- Vacancies and jobs in the UK
- Public sector employment, UK

### 2. Main points

In September to November 2023, the estimated number of vacancies in the UK fell by 45,000 on the quarter to 949,000. Vacancies fell on the quarter for the 17th consecutive period, the longest consecutive run of quarterly falls ever recorded but still above pre-coronavirus (COVID-19) pandemic levels.

Annual growth in regular pay (excluding bonuses) in Great Britain was 7.3% in August to October 2023, this growth continues to remain strong but is not as high as in recent periods. Annual growth in employees' average total pay (including bonuses) was 7.2%. Annual average regular earnings growth for the public sector was 6.9% in August to October 2023, and is among the highest regular annual growth rates since comparable records began in 2001. Annual average regular earnings growth for the private sector was 7.3%.

In real terms (adjusted for inflation using the Consumer Prices Index including owner occupiers' housing costs (CPIH)), annual growth for total pay rose on the year by 1.3%, and regular pay rose on the year by 1.4%.

There were 131,000 working days lost because of labour disputes across the UK in October 2023. Three-fifths of the labour disputes were in the health and social work sector. In October 2023, 49,000 workers were involved in labour disputes, the lowest number since June 2022.

The estimated number of workforce jobs in the UK in September 2023 was a record 36.8 million, an increase of 210,000 from June 2023. The total number of jobs includes both employee jobs and self-employment jobs. The estimated number of employee jobs has been on a largely upwards trend since September 2020, resulting in a record high of 32.5 million in September 2023.

The estimate of payrolled employees in the UK for November 2023 was largely unchanged compared with the revised October 2023 figure, down 13,000 to 30.2 million. The November 2023 estimate should be treated as a provisional estimate and is likely to be revised when more data are received next month.

UK payrolled employee growth for October 2023 compared with September 2023 has been revised from an increase of 33,000 reported in the last bulletin to an increase of 39,000.

Because of the increased uncertainty around the Labour Force Survey (LFS) estimates, we are publishing an <u>alternative series of estimates of UK employment, unemployment, and economic inactivity</u>. These figures were derived using growth rates from Pay As You Earn Real Time Information (excluding the early flash estimate) and the Claimant Count for the periods from May to July 2023 onwards. This is to provide a more considered view of the labour market while the LFS estimates are uncertain.

These alternative estimates for August to October 2023 show that:

- the UK employment rate (for those aged 16 to 64 years) was largely unchanged on the quarter at 75.7%
- the UK unemployment rate (for those aged 16 years and over) was largely unchanged on the quarter at 4.2%
- the UK economic inactivity rate (for those aged 16 to 64 years) was largely unchanged on the quarter at 20.9%

#### 3. Latest indicators at a glance

#### 4. Labour market data

#### Summary of labour market statistics

Dataset A01 | Released 12 December 2023

Labour market statistics summary data table, including earnings, employment, unemployment, redundancies and vacancies, Great Britain and UK, published monthly.

#### Earnings and employment from Pay As You Earn Real Time Information, seasonally adjusted

Dataset | Released 12 December 2023

Earnings and employment statistics from Pay As You Earn (PAYE) Real Time Information (RTI) (experimental statistics), seasonally adjusted.

#### Adjusted employment, unemployment and economic inactivity

Dataset X10 | Released 12 December 2023

Experimental labour market estimates using administrative data to produce adjusted UK employment, unemployment and economic inactivity measures, seasonally adjusted. Includes a breakdown by countries and regions of the UK.

#### A guide to labour market data

Methodology | Updated 21 April 2023

Summary of labour market datasets, providing estimates of employment, unemployment, average weekly earnings, and the number of vacancies. Tables are listed alphabetically and by topic.

View all related data on our related data page.

Alternatively, Nomis provides free access to the most detailed and up-to-date UK labour market statistics.

### 5. Glossary

#### Average weekly earnings

Average weekly earnings, detailed in our <u>Guide to labour market statistics methodology</u>, measure money paid by employers to employees in Great Britain before tax and other deductions from pay. The estimates are not just a measure of pay rises, because they also reflect, for example, changes in the overall structure of the workforce.

More high-paid jobs in the economy would have an upward effect on the earnings growth rate.

#### **Economic inactivity**

People not in the labour force (also known as economically inactive in our <u>Guide to labour market statistics</u> <u>methodology</u>) are not in employment but do not meet the internationally accepted definition of unemployment. This is because they have not been seeking work within the last four weeks or they are unable to start work in the next two weeks. The economic inactivity rate is the proportion of people aged between 16 and 64 years who are not in the labour force.

#### **Employment**

Employment measures the number of people in paid work or who had a job that they were temporarily away from (for example, because they were on holiday or off sick). This differs from the number of jobs because some people have more than one job. The employment rate is the proportion of people aged between 16 and 64 years who are in employment. See our <u>Guide to labour market statistics methodology</u> for a more detailed explanation.

#### Unemployment

Unemployment measures people without a job who have been actively seeking work within the last four weeks and are available to start work within the next two weeks. The unemployment rate is not the proportion of the total population who are unemployed. It is the proportion of the economically active population (people in work and those seeking and available to work) who are unemployed. See our <u>Guide to labour market statistics methodology</u> for more information.

#### **Vacancies**

Vacancies are defined as positions for which employers are actively seeking recruits from outside their business or organisation. The estimates are based on the Vacancy Survey. This is a survey of businesses designed to provide estimates of the stock of vacancies across the economy, excluding agriculture, forestry, and fishing (a small sector for which the collection of estimates would not be practical). For more information, see our <u>Guide to labour market statistics methodology</u>.

#### Pay As You Earn Real Time Information

These data come from HM Revenue and Customs' (HMRC's) Pay As You Earn (PAYE) Real Time Information (RTI) system. They cover the whole population, rather than a sample of people or companies, and they will allow for more detailed estimates of the population. The release is classed as experimental statistics (see our <u>Guide to experimental statistics methodology</u>), as the methodologies used to produce the statistics are still in their development phase. As a result, the series are subject to revisions.

A more detailed glossary is available in our <u>Guide to labour market statistics methodology</u>.

### 6. Measuring the data

We have been facing the challenge of falling response rates for household surveys, as have other comparable countries. This issue became more acute in the Labour Force Survey (LFS) data collected for August 2023. The LFS estimates due to be published in October 2023 were suspended because of quality concerns.

Therefore, we have developed a <u>comprehensive plan to address these concerns and reintroduce LFS estimates</u>. The plan covers both data collection and methodological improvements. An <u>Update on the Labour Force Survey</u> was published in a statement on 5 December 2023, detailing the plan for the December and January Labour Market publications.

Further information on response rates and other quality-related issues for the LFS can be found in our quarterly <u>Labour Force Survey performance and quality monitoring reports</u>.

Our <u>Comparison of labour market data sources methodology</u> compares data sources and discusses some of the main differences.

#### Coronavirus

For more information on how labour market data sources were affected by the coronavirus (COVID-19) pandemic, see our Coronavirus and the effects on UK labour market statistics article.

#### Making our published spreadsheets accessible

Following the <u>Government Statistical Service (GSS)</u> guidance on <u>Releasing statistics in spreadsheets</u>, we will be amending our published tables over the coming months to improve usability, accessibility and machine readability of our published statistics. To help users change to the new formats, we will be publishing sample versions of a selection of our tables and, where practical, initially publish the tables in both the new and current formats. If you have any questions or comments, please email us at <u>labour.market@ons.gov.uk</u>.

#### Labour market transformation

We have published a <u>Labour market transformation article</u> providing an update on the transformation of labour market statistics.

We welcome your feedback on this latest update and our plans. Please email us at <u>labour.market.transformation@ons.gov.uk</u> to tell us what you think.

#### Pre-release data

The Bank of England were granted exceptional pre-release access to our Labour market overview, UK: December 2023 bulletin and accompanying tables at 8am on Monday 11 December 2023 so that the data were available for the Monetary Policy Committee (MPC) meeting held on that day. For further information, see the Exchange of letters requesting exceptional pre-release access.

### 7. Strengths and limitations

The estimates presented in this bulletin contain uncertainty. For more information, see our <u>Uncertainty and how we measure it methodology</u>.

Information on revisions is available in our Labour market statistics revisions policy.

Information on the strengths and limitations of this bulletin is available in our previous bulletin, <u>Labour market overview</u>, <u>UK: April 2021</u>.

Further information is available in our <u>Guide to labour market statistics methodology</u>.

#### Note on headline employment, unemployment and inactivity rates

The headline employment and inactivity rates are based on the population aged 16 to 64 but the headline unemployment rate is based on the economically active population aged 16 and over. The employment and inactivity rates for those aged 16 and over are affected by the inclusion of the retired population in the denominators and are therefore less meaningful than the rates for those aged from 16 to 64. However, for the unemployment rate for those aged 16 and over, no such effect occurs as the denominator for the unemployment rate is the economically active population which only includes people in work or actively seeking and able to work.

#### Note on headline employment, unemployment and inactivity levels

The headline employment and unemployment levels are for those aged 16 and over; they measure all people in work or actively seeking and able to work. However, the headline inactivity level is for those aged 16 to 64. The inactivity rate for those aged 16 and over is less meaningful as it includes elderly people who have retired from the labour force.

<sup>1.</sup> The Labour Force Survey (LFS) is a survey of households in the UK.

<sup>2.</sup> The headline employment rate is the number of people aged 16 to 64 in employment divided by the population aged 16 to 64.

<sup>3.</sup> The headline unemployment rate is the number of unemployed people (aged 16+) divided by the economically active population (aged 16+). The economically active population is defined as those in employment plus those who are unemployed.

<sup>4.</sup> The headline inactivity rate is the number of people aged 16 to 64 divided by the population aged 16-64.

Labour market statistics enquiries: labour.market@ons.gov.uk

Note: When comparing quarterly changes ONS recommends comparing with the previous non-overlapping 3-month average time period (eg, compare Apr-Jun with Jan-Mar, not with Mar-May).

<sup>1.</sup> The split between full-time and part-time employment is based on respondents' self-classification.

<sup>2.</sup> This series does not include all people on these programmes; it only includes those engaging in any form of work, work experience or work-related training.

<sup>3.</sup> These series cover Employees and Self-employed only. These series include some temporary employees.

<sup>4.</sup> The total includes those who did not give a reason for working part-time and it therefore does not equal the sum of the other columns in this section of the table.

Source: returns from public sector organisations

**Explanatory Note:** The public and private sector employment series have been affected by a number of major reclassifications where bodies employing large numbers of people have moved between the public and private sectors. These major reclassifications are as follows:

Further Education corporations and Sixth Form College corporations in England are included in the private sector from June 2012 but in the public sector for earlier time periods.

Royal Mail plc is included in the private sector from December 2013 but in the public sector for earlier time periods.

Lloyds Banking Group plc is included in the public sector from December 2008 to December 2013 but in the private sector for earlier and later time periods.

Royal Bank of Scotland plc is included in the public sector from December 2008 but in the private sector for earlier time periods.

Network Rail is included in the private sector before December 2002. From December 2002 onwards it is included in the public sector (except for the period from June 2003 to March 2004, when it is included in the private sector).

Northern Rock is included in the public sector from December 2007 until December 2011 but in the private sector for earlier and later time periods.

Bradford and Bingley is included in the public sector from September 2008 but in the private sector for earlier time periods.

Welsh Further Education colleges are included in the private sector from March 2015 but in the public sector for earlier time periods.

Housing associations in England are included in the public sector between September 2008 and September 2017; they are in the private sector for earlier and later time periods.

Housing associations in Scotland are included in the public sector from September 2001 until June 2018; they are included in the private sector for earlier and later time periods. Housing associations in Wales are included in the private sector from June 2018; they are included in the public sector for earlier time periods.

Housing associations in Northern Ireland are included in the public sector from March 1999 to June 2020.

Train operating companies in England, Scotland and Wales operating under emergency measure agreements are included in the public sector from June 2020.

The series shown at Table 4 (in columns 6 to 9) for public and private sector employment excluding the effects of major reclassifications show all of the above mentioned bodies included in the private sector for all time periods and excluded from the public sector for all time periods. When using figures from this table, the latest estimate of the number of people employed in the public and private sectors should be taken from columns 1 and 3 respectively. However the quarterly and annual changes in employment shown in these columns are affected by reclassifications. Figures from columns 6 and 8 should be used for assessments of the recent underlying changes in public and private sector employment. The changes in employment shown in these columns are measured on a consistent basis to remove the effect of major reclassifications.

- 1 Estimates derived from public sector organisations.
- 2 Estimates for Northern Ireland included in the UK total are sourced from the Quarterly Employment Survey and are based on jobs rather than employees.
- 3 Estimated as the difference between LFS total employment and the data from public sector organisations.
   4 LFS data refer to May to July for annual data from 1999-2010. LFS data for March refer to February-April, June refers to May-July, September refers to August-October and December refers to November-January.
- 5 Labour Force Survey employment, all aged 16 and over, seasonally adjusted.6 Estimates of total employment from the Labour Force Survey are not available for August-October 2023, therefore it is not possible to produce private sector employment estimates for September 2023.
- 7 This series excludes locally engaged staff stationed outside the United Kingdom.
- 8 This series excludes the Northern Ireland Civil Service.
- 9 This series includes publicly owned financial corporations. Royal Bank of Scotland Group plc was classified to the public sector from 13 October 2008. It is therefore included in the public sector estimates from December 2008 onwards but not for earlier periods. Northern Rock is classified to the public sector between 9 October 2007 and 31 December 2011 and is therefore included in the public sector estimates from December 2007 to December 2011 but not for earlier or later periods. Similarly, Lloyds Banking Group plc is included in the public sector from December 2008 to December 2013 but in the private sector for earlier and later time periods. Bradford and Bingley is included in the public sector from September 2008 but in the private sector for earlier time periods.
- 10 This series does not exactly equal the sum of Construction, HM Forces, Police (including civilians), Education, National Health Service, Other health and social work and Other (including financial corporations) because the series are separately seasonally adjusted.

More detailed estimates are available in the Public Sector Emple <a href="http://www.ons.gov.uk/ons/rel/pse/public-sector-employment/index.html">http://www.ons.gov.uk/ons/rel/pse/public-sector-employment/index.html</a>

Workforce jobs enquiries 01633 456776 Sources: Employer surveys, Labour Force Survey and administrative sources

<sup>1.</sup> Due to data provision issues for 2023 Q3 the Labour Force Survey data required to produce elements of the Workforce Jobs statistics are not available. Statistics for self-employment jobs, employee jobs (industries A and T) and English government supported trainees are estimated using projections.

Estimates prior to September 2001 exclude employee jobs for SIC 2007 section T because they are not available.

<sup>3.</sup> Workforce Jobs figures are a measure of jobs rather than people. For this reason estimates of self-employment jobs and government supported trainee jobs differ from estimates of people in self-employment and in government supported training and employment programmes. The estimates for government supported trainees shown in this table exclude trainees with contracts of employment as such people are included in the estimates of employee jobs.

<sup>4.</sup> Due to a change in the method of compiling the data, there is currently a discontinuity between June and September 2002. These estimates do not include jobs with a contract of employment as such jobs are recorded in the employee jobs series.

<sup>5.</sup> This series is not exclusively a public sector series as it includes some private sector jobs.

Labour market statistics enquiries: labour.market@ons.gov.uk

The estimates shown in this table relate to the number of people in employment and should not be used as a proxy for flows of foreign migrants into the UK.

<sup>1.</sup> The total series includes people who do not state their country of birth or nationality. The total levels series MGTM does not therefore equal the sum of the "UK" and "Non-UK" series.

<sup>2.</sup> This series consists of all 27 EU member states. This series equals the sum of EU14, EU8, EU2 and Other EU.

<sup>3.</sup> Austria, Belgium, Denmark, Finland, France, Germany, Greece, Ireland, Italy, Luxembourg, Netherlands, Portugal, Spain and Sweden.

<sup>4.</sup> Czech Republic, Estonia, Hungary, Latvia, Lithuania, Poland, Slovak Republic and Slovenia.

<sup>5.</sup> Romania and Bulgaria.

<sup>6.</sup> Cyprus, Malta and Croatia

<sup>7.</sup> Total Non-EU equals the sum of Other Europe, Total Africa, Total Asia and Total America and Oceania

## **NON-UK WORKERS**

# 8(2) Unemployment and economic inactivity levels and rates by country of birth and nationality

Labour market statistics enquiries: labour.market@ons.gov.uk

<sup>1.</sup> The total series includes people who do not state their country of birth or nationality. The total levels series therefore do not equal the sum of the "UK" and "Non-UK" series.

<sup>2.</sup> This series consists of all 27 EU member states.

<sup>3.</sup> This series consists of those people whose main reason for being economically inactive was because they were students. It does not include all students as some students will be included in the employment and unemployment estimates.

Labour market statistics enquiries: labour.market@ons.gov.uk

<sup>1.</sup> Discouraged workers are those who are not looking for work because they believe no jobs are available.
2. Other reasons include people who (i) are waiting the results of a job application, (ii) have not yet started looking for work, (iii) do not need or want employment, (iv) have given an uncategorised reason for being economically inactive, or (v) have not given a reason for being economically inactive.

Source: Labour Force Survey

Labour market statistics enquiries: labour.market@ons.gov.uk

<sup>1.</sup> Not in full-time education includes people in part-time education and/or some form of training. Estimates of the number of young people who were not in employment, education or training ("NEET") cannot therefore be derived from this table. Estimates of young people who were NEET are published separately at:

https://www.ons.gov.uk/employmentandlabourmarket/peoplenotinwork/unemployment/bulletins/youngpeoplenotineducationemploymentortrainingneet/latest

2. People in full-time education are employed if they have a part-time job or unemployed if they are looking for part-time employment.

<sup>3.</sup> Denominator = all persons in the relevant age group for economically active, total in employment and economically inactive; economically active for unemployment.

Email: earnings@ons.gov.uk

<sup>1.</sup> Estimates of total pay include bonuses but exclude arrears of pay.

<sup>2.</sup> The three month average figures are the changes in the average seasonally adjusted values for the three months ending with the relevant month compared with the same period a year earlier.

<sup>3.</sup> Estimates of real earnings are calculated by deflating the nominal earnings estimates by the Consumer Prices Index including owner occupiers' housing costs (CPIH), our preferred measure of consumer price inflation.

Labour market statistics enquiries: labour.market@ons.gov.uk

- 1. As figures are taken from OECD they will not match ONS published figures for the United Kingdom.
- 2. Employment rate data is for ages 15 to 64. For the United Kingdom and the United States, the lower age limit is 16 years old.
- 3. Unemployment rate data is for ages 15 and over. For the United Kingdom and the United States, the lower age limit is 16 years old.
- 4. Estimated values are highlighted with shaded cells.

Data source: ONS Labour Disputes Survey Labour disputes enquiries 01633 455400

<sup>1.</sup> As a result of difficulties in consistently defining a stoppage over time, the number of working days lost is considered to be a better indicator of the impact of labour disputes than the number of recorded stoppages.

<sup>2.</sup> A stoppage is defined as a dispute between a single trade union and a single employer. Where a union co-ordinates disputes with several employers, or several unions co-ordinate action with a single employer, this would be counted as multiple stoppages.

<sup>3.</sup> Data for number of workers involved are only available from January 1986 onwards.

<sup>1.</sup> The redundancy level is the number of people who were made redundant in the three months prior to interview. The figure is not seasonally adjusted.

<sup>2.</sup> The redundancy rate is the ratio of the redundancy level for the given quarter to the seasonally adjusted number of employees in the previous quarter, multiplied by 1,000.
