

Statistical bulletin

Labour market overview, UK: January 2024

Estimates of employment, unemployment, economic inactivity and other employmentrelated statistics for the UK.

Contact: Debra Leaker labour.market@ons.gov.uk +44 1633 455400 Release date: 16 January 2024 Next release: 13 February 2024

Notice

5 February 2024

From 13 February, we will be reinstating reweighted Labour Force Survey (LFS) estimates, incorporating our latest estimates of the size and composition of the UK population. These will replace the experimental estimates we have been publishing since October 2023.

Our <u>Impact of reweighting on Labour Force Survey key indicators: 2024</u> article, with accompanying dataset, published 5 February 2024, shows the indicative impacts of this reweighting, from the period July to September 2022 onwards, for the headline levels and rates of employment, unemployment and economic inactivity.

- Vacancies and jobs in the UK

2. Main points

In October to December 2023, the estimated number of vacancies in the UK fell by 49,000 on the quarter to 934,000. Vacancies fell on the quarter for the 18th consecutive period, the longest consecutive run of quarterly falls ever recorded but still above pre-coronavirus (COVID-19) pandemic levels.

Annual growth in regular earnings (excluding bonuses) in Great Britain was 6.6% in September to November 2023, and annual growth in employees' average total earnings (including bonuses) was 6.5% in September to November 2023. Annual growth in real terms (adjusted for inflation using the Consumer Prices Index including owner occupiers' housing costs (CPIH)) for total pay rose on the year by 1.3% in September to November 2023, and for regular pay rose on the year by 1.4%.

In November 2023, there were 69,000 working days lost because of labour disputes across the UK, the lowest number of working days lost since May 2022. Over half of the labour disputes in November 2023 were in the transport, storage, information and communication industries.

The estimate of payrolled employees in the UK for December 2023 decreased by 24,000 on the revised November 2023 figure to 30.2 million. The December 2023 estimate should be treated as a provisional estimate and is likely to be revised when more data are received next month.

Because of the increased uncertainty around the Labour Force Survey (LFS) estimates, we are publishing an alternative series of estimates of UK employment, unemployment, and economic inactivity in our <u>Using</u>. administrative data to create headline labour market figures article. These figures were derived using growth rates from Pay As You Earn Real Time Information (excluding the early flash estimate) and the Claimant Count for the periods from May to July 2023 onwards. Our <u>Statement on the Labour Force Survey published on 12 January</u> 2024 stated that we will publish a methods article in the coming weeks explaining the improvements that are being made to the LFS, as well as the impacts of these improvements on headline estimates, ahead of the reintroduction of a fuller LFS-based dataset in the February 2024 publication.

These alternative estimates for September to November 2023 show that:

- the UK employment rate (for those aged 16 to 64 years) increased by 0.1 percentage points on the quarter to 75.8%
- the UK unemployment rate (for those aged 16 years and over) was largely unchanged on the quarter at 4.2%
- the UK economic inactivity rate (for those aged 16 to 64 years) decreased by 0.1 percentage points on the quarter to 20.8%

4 . Labour market data

Summary of labour market statistics

Dataset A01 | Released 16 January 2024

Labour market statistics summary data table, including earnings, employment, unemployment, redundancies and vacancies, Great Britain and UK, published monthly.

Earnings and employment from Pay As You Earn Real Time Information, seasonally adjusted

Dataset | Released 16 January 2024

Earnings and employment statistics from Pay As You Earn (PAYE) Real Time Information (RTI) (official statistics in development), seasonally adjusted.

Adjusted employment, unemployment and economic inactivity

Dataset X10 | Released 16 January 2024

Experimental labour market estimates using administrative data to produce adjusted UK employment, unemployment and economic inactivity measures, seasonally adjusted. Includes a breakdown by countries and regions of the UK.

A guide to labour market data

Methodology | Updated 21 April 2023 Summary of labour market datasets, providing estimates of employment, unemployment, average weekly earnings, and the number of vacancies. Tables are listed alphabetically and by topic.

View all related data on our related data page.

Alternatively, Nomis provides free access to the most detailed and up-to-date UK labour market statistics.

5. Glossary

Average weekly earnings

Average weekly earnings, detailed in our <u>Guide to labour market statistics methodology</u>, measure money paid by employers to employees in Great Britain before tax and other deductions from pay. The estimates are not just a measure of pay rises, because they also reflect, for example, changes in the overall structure of the workforce.

More high-paid jobs in the economy would have an upward effect on the earnings growth rate.

Economic inactivity

People not in the labour force (also known as economically inactive in our <u>Guide to labour market statistics</u> <u>methodology</u>) are not in employment but do not meet the internationally accepted definition of unemployment. This is because they have not been seeking work within the last four weeks or they are unable to start work in the next two weeks. The economic inactivity rate is the proportion of people aged between 16 and 64 years who are not in the labour force.

Employment

Employment measures the number of people in paid work or who had a job that they were temporarily away from (for example, because they were on holiday or off sick). This differs from the number of jobs because some people have more than one job. The employment rate is the proportion of people aged between 16 and 64 years who are in employment. See our <u>Guide to labour market statistics methodology</u> for a more detailed explanation.

Unemployment

Unemployment measures people without a job who have been actively seeking work within the last four weeks and are available to start work within the next two weeks. The unemployment rate is not the proportion of the total population who are unemployed. It is the proportion of the economically active population (people in work and those seeking and available to work) who are unemployed. See our <u>Guide to labour market statistics methodology</u> for more information.

Vacancies

Vacancies are defined as positions for which employers are actively seeking recruits from outside their business or organisation. The estimates are based on the Vacancy Survey. This is a survey of businesses designed to provide estimates of the stock of vacancies across the economy, excluding agriculture, forestry, and fishing (a small sector for which the collection of estimates would not be practical). For more information, see our <u>Guide to labour market statistics methodology</u>.

Pay As You Earn Real Time Information

These data come from HM Revenue and Customs' (HMRC's) Pay As You Earn (PAYE) Real Time Information (RTI) system. They cover the whole population, rather than a sample of people or companies, and they will allow for more detailed estimates of the population. The PAYE RTI statistics are official statistics in development (previously called experimental statistics) as the methodologies used to produce the statistics are still in their development phase.

In June 2023, the Office for Statistics Regulation (OSR) published an assessment report of HM Revenue and Customs (HMRC) and Office for National Statistics (ONS) statistics on earnings and employment from Pay as You Earn Real Time Information (PAYE RTI). HMRC and the ONS welcome OSR's assessment report and have developed an <u>action plan focusing on the six requirements</u>.

A more detailed glossary is available in our Guide to labour market statistics methodology.

6. Measuring the data

We have been facing the challenge of falling response rates for household surveys, as have other comparable countries. This issue became more acute in the Labour Force Survey (LFS) data collected for August 2023. The LFS estimates due to be published in October 2023 were suspended because of quality concerns.

Therefore, we have developed a comprehensive plan to address these concerns and reintroduce LFS, as described in our <u>Labour Force Survey</u>: planned improvements and its reintroduction estimates methodology. The plan covers both data collection and methodological improvements. Our <u>statement on the Labour Force Survey</u> was published on 12 January 2024, detailing the plan for an article in coming weeks and the February 2024 labour market publication.

Further information on response rates and other quality-related issues for the LFS can be found in our quarterly <u>Labour Force Survey performance and quality monitoring reports</u>.

Our <u>Comparison of labour market data sources methodology</u> compares data sources and discusses some of the main differences.

Coronavirus

For more information on how labour market data sources were affected by the coronavirus (COVID-19) pandemic, see our <u>Coronavirus and the effects on UK labour market statistics article</u>.

Making our published spreadsheets accessible

Following the <u>Government Statistical Service (GSS) guidance on Releasing statistics in spreadsheets</u>, we will be amending our published tables over the coming months to improve usability, accessibility and machine readability of our published statistics. To help users change to the new formats, we will be publishing sample versions of a selection of our tables and, where practical, initially publish the tables in both the new and current formats. If you have any questions or comments, please email us at <u>labour.market@ons.gov.uk</u>.

Labour market transformation

We have published a <u>Labour market transformation article</u> providing an update on the transformation of labour market statistics.

We welcome your feedback on this latest update and our plans. Please email us at <u>labour.market</u>. <u>transformation@ons.gov.uk</u> to tell us what you think.

7 . Strengths and limitations

The estimates presented in this bulletin contain uncertainty. For more information, see our <u>Uncertainty and how</u> we measure it methodology.

Information on revisions is available in our Labour market statistics revisions policy.

Information on the strengths and limitations of this bulletin is available in our previous bulletin, <u>Labour market</u> overview, <u>UK: April 2021</u>.

Further information is available in our Guide to labour market statistics methodology.

Source: Labour Force Survey

Labour market statistics enquiries: labour.market@ons.gov.uk

United Kingdom (thousands) seasonally adjusted

1. The Labour Force Survey (LFS) is a survey of households in the UK.

2. The headline employment rate is the number of people aged 16 to 64 in employment divided by the population aged 16 to 64.

3. The headline unemployment rate is the number of unemployed people (aged 16+) divided by the economically active population (aged 16+). The

economically active population is defined as those in employment plus those who are unemployed.

4. The headline inactivity rate is the number of people aged 16 to 64 divided by the population aged 16-64.

Note on headline employment, unemployment and inactivity rates

The headline employment and inactivity rates are based on the population aged 16 to 64 but the headline unemployment rate is based on the economically active population aged 16 and over. The employment and inactivity rates for those aged 16 and over are affected by the inclusion of the retired population in the denominators and are therefore less meaningful than the rates for those aged from 16 to 64. However, for the unemployment rate for those aged 16 and over, no such effect occurs as the denominator for the unemployment rate is the economically active population which only includes people in work or actively seeking and able to work.

Note on headline employment, unemployment and inactivity levels

The headline employment and unemployment levels are for those aged 16 and over; they measure all people in work or actively seeking and able to work. However, the headline inactivity level is for those aged 16 to 64. The inactivity rate for those aged 16 and over is less meaningful as it includes elderly people who have retired from the labour force.

SUMMARY 2(1) Labour market status by age group

Source: Labour Force Survey Labour market statistics enquiries: labour.market@ons.gov.uk

Note: When comparing quarterly changes ONS recommends comparing with the previous non-overlapping 3-month average time period (eg, compare Apr-Jun with Jan-Mar, not with Mar-May).

The split between full-time and part-time employment is based on respondents' self-classification.
 This series does not include all people on these programmes; it only includes those engaging in any form of work, work experience or work-related training.
 These series cover Employees and Self-employed only. These series include some temporary employees.
 The total includes those who did not give a reason for working part-time and it therefore does not equal the sum of the other columns in this section of the table.

Explanatory Note: The public and private sector employment series have been affected by a number of major reclassifications where bodies employing large

numbers of people have moved between the public and private sectors. These major reclassifications are as follows:

Further Education corporations and Sixth Form College corporations in England are included in the private sector from June 2012 but in the public sector for earlier time periods.

Royal Mail plc is included in the private sector from December 2013 but in the public sector for earlier time periods. Lloyds Banking Group plc is included in the public sector from December 2008 to December 2013 but in the private sector for earlier and later time periods.

Royal Bank of Scotland plc is included in the public sector from December 2008 but in the private sector for earlier time periods. Network Rall is included in the private sector). From December 2002 on wards it is included in the public sector (except for the period from June 2003 to March 2004, when it is included in the private sector).

Northern Rock is included in the public sector from December 2007 until December 2011 but in the private sector for earlier and later time periods

Bradford and Bingley is included in the public sector from September 2008 but in the private sector for earlier time periods. Welsh Further Education colleges are included in the public sector from September 2008 but in the public sector for earlier time periods.

Housing associations in England are included in the public sector between September 2008 and September 2017; they are in the private sector for earlier and later time periods. Housing associations in Scotland are included in the public sector from September 2010 until June 2018; they are included in the private sector for earlier and later time periods. Housing associations in Wales are included in the private sector from June 2018; they are included in the private sector for earlier and later time periods. Housing associations in Northern Ireland are included in the public sector from March 1999 to June 2020.

Train operating companies in England, Scotland and Wales operating under emergency measure agreements are included in the public sector from June 2020.

The series shown at Table 4 (in columns 6 to 9) for public and private sector employment excluding the effects of major reclassifications show all of the above mentioned bodies included in the private sector for all time periods and excluded from the public sector for all time periods. When using figures from this table, the latest estimate of the number of people employed in the public and private sectors should be taken from columns 1 and 3 respectively. However the quarterly and annual changes in employment shown in these columns are affected by reclassifications. Figures from columns 6 and 8 should be used for assessments of the recent underlying changes in public and private sector employment. The changes in employment shown in these columns are measured on a consistent basis to remove the effect of major reclassifications.

Estimated as the difference between LFS total employment and the data from public sector organisations.
 LFS employment data for March refer to February-April, June refers to May-July, September refers to August-October and December refers to November-January.
 This series excludes locally engaged staff stationed outside the United Kingdom.
 This series excludes the Northern Ireland Civil Service.
 This series may not exactly equal the sum of the components because each component is independently seasonally adjusted.
 Estimates of total employment from the Labour Force Survey are not available for August-October 2023, therefore it is not possible to produce private sector employment estimates for September 2023.

More detailed estimates are available in the Public Sector Employment Statistical Bulletin at:

bulletins/publicsectoremployment/latest

Workforce jobs enquiries 01633 456776 Sources: Employer surveys, Labour Force Survey and administrative sources

United Kingdom (thousands), seasonally adjusted

1. Due to data provision issues for 2023 Q3 the Labour Force Survey data required to produce elements of the Workforce Jobs statistics are not available. Statistics for self-employment jobs, employee jobs (industries A and T) and English government supported trainees are estimated using projections.

2. Workforce Jobs figures are a measure of jobs rather than people. For this reason estimates of self-employment jobs and government supported trainee jobs differ from estimates of people in self-employment and in government supported training and employment programmes shown at Table 3. The estimates for government supported trainees shown in this table exclude trainees with contracts of employment as such people are included in the estimates of employee jobs.

3. This series is not exclusively a public sector series as it includes some private sector jobs. See table 4 for estimates of public and private sector employment.

Source: Labour Force Survey Labour market statistics enquiries: labour.market@ons.gov.uk

1. Not in full-time education includes people in part-time education and/or some form of training. Estimates of the number of young people who were not in employment, education or

training ("NEET") cannot therefore be derived from this table. Estimates of young people who were NEET are published separately at:

https://www.ons.gov.uk/employmentandlabourmarket/becolenotinwork/unemployment/builetins/younopeoplenotineducationemploymentortrainingneet/latest
2. People in full-time education are employed if they have a part-time job or unemployed if they are looking for part-time employment.
3. Denominator = all persons in the relevant age group for economically active, total in employment and economically inactive; economically active for unemployment.

Estimates of regular pay exclude bonuses and arrears of pay.
 The figure in brackets is the percentage of whole economy employment in that sector or industry for the latest time period.

Email: earnings@ons.gov.uk

3. The three month average figures are the changes in the average seasonally adjusted values for the three months ending with the relevant month compared with the same period a year earlier.

1. Estimates of total pay include bonuses but exclude arrears of pay.

2. The three month average figures are the changes in the average seasonally adjusted values for the three months ending with the relevant month compared with the same period a year earlier.

3. Estimates of real earnings are calculated by deflating the nominal earnings estimates by the Consumer Prices Index including owner occupiers' housing costs (CPIH), our preferred measure of consumer price inflation.

As figures are taken from OECD they will not match ONS published figures for the United Kingdom.
 Employment rate data is for ages 15 to 64. For the United Kingdom and the United States, the lower age limit is 16 years old.
 Unemployment rate data is for ages 15 and over. For the United Kingdom and the United States, the lower age limit is 16 years old.
 Estimated values are highlighted with shaded cells.

Labour disputes enquiries 01633 455400

As a result of difficulties in consistently defining a stoppage over time, the number of working days lost is considered to be a better indicator of the impact of labour disputes than the number of recorded stoppages.

2. A stoppage is defined as a dispute between a single trade union and a single employer. Where a union co-ordinates disputes with several employers, or several unions co-ordinate action with a single employer, this would be counted as multiple stoppages.

3. Data for number of workers involved are only available from January 1986 onwards.

Data source: Labour Force Survey

United Kingdom

Labour market statistics enquiries: labour.market@ons.gov.uk

1. The redundancy level is the number of people who were made redundant in the three months prior to interview. The figure is not seasonally adjusted.

2. The redundancy rate is the ratio of the redundancy level for the given quarter to the seasonally adjusted number of employees in the previous quarter, multiplied by 1,000.

N92000002	Northern Ireland	922	8

Workforce jobs are mainly sourced from employer surveys and are tabulated by region of workplace.

HM Forces stationed abroad are included in the UK workforce jobs estimates but not in the regional estimates. The UK workforce jobs estimates therefore do not equal the sum of the regional estimates.

Thousands, seasonally adjusted
