- Labour market overview
- Average weekly earnings in Great Britain
- Vacancies and jobs

2. Main points for June to August 2019

- The UK employment rate was estimated at 75.9%; higher than a year earlier (75.6%) but 0.2 percentage points lower than last quarter.
- The UK unemployment rate was estimated at 3.9%; this is lower than a year earlier (4.0%) but 0.1 percentage points higher than last quarter.
- The UK economic inactivity rate was estimated at 21.0%; this is lower than a year earlier (21.2%) but 0.1 percentage points higher on the quarter.

The data in this bulletin come from the Labour Force Survey, a survey of households. It is not practical to survey every household each quarter, so these statistics are estimates based on a large sample.

3 . Analysis of employment in the UK

Employment

Figure 1: Employment rate for all people increased 0.3 percentage points on the year, to just below the record high employment rate

UK employment rates (aged 16 to 64 years), seasonally adjusted, January to March 1971 to June to August 2019

Figure 1: Employment rate for all people increased 0.3 percentage points on the year, to just below the record high employment rate

UK employment rates (aged 16 to 64 years), seasonally adjusted, January to March 1971 to June to August 2019

Source: Office for National Statistics – Labour Force Survey

<u>Employment</u> measures the number of people aged 16 years and over in paid work. The employment rate is the proportion of people aged between 16 and 64 years who are in paid work.

Estimated employment rates for men and women aged between 16 and 64 years have generally been increasing since early 2012 (as seen in Figure 1). For June to August 2019:

- the estimated employment rate for people was 75.9%; this is 0.3 percentage points up on the year, but 0.2 percentage points lower on the quarter
- the estimated employment rate for men was 80.2%; this is largely unchanged on the year and on the quarter
- the estimated employment rate for women was 71.6%; this is 0.6 percentage points up on the year, but 0.3 percentage points down on the quarter

The increase in the employment rate for women in recent years is partly a result of changes to the State Pension age for women, resulting in fewer women retiring between the ages of 60 and 65 years.

Figure 2: Employment rates increased on the year for all age groups except the younger age groups (those aged below 25 years)

UK Employment rates by age, seasonally adjusted, June to August 2009 to June to August 2019

Figure 2: Employment rates increased on the year for all age groups except the younger age groups (those aged below 25 years)

UK Employment rates by age, seasonally adjusted, June to August 2009 to June to August 2019

Source: Office for National Statistics - Labour Force Survey

Looking at the estimates for employment rates by age group for June to August 2019 and comparing them with the estimates for June to August 2018, the only decrease was for those aged between 18 and 24 years (down 1.3 percentage points to 61.1%). Employment rates increased on the year for all other age groups shown in Figure 2 (the 16 to 17 years age group is excluded). However, the employment rate decreased on the quarter for almost all of them; the only exception being the 50 to 64 years age group, which increased 0.1 percentage points on the quarter.

Estimates for June to August 2019 show 32.69 million people aged 16 years and over in employment, 282,000 more than a year earlier. This annual increase was mainly driven by women (up 202,000 on the year), those aged 50 years and over (up 287,000 on the year) and full-time workers (up 263,000 on the year). There was, however, a 56,000 decrease in employment on the quarter, which was the first quarterly decrease since August to October 2017.

Figure 3: Smallest annual increase in employees (up 97,000) since May to July 2012

Employees and self-employed people annual changes (aged 16 and over), UK, seasonally adjusted, June to August 2009 to June to August 2019

Figure 3: Smallest annual increase in employees (up 97,000) since May to July 2012

Employees and self-employed people annual changes (aged 16 and over), UK, seasonally adjusted, June to August 2009 to June to August 2019

Source: Office for National Statistics - Labour Force Survey

Looking at the estimates for June to August 2019 by type of employment:

- there were 27.58 million paid employees (84.4% of all people in employment), 97,000 more than a year earlier
- there were 4.93 million self-employed people (15.1% of all people in employment), 162,000 more than a year earlier

Since the latter half of 2012, the annual increases for employees have generally been greater than for the selfemployed. However, the latest estimate shows the weakest annual increase for employees since May to July 2012 (see Figure 3), making it smaller than the annual increase for the self-employed.

These estimates for paid employees and self-employed people make up over 99% of all people in employment in the UK. The total employment figure also includes two other minor categories as explained in the <u>Guide to labour</u> market statistics.

Since estimates began in 1971, total hours worked by women have generally increased, reflecting increases in both the employment rate for women and the UK population. In contrast, total hours worked by men have been relatively stable. This is because falls in the employment rate for men have been roughly offset by population increases.

Between June to August 2018 and June to August 2019 total actual weekly hours worked in the UK increased by 0.8% (to reach 1.05 billion hours), whereas average actual weekly hours worked decreased by 0.1% (to 32.1 hours). Therefore, the annual increase in total hours is driven by the 0.9% increase in employment over the last year.

Unemployment

Figure 4: Unemployment rates have generally been falling for the last six years

UK unemployment rates (aged 16 years and over), seasonally adjusted, January to March 1971 to June to August 2019

Figure 4: Unemployment rates have generally been falling for the last six years

UK unemployment rates (aged 16 years and over), seasonally adjusted, January to March 1971 to June to August 2019

Source: Office for National Statistics - Labour Force Survey

<u>Unemployment</u> measures people without a job who have been actively seeking work within the last four weeks, and are available to start work within the next two weeks. The unemployment rate is not the proportion of the total population who are unemployed. It is the proportion of the economically active population (those in work plus those seeking and available to work) who are unemployed.

Estimated unemployment rates for both men and women aged 16 years and over have generally been falling since late 2013 but have levelled off in recent periods (as seen in Figure 4).

For June to August 2019:

- the estimated UK unemployment rate for all people was 3.9%, lower than a year earlier (4.0%) but 0.1 percentage points higher than the previous quarter
- the estimated UK unemployment rate for men was 4.0%, 0.1 percentage points lower than last year but 0.1 percentage points higher than the previous quarter
- the estimated UK unemployment rate for women was 3.7%, down 0.3 percentage points on a year earlier but largely unchanged on the quarter

Figure 5: The steady fall in unemployment rates for men and women over the last few years has slowed in recent periods

UK unemployment rates (aged 16 years and over), seasonally adjusted, June to August 2014 to June to August 2019

Figure 5: The steady fall in unemployment rates for men and women over the last few years has slowed in recent periods

UK unemployment rates (aged 16 years and over), seasonally adjusted, June to August 2014 to June to August 2019

Source: Office for National Statistics - Labour Force Survey

Between June to August 2014 and June to August 2019:

- the estimated unemployment rate for all people fell from 6.0% to 3.9%
- the estimated unemployment rate for men fell from 6.3% to 4.0%
- the estimated unemployment rate for women fell from 5.7% to 3.7%

For June to August 2019, an estimated 1.31 million people were unemployed, 49,000 fewer than a year earlier and 658,000 fewer than five years earlier.

Figure 6: Long-term unemployment has more than halved over the last five years

Unemployment in the UK by duration (aged 16 years and over), seasonally adjusted, June to August 2014 to June to August 2019

Figure 6: Long-term unemployment has more than halved over the last five years

Unemployment in the UK by duration (aged 16 years and over), seasonally adjusted, June to August 2014 to June to August 2019

Source: Office for National Statistics - Labour Force Survey

Looking in more detail at this fall of 658,000 over the last five years:

- the largest fall was for long-term unemployment (those unemployed for over one year), which was down 380,000 to 333,000
- for those unemployed for over 6 and up to 12 months the number fell by 141,000 to a record low of 173,000
- the estimated number of people unemployed for up to six months fell by 137,000 to 808,000 over the last five years, although the number has increased slightly over the last year

Economic inactivity

<u>Economic inactivity</u> measures people without a job but who are not classed as unemployed because they have not been actively seeking work within the last four weeks and/or they are unable to start work within the next two weeks. Our headline measure of economic inactivity is for those aged between 16 and 64 years.

Since comparable records began in 1971, the economic inactivity rate for all people aged between 16 and 64 years has been generally falling (although it increased during recessions). This is because of a gradual fall in the economic inactivity rate for women.

Figure 7: Overall inactivity rate for people aged between 16 and 64 years was 21.0%, down 0.2 percentage points on the year

UK economic inactivity rate (all people aged 16 to 64 years), seasonally adjusted, January to March 1971 to June to August 2019

Figure 7: Overall inactivity rate for people aged between 16 and 64 years was 21.0%, down 0.2 percentage points on the year

UK economic inactivity rate (all people aged 16 to 64 years), seasonally adjusted, January to March 1971 to June to August 2019

Source: Office for National Statistics – Labour Force Survey

For people aged between 16 and 64 years, for June to August 2019:

- the estimated economic inactivity rate for all people was 21.0%, down 0.2 percentage points on the year but up 0.1 percentage points on the quarter
- the estimated economic inactivity rate for men was 16.4%; largely unchanged on the previous year and on the previous quarter
- the estimated economic inactivity rate for women was 25.6%, down 0.4 percentage points on the year but up 0.3 percentage points on the quarter

Estimates for June to August 2019 showed 8.68 million people aged between 16 and 64 years not in the labour force (economically inactive). This was 63,000 fewer than a year earlier and 362,000 fewer than five years earlier.

Figure 8: The number of people who are inactive mainly because they are looking after family or home is at a record low

Inactive people (aged 16 to 64 years) by main reason in the UK, seasonally adjusted, March to May 1993 to June to August 2019

Figure 8: The number of people who are inactive mainly because they are looking after family or home is at a record low

Inactive people (aged 16 to 64 years) by main reason in the UK, seasonally adjusted, March to May 1993 to June to August 2019

Source: Office for National Statistics - Labour Force Survey

Looking in more detail at the estimated fall of 362,000 in economic inactivity over the last five years, the categories showing the largest decreases were people looking after the family or home (down 309,000 to a record low) and those retiring from the labour force (down 198,000).

The fall was driven by women, with a decrease of 366,000. This reflects changes to the State Pension age, resulting in fewer women retiring between the ages of 60 and 65 years, as well as more women in younger age groups participating in the labour market.

4. Employment data

The data in this bulletin follow internationally accepted definitions specified by the <u>International Labour</u> <u>Organization</u>. This ensures that the estimates for the UK are comparable with those for other countries.

Employment, unemployment and economic inactivity

Dataset A05 SA | Released 15 October 2019 Estimates of UK employment, unemployment and economic inactivity broken down into age bands.

Full-time, part-time and temporary workers

Dataset EMP01 SA | Released 15 October 2019 Estimates of UK employment including a breakdown by sex, type of employment, and full-time and part-time working.

Actual weekly hours worked Dataset HOUR01 SA | Released 15 October 2019 Estimates for the hours that people in employment work in the UK.

Unemployment by age and duration

Dataset UNEM01 SA | Released 15 October 2019 Estimates of unemployment in the UK including a breakdown by sex, age group and the length of time people are unemployed.

Economic inactivity by reason

Dataset INAC01 SA | Released 15 October 2019 Estimates of those not in the UK labour force measured by the reasons given for inactivity.

5. Glossary

Actual and usual hours worked

Statistics for <u>usual hours worked</u> measure how many hours people usually work per week. Compared with <u>actual</u> <u>hours worked</u> they are not affected by absences and so can provide a better measure of normal working patterns. For example, a person who usually works 37 hours a week but who was on holiday for a week would be recorded as working zero actual hours for that week, while usual hours would be recorded as 37 hours.

Economic inactivity

People not in the labour force (also known as <u>economically inactive</u>) are not in employment but do not meet the internationally accepted definition of unemployment because they have not been seeking work within the last four weeks and/or they are unable to start work in the next two weeks. The economic inactivity rate is the proportion of people aged between 16 and 64 years who are not in the labour force.

Employment

<u>Employment</u> measures the number of people in paid work and differs from the number of jobs because some people have more than one job. The employment rate is the proportion of people aged between 16 and 64 years who are in paid work. A more detailed explanation is available in our <u>Guide to labour market statistics</u>.

Unemployment

<u>Unemployment</u> measures people without a job who have been actively seeking work within the last four weeks and are available to start work within the next two weeks. The unemployment rate is not the proportion of the total population who are unemployed. It is the proportion of the economically active population (those in work plus those seeking and available to work) who are unemployed.

A more detailed glossary is available.

6. Measuring the data

This bulletin relies on data collected from the Labour Force Survey (LFS), the largest household survey in the UK.

The <u>Quality and Methodology Information (QMI)</u> report pulls together important qualitative information on the various dimensions of data quality and provides a summary of the methods used to compile the output.

The <u>LFS performance and quality monitoring reports</u> provide data on response rates and other quality-related issues for the LFS.

7. Strengths and limitations

The figures in this bulletin come from the Labour Force Survey (LFS), which gathers information from a sample of households across the UK rather than from the whole population. The sample is designed to be as accurate as possible given practical limitations such as time and cost constraints. Results from sample surveys are always estimates, not precise figures. This can have an impact on how changes in the estimates should be interpreted, especially for short-term comparisons.

As the number of people available in the sample gets smaller, the variability of the estimates that we can make from that sample size gets larger. Estimates for small groups (for example, unemployed people aged between 16 and 17 years), which are based on small subsets of the LFS sample, are less reliable and tend to be more volatile than for larger aggregated groups (for example, the total number of unemployed people).

In general, changes in the numbers (and especially the rates) reported in this bulletin between three-month periods are small and are not usually greater than the level that can be explained by sampling variability. Short-term movements in reported rates should be considered alongside longer-term patterns in the series and corresponding movements in other sources to give a fuller picture.

Further information is available in <u>A guide to labour market statistics</u>.

Table 1: Summary of UK employment estimates for June to August 2019, seasonally adjusted

| | Estimate (seasonally adjusted) | Sampling variability of estimate (1) | Change on quarter | Sampling variability of change on quarter (1) | Change on year | Sampling variability of change on year (1) |
|---|--------------------------------------|---|----------------------|---|-------------------|---|
| Employment (thousands of people aged 16 years and over) | 32,693 | ± 179 | -56 | ± 151 | 282 | ± 238 |
| Employment rate (%, aged 16 to 64 years) | 75.9% | ± 0.4 | -0.2 | ± 0.3 | 0.3 | ± 0.5 |
| Unemployment (thousands of people aged 16 years and over) | 1,314 | ± 71 | 22 | ± 74 | -49 | ± 99 |
| Unemployment rate (%, aged 16 years and over) | 3.9% | ± 0.2 | 0.1 | ± 0.2 | -0.2 | ± 0.3 |
| Economically inactive (thousands of people aged 16 to 64 years) | 8,676 | ± 156 | 57 | ± 134 | -63 | ± 208 |
| Economic inactivity rate (%, aged 16 to 64 years) | 21.0% | ± 0.4 | 0.1 | ± 0.3 | -0.2 | ± 0.5 |

The Office for Statistics Regulation (OSR) has a planned reassessment of labour market employment estimates, which aims to publish a set of recommendations in early 2020. As part of this assessment, the OSR may contact you to:

- gather feedback on your use of labour market estimates
- listen to your suggestions on ways we can build on our current engagement opportunities
- capture examples of where we have worked (or are working) together to improve communication and use of our statistics

The three sections of the recommendations report will cover trustworthiness, quality and value. The OSR will coordinate engagement with you but please feel free to contact David Freeman (<u>david.freeman@ons.gov.uk</u>) or Matt Hughes (<u>matthew.hughes@ons.gov.uk</u>) if you wish to discuss further.

Source: Labour Force Survey

Labour market statistics enquiries: labour.market@ons.gov.uk

1. The Labour Force Survey (LFS) is a survey of households in the UK.

2. The headline employment rate is the number of people aged 16 to 64 in employment divided by the population aged 16 to 64.

3. The headline unemployment rate is the number of unemployed people (aged 16+) divided by the economically active population (aged 16+). The

economically active population is defined as those in employment plus those who are unemployed.

4. The headline inactivity rate is the number of people aged 16 to 64 divided by the population aged 16-64.

Note on headline employment, unemployment and inactivity rates

The headline employment and inactivity rates are based on the population aged 16 to 64 but the headline unemployment rate is based on the economically active population aged 16 and over. The employment and inactivity rates for those aged 16 and over are affected by the inclusion of the retired population in the denominators and are therefore less meaningful than the rates for those aged from 16 to 64. However, for the unemployment rate for those aged 16 and over, no such effect occurs as the denominator for the unemployment rate is the economically active population which only includes people in work or actively seeking and able to work.

Note on headline employment, unemployment and inactivity levels

The headline employment and unemployment levels are for those aged 16 and over; they measure all people in work or actively seeking and able to work. However, the headline inactivity level is for those aged 16 to 64. The inactivity rate for those aged 16 and over is less meaningful as it includes elderly people who have retired from the labour force.

Labour market statistics enquiries: labour.market@ons.gov.uk

1. The total series includes people who do not state their country of birth or nationality. The total levels series MGTM does not therefore equal the sum of the "UK" and "Non-UK" series.

2. This series consists of all 27 EU member states excluding the UK. This series equals the sum of EU14, EU8, EU2 and Other EU.

3. Austria, Belgium, Denmark, Finland, France, Germany, Greece, Ireland, Italy, Luxembourg, Netherlands, Portugal, Spain and Sweden.

4. Czech Republic, Estonia, Hungary, Latvia, Lithuania, Poland, Slovak Republic and Slovenia.

5. Romania and Bulgaria.

6. Cyprus, Malta and Croatia

7. Total Non-EU equals the sum of Other Europe, Total Africa, Total Asia and Total America and Oceania

The estimates shown in this table relate to the number of people in employment and should not be used as a proxy for flows of foreign migrants into the UK.

Labour market statistics enquiries: labour.market@ons.gov.uk

1. The total series includes people who do not state their country of birth or nationality. The total levels series therefore do not equal the sum of the "UK" and "Non-UK" series.

2. This series consists of all 27 EU member states excluding the UK.

3. This series consists of those people whose main reason for being economically inactive was because they were students. It does not include all students as some students will be included in the employment and unemployment estimates.

Relationship between columns: 1=5+9; 2=6+10; 3=7+11.

Source: Labour Force Survey Labour market statistics enquiries: labour.market@ons.gov.uk

1. Not in full-time education includes people in part-time education and/or some form of training. Estimates of the number of young people who were not in employment, education or training ("NEET") cannot therefore be derived from this table. Estimates of young people who were NEET are published separately at:

 $\label{eq:https://www.ons.gov.uk/employmentandlabourmarket/peoplenotinwork/unemployment/bulletins/youngpeoplenotineducationemploymentortrainingneet/latest the statest statest and the statest state$

2. People in full-time education are employed if they have a part-time job or unemployed if they are looking for part-time employment.

3. Denominator = all persons in the relevant age group for economically active, total in employment and economically inactive; economically active for unemployment.
