Other commentary from the latest labour market data can be found on the following pages:

- Labour market overview
- Average weekly earnings in Great Britain
- Vacancies and jobs

2. Main points for February to April 2019

- The UK employment rate was estimated at 76.1%, higher than a year earlier (75.6%) and the joint-highest on record.
- The UK unemployment rate was estimated at 3.8%; it has not been lower since October to December 1974.
- The UK economic inactivity rate was estimated at 20.8%, lower than a year earlier (21.0%) and close to a record low.

The data in this bulletin come from the Labour Force Survey, a survey of households. It is not practical to survey every household each quarter, so these statistics are estimates based on a large sample.

3. Analysis

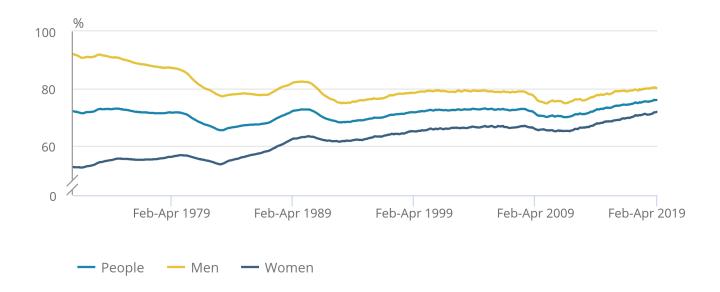

Employment

Figure 1: Employment rate for women was 72.0%, the highest on record

UK employment rates (aged 16 to 64 years), seasonally adjusted, January to March 1971 to February to April 2019

Figure 1: Employment rate for women was 72.0%, the highest on record

UK employment rates (aged 16 to 64 years), seasonally adjusted, January to March 1971 to February to April 2019

Source: Office for National Statistics – Labour Force Survey

<u>Employment</u> measures the number of people aged 16 years and over in paid work. The employment rate is the proportion of people aged from 16 to 64 years who are in paid work.

Estimated employment rates for men and women aged between 16 and 64 years have been generally increasing since early 2012. For February to April 2019, the estimated employment rate:

- for all people was 76.1%, the joint-highest since comparable records began in 1971
- for men was 80.3%; slightly higher than a year earlier (80.0%)
- for women was 72.0%, the highest since comparable records began in 1971

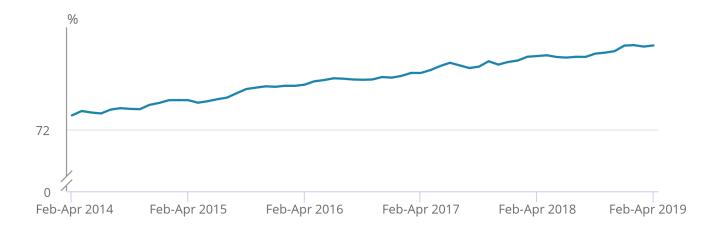

The increase in the employment rate for women in recent years is due partly to changes to the State Pension age for women, resulting in fewer women retiring between the ages of 60 and 65 years.

Figure 2: Over the last five years the overall employment rate increased from 72.7% to 76.1%

UK employment rate (all people aged 16 to 64 years), seasonally adjusted, February to April 2014 to February to April 2019

Figure 2: Over the last five years the overall employment rate increased from 72.7% to 76.1%

UK employment rate (all people aged 16 to 64 years), seasonally adjusted, February to April 2014 to February to April 2019

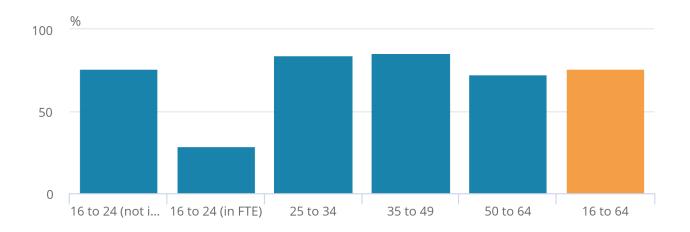

Source: Office for National Statistics - Labour Force Survey

Figure 3: The highest employment rate, at 85.3%, was for those aged from 35 to 49 years

UK employment rates by age band, seasonally adjusted, February to April 2019

Figure 3: The highest employment rate, at 85.3%, was for those aged from 35 to 49 years

UK employment rates by age band, seasonally adjusted, February to April 2019

Source: Office for National Statistics - Labour Force Survey

Notes:

1. FTE means full-time education. The "not in FTE" series includes people in part-time education and/or training.

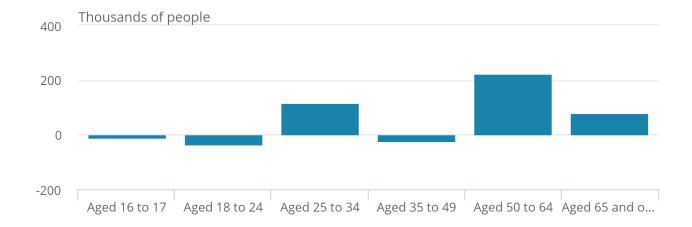

Looking at the estimates for employment rates by age band for February to April 2019, the highest were for those aged from 35 to 49 years (85.3%) and for those aged from 25 to 34 years (84.5%).

Figure 4: More than half of the annual increase in the number of people in work occurred among those aged from 50 to 64 years

Changes in numbers of people in employment, seasonally adjusted, between February to April 2018 and February to April 2019

Figure 4: More than half of the annual increase in the number of people in work occurred among those aged from 50 to 64 years

Changes in numbers of people in employment, seasonally adjusted, between February to April 2018 and February to April 2019

Source: Office for National Statistics - Labour Force Survey

Estimates for February to April 2019 show 32.75 million people aged 16 years and over in employment, 357,000 more than for a year earlier. This annual increase of 357,000 was due entirely to more people working full-time (up 402,000 on the year to reach 24.15 million). Part-time working showed a fall of 45,000 on the year to reach 8.60 million.

Looking at the estimates for February to April 2019 by type of employment, there were:

- 27.66 million paid employees (84.5% of all people in employment), 241,000 more than a year earlier
- 4.91 million self-employed people (15.0% of all people in employment), 101,000 more than a year earlier

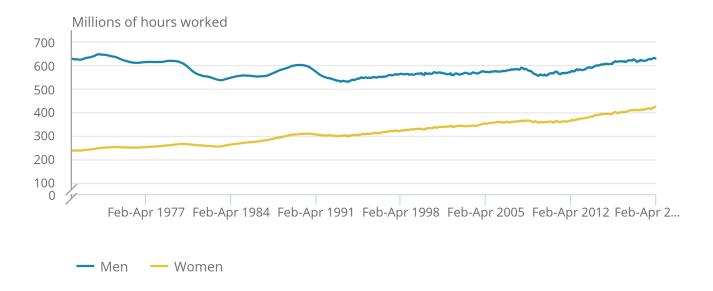

These estimates for paid employees and self-employed people make up over 99% of all people in employment. The total employment figure also includes two other minor categories as explained in the <u>Guide to labour market statistics</u>.

Figure 5: Hours worked by women have increased steadily since records began in 1971

Total weekly hours worked in the UK, seasonally adjusted, January to March 1971 to February to April 2019

Figure 5: Hours worked by women have increased steadily since records began in 1971

Total weekly hours worked in the UK, seasonally adjusted, January to March 1971 to February to April 2019

Source: Office for National Statistics - Labour Force Survey

Since estimates began in 1971, total hours worked by women have generally increased, reflecting increases in both the employment rate for women and the UK population. In contrast, total hours worked by men have been relatively stable. This is because falls in the employment rate for men have been roughly offset by population increases.

Between February to April 2018 and February to April 2019:

- hours worked in the UK increased by 2.4% (to reach 1.05 billion hours)
- the number of people in employment in the UK increased by 1.1% (to reach 32.75 million)

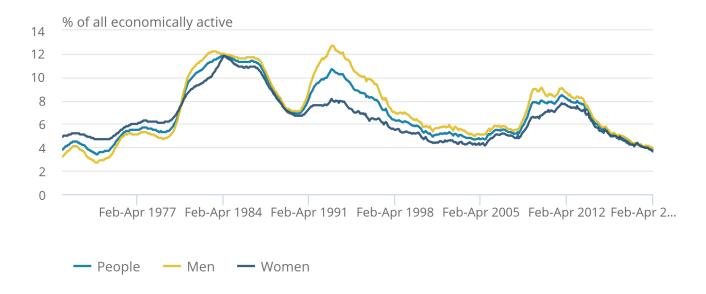

Unemployment

Figure 6: Unemployment rates have been generally falling for the last five years

UK unemployment rates (aged 16 years and over), seasonally adjusted, January to March 1971 to February to April 2019

Figure 6: Unemployment rates have been generally falling for the last five years

UK unemployment rates (aged 16 years and over), seasonally adjusted, January to March 1971 to February to April 2019

Source: Office for National Statistics - Labour Force Survey

<u>Unemployment</u> measures people without a job who have been actively seeking work within the last four weeks and are available to start work within the next two weeks. The unemployment rate is the proportion of all employed and unemployed people (not the proportion of the total population) who are unemployed.

Estimated unemployment rates for both men and women aged 16 years and over have been generally falling since late 2013.

For February to April 2019, the estimated unemployment rate:

- for everyone was 3.8%; it has not been lower since October to December 1974
- for men was 4.0%, slightly lower than a year earlier (4.3%)
- for women was 3.7%, the joint-lowest since comparable records began in 1971

Figure 7: Unemployment rates for men and women have been steadily falling for the last five years

UK unemployment rates (aged 16 years and over), seasonally adjusted, February to April 2014 to February to April 2019

Figure 7: Unemployment rates for men and women have been steadily falling for the last five years

UK unemployment rates (aged 16 years and over), seasonally adjusted, February to April 2014 to February to April 2019

Source: Office for National Statistics - Labour Force Survey

Over the last five years the estimated unemployment rate:

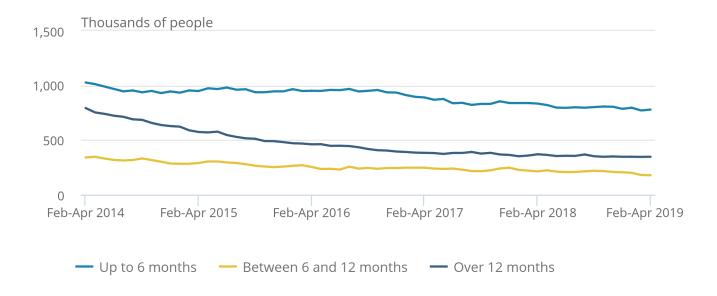

- for all people fell from 6.6% to 3.8%
- for men fell from 6.9% to 4.0%
- for women fell from 6.3% to 3.7%

Figure 8: Over the last five years long-term unemployment has more than halved

Unemployment in the UK by duration (aged 16 years and over), seasonally adjusted, February to April 2014 to February to April 2019

Figure 8: Over the last five years long-term unemployment has more than halved

Unemployment in the UK by duration (aged 16 years and over), seasonally adjusted, February to April 2014 to February to April 2019

Source: Office for National Statistics - Labour Force Survey

For February to April 2019, an estimated 1.30 million people were unemployed, 112,000 fewer than a year earlier and 857,000 fewer than five years earlier. Looking in more detail at this fall of 857,000 unemployed people over the last five years:

- people unemployed for up to 6 months fell by 249,000 to 779,000
- people out of work for between 6 and 12 months fell by 162,000 to 178,000
- the largest fall was for people unemployed for over one year (down 446,000 to 347,000)

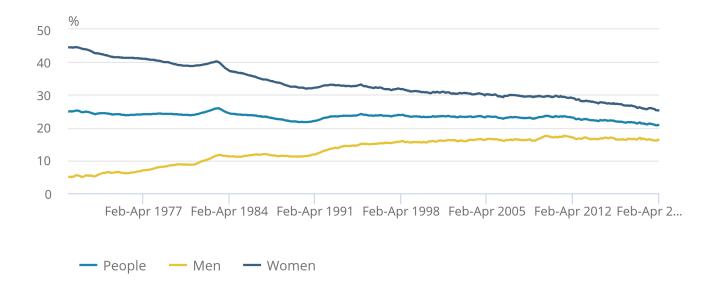

Economic inactivity

Figure 9: Economic inactivity rate for women has fallen to a record low of 25.2%

UK economic inactivity rates (aged 16 to 64 years), seasonally adjusted, January to March 1971 to February to April 2019

Figure 9: Economic inactivity rate for women has fallen to a record low of 25.2%

UK economic inactivity rates (aged 16 to 64 years), seasonally adjusted, January to March 1971 to February to April 2019

Source: Office for National Statistics - Labour Force Survey

<u>Economic inactivity</u> measures people without a job but who are not classed as unemployed because they have not been actively seeking work within the last four weeks and/or they are unable to start work within the next two weeks. Our headline measure of economic inactivity is for those aged from 16 to 64 years.

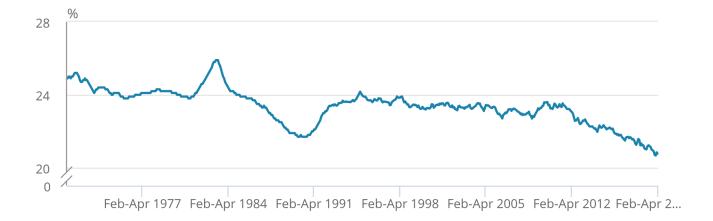

Since comparable records began in 1971, the economic inactivity rate for all people aged from 16 to 64 years has been generally falling (although it increased during recessions). This is due to a gradual fall in the economic inactivity rate for women.

Figure 10: Overall inactivity rate for people aged from 16 to 64 years was 20.8%, close to a record low

UK economic inactivity rate (all people aged 16 to 64 years), seasonally adjusted, January to March 1971 to February to April 2019

Figure 10: Overall inactivity rate for people aged from 16 to 64 years was 20.8%, close to a record low

UK economic inactivity rate (all people aged 16 to 64 years), seasonally adjusted, January to March 1971 to February to April 2019

Source: Office for National Statistics - Labour Force Survey

For people aged from 16 to 64 years, for February to April 2019, the estimated economic inactivity rate:

- for all people was 20.8%, close to a record low
- for men was 16.3%
- for women was 25.2%, the lowest since comparable records began in 1971

Estimates for February to April 2019 showed 8.58 million people aged from 16 to 64 years not in the labour force (economically inactive). This was:

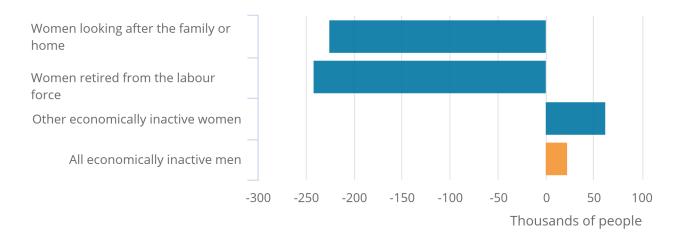

- 87,000 fewer than a year earlier
- 381,000 fewer than five years earlier

Figure 11: More women in the labour force is the main cause of the fall in economic inactivity

Changes in the number of economically inactive people (aged 16 to 64 years) in the UK, seasonally adjusted, between February to April 2014 and February to April 2019

Figure 11: More women in the labour force is the main cause of the fall in economic inactivity

Changes in the number of economically inactive people (aged 16 to 64 years) in the UK, seasonally adjusted, between February to April 2014 and February to April 2019

Source: Office for National Statistics - Labour Force Survey

Looking in more detail at the estimated fall of 381,000 in economic inactivity over the last five years, the categories showing the largest falls were:

- women younger than 65 years retiring from the labour force (down 241,000)
- women looking after the family or home (down 225,000)

This reflects ongoing changes to the State Pension age, resulting in fewer women retiring between the ages of 60 and 65 years, as well as more women in younger age groups participating in the labour market.

4. Data

The data in this bulletin follow internationally accepted definitions specified by the <u>International Labour Organisation</u>. This ensures that the estimates for the UK are comparable with those for other countries.

Employment, unemployment and economic inactivity

Dataset A05 SA | Released 11 June 2019

Estimates of UK employment, unemployment and economic inactivity broken down into age bands.

Full-time, part-time and temporary workers

Dataset EMP01 SA | Released 11 June 2019

Estimates of UK employment including a breakdown by sex, type of employment and full-time and part-time working.

Actual weekly hours worked

Dataset HOUR01 SA | Released 11 June 2019

Estimates for the hours that people in employment work in the UK.

Unemployment by age and duration

Dataset UNEM01 SA | Released 11 June 2019

Estimates of unemployment in the UK including a breakdown by sex, age group and the length of time people are unemployed.

Economic inactivity by reason

Dataset INAC01 SA | Released 11 June 2019

Estimates of those not in the UK labour force measured by the reasons given for inactivity.

Table 1: Summary of UK employment estimates for February to April 2019, seasonally adjusted

	Estimate (seasonally adjusted)	Sampling variability of estimate (1)	Change on quarter	Sampling variability of change on quarter (1)	Change on year	Sampling variability of change on year (1)
Employment (thousands of people aged 16 years and over)	32,746	± 174	32	± 149	357	± 235
Employment rate (%, aged 16 to 64 years)	76.1%	± 0.4	0.0	± 0.3	0.5	± 0.5
Unemployment (thousands of people aged 16 years and over)	1,304	± 67	-34	± 73	-112	± 95
Unemployment rate (%, aged 16 years and over)	3.8%	± 0.2	-0.1	± 0.2	-0.4	± 0.3
Economically inactive (thousands of people aged 16 to 64 years)	8,581	± 153	32	± 133	-87	± 206
Economic inactivity rate (%, aged 16 to 64 years)	20.8%	± 0.4	0.1	± 0.3	-0.3	± 0.5

Notes

1. The sampling variability estimates are for 95% confidence intervals and are calculated on data that are not seasonally adjusted. Back to table

5. Glossary

Actual and usual hours worked

Statistics for <u>usual hours worked</u> measure how many hours people usually work per week. Compared with <u>actual hours worked</u>, they are not affected by absences and so can provide a better measure of normal working patterns. For example, a person who usually works 37 hours a week but who was on holiday for a particular week would be recorded as working zero actual hours for that week while usual hours would be recorded as 37.

Economic inactivity

People not in the labour force (also known as <u>economically inactive</u>) are not in employment but do not meet the internationally accepted definition of unemployment because they have not been seeking work within the last four weeks and/or they are unable to start work in the next two weeks. The economic inactivity rate is the proportion of people aged from 16 to 64 years who are not in the labour force.

Employment

<u>Employment</u> measures the number of people in paid work and differs from the number of jobs because some people have more than one job. The employment rate is the proportion of people aged from 16 to 64 years who are in paid work. A more detailed explanation is available in our <u>Guide to labour market statistics</u>.

Unemployment

<u>Unemployment</u> measures people without a job who have been actively seeking work within the last four weeks and are available to start work within the next two weeks. The unemployment rate is not the proportion of the total population who are unemployed. It is the proportion of the economically active population (those in work plus those seeking and available to work) who are unemployed.

A more detailed Glossary is available.

6. Measuring the data

This bulletin relies on data collected from the <u>Labour Force Survey</u>, the largest household survey in the UK.

The <u>Quality and Methodology Information (QMI)</u> report pulls together important qualitative information on the various dimensions of data quality, as well as providing a summary of the methods used to compile the output.

The <u>Labour Force Survey performance and quality monitoring reports</u> provide data on response rates and other quality-related issues for the Labour Force Survey.

7. Strengths and limitations

The figures in this bulletin come from the Labour Force Survey, which gathers information from a sample of households across the UK rather than from the whole population. The sample is designed to be as accurate as possible given practical limitations such as time and cost constraints. Results from sample surveys are always estimates, not precise figures. This can have an impact on how changes in the estimates should be interpreted, especially for short-term comparisons.

As the number of people available in the sample gets smaller, the variability of the estimates that we can make from that sample size gets larger. Estimates for small groups (for example, unemployed people aged from 16 to 17 years), which are based on quite small subsets of the Labour Force Survey sample, are less reliable and tend to be more volatile than for larger aggregated groups (for example, the total number of unemployed people).

In general, changes in the numbers (and especially the rates) reported in this bulletin between three-month periods are small and are not usually greater than the level that can be explained by sampling variability. Short-term movements in reported rates should be considered alongside longer-term patterns in the series and corresponding movements in other sources to give a fuller picture.

Labour market statistics enquiries: labour.market@ons.gov.uk

Note on headline employment, unemployment and inactivity rates

The headline employment and inactivity rates are based on the population aged 16 to 64 but the headline unemployment rate is based on the economically active population aged 16 and over. The employment and inactivity rates for those aged 16 and over are affected by the inclusion of the retired population in the denominators and are therefore less meaningful than the rates for those aged from 16 to 64. However, for the unemployment rate for those aged 16 and over, no such effect occurs as the denominator for the unemployment rate is the economically active population which only includes people in work or actively seeking and able to work.

Note on headline employment, unemployment and inactivity levels

The headline employment and unemployment levels are for those aged 16 and over; they measure all people in work or actively seeking and able to work. However, the headline inactivity level is for those aged 16 to 64. The inactivity rate for those aged 16 and over is less meaningful as it includes elderly people who have retired from the labour force.

^{1.} The Labour Force Survey (LFS) is a survey of households in the UK.

^{2.} The headline employment rate is the number of people aged 16 to 64 in employment divided by the population aged 16 to 64.

^{3.} The headline unemployment rate is the number of unemployed people (aged 16+) divided by the economically active population (aged 16+). The economically active population is defined as those in employment plus those who are unemployed.

^{4.} The headline inactivity rate is the number of people aged 16 to 64 divided by the population aged 16-64.

^{1.} The split between full-time and part-time employment is based on respondents' self-classification.

^{2.} This series does not include all people on these programmes; it only includes those engaging in any form of work, work experience or work-related training.

3. These series cover Employees and Self-employed only. These series include some temporary employees recorded in columns 13 to 19.

4. The total includes those who did not give a reason for working part-time and it therefore does not equal the sum of columns 21, 23, 24 and 25.

Relationship between columns: 1=5+9; 2=6+10; 3=7+11.

^{1.} Not in full-time education includes people in part-time education and/or some form of training. Estimates of the number of young people who were not in employment, education or training ("NEET") cannot therefore be derived from this table. Estimates of young people who were NEET are published separately at:

https://www.ons.gov.uk/employmentandlabourmarket/peoplenotinwork/unemployment/bulletins/youngpeoplenotineducationemploymentortrainingneet/latest

^{2.} People in full-time education are employed if they have a part-time job or unemployed if they are looking for part-time employment.

^{3.} Denominator = all persons in the relevant age group for economically active, total in employment and economically inactive; economically active for unemployment.
