## 1. Other pages in this release

Commentary on topics covered in the previous Labour market statistics bulletin is now split into four separate bulletins. Other commentary from the latest labour market data can be found on the following pages:

- Labour market overview
- Average weekly earnings in Great Britain
- Jobs and vacancies

## 2. Main points for November 2018 to January 2019

- The UK employment rate was estimated at 76.1%, higher than for a year earlier (75.3%) and the highest figure on record.
- The UK unemployment rate was estimated at 3.9%; it has not been lower since November 1974 to January 1975.
- The UK economic inactivity rate was estimated at 20.7%, lower than for a year earlier (21.2%) and the lowest figure on record.

The data in this bulletin come from the Labour Force Survey, a survey of households. It is not practical to survey every household each quarter, so these statistics are estimates based on a large sample.

## 3. Analysis

### **Employment**

Figure 1: Overall employment rate reaches new record high of 76.1%

UK employment rates (aged 16 to 64 years), seasonally adjusted, January to March 1971 to November 2018 to January 2019

Figure 1: Overall employment rate reaches new record high of 76.1%

UK employment rates (aged 16 to 64 years), seasonally adjusted, January to March 1971 to November 2018 to January 2019

Source: Office for National Statistics – Labour Force Survey

<u>Employment</u> measures the number of people aged 16 years and over in paid work. The employment rate is the proportion of people aged from 16 to 64 years who are in paid work.

Estimated employment rates for men and women aged between 16 and 64 years have been generally increasing since early 2012. For November 2018 to January 2019, the employment rate:

- for all people was estimated at 76.1%, the highest since comparable records began in 1971
- for men was estimated at 80.5%; it has not been higher since December 1990 to February 1991
- for women was estimated at 71.8%, the highest since comparable records began in 1971

The increase in the employment rate for women in recent years is due partly to changes to the State Pension age for women, resulting in fewer women retiring between the ages of 60 and 65 years.

Figure 2: Over the last five years the overall employment rate increased from 72.1% to 76.1%

UK employment rate (all people aged 16 to 64 years), seasonally adjusted, November 2013 to January 2014 to November 2018 to January 2019

Figure 2: Over the last five years the overall employment rate increased from 72.1% to 76.1%

UK employment rate (all people aged 16 to 64 years), seasonally adjusted, November 2013 to January 2014 to November 2018 to January 2019

Source: Office for National Statistics - Labour Force Survey

Figure 3: The highest employment rate, at 85.4%, was for those aged from 35 to 49 years

UK employment rates by age band, seasonally adjusted, November 2018 to January 2019

# Figure 3: The highest employment rate, at 85.4%, was for those aged from 35 to 49 years

UK employment rates by age band, seasonally adjusted, November 2018 to January 2019

Source: Office for National Statistics - Labour Force Survey

#### Notes:

1. FTE means full-time education. The "not in FTE" series includes people in part-time education and/or training.

Looking at the estimates for employment rates by age band for November 2018 to January 2019, the highest were for those aged from 35 to 49 years (85.4%) and for those aged from 25 to 34 years (84.2%).

Figure 4: The increase in the number of people in work mainly occurred among those aged 50 to 64 years

Changes in numbers of people in employment, seasonally adjusted, between November 2017 to January 2018 and November 2018 to January 2019

# Figure 4: The increase in the number of people in work mainly occurred among those aged 50 to 64 years

Changes in numbers of people in employment, seasonally adjusted, between November 2017 to January 2018 and November 2018 to January 2019

Source: Office for National Statistics - Labour Force Survey

Estimates for November 2018 to January 2019 show 32.71 million people aged 16 years and over in employment, 473,000 more than for a year earlier. This estimated annual increase of 473,000 was due mainly to more people working full-time (up 424,000 on the year to reach 24.12 million). Part-time working also contributed, with an increase of 49,000 on the year to reach 8.60 million.

Estimates for November 2018 to January 2019 show that there were:

- 27.70 million paid employees (84.7% of all people in employment), 424,000 more than a year earlier
- 4.84 million self-employed people (14.8% of all people in employment), 65,000 more than a year earlier

These estimates for paid employees and self-employed people make up over 99% of all people in employment. The total employment figure also includes two other minor categories as explained in the <u>Guide to labour market statistics</u>.

Figure 5: Hours worked by women have increased steadily since records began in 1971

Total weekly hours worked in the UK, seasonally adjusted, January to March 1971 to November 2018 to January 2019

# Figure 5: Hours worked by women have increased steadily since records began in 1971

Total weekly hours worked in the UK, seasonally adjusted, January to March 1971 to November 2018 to January 2019

Source: Office for National Statistics - Labour Force Survey

Since estimates began in 1971, total hours worked by women have generally increased, reflecting increases in the employment rate for women and increases in the UK population. In contrast, total hours worked by men have been relatively stable. This is because falls in the employment rate for men have been roughly offset by population increases.

Between November 2017 to January 2018 and November 2018 to January 2019:

- hours worked in the UK increased by 1.2% (to reach 1.05 billion hours)
- the number of people in employment in the UK increased by 1.5% (to reach 32.71 million)

### Unemployment

Figure 6: Unemployment rates have been generally falling for the last five years

UK unemployment rates (aged 16 years and over), seasonally adjusted, January to March 1971 to November 2018 to January 2019

# Figure 6: Unemployment rates have been generally falling for the last five years

UK unemployment rates (aged 16 years and over), seasonally adjusted, January to March 1971 to November 2018 to January 2019

Source: Office for National Statistics – Labour Force Survey

<u>Unemployment</u> measures people without a job who have been actively seeking work within the last four weeks and are available to start work within the next two weeks. The unemployment rate is the proportion of all employed and unemployed people (not the proportion of the total population) who are unemployed.

The unemployment rates for both men and women aged 16 years and over have been generally falling since late 2013.

For November 2018 to January 2019, the unemployment rate:

- for everyone was estimated at 3.9%; it has not been lower since November 1974 to January 1975
- for men was estimated at 4.0%; it has not been lower since April to June 1975
- for women was estimated at 3.8%, the lowest since comparable records began in 1971

Figure 7: Unemployment rates for men and women have been steadily falling for the last five years

UK unemployment rates (aged 16 years and over), seasonally adjusted, November 2013 to January 2014 to November 2018 to January 2019

# Figure 7: Unemployment rates for men and women have been steadily falling for the last five years

UK unemployment rates (aged 16 years and over), seasonally adjusted, November 2013 to January 2014 to November 2018 to January 2019

Source: Office for National Statistics - Labour Force Survey

Over the last five years the estimated unemployment rate for men has fallen from 7.4% to 4.0%. The estimated unemployment rate for women has shown a smaller fall over this period – from 6.9% to 3.8%.

For November 2018 to January 2019, an estimated 1.34 million people were unemployed, 112,000 fewer than for a year earlier. There have not been fewer unemployed people in the UK since October to December 1975.

Figure 8: Over half of all unemployed people had been out of work for less than six months

UK unemployment by duration (aged 16 years and over), seasonally adjusted, November 2018 to January 2019

Figure 8: Over half of all unemployed people had been out of work for less than six months

### **Economic inactivity**

Figure 9: Economic inactivity for women has been generally falling since records began in 1971

UK economic inactivity rates (aged 16 to 64 years), seasonally adjusted, January to March 1971 to November 2018 to January 2019

Figure 9: Economic inactivity for women has been generally falling since records began in 1971

UK economic inactivity rates (aged 16 to 64 years), seasonally adjusted, January to March 1971 to November 2018 to January 2019

Source: Office for National Statistics - Labour Force Survey

<u>Economic inactivity</u> measures people without a job but who are not classed as unemployed because they have not been actively seeking work within the last four weeks and/or they are unable to start work within the next two weeks. Our headline measure of economic inactivity is for those aged from 16 to 64 years.

Since comparable records began in 1971, the economic inactivity rate for all people aged from 16 to 64 years has been generally falling (although it increased during recessions). This is due to a gradual fall in the economic inactivity rate for women.

Figure 10: Overall economic inactivity rate reaches new record low of 20.7%

UK economic inactivity rate (all people aged 16 to 64 years), seasonally adjusted, January to March 1971 to November 2018 to January 2019

## Figure 10: Overall economic inactivity rate reaches new record low of 20.7%

UK economic inactivity rate (all people aged 16 to 64 years), seasonally adjusted, January to March 1971 to November 2018 to January 2019

#### Source: Office for National Statistics - Labour Force Survey

For people aged from 16 to 64 years for November 2018 to January 2019, the economic inactivity rate:

- for all people was estimated at 20.7%, the lowest figure since comparable records began in 1971
- for men was estimated at 16.0%; it has not been lower since May to July 2003
- for women was estimated at 25.3%, the lowest figure since comparable records began in 1971

Estimates for November 2018 to January 2019 showed 8.55 million people aged from 16 to 64 years not in the labour force (economically inactive), 194,000 fewer than for a year earlier and the lowest since January to March 1993. Of these, 3.29 million were men (116,000 fewer than for a year earlier) and 5.26 million were women (78,000 fewer than for a year earlier).

Figure 11: More women in the labour force is the main cause of the fall in economic inactivity

Changes in the number of economically inactive people (aged 16 to 64 years) in the UK, seasonally adjusted, between November 2013 to January 2014 and November 2018 to January 2019

## Figure 11: More women in the labour force is the main cause of the fall in economic inactivity

Changes in the number of economically inactive people (aged 16 to 64 years) in the UK, seasonally adjusted, between November 2013 to January 2014 and November 2018 to January 2019

Source: Office for National Statistics - Labour Force Survey

Looking now at changes in economic inactivity over the five-year period between November 2013 to January 2014 and November 2018 to January 2019, the categories showing the largest falls in the estimates were women looking after the family or home (down 277,000) and women taking early retirement (down 253,000). This reflects ongoing changes to the State Pension age, resulting in fewer women retiring between the ages of 60 and 65 years, as well as more women in younger age groups participating in the labour market.

#### 4. Data

The data in this bulletin follow internationally accepted definitions specified by the <u>International Labour Organisation</u>. This ensures that the estimates for the UK are comparable with those for other countries.

#### Employment, unemployment and economic inactivity

Dataset A05 SA | Released 19 March 2019

Estimates of UK employment, unemployment and economic inactivity broken down into age bands.

#### Full-time, part-time and temporary workers

Dataset EMP01 SA | Released 19 March 2019

Estimates of UK employment including a breakdown by sex, type of employment and full-time and part-time working.

#### Actual weekly hours worked

Dataset HOUR01 SA | Released 19 March 2019

Estimates for the hours that people in employment work in the UK.

#### Unemployment by age and duration

Dataset UNEM01 SA | Released 19 March 2019

Estimates of unemployment in the UK including a breakdown by sex, age group and the length of time people are unemployed.

#### Economic inactivity by reason

Dataset INAC01 SA | Released 19 March 2019

Estimates of those not in the UK labour force measured by the reasons given for inactivity.

Table 1: Summary of UK employment estimates for November 2018 to January 2019, seasonally adjusted

	Estimate (seasonally adjusted)	Sampling variability of estimate (1)	Change on quarter	Sampling variability of change on quarter (1)	Change on year	Sampling variability of change on year (1)

#### Notes

1. The sampling variability estimates are for 95% confidence intervals and are calculated on data that are not seasonally adjusted. Back to table

## 5. Glossary

### **Employment**

<u>Employment</u> measures the number of people in paid work and differs from the number of jobs because some people have more than one job. The employment rate is the proportion of people aged from 16 to 64 years who are in paid work.

### Unemployment

<u>Unemployment</u> measures people without a job who have been actively seeking work within the last four weeks and are available to start work within the next two weeks. The unemployment rate is not the proportion of the total population who are unemployed. It is the proportion of the economically active population (those in work plus those seeking and available to work) who are unemployed.

### **Economic inactivity**

People not in the labour force (also known as <u>economically inactive</u>) are not in employment but do not meet the internationally accepted definition of unemployment because they have not been seeking work within the last four weeks and/or they are unable to start work in the next two weeks. The economic inactivity rate is the proportion of people aged from 16 to 64 years who are not in the labour force.

A more detailed Glossary is available.

## 6. Measuring the data

This bulletin relies on data collected from the <u>Labour Force Survey</u>, the largest household survey in the UK.

The <u>Quality and Methodology Information (QMI)</u> report pulls together important qualitative information on the various dimensions of data quality, as well as providing a summary of the methods used to compile the output.

The <u>Labour Force Survey performance and quality monitoring reports</u> provide data on response rates and other quality-related issues for the Labour Force Survey.

## 7. Strengths and limitations

The figures in this bulletin come from the Labour Force Survey, which gathers information from a sample of households across the UK rather than from the whole population. The sample is designed to be as accurate as possible given practical limitations such as time and cost constraints. Results from sample surveys are always estimates, not precise figures. This can have an impact on how changes in the estimates should be interpreted, especially for short-term comparisons.

As the number of people available in the sample gets smaller, the variability of the estimates that we can make from that sample size gets larger. Estimates for small groups (for example, unemployed people aged from 16 to 17 years), which are based on quite small subsets of the Labour Force Survey sample, are less reliable and tend to be more volatile than for larger aggregated groups (for example, the total number of unemployed people).

In general, changes in the numbers (and especially the rates) reported in this bulletin between three-month periods are small, and are not usually greater than the level that can be explained by sampling variability. Short-term movements in reported rates should be considered alongside longer-term patterns in the series and corresponding movements in other sources to give a fuller picture.

Source: Labour Force Survey

 $Labour\ market\ statistics\ enquiries: labour.market@ons.gov.uk$ 

- 1. The Labour Force Survey (LFS) is a survey of households in the UK.
- 2. The headline employment rate is the number of people aged 16 to 64 in employment divided by the population aged 16 to 64.
- 3. The headline unemployment rate is the number of unemployed people (aged 16+) divided by the economically active population (aged 16+). The economically active population is defined as those in employment plus those who are unemployed.
- 4. The headline inactivity rate is the number of people aged 16 to 64 divided by the population aged 16 to 64.

#### Note on headline employment, unemployment and inactivity rates

The headline employment and inactivity rates are based on the population aged 16 to 64 but the headline unemployment rate is based on the economically active population aged 16 and over. The employment and inactivity rates for those aged 16 and over are affected by the inclusion of the retired population in the denominators and are therefore less meaningful than the rates for those aged from 16 to 64. However, for the unemployment rate for those aged 16 and over, no such effect occurs as the denominator for the unemployment rate is the economically active population which only includes people in work or actively seeking and able to work.

#### Note on headline employment, unemployment and inactivity levels

The headline employment and unemployment levels are for those aged 16 and over; they measure all people in work or actively seeking and able to work. However, the headline inactivity level is for those aged 16 to 64. The inactivity rate for those aged 16 and over is less meaningful as it includes elderly people who have retired from the labour force.

## SUMMARY

## 2(1) Labour market status by age group

United Kingdom (thousands) seasonally adjusted

Source: Labour Force Survey

1. The split between full-time and part-time employment is based on respondents' self-classification.

Labour market statistics enquiries: labour.market@ons.gov.uk

2. This series does not include all people on these programmes; it only includes those engaging in any form of work, work experience or work-related training.

3. These series cover Employees and Self-employed only. These series include some temporary employees recorded in columns 13 to 19.

4. The total includes those who did not give a reason for working part-time and it therefore does not equal the sum of columns 21, 23, 24 and 25.
