2. Main points

Our latest Labour Force Survey (LFS) estimates for November 2021 to January 2022 show a continuing recovery in the labour market, with a quarterly increase in the employment rate and a decrease in the unemployment rate. However, economic inactivity has increased slightly on the quarter.

The UK employment rate increased by 0.1 percentage points on the quarter to 75.6%. Full-time employees drove the increase in the employment rate during the latest three-month period. While the number of part-time employees decreased strongly during the coronavirus (COVID-19) pandemic, it has been increasing since April to June 2021. However, the number of self-employed workers remains low following decreases through the coronavirus pandemic.

Our most timely estimate of payrolled employees shows another monthly increase (up 275,000) in February 2022 to a record 29.7 million.

The unemployment rate decreased by 0.2 percentage points on the quarter to 3.9%, while the economic inactivity rate increased by 0.1 percentage points to 21.3%. During the coronavirus pandemic, increases in economic inactivity compared with the previous three-month period were largely driven by those aged 16 to 24 years. However, the number of economically inactive people aged 16 to 24 years has been decreasing since early 2021, with those aged 50 to 64 years driving the recent increases in economic inactivity. Yesterday we <u>published an article</u> looking at this age group in more detail.

The number of job vacancies in December 2021 to February 2022 rose to a new record of 1,318,000. This is an increase of 105,000 from last quarter, with half of the industry sectors showing record highs. However, the rate of growth in vacancies continued to slow down.

Growth in average total pay (including bonuses) was 4.8% and growth in regular pay (excluding bonuses) was 3.8% among employees in November 2021 to January 2022. In real terms (adjusted for inflation), growth in total pay was 0.1% and regular pay fell on the year at negative 1.0%; strong bonus payments over the past 6 months have kept recent real total pay growth positive. Previous months' strong growth rates were affected upwards by base and compositional effects. These initial temporary factors have worked their way out. However, we are now comparing the latest period with a period where certain sectors had increasing numbers of employees on furlough because of the winter 2020 to 2021 lockdown, so a small amount of base effect will be present for these sectors. This will not be to the degree we saw when comparing periods at the start of the coronavirus pandemic.

3. Latest indicators at a glance

4. Labour market data

Summary of labour market statistics

Dataset A01 | Released 15 March 2022

Estimates of employment, unemployment and other employment-related statistics for the UK.

Real Time Information statistics

Dataset Real Time Information statistics | Released 15 March 2022

Earnings and employment statistics from Pay As You Earn (PAYE) Real Time Information (RTI) (Experimental Statistics) seasonally adjusted.

Labour Force Survey single month estimates

Dataset X01 | Released 15 March 2022

Labour Force Survey (LFS) experimental single month estimates of employment, unemployment and economic inactivity.

Labour Force Survey weekly estimates

Dataset X07 | Released 15 March 2022

Labour Force Survey (LFS) experimental weekly estimates of employment, unemployment, economic inactivity and hours in the UK.

A guide to labour market data

Methodology | Released 15 December 2021

Summary of labour market datasets providing estimates of employment, unemployment, average weekly earnings and the number of vacancies. Tables are listed alphabetically and by topic.

View all related data on the related data page.

Alternatively, NOMIS provides free access to the most detailed and up-to-date UK labour market statistics.

5. Glossary

Average weekly earnings

Average weekly earnings measures money paid by employers to employees in Great Britain before tax and other deductions from pay. The estimates are not just a measure of pay rises because they also reflect, for example, changes in the overall structure of the workforce. More high-paid jobs in the economy would have an upward effect on the earnings growth rate.

Economic inactivity

People not in the labour force (also known as <u>economically inactive</u>) are not in employment but do not meet the internationally accepted definition of unemployment because they have not been seeking work within the last four weeks and/or they are unable to start work in the next two weeks. The economic inactivity rate is the proportion of people aged between 16 and 64 years who are not in the labour force.

Employment

Employment measures the number of people in paid work or who had a job that they were temporarily away from (for example, because they were on holiday or off sick). This differs from the number of jobs because some people have more than one job. The employment rate is the proportion of people aged between 16 and 64 years who are in employment. A more detailed explanation is available in A guide to labour market statistics.

Unemployment

<u>Unemployment</u> measures people without a job who have been actively seeking work within the last four weeks and are available to start work within the next two weeks. The unemployment rate is not the proportion of the total population who are unemployed. It is the proportion of the economically active population (those in work plus those seeking and available to work) who are unemployed.

Vacancies

<u>Vacancies</u> are defined as positions for which employers are actively seeking recruits from outside their business or organisation. The estimates are based on the Vacancy Survey; this is a survey of businesses designed to provide estimates of the stock of vacancies across the economy, excluding agriculture, forestry and fishing (a small sector for which the collection of estimates would not be practical).

Pay As You Earn (PAYE) Real Time Information (RTI)

These data come from HM Revenue and Customs' (HMRC's) Pay As You Earn (PAYE) Real Time Information (RTI) system. They cover the whole population rather than a sample of people or companies, and they will allow for more detailed estimates of the population. The release is classed as Experimental Statistics as the methodologies used to produce the statistics are still in their development phase. As a result, the series are subject to revisions.

6. Measuring the data

Our bulletins will be shorter and more focused on the main messages and most important trends in response to user feedback. Read more on this and how to send us feedback on how our publications are evolving.

Coronavirus

For more information on how labour market data sources are affected by the coronavirus (COVID-19) pandemic, see <u>Coronavirus and the effects on UK labour market statistics</u>, which details some of the challenges that we have faced in producing <u>estimates</u> at this time.

Our article <u>Comparison of labour market data sources</u> compares data sources and discusses some of the main differences.

Our latest data and analysis on the impact of coronavirus on the UK economy and population are available on our dedicated <u>coronavirus web page</u>. This is a hub for all special coronavirus-related publications, drawing on all available data. In response to the developing coronavirus pandemic, we are working to ensure that we continue to publish economic statistics. For more information, please see <u>COVID-19 and the production of statistics</u>.

Labour Force Survey reweighting

Labour Force Survey (LFS) responses published from 15 July 2021 have been reweighted to new populations using growth rates from HM Revenue and Customs (HMRC) Real Time Information (RTI). This is to allow for different trends during the coronavirus pandemic. The reweighting gives improved estimates of both rates and levels.

When the recent <u>weighting methodology for the Labour Force Survey (LFS)</u> was applied, there was a small error in the implementation. When calculating three-month averages for the Pay As You Earn (PAYE) RTI the months used were the previous three-month average. For example, for the October to December period, the RTI data used were that for September to November. This led to a slight overestimation of the non-UK population by approximately 0.5%. This represents less than half the size of the sampling variability. The size is roughly the same over the quarters of 2020 and the impact on January to December 2020 Annual Population Survey (APS) estimates is about 14,000 for EU born, 25,000 for non-EU born and 39,000 for non-UK born. The impact on LFS economic activity estimates at national level is mostly below 0.1% and the impact on rates is less than 0.02 percentage points.

We plan to reweight Labour Force Survey (LFS) and Annual Population Survey (APS) datasets that include data from March 2020 using RTI data published today. Last month, we said that we would provide further details on our plans including a timeline in our March labour market publication. Since then, new data became available that we need to analyse and consider before firming up our timeline, which we will do as soon as possible.

Economic statistics governance after EU exit

Following the UK's exit from the EU, new governance arrangements are being put in place that will support the adoption and implementation of high-quality standards for UK economic statistics. These governance arrangements will promote international comparability and add to the credibility and independence of the UK's statistical system.

At the centre of this new governance framework will be the new National Statistician's Committee for Advice on Standards for Economic Statistics (NSCASE). NSCASE will support the UK by ensuring its processes for influencing and adopting international statistical standards are world leading. The advice NSCASE provides to the National Statistician will span the full range of domains in economic statistics, including the national accounts, fiscal statistics, prices, trade and the balance of payments, and labour market statistics.

Further information about NSCASE is available.

Making our published spreadsheets accessible

Following the Government Statistical Service (GSS) guidance on <u>releasing statistics in spreadsheets</u> we will be amending our published tables over the coming months to improve usability, accessibility and machine readability of our published statistics. To help users change to the new formats we will be publishing sample versions of a selection of our tables, and where practical, initially publish the tables in both the new and current formats. If you have any questions or comments, please email <u>labour.market@ons.gov.uk</u>.

Pre-release data

The Bank of England were granted exceptional pre-release access to the "Labour market overview, UK: March 2022" bulletin and accompanying tables at 13:00 pm on Friday 11 March 2022 so that the data were available for the Monetary Policy Committee (MPC) meeting held on that day. See exchange of letters requesting exceptional pre-release access so that data are available for discussion at the MPC.

7. Strengths and limitations

The estimates presented in this bulletin contain uncertainty.

Further information is available in A guide to labour market statistics.

Information on revisions is available in the <u>Labour market statistics revisions policy</u>.

Information on the strengths and limitations of this bulletin is available in our previous release.

Note on headline employment, unemployment and inactivity rates

The headline employment and inactivity rates are based on the population aged 16 to 64 but the headline unemployment rate is based on the economically active population aged 16 and over. The employment and inactivity rates for those aged 16 and over are affected by the inclusion of the retired population in the denominators and are therefore less meaningful than the rates for those aged from 16 to 64. However, for the unemployment rate for those aged 16 and over, no such effect occurs as the denominator for the unemployment rate is the economically active population which only includes people in work or actively seeking and able to work.

Note on headline employment, unemployment and inactivity levels

The headline employment and unemployment levels are for those aged 16 and over; they measure all people in work or actively seeking and able to work. However, the headline inactivity level is for those aged 16 to 64. The inactivity rate for those aged 16 and over is less meaningful as it includes elderly people who have retired from the labour force.

^{1.} The Labour Force Survey (LFS) is a survey of households in the UK.

^{2.} The headline employment rate is the number of people aged 16 to 64 in employment divided by the population aged 16 to 64.

^{3.} The headline unemployment rate is the number of unemployed people (aged 16+) divided by the economically active population (aged 16+). The economically active population is defined as those in employment plus those who are unemployed.

^{4.} The headline inactivity rate is the number of people aged 16 to 64 divided by the population aged 16-64.

Note: When comparing quarterly changes ONS recommends comparing with the previous non-overlapping 3-month average time period (eg, compare Apr-Jun with Jan-Mar, not with Mar-May).

^{1.} The split between full-time and part-time employment is based on respondents' self-classification.

^{2.} This series does not include all people on these programmes; it only includes those engaging in any form of work, work experience or work-related training.

3. These series cover Employees and Self-employed only. These series include some temporary employees.

4. The total includes those who did not give a reason for working part-time and it therefore does not equal the sum of the other columns in this section of the table.

Source: returns from public sector organisations

Explanatory Note: The public and private sector employment series have been affected by a number of major reclassifications where bodies employing large numbers of people have moved between the public and private sectors. These major reclassifications are as follows:

Further Education corporations and Sixth Form College corporations in England are included in the private sector from June 2012 but in the public sector for earlier time periods

Royal Mail plc is included in the private sector from December 2013 but in the public sector for earlier time periods.

Lloyds Banking Group plc is included in the public sector from December 2008 to December 2013 but in the private sector for earlier and later time periods

Royal Bank of Scotland plc is included in the public sector from December 2008 but in the private sector for earlier time periods.

Network Rail is included in the private sector before December 2002. From December 2002 onwards it is included in the public sector (except for the period from June 2003 to March 2004, when it is included in the private sector).

Northern Rock is included in the public sector from December 2007 until December 2011 but in the private sector for earlier and later time periods. Bradford and Bingley is included in the public sector from September 2008 but in the private sector for earlier time periods.

Welsh Further Education colleges are included in the private sector from March 2015 but in the public sector for earlier time periods

Housing associations in England are included in the public sector between September 2008 and September 2017; they are in the private sector for earlier and later time periods.

Housing associations in Scotland are included in the public sector from September 2001 until June 2018; they are included in the private sector for earlier and later time periods. Housing associations in Wales are included in the private sector from June 2018; they are included in the public sector for earlier time periods.

Housing associations in Northern Ireland are included in the public sector from March 1999 to June 2020.

Train operating companies in England, Scotland and Wales operating under emergency measure agreements are included in the public sector from June 2020.

The series shown at Table 4 (in columns 6 to 9) for public and private sector employment excluding the effects of major reclassifications show all of the above mentioned bodies included in the private sector for all time periods and excluded from the public sector for all time periods. When using figures from this table, the latest estimate of the number of people employed in the public and private sectors should be taken from columns 1 and 3 respectively. However the quarterly and annual changes in employment shown in these columns are affected by reclassifications. Figures from columns 6 and 8 should be used for assessments of the recent underlying changes in public and private sector employment. The changes in employment shown in these columns are measured on a consistent basis to remove the effect of major reclassifications.

- Estimated as the difference between LFS total employment and the data from public sector organisations
- 2. LFS employment data for March refer to February-April, June refers to May-July, September refers to August-October and December refers to November-January.
- This series excludes locally engaged staff stationed outside the United Kingdom This series excludes the Northern Ireland Civil Service.
- 5. This series may not exactly equal the sum of the components because each component is independently seasonally adjusted.

More detailed estimates are available in the Public Sector Employment Statistical Bulletin at:

https://www.ons.gov.uk/employmentandlabou narket/peopleinwork/publicsectorpersonnel/bulletins/publicsectoremployment/latest

Workforce jobs enquiries 01633 456776

Sources: Employer surveys, Labour Force Survey and administrative sources

^{1.} Workforce Jobs figures are a measure of jobs rather than people. For this reason estimates of self-employment jobs and government supported trainee jobs differ from estimates of people in self-employment and in government supported training and employment programmes shown at Table 3. The estimates for government supported trainees shown in this table exclude trainees with contracts of employment as such people are included in the estimates of employee jobs.

^{2.} The employee jobs data relate to the March 2020 period before reported cases of the coronavirus (COVID-19) in the UK. Self-employment jobs relate to the period February-April 2020 which includes self-employment jobs before and after COVID-19 measures were implemented.

^{3.} This series is not exclusively a public sector series as it includes some private sector jobs. See table 4 for estimates of public and private sector employment.

Labour market statistics enquiries: labour.market@ons.gov.uk

The estimates shown in this table relate to the number of people in employment and should not be used as a proxy for flows of foreign migrants into the UK.

The total series includes people who do not state their country of birth or nationality. The total levels series MGTM does not therefore equal the sum of the "UK" and "Non-UK" series.
 This series consists of all 27 EU member states. This series equals the sum of EU14, EU8, EU2 and Other EU.
 Austria, Beglinu, Denmark, Finland, France, Germany, Greece, Ireland, Italy, Luxembourg, Netherlands, Portugal, Spain and Sweden.
 Czech Republic, Estonia, Hungary, Latvia, Lithuania, Poland, Slovak Republic and Slovenia.
 Romania and Bulgaria.
 Copyrus, Malta and Crostia
 Total Non-EU equals the sum of Other Europe, Total Africa, Total Asia and Total America and Oceania

The total series includes people who do not state their country of birth or nationality. The total levels series therefore do not equal the sum of the "UK" and "Non-UK" series.

This series consists of all 27 EU member states.

This series consists of hose people whose main reason for being economically inactive was because they were students. It does not include all students as some students will be included in the employment and unemployment estimates.

UNEMPLOYMENT

9(1) Unemployment by age and duration

United Kingdom (thousands) seasonally adjuste

Labour market statistics enquiries: labour.market@ons.gov.uk

Note: When comparing quarterly changes ONS recommends comparing with the previous non-overlapping 3-month average time period (eg, compare Apr-Jun with Jan-Mar, not with Mar-May).

¹ Denominator = economically active for that age group.

^{*} Sample size too small for reliable estimate.

Source: Labour Force Survey
Labour market statistics enquiries: labour.market@ons.gov.uk

Note: When comparing quarterly changes ONS recommends comparing with the previous non-overlapping 3-month average time period (eg, compare Apr-Jun with Jan-Mar, not with Mar-May).

¹ Denominator = economically active for that age group.
* Sample size too small for reliable estimate.

Data Source: Labour Force Survey.

Labour market statistics enquiries: labour.market@ons.gov.uk

Discouraged workers are those who are not looking for work because they believe no jobs are available.
 Other reasons include people who (i) are waiting the results of a job application, (ii) have not yet started looking for work, (iii) do not need or want employment, (iv) have given an uncategorised reason for being economically inactive, or (v) have not given a reason for being economically inactive.

Source: Labour Force Survey

Labour market statistics enquiries: labour.market@ons.gov.uk

^{1.} Not in full-time education includes people in part-time education and/or some form of training. Estimates of the number of young people who were not in employment, education or training ("NEET") cannot therefore be derived from this table. Estimates of young people who were NEET are published separately at:

 $[\]underline{\text{https://www.ons.gov.uk/employmentandlabourmarket/peoplenotinwork/unemployment/bulletins/youngpeoplenotineducationemploymentortrainingneet/latest}$

^{2.} People in full-time education are employed if they have a part-time job or unemployed if they are looking for part-time employment.

^{3.} Denominator = all persons in the relevant age group for economically active, total in employment and economically inactive; economically active for unemployment.

Source: Monthly Wages & Salaries Survey

^{1.} Estimates of regular pay exclude bonuses and arrears of pay.

^{2.} The figure in brackets is the percentage of whole economy employment in that sector or industry for the latest time period.

Earnings enquiries: 01633 456120 Email: earnings@ons.gov.uk

^{3.} The three month average figures are the changes in the average seasonally adjusted values for the three months ending with the relevant month compared with the same period a year earlier.

Email: earnings@ons.gov.uk

^{1.} Estimates of total pay include bonuses but exclude arrears of pay.

^{2.} The three month average figures are the changes in the average seasonally adjusted values for the three months ending with the relevant month compared with the same period a year earlier.

^{3.} Estimates of real earnings are calculated by deflating the nominal earnings estimates by the Consumer Prices Index including owner occupiers' housing costs (CPIH), our preferred measure of consumer price inflation.

Sources: EUROSTAT, OECD, national statistical offices.

Labour market statistics enquiries: labour.market@ons.gov.uk

(*) Note: The UK rates shown in this table are as published by EUROSTAT (the EUs statistical office). See Table 1 for the latest rates for the UK as published by ONS.

Caution should be taken with international comparisons of labour markets during the COVID-19 pandemic, since definitional definitions of economic measures, such as furloughing, will vary between countries.

- 1. All employment rates shown in this table are for those aged from 15 to 64 except for the rate for the United States published by OECD which are for those aged from 16 to 64.
- The employment rates for the EU are published by EUROSTAT and are not seasonally adjusted. EUROSTAT do not publish seasonally adjusted (SA) employment rates but SA rates for some EU countries are published by OECD. These OECD employment rates are available on our website at
 Unemployment rates published by EUROSTAT for most EU countries (but not for the UK), are calculated by extrapolating from the most recent LFS data using monthly registered unemployment data.
- 3. Unemployment rates published by EUROSTAT for most EU countries (but not for the UK), are calculated by extrapolating from the most recent LFS data using monthly registered unemployment data.
 A standard population basis (15-74) is used by EUROSTAT except for Spain, Italy and the UK (16-74). The unemployment rate for the US is based on those aged 16 and over, but the rates for Canada and lappan are for those aged 15 and over, but the rates for Canada and lappan are for those aged 15 and over, but the rates for Canada and lappan are for those aged 15 and over, but the rates for Canada and lappan are for those aged 15 and over, but the rates for Canada and lappan are for those aged 15 and over, but the rates for Canada and lappan are for those aged 15 and over, but the rates for Canada and lappan are for those aged 15 and over, but the rates for Canada and lappan are for those aged 15 and over, but the rates for Canada and lappan are for those aged 15 and over, but the rates for Canada and lappan are for those aged 15 and over, but the rates for Canada and lappan are for those aged 15 and over, but the rates for Canada and lappan are for those aged 15 and over, but the rates for Canada and lappan are for those aged 15 and over, but the rates for Canada and lappan are for those aged 15 and over, but the rates for Canada and lappan are for those aged 15 and over, but the rates for Canada and lappan are for those aged 15 and over, but the rate over the rate of the lappan are for those aged 15 and over the rate of the lappan are for the lap
- Japan are for those aged 15 and over. All unemployment rates shown in this table are seasonally adjusted.

 4. The "Total EU" series consist of all 27 EU countries. The Eurozone figures consist of the following EU countries: Austria, Belgium, Cyprus, Estonia, Finland, France, Germany, Greece, Ireland, Italy, Label Labria, Labriang Labriang, Martin Nethrades, Partial Stands Populies, Standing and Spain and Spain
- 4. The Total CO series consist of male 2 to Countines. The Lauroel rigulars owned in the Survey of Countines. Austral, England, Formal Cou

Relationship between columns 1=2+3; 4=5+6

Data source: ONS Labour Disputes Survey

- 1. Estimates of working days lost and workers involved are shown to the nearest thousand. Unrounded estimates of less than 500 therefore round to zero.
- 2. Due to rounding the working days lost for the public and private sectors may not add up to the total working days lost.
- 3. The latest 12 month cumulative totals for the figures in these columns will not necessarily equal the sum of the 12 months as some disputes continue for over one month. These disputes appear in each month's data, but only once in the total.

Labour market statistics enquiries: labour.market@ons.gov.uk

^{1.} The redundancy level is the number of people who were made redundant in the three months prior to interview. The figure is not seasonally adjusted.

^{2.} The redundancy rate is the ratio of the redundancy level for the given quarter to the seasonally adjusted number of employees in the previous quarter, multiplied by 1,000.

The Labour Fo	orce Survey is tabulated by region of	residence.					S	ource: Labour Fo	orce Survey	

Labour market statistics enquiries: labour.market@ons.gov.uk

The Labour Force Survey is tabulated by region or residence.

1. Economically active = Employment plus Unemployment.

2. Denominator = all persons aged 16 to 64.

3. Denominator = total economically active

4. The estimates for Northern Ireland have not had the non-response bias adjustment from the recent reweighting fully applied. Early indications suggest the impact on UK headline rate estimates would be less than 0.1 percentage point. We will continue to investigate this and will keep users advised accordingly.

REGIONAL SUMMARY

23(2) Regional summary of Workforce Jobs

Thousands, seasonally adjusted

Area Codes	Area Names	December 2021	Change on September 2021

E12000007	London	5,970	47
E12000008	South East	4,867	7
E12000009	South West	3,016	50
W92000004	Wales	1,462	12
S92000003	Scotland	2,786	17
N92000002	Northern Ireland ¹	888	3

Workforce jobs are mainly sourced from employer surveys and are tabulated by region of workplace.

HM Forces stationed abroad are included in the UK workforce jobs estimates but not in the regional estimates. The

UK workforce jobs estimates therefore do not equal the sum of the regional estimates.

^{1.} The LFS components of the Workforce Jobs estimates for Northern Ireland have not had the non-response bias adjustment from the recent reweighting fully applied. Early indications suggest the impact on UK headline rate estimates would be less than 0.1 percentage points. We will continue to investigate this and will keep users advised accordingly.
