with owning, maintaining and living in one's own home.

RPI

The Retail Prices Index (RPI) and its subcomponents do not meet the required standard for designation as [accredited official statistics](#). In recognition that the index continues to be widely used in contracts, we continue to publish the RPI, its subcomponents, and RPI excluding mortgage interest payments (RPIX). To view the all-items RPI, please see the [data time series section of the Inflation and price indices area of our website](#). The annual RPI inflation rate was 3.0% in June 2026.

The UK Statistics Authority (The Authority) and HM Treasury launched a consultation in 2020 on The Authority's proposal to address the shortcomings of the RPI. From 2030 (at the earliest), as outlined in [The Authority's response to the joint consultation on reforming the methodology of the Retail Prices Index](#), the CPIH methods and data sources will be introduced into the RPI. Additionally, the supplementary and lower-level indices of the RPI will be discontinued.

8 . Data sources and quality

Great British Summer Savings

The UK Government's [Great British Summer Savings scheme](#), announced on 21 May 2026, took effect on 25 June. This was after the collection period for our June 2026 data and does not affect the indices this month. The scheme potentially affects a small number of low-level items in the inflation baskets, such as attractions and admissions to cultural events, whose prices are being collected for July.

Introducing scanner data into consumer price inflation statistics

We introduced scanner data for approximately 50% of the grocery market with the February 2026 index, published on 25 March 2026. Instead of collecting 25,000 prices per month directly from shops by price collectors, we are now using approximately 300 million price points derived from sales of over a billion units of products per month, collected directly from supermarket scanners at the checkouts or online. For the remaining 50% of the groceries market, we continue to manually collect prices in-store and online.

For comparison, we produced the all-items headline rates for February 2026 without using scanner data. Based on locally collected grocery data, the Consumer Prices Index including owner occupiers' housing costs (CPIH) rose by 3.3% in the year to February 2026, and the Consumer Prices Index (CPI) rose by 3.1%. These were slightly above the official rates of 3.2% and 3.0%, respectively.

You can find more about this change and how it affects our headline measures of inflation in our [Impact analysis on transformation of UK consumer price statistics: January 2026 article](#).

We also published our [Overview of how we use scanner data in consumer price inflation statistics: January 2026 article](#) and our [How multilateral index methods help us understand grocery scanner data article](#), which support user understanding of how we use the data.

Following the [Bank of England's response to the proposed changes to the Retail Prices Index \(RPI\) in 2026 \(PDF, 140KB\)](#), required under the Statistics and Registration Service Act 2007, this change was included in the RPI released in March 2026. It was also incorporated into the Household Costs Indices (HCIs) published on 28 May 2026.

This followed some changes introduced with the February 2025 consumer price indices in March 2025, as a necessary step towards incorporating scanner data. At that point, the process for aggregating the detailed information changed. Goods and services were allocated into "consumption segments" for different categories of expenditure.

In some cases, we defined these consumption segments to correspond to one "item" for which we track prices over time. However, in cases where more comprehensive source data were going to become available, a consumption segment was set up to include much more than just one item. There is more information on the use of consumption segments in our [Introducing alternative data into consumer price statistics: aggregation and weights article](#). For simplicity, we continue to refer to "items" in our statistical bulletin and detailed briefing note.

Changes to published microdata

Despite the benefits of introducing scanner data into the consumer price indices, we can no longer publish the price quote data for food and non-alcoholic beverages, alcohol and tobacco (Divisions 1 and 2 of the CPIH and CPI), or the equivalent categories of RPI in our [Consumer price inflation consumption segment indices and price quotes dataset](#). This is because of our data-sharing agreements with retailers.

Instead, we have developed new aggregate output statistics to meet the needs of users. We have improved the granularity and accuracy of our [Shopping prices comparison tool](#). We now provide average prices for more specific product types, such as "Microwave rice" and "Basmati rice". Under the previous, broader definitions (such as "rice, in all forms") we were unable to produce average prices. Units of measurement are also now included, making comparisons more meaningful and easier to interpret.

We are also publishing regional consumption segment indices and weights, and counts of indicator marker codes (for example, sales and recoveries) that are manually collected as part of the traditional data collection. We first published these from March 2026, with the release of the February 2026 indices. Further outputs will be introduced later in 2026.

More information on the new outputs is available in our [Changes to the provision of microdata outputs for consumer price inflation statistics: January 2026](#).

Households and the cost of living

To assist individuals in understanding how the rise in inflation affects their expenditure, we have produced a [personal inflation calculator](#). The calculator allows users to enter the amount they spend across either a reduced or a wide range of categories, to produce an estimate of their personal inflation based on those spending patterns.

Our [Shopping prices comparison tool](#) shows how the average prices of items have changed over time. Please note that the newly introduced consumption segments for food, drink and tobacco will not have data before 2025 in the tool. However, the historical average prices for food, drink and tobacco items, that were in the tool before the update in 2025, can be found in our [Shopping prices comparison tool data download before the 2025 update](#).

Please also note that Table 55 in our historical [Consumer price inflation dataset](#), which provided time series of prices for petrol and diesel, has not been published since 19 February 2025, and the two series have been discontinued. Historical average prices are still available from the time series explorer function on our website, using the four-character identifiers CZMK for petrol and CZML for diesel.

On 28 May 2026, we published our quarterly [Household Costs Indices \(HCIs\) for UK household groups bulletin](#). The HCIs reflect how different types of households experience changing prices, and they differ from CPIH and CPI. The CPIH and CPI are based on recognised economic principles and provide an aggregate measure of inflation for household spending in the UK.

The HCIs are [official statistics in development](#) and this release included new estimates for January to March 2026. This release uses updated 2025 weights. It has not been possible to update to 2026 weights in line with the standard methodology for consumer prices. This is because of delays in processing the underlying survey data and the need for further quality assurance. We will update the weights as soon as the data are available to use.

The latest HCI dataset also includes scanner data for the first time.

Passenger transport by air

A monthly index for passenger transport by air is included in the monthly consumer price inflation dataset. From March 2025, we also began publishing a set of subindices and weights on an annual basis. We updated our [Domestic, European and long-haul airfares consumer prices subindices and weights dataset](#) on 25 March 2026 with data for March 2025 to February 2026, and a longer historical time series back to 2007. From March 2026, we have also started to release [quarterly and annual average air fares](#), again on an annual basis. The analyses are released in [the user requested data section of our website](#).

Classification of Individual Consumption According to Purpose

The Classification of Individual Consumption According to Purpose (COICOP) is the classification that underpins some of the main statistics that we produce. To reflect changes in household expenditure patterns since its inception in the late 1990s, the [classification was updated in 2018 \(PDF, 1.286KB\)](#).

The UK currently uses the [version of COICOP introduced in 1999, which was updated in 2017](#) to add additional detail at the subclass level. However, we plan to have implemented the updated COICOP 2018 by 2029, as referenced in [Section B4 of our Economic statistics plan](#) and [Section 5 of our Economic statistics progress report](#). We will also consider re-referencing the CPI as part of the move to the new classification and will provide users with full details of our plans, once finalised.

For further information, please email cpi@ons.gov.uk.

Weights for 2026 consumer price inflation statistics

In line with usual practice at the start of each year, the expenditure weights used in compiling the CPIH and CPI were calculated using updated spending information. The first update of weights was implemented with the January indices. The second update was introduced, along with the usual basket update, with the February indices released in March. We published our [Consumer price inflation, updating weights: 2026 article](#) and our [Consumer price inflation basket of goods and services: 2026 article](#) on 16 March 2026.

The 2026 weights for CPIH and CPI were calculated using national accounts household final consumption expenditure (HHFCE) data for 2024. They reflect our most comprehensive and complete estimate of the latest household spending at the time of the weights update. This is in line with our standard methodology. More information is available in our [Consumer price inflation, updating weights articles](#).

The weights for the RPI were also updated and introduced with the February 2026 index.

Consumer price inflation historical estimates, UK, 1950 to 1988

On 18 May 2022, we published our [Consumer price inflation, historical estimates, UK, 1950 to 1988 - methodology](#) and our [Consumer price inflation, historical estimates and recent trends, UK: 1950 to 2022 article](#). These include new estimates of CPIH and improved estimates of CPI for 1950 to 1988. These estimates (published in response to user need for a longer series) are indicative and are for analytical purposes only. They are not intended for official use and do not constitute part of the [accredited official statistics](#) series.

Previously, in December 2018, we published our [Consumer Prices Index including owner occupiers' housing costs \(CPIH\) historical series: 1988 to 2004 article](#). These series are also not classed as accredited official statistics, reflecting the historical uncertainty around the backcasts.

Methodology information

The consumer price indices are based on prices collected manually from outlets around the country, information collected centrally over the internet and by phone, and, from February 2026, data collected from supermarket scanners at the checkouts or online. The traditionally sourced data used in this release were collected on or around 16 June 2026.

An overview of consumer price statistics is given in our [Consumer price indices, a brief guide: 2026 article](#). The concepts and methodologies underpinning the indices in more detail are covered in our [Consumer prices indices technical guidance methodology](#).

Information on the users and uses of these statistics, and the characteristics of the different measures of inflation related to potential use, is included in our [Users and uses of consumer price inflation statistics: July 2018 update methodology](#).

Strengths and limitations

In our [Measuring changing prices and costs for consumers and households article](#), we illustrated our approach to the process using three "use cases" and described how they relate to the measures published and under development.

The three cases refer firstly to the CPIH as our lead measure of inflation, based on economic principles. They also refer to the HCIs as a set of measures that reflect the change in costs and prices experienced by different households, and the RPI as a legacy measure that is required to meet existing user needs. The issues with the RPI are described in our [Shortcomings of the Retail Prices Index as a measure of inflation article](#).

Accredited official statistics

These [accredited official statistics](#) were independently reviewed by the Office for Statistics Regulation in July 2017. They comply with the standards of trustworthiness, quality and value in the [Code of Practice for Statistics](#) and should be labelled "accredited official statistics".

Revisions and correction of errors policies for consumer price inflation statistics

Our [Revisions and correction of errors policies for consumer price inflation statistics](#) are stated separately to highlight the differences between them. Within each policy, there is information on how the policy is applied, in what circumstances users will be notified and how users will be notified. This policy replaces our previous [Revisions policy for consumer price inflation statistics article](#), published in March 2017.

Key: - zero or negligible

1 From the release of January consumer price inflation data on 16 February 2016, CPIH and CPI indices have been re-referenced and published with 2015=100. Full historic series for each of the re-referenced indices are available for users to view or download. Regular re-referencing of indices is methodological good practice as it avoids rounding issues that can arise from small index values. Please note that re-referencing does not impact on published inflation rates, although when using the indices to calculate inflation rates, it is important to use indices that are referenced on the same year. Re-referencing does not impact on RPI. For more information, please contact cpi@ons.gsi.gov.uk.

2 The Retail Prices Index and its derivatives do not meet the required standards for designation as National Statistics. A full report can be found at <http://www.statisticsauthority.gov.uk/>.

3 The series CPIY, CPI-CT and CPIHY were discontinued in January 2022, with the final estimates referring to price change in the period December 2021.

1 As a direct result of the reduced availability of products due to the coronavirus (COVID-19) pandemic, some series are based on less than half of the number of quotes used in February 2020 (the most recent 'normal' collection). To identify which series are affected please consult

the latest Consumer price inflation tables which can be located here: <https://www.ons.gov.uk/economy/inflationandpriceindices/datasets/consumer-priceinflation>, which includes notation to reflect the reduced coverage.

1 As a direct result of the reduced availability of products due to the coronavirus (COVID-19) pandemic, some series are based on less than half of the number of quotes used in February 2020 (the most recent 'normal'

collection). To identify which series are affected, please consult the latest Consumer price inflation tables which can be located here: <https://www.ons.gov.uk/economy/inflationandpriceindices/datasets/consumer-priceinflation>, which includes notation to reflect the reduced coverage.

1 From the release of January consumer price inflation data on 16 February 2016, CPIH and CPI indices have been re-referenced and published with 2015=100. Full historic series for each of the re-referenced indices are available for users to view or download. Regular re-referencing of indices is methodological good practice as it avoids rounding issues that can arise from small index values. Please note that re-referencing does not impact on published inflation rates, although when using the indices to calculate inflation rates, it is important to use indices that are referenced on the same year. Re-referencing does not impact on RPI. For more information, please contact cpi@ons.gov.uk.

2 More detailed CPIH, CPI and RPI data are available at: <http://www.ons.gov.uk>.

1 From the release of January consumer price inflation data on 16 February 2016, CPIH & CPI indices have been re-referenced and published with 2015=100. Full historic series for each of the re-referenced indices are available for users to view or download. Regular re-referencing of indices is methodological good practice as it avoids rounding issues that can arise from small index values. Please note that re-referencing does not impact on published inflation rates, although when using the indices to calculate inflation rates, it is important to use indices that are referenced on the same year. Re-referencing does not impact on RPI. For more information, please contact cpi@ons.gsi.gov.uk.

2 More detailed CPIH, CPI and RPI data are available at: <http://www.ons.gsi.gov.uk>.

1 For further information on the composition of the indices shown, see 'The Consumer Prices Index: Goods and Services Indices and Special Aggregates', which can be downloaded from: <http://webarchive.nationalarchives.gov.uk/20160105160709/http://ons.gov.uk/>

2 The coverage of this special aggregate has changed extensively since January 2000, when Social protection was first included and extensions to the Education and Health divisions also took effect. Health was further extended with effect from January 2001.

3 Energy includes electricity, gas and other fuels, and fuels and lubricants.

Key: - zero or negligible

1 Comprises 'Electricity, gas and other fuels' (group 04.5) and 'Fuels and lubricants' (class 07.2.2).

2 Comprises all other goods elements of the CPI.

3 For further information on all of these services components, see 'The Consumer Prices Index: Goods and Services Indices and Special Aggregates', which can be downloaded from: <http://webarchive.nationalarchives.gov.uk/20160105160709/http://ons.gov.uk/>

Key: - zero or negligible .. Not available

1 Published as the CPI in the UK.

2 Aggregate for European Union with 27 Member States.

Following user requests, on 10 April 2018 Eurostat began to publish in its database an aggregate for the EU with 27 Member States for around 50 most in-demand indicators, such as population, GDP growth rate and unemployment.

3 Data for the former EU28 aggregate.

For reference periods February 2020 or later, Eurostat no longer calculates or publishes the former EU 28 aggregate. This means that the final time periods for which the EU28 aggregate is published are January 2020, fourth quarter 2019 or the year 2019 depending on the frequency of the dataset. Eurostat will maintain historic data for EU28 in the database and will update as revisions are received.

4 The coverage of the Monetary Union Indices of Consumer Prices (MUICP) was extended to include Greece with effect from Jan 2001 and Slovakia from Jan 2009.

5 Following the end of the transition period, we have ceased to publish the Harmonised Index of Consumer Prices (HICP) international comparisons for EU countries in this table. The international comparisons will continue to be available on the Eurostat website. <https://ec.europa.eu/eurostat/web/main/data/database>

Key: – zero or negligible

1 An error was identified in the dataset underpinning the 2019 RPI weights covering the period February to June 2019. In line with the consumer price inflation statistics revision policy RPI was not revised. The corrected weights have been used for the July 2019 RPI onwards. Users should note there is a discontinuity between June's and July's index levels, which have been calculated using differing weights.

2 The Retail Prices Index and its derivatives do not meet the required standards for designation as National Statistics. A full report can be found at <http://www.statisticsauthority.gov.uk>.

3 As a direct result of the reduced availability of products due to the coronavirus (COVID-19) pandemic, some series are based on less than half of the number of price quotes used in February 2020 (the most recent 'normal' collection). To identify which series are affected, please the latest Consumer price inflation tables which can be found here: <https://www.ons.gov.uk/economy/inflationandpriceindices/datasets/consumerpriceinflation>, which includes notation to reflect the reduced coverage.

4 Index date for June: 16 June 2026

Key: - zero or negligible

1 All components of the RPI are included in the above breakdown with the exception of mortgage interest payments, council tax and depreciation.

2 Including fuel oil.

3 The 'other goods' category comprises DIY materials, coal & solid fuels, household goods, clothing & footwear, personal articles, chemists goods, purchase of motor vehicles and leisure goods.

4 The 'utilities' category comprises water, electricity, gas, postage, telephone charges and rail fares.

5 The 'shop services' category comprises catering, repairs & maintenance charges, domestic services, personal services, maintenance of motor vehicles, TV licence & rentals and entertainment & recreation charges.

6 The 'non-shop services' category comprises dwelling insurance & ground rent, fees and subscriptions, vehicle tax and insurance, bus & coach fares, other travel costs, foreign holidays and UK holidays.

7 The Retail Prices Index and its derivatives do not meet the required standards for designation as National Statistics. A full report can be found at: <http://www.statisticsauthority.gov.uk/>.

8 An error was identified in the dataset underpinning the 2019 RPI weights covering the period February to June 2019. In line with the consumer price inflation statistics revision policy RPI was not revised. The corrected weights have been used for the July 2019 RPI onwards. Users should note there is a discontinuity between June's and July's index levels, which have been calculated using differing weights.
