1 . Main points

- The household saving ratio decreased to 8.7% in Quarter 1 (Jan to Mar) 2023, from 9.3% in the previous quarter.
- The decrease in the saving ratio was driven by a rise in taxes on income of £5.4 billion with increased Pay As You Earn (PAYE) and self-assessment taxes paid; there was also a rise in final consumption expenditure of £5.2 billion driven by increases in housing and energy spending.
- Real households' disposable income (RHDI) fell by 0.8% following positive growth of 1.3% in Quarter 4 (Oct to Dec) 2022.
- Within RHDI, nominal gross disposable income increased 0.5%, but the household expenditure implied deflator increased 1.3%, as households experienced price increases in several spending categories.
- The UK's borrowing position with the rest of the world as a percentage of gross domestic product (GDP) increased to 1.8% in Quarter 1 2023 from 0.6% in Quarter 4 2022.
- Financial corporations decreased their net lending position to 0.3% of GDP from 3.7% of GDP in the previous quarter; this was driven by a fall in net property income of £14.3 billion, as net interest received fell and dividends paid increased.
- Households increased their net lending to 2.2% of GDP in Quarter 1 2023 compared with 2.1% of GDP the previous quarter; this was driven by a £4.7 billion rise in compensation of employees and a rise in net capital transfers of £3.4 billion.
- General government saw an increase in their net borrowing position to 7.6% of GDP in Quarter 1 2023 from net borrowing of 7.0% as a percentage of GDP in Quarter 4 2022.
- Within their financial account, households made more withdrawals than they deposited with financial institutions for the first time since records began in 1987.
- Households also saw record negative secured lending on dwellings of £5.2 billion, with the amount of new mortgage and re-mortgage borrowing falling.

2 . Quarterly sector accounts data

[Quarterly sector accounts](#)

Dataset | Released 30 June 2023

Quarterly aggregate economic indicators and summary estimates for the private non-financial corporations and households' sectors of the UK economy, and revisions.

[UK Economic Accounts time series](#)

Dataset | Released 30 June 2023

Quarterly estimates of national product, income and expenditure, sector accounts revisions and balance of payments.

[UK Economic Accounts: main aggregates](#)

Dataset | Released 30 June 2023

Quarterly national accounts aggregates, per capita data, including gross domestic product by income and expenditure, gross value added, gross fixed capital formation, change in inventories, gross operating surplus and revisions.

[UK Economic Accounts: flow of funds](#)

Dataset | Released 30 June 2023

Quarterly flow of funds, financial account and balance sheet data for the UK economy by institutional sector.

[UK Economic Accounts: institutional sector - general government](#)

Dataset | Released 30 June 2023

Distribution and use of income account and capital account, financial account and balance sheet quarterly data for general government.

[UK Economic Accounts: institutional sector - households and non-profit institutions serving households](#)

Dataset | Released 30 June 2023

Distribution and use of income account and capital account, financial account and balance sheet quarterly data for households and non-profit institutions serving households. Includes the Experimental Statistics on the impact of removing "imputed" transactions from real household disposable income and the saving ratio to better represent the economic experience of UK households.

[UK Economic Accounts: institutional sector - financial and non-financial corporations](#)

Dataset | Released 30 June 2023

Distribution and use of income account and capital account, financial account and balance sheet quarterly data for non-financial corporations and sub-sectors.

[UK Economic Accounts: institutional sector - rest of the world](#)

Dataset | Released 30 June 2023

Distribution and use of income account and capital account, financial account and balance sheet quarterly data for the rest of the world.

[UK Economic Accounts: balance of payments](#)

Dataset | Released 30 June 2023

Estimates of the balance of payments current and capital accounts, financial accounts, international investment position and external debt statement.

3 . Glossary

Interactive glossary

Gross disposable household income (GDHI) and real household disposable income (RHDI)

Gross disposable household income (GDHI) is the estimate of the total amount of income that households have available to either spend, save or invest including income received from wages (and the self-employed), social benefits, pensions and net property income (that is, earnings from interest on savings and dividends from shares) less taxes on income and wealth.

Adjusting GDHI to remove the effects of inflation gives real household disposable income (RHDI). This is a measure of the real purchasing power of households' income, in terms of the physical quantity of goods and services they would be able to purchase if prices remained constant over time.

The household saving ratio explained

The saving ratio estimates the amount of money households have available to save as a percentage of their gross disposable income plus pension accumulations.

Net lending or borrowing

The net lending of a sector represents the surplus resources that a sector makes available to other sectors. Net borrowing represents their financing of a deficit from other sectors.

Net lending means a sector has money left over after its spending and investment in a given period, whereas net borrowing means it has spent and invested more than it received and has a need for financing, which may be covered by borrowing, issuing shares or bonds, or by drawing on reserves.

4 . Measuring the data

Revisions within this release

This bulletin includes new data for the latest available quarter, Quarter 1 (Jan to Mar) 2023, with no revisions to previous data.

Understanding the sector and financial accounts

This release presents analysis on UK aggregate data for the main economic indicators and summary estimates from the institutional sectors of the UK economy that are presented in the [UK Economic Accounts \(UKEA\) dataset](#):

- public corporations
- private non-financial corporations
- financial corporations
- households
- non-profit institutions serving households (NPISH)
- central government
- local government
- rest of the world

This release uses data from the UKEA and provides detailed estimates of national product, income and expenditure, UK sector, non-financial and financial accounts, and UK Balance of Payments. These accounts are the underlying data that produce a single estimate of gross domestic product (GDP) using income, production and expenditure data.

Quality and Methodology Information report

The [Quarterly sector accounts QMI report](#) contains important information on:

- the strengths and limitations of the data and how they compare with related data
- uses and users of the data
- how the output was created
- the quality of the output including the accuracy of the data

System of National Accounts consultation

As part of an update to the System of National Accounts, the United Nations (UN) is in the process of consulting on several areas being considered for improvement. [Previous and live consultations](#) can be found on the UN Statistics Division website. If you would like to discuss any of these consultations with the Office for National Statistics (ONS), please contact us at sna.consultations@ons.gov.uk. Bodies outside the UK national statistical system are also free to respond to the consultations themselves.

Economic statistics governance after EU exit

Following the UK's exit from the EU, new governance arrangements are being put in place that will support the adoption and implementation of high-quality standards for UK economic statistics. These governance arrangements will promote international comparability and add to the credibility and independence of the UK's statistical system.

At the centre of this new governance framework will be the new National Statistician's Committee for Advice on Standards for Economic Statistics (NSCASE). NSCASE will support the UK by ensuring its processes for influencing and adopting international statistical standards are world leading. The advice NSCASE provides to the National Statistician will span the full range of domains in economic statistics, including the national accounts, fiscal statistics, prices, trade and the balance of payments and labour market statistics.

5 . Related links

[GDP quarterly national accounts](#)

Bulletin | Released 30 June 2023

Revised quarterly estimate of gross domestic product (GDP) for the UK. Uses additional data to provide a more precise indication of economic growth than the first estimate.

1 This data uses the latest population estimates with the exception of the latest year where populations projections are used. The quarterly data in this table does not sum to annuals

2 This data uses the UK resident population mid-year estimates published and the population projections available

3 The private non-financial corporations self-investment ratio is calculated by taking the sectors gross saving (RPKZ) and dividing it by their gross fixed capital formation (ROAW)

4 Quarterly Households debt to income ratio is calculated by taking the balance of Household debt (NIWK) and dividing it by the four quarter rolling sum of gross disposable income (HABN).
