

## Social Survey response rates summary

\* Indicates moving targets, changing slowly over time; all other surveys have fixed targets

### General notes

- **These figures are a snapshot of current performance based on data retrieved on 10/12/2014.**
- Response rates are, mid-level, survey, client rates (client rates include partial and proxy interviews from some surveys, but not for others)
- This information includes telephone and face-to-face interviewing
- This information includes reissues where these have been merged with 'mainstage' rates
- "Latest month" refers to the most recent month with 95% mainstage fieldwork complete

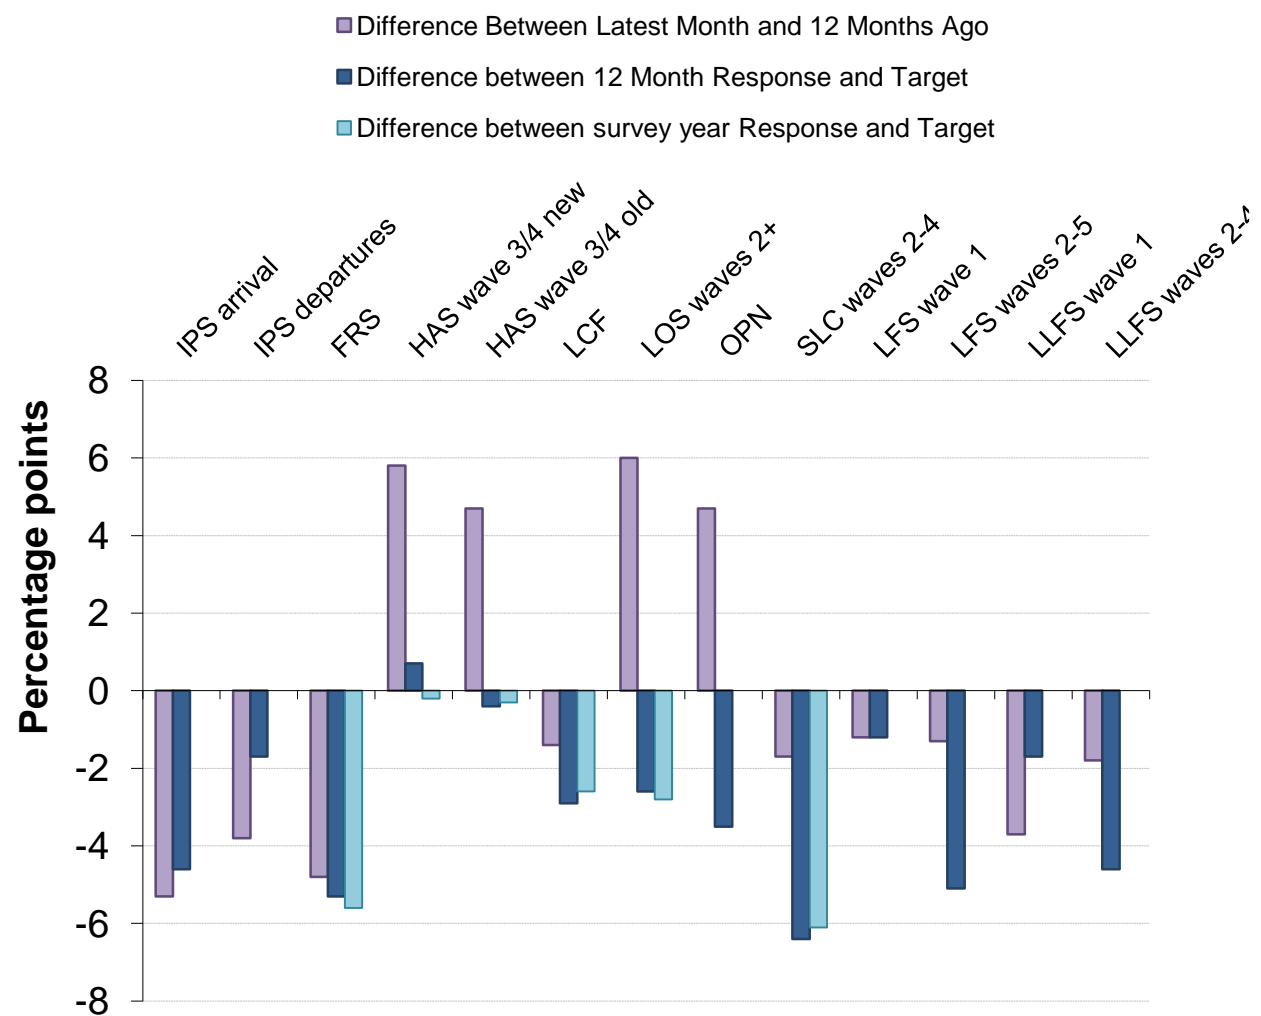

### Notes on particular surveys

- IPS response rates include full and partial interviews
- LLFS refers to the Local Labour Force Survey, also known as the 'boost'
