	65-69	1	780	267	119	222	429	0	22
	70-74	4	956	415	172	286	649	0	34
	75-79	7	1,239	595	198	355	785	0	36
80-84	5	1,223	668	179	338	703	0	45	
85-89	4	1,166	734	189	241	541	0	45	
90+	1	1,220	640	151	142	361	0	29	

note 1 Figures are for deaths registered rather than deaths occurred. For more information see our [Impact of registration delays publication](#).

[Impact of registration delays on mortality statistics in England and Wales](#)

note 2 Figures exclude deaths of non-residents.

note 3 Based on area of usual residence. Figures are based on boundaries as of May 2023. Therefore, figures may not match those previously published where boundaries have changed.

note 4 Based on underlying cause of death.

note 5 For deaths over 28 days, the Tenth Revision of the International Statistical Classification of Diseases and Related Health Problems (ICD-10) has been used to classify cause of death in the publication. The ICD is used to translate diagnoses of diseases and other health problems from words into alphanumeric code to permit easier storage, retrieval and analysis. For deaths registered from 1 January 2022, cause of death is coded to the ICD-10 classification using MUSE 5.8 software. Deaths registered between 1 January 2020 and 31 December 2021 were coded to the using MUSE 5.5 and previous years were coded to IRIS 4.2.3. For more information see:

[Cause of death coding in mortality statistics, software changes.](#)
