

**Table 1a: Prevalence of domestic abuse in the last year among all adults aged 16 to 59 and among adults aged 16 to 59 with selected Eastern European countries of birth, year ending March 2017 CSEW<sup>1</sup>**

England and Wales	<b>Adults aged 16-59</b>	
	<b>Any domestic abuse (partner or family non-physical abuse, threats, force, sexual assault or stalking)</b>	Unweighted base - number of adults
	Percentage of victims once or more	
<b>All</b>	5.9	20,578
<b>Selected Eastern Europe</b>	2.5	645

Source: Crime Survey for England and Wales, Office for National Statistics

1. Adults with selected Eastern European countries of birth include those who originated from any of the following countries: Poland, Slovakia, Romania, Bulgaria, Lithuania, Latvia and Ukraine

**Table 1b: Estimated number of victims of domestic abuse, in the last year, among all adults aged 16 to 59 and among adults aged 16 to 59 with selected Eastern European countries of birth, year ending March 2017 CSEW<sup>1</sup>**

England and Wales	<b>Adults aged 16-59</b>				
	<b>Any domestic abuse (partner or family non-physical abuse, threats, force, sexual assault or stalking)</b>				Unweighted base - number of adults
	Estimated number of victims (000's) <sup>2</sup>		Range <sup>3</sup>		
<b>All</b>	1,946	1,818	-	2,073	20,578
<b>Selected Eastern Europe</b>	27	15	-	39	645

Source: Crime Survey for England and Wales, Office for National Statistics

1. Adults with selected Eastern European countries of birth include those who originated from any of the following countries: Poland, Slovakia, Romania, Bulgaria, Lithuania, Latvia and Ukraine

2. As official population estimates for the household population with these selected Eastern European countries of birth are not available, the estimated number of victims is calculated using population figures implied from the weighted survey data.

3. The range given for these estimates is based on a 95 per cent confidence interval (Chapter 8 of the [User Guide](#) has more information). Users are advised to be cautious when making inferences from estimates with large confidence intervals.
