2 . Main points

The UK employment rate for July to September 2022 was 75.5%, largely unchanged on the previous quarter and 1.1 percentage points lower than before the coronavirus (COVID-19) pandemic (December 2019 to February 2020). Over the latest three-month period, the number of employees decreased, while self-employed workers increased.

The most timely estimate of payrolled employees for October 2022 shows another monthly increase, up 74,000 on the revised September 2022 figures, to a record 29.8 million.

The unemployment rate for July to September 2022 decreased by 0.2 percentage points on the quarter to 3.6%. The number of people unemployed for all duration categories decreased in the latest three-month period.

The economic inactivity rate increased by 0.2 percentage points on the quarter to 21.6% in July to September 2022. During the latest three-month period, the increase in economic inactivity was driven by those who are long-term sick, who increased to a record high. Our recent article looked at the [economically inactive because of long-term sickness](#) in more detail. It showed that over two-thirds of those becoming long-term sick in 2021 and 2022 were already economically inactive for another reason in the three months before interview.

In August to October 2022, the estimated number of vacancies fell by 46,000 on the quarter to 1,225,000. Despite four consecutive quarterly falls, the number of vacancies remain at historically high levels. An increasing number of businesses are now reporting holding back recruitment because of economic pressures.

Growth in average total pay (including bonuses) was 6.0% and growth in regular pay (excluding bonuses) was 5.7% among employees in July to September 2022. This is the strongest growth in regular pay seen outside of the coronavirus pandemic period.

Average regular pay growth for the private sector was 6.6% in July to September 2022, and 2.2% for the public sector. Outside of the height of the coronavirus pandemic period, this is the largest growth seen for the private sector and the largest difference between the private sector and public sector.

In real terms (adjusted for inflation) over the year, total pay fell by 2.6% and regular pay fell by 2.7%. This is slightly smaller than the record fall in real regular pay we saw in April to June 2022 (3.0%), but remains among the largest falls in growth since comparable records began in 2001.

This month we have reinstated the monthly labour disputes statistics. In September 2022, there were 205,000 working days lost to labour disputes.

3 . Latest indicators at a glance

4 . Labour market data

[Summary of labour market statistics](#)

Dataset A01 | Released 15 November 2022

Estimates of employment, unemployment and other employment-related statistics for the UK.

[Real Time Information statistics](#)

Dataset | Released 15 November 2022

Earnings and employment statistics from Pay As You Earn (PAYE) Real Time Information (RTI) (Experimental Statistics), seasonally adjusted.

[Labour Force Survey single-month estimates](#)

Dataset X01 | Released 15 November 2022

Labour Force Survey (LFS) experimental single-month estimates of employment, unemployment, and economic inactivity.

[A guide to labour market data](#)

Methodology | Updated 25 August 2022

Summary of labour market datasets providing estimates of employment, unemployment, average weekly earnings and the number of vacancies. Tables are listed alphabetically and by topic.

View all related data on our [related data page](#).

Alternatively, [Nomis](#) provides free access to the most detailed and up-to-date UK labour market statistics.

5 . Glossary

Average weekly earnings

[Average weekly earnings](#) measure money paid by employers to employees in Great Britain before tax and other deductions from pay. The estimates are not just a measure of pay rises because they also reflect, for example, changes in the overall structure of the workforce. More high-paid jobs in the economy would have an upward effect on the earnings growth rate.

Economic inactivity

People not in the labour force (also known as [economically inactive](#)) are not in employment but do not meet the internationally accepted definition of unemployment because they have not been seeking work within the last four weeks, and/or they are unable to start work in the next two weeks. The economic inactivity rate is the proportion of people aged between 16 and 64 years who are not in the labour force.

Employment

[Employment](#) measures the number of people in paid work or who had a job that they were temporarily away from (for example, because they were on holiday or off sick). This differs from the number of jobs because some people have more than one job. The employment rate is the proportion of people aged between 16 and 64 years who are in employment.

Unemployment

[Unemployment](#) measures people without a job who have been actively seeking work within the last four weeks and are available to start work within the next two weeks. The unemployment rate is not the proportion of the total population who are unemployed. It is the proportion of the economically active population (those in work, and those seeking and available to work) who are unemployed.

Vacancies

[Vacancies](#) are defined as positions for which employers are actively seeking recruits from outside their business or organisation. The estimates are based on the Vacancy Survey. This is a survey of businesses designed to provide estimates of the stock of vacancies across the economy, excluding agriculture, forestry, and fishing (a small sector for which the collection of estimates would not be practical).

Pay As You Earn (PAYE) Real Time Information (RTI)

These data come from HM Revenue and Customs' (HMRC's) Pay As You Earn (PAYE) Real Time Information (RTI) system. They cover the whole population rather than a sample of people or companies, and they will allow for more detailed estimates of the population. The release is classed as [Experimental Statistics](#) as the methodologies used to produce the statistics are still in their development phase. As a result, the series are subject to revisions.

A [more detailed glossary](#) is available in our Guide to labour market statistics.

6 . Measuring the data

Our [Comparison of labour market data sources article](#) compares data sources and discusses some of the main differences.

Coronavirus

For more information on how labour market data sources are affected by the coronavirus (COVID-19) pandemic, see our [Coronavirus and the effects on UK labour market statistics article](#).

Our latest data and analysis on the impact of coronavirus on the UK economy and population are available on our dedicated [Coronavirus webpage](#). This is a hub for all special coronavirus-related publications, drawing on all available data. In response to the developing coronavirus pandemic, we are working to ensure that we continue to publish economic statistics. For more information, please see our [COVID-19 and the production of statistics](#) webpage.

The population totals used for the latest Labour Force Survey (LFS) estimates use projected growth rates from Real Time Information (RTI) data for UK, EU and non-EU populations based on 2021 patterns. The total population used for the LFS therefore does not take into account any changes in migration, birth rates, death rates, and so on since June 2021, and hence levels estimates may be under- or over-estimating the true values and should be used with caution. Estimates of rates will, however, be robust.

Economic statistics governance after EU exit

Following the UK's exit from the EU, new governance arrangements are being put in place that will support the adoption and implementation of high-quality standards for UK economic statistics. These governance arrangements will promote international comparability, and add to the credibility and independence of the UK's statistical system.

At the centre of this new governance framework will be the new National Statistician's Committee for Advice on Standards for Economic Statistics (NSCASE). NSCASE will support the UK by ensuring its processes for influencing and adopting international statistical standards are world leading. The advice NSCASE provides to the National Statistician will span the full range of domains in economic statistics, including the national accounts, fiscal statistics, prices, trade and the balance of payments, and labour market statistics.

[Further information about NSCASE](#) is available on the UK Statistics Authority website.

Making our published spreadsheets accessible

Following the [Government Statistical Service \(GSS\) guidance on releasing statistics in spreadsheets](#), we will be amending our published tables over the coming months to improve usability, accessibility and machine readability of our published statistics. To help users change to the new formats, we will be publishing sample versions of a selection of our tables, and where practical, initially publish the tables in both the new and current formats. If you have any questions or comments, please email labour.market@ons.gov.uk.

Consultation on release practices

The Office for Statistics Regulation (OSR) has finalised its [consultation on release practices](#). The Office for National Statistics (ONS) has welcomed the findings in a [statement on the ONS's response to the OSR's proposals](#), specifically noting that the release time exemptions, which were granted during the coronavirus pandemic, are now incorporated into the revised Code of Practice. As such, the monthly labour market bulletin will continue to be published at 7am.

Occupational data in ONS surveys

The Office for National Statistics (ONS) has identified an issue with the collection of some occupational data in a number of our surveys, including the LFS and Annual Population Survey (APS), which are used in the production of the labour market publication. While we estimate any impacts will be small overall, this will affect the accuracy of the breakdowns of some detailed (four-digit Standard Occupational Classifications (SOC)) occupations, and data derived from them.

On 26 September 2022, [the ONS published an article](#) based on initial analysis of the potential impact on different four-digit SOC codes. The ONS advises to continue exercising caution in the use of detailed SOC breakdowns until the issue has been corrected.

7 . Strengths and limitations

The estimates presented in this bulletin contain [uncertainty](#).

Further information is available in our [Guide to labour market statistics](#).

Information on revisions is available in our [Labour market statistics revisions policy](#).

Information on the strengths and limitations of this bulletin is available in our [previous bulletin, Labour market overview, UK: April 2021](#).

Source: Labour Force Survey

Labour market statistics enquiries: labour.market@ons.gov.uk

1. The Labour Force Survey (LFS) is a survey of households in the UK.

2. The headline employment rate is the number of people aged 16 to 64 in employment divided by the population aged 16 to 64.

3. The headline unemployment rate is the number of unemployed people (aged 16+) divided by the economically active population (aged 16+). The economically active population is defined as those in employment plus those who are unemployed.

4. The headline inactivity rate is the number of people aged 16 to 64 divided by the population aged 16-64.

Note on headline employment, unemployment and inactivity rates

The headline employment and inactivity rates are based on the population aged 16 to 64 but the headline unemployment rate is based on the economically active population aged 16 and over. The employment and inactivity rates for those aged 16 and over are affected by the inclusion of the retired population in the denominators and are therefore less meaningful than the rates for those aged from 16 to 64. However, for the unemployment rate for those aged 16 and over, no such effect occurs as the denominator for the unemployment rate is the economically active population which only includes people in work or actively seeking and able to work.

Note on headline employment, unemployment and inactivity levels

The headline employment and unemployment levels are for those aged 16 and over; they measure all people in work or actively seeking and able to work. However, the headline inactivity level is for those aged 16 to 64. The inactivity rate for those aged 16 and over is less meaningful as it includes elderly people who have retired from the labour force.

Source: Labour Force Survey

Labour market statistics enquiries: labour.market@ons.gov.uk

Note: When comparing quarterly changes ONS recommends comparing with the previous non-overlapping 3-month average time period (eg, compare Apr-Jun with Jan-Mar, not with Mar-May).

1. The split between full-time and part-time employment is based on respondents' self-classification.
2. This series does not include all people on these programmes; it only includes those engaging in any form of work, work experience or work-related training.
3. These series cover Employees and Self-employed only. These series include some temporary employees.
4. The total includes those who did not give a reason for working part-time and it therefore does not equal the sum of the other columns in this section of the table.

Source: returns from public sector organisations

Explanatory Note: The public and private sector employment series have been affected by a number of major reclassifications where bodies employing large numbers of people have moved between the public and private sectors. These major reclassifications are as follows:

Further Education corporations and Sixth Form College corporations in England are included in the private sector from June 2012 but in the public sector for earlier time periods.

Royal Mail plc is included in the private sector from December 2013 but in the public sector for earlier time periods.

Lloyds Banking Group plc is included in the public sector from December 2008 to December 2013 but in the private sector for earlier and later time periods.

Royal Bank of Scotland plc is included in the public sector from December 2008 but in the private sector for earlier time periods.

Network Rail is included in the private sector before December 2002. From December 2002 onwards it is included in the public sector (except for the period from June 2003 to March 2004, when it is included in the private sector).

Northern Rock is included in the public sector from December 2007 until December 2011 but in the private sector for earlier and later time periods.

Bradford and Bingley is included in the public sector from September 2008 but in the private sector for earlier time periods.

Welsh Further Education colleges are included in the private sector from March 2015 but in the public sector for earlier time periods.

Housing associations in England are included in the public sector between September 2008 and September 2017; they are in the private sector for earlier and later time periods.

Housing associations in Scotland are included in the public sector from September 2001 until June 2018; they are included in the private sector for earlier and later time periods.

Housing associations in Wales are included in the private sector from June 2018; they are included in the public sector for earlier time periods.

Housing associations in Northern Ireland are included in the public sector from March 1999 to June 2020.

Train operating companies in England, Scotland and Wales operating under emergency measure agreements are included in the public sector from June 2020.

The series shown at Table 4 (in columns 6 to 9) for public and private sector employment excluding the effects of major reclassifications show all of the above mentioned bodies included in the private sector for all time periods and excluded from the public sector for all time periods. When using figures from this table, the latest estimate of the number of people employed in the public and private sectors should be taken from columns 1 and 3 respectively. However the quarterly and annual changes in employment shown in these columns are affected by reclassifications. Figures from columns 6 and 8 should be used for assessments of the recent underlying changes in public and private sector employment. The changes in employment shown in these columns are measured on a consistent basis to remove the effect of major reclassifications.

1. Estimated as the difference between LFS total employment and the data from public sector organisations.

2. LFS employment data for March refer to February-April, June refers to May-July, September refers to August-October and December refers to November-January.

3. This series excludes locally engaged staff stationed outside the United Kingdom.

4. This series excludes the Northern Ireland Civil Service.

5. This series may not exactly equal the sum of the components because each component is independently seasonally adjusted.

More detailed estimates are available in the Public Sector Employment Statistical Bulletin at:

<https://www.ons.gov.uk/employmentandlabourmarket/peopleinwork/publicsectorpersonnel/bulletins/publicsectoremployment/latest>

Workforce jobs enquiries 01633 456776

Sources: Employer surveys, Labour Force Survey and administrative sources

1. Workforce Jobs figures are a measure of jobs rather than people. For this reason estimates of self-employment jobs and government supported trainee jobs differ from estimates of people in self-employment and in government supported training and employment programmes shown at Table 3. The estimates for government supported trainees shown in this table exclude trainees with contracts of employment as such people are included in the estimates of employee jobs.
2. This series is not exclusively a public sector series as it includes some private sector jobs. See table 4 for estimates of public and private sector employment.

1. The total series includes people who do not state their country of birth or nationality. The total levels series MGTM does not therefore equal the sum of the "UK" and "Non-UK" series.

Labour market statistics enquiries: labour.market@ons.gov.uk

2. This series consists of all 27 EU member states. This series equals the sum of EU14, EU8, EU2 and Other EU.

3. Austria, Belgium, Denmark, Finland, France, Germany, Greece, Ireland, Italy, Luxembourg, Netherlands, Portugal, Spain and Sweden.

4. Czech Republic, Estonia, Hungary, Latvia, Lithuania, Poland, Slovak Republic and Slovenia.

5. Romania and Bulgaria.

6. Cyprus, Malta and Croatia.

7. Total Non-EU equals the sum of Other Europe, Total Africa, Total Asia and Total America and Oceania.

The estimates shown in this table relate to the number of people in employment and should not be used as a proxy for flows of foreign migrants into the UK.

Source: Labour Force Survey

1. The total series includes people who do not state their country of birth or nationality. The total levels series therefore do not equal the sum of the "UK" and "Non-UK" series.

2. This series consists of all 27 EU member states.

3. This series consists of those people whose main reason for being economically inactive was because they were students. It does not include all students as some students will be included in the employment and unemployment estimates.

Labour market statistics enquiries: labour.market@ons.gov.uk

1. Discouraged workers are those who are not looking for work because they believe no jobs are available.

2. Other reasons include people who (i) are waiting the results of a job application, (ii) have not yet started looking for work, (iii) do not need or want employment, (iv) have given an uncategorised reason for being economically inactive, or (v) have not given a reason for being economically inactive.

Source: Labour Force Survey

Labour market statistics enquiries: labour.market@ons.gov.uk

1. Not in full-time education includes people in part-time education and/or some form of training. Estimates of the number of young people who were not in employment, education or training ("NEET") cannot therefore be derived from this table. Estimates of young people who were NEET are published separately at: <https://www.ons.gov.uk/employmentandlabourmarket/peopleinwork/unemployment/bulletins/youngpeoplenotineducationemploymentortrainingneet/1>

2. People in full-time education are employed if they have a part-time job or unemployed if they are looking for part-time employment.

3. Denominator = all persons in the relevant age group for economically active, total in employment and economically inactive; economically active for unemployment.

1. Estimates of total pay include bonuses but exclude arrears of pay.

2. The three month average figures are the changes in the average seasonally adjusted values for the three months ending with the relevant month compared with the same period a year earlier.

3. Estimates of real earnings are calculated by deflating the nominal earnings estimates by the Consumer Prices Index including owner occupiers' housing costs (CPIH), our preferred measure of consumer price inflation.

Labour market statistics enquiries: labour.market@ons.gov.uk

- As figures are taken from OECD they will not match ONS published figures for the United Kingdom.
- Employment rate data is for ages 15 to 64. For the United Kingdom and the United States, the lower age limit is 16 years old.
- Unemployment rate data is for ages 15 and over. For the United Kingdom and the United States, the lower age limit is 16 years old.

Data source: ONS Labour Disputes Survey
Labour disputes enquiries 01633 455400

- In April 2020, collection and publication of labour disputes data were temporarily suspended to protect and prioritise our outputs in response to the coronavirus (COVID-19) pandemic. In June 2022, collection of the Labour Disputes Inquiry restarted, but only for the period from January 2022 onwards.
- Although collection of labour disputes statistics restarted for the period from January 2022 onwards, collection for June 2022 onwards was prioritised. Data for the period January 2022 to May 2022 will be made available shortly.
- Data for number of workers involved are only available from January 1986 onwards.

Data source: Labour Force Survey

Labour market statistics enquiries: labour.market@ons.gov.uk

1. The redundancy level is the number of people who were made redundant in the three months prior to interview. The figure is not seasonally adjusted.

2. The redundancy rate is the ratio of the redundancy level for the given quarter to the seasonally adjusted number of employees in the previous quarter, multiplied by 1,000.

N92000002	Northern Ireland	898	3

Workforce jobs are mainly sourced from employer surveys and are tabulated by region of workplace.

HM Forces stationed abroad are included in the UK workforce jobs estimates but not in the regional estimates. The

UK workforce jobs estimates therefore do not equal the sum of the regional estimates.
