

**RESPONDENT:** 2902775173 – Mirain Rhys  
**SECTOR:** Unknown - Individual

**Q1 - What are your views of the different census approaches described in the consultation document?**

I agree with the second suggestion of using administrative data from a variety of sources. Not all the population will be able to access the internet based survey and I believe a variety of data sources would create a more accurate, up to date account of the population.

**Q2 - Please specify any significant uses of population and housing statistics that we have not already identified.**

**Q3 - Please specify any significant additional benefits of population and housing statistics that we have not already identified.**

**Q4 - What would the impact be if the most detailed statistics for very small geographic areas and small population groups were no longer available? High, medium, low or no impact?**

High

**If medium or high, please give further information.**

Policy makers depend heavily on such information.

**Q5 - What would the additional benefit be if more frequent (i.e. annual) statistics about population characteristics were available for areas like local authorities and electoral wards? High, medium, low or no additional benefit?**

High

**If medium or high please give further information.**

It would create a more accurate picture of the population.

**Q6 - Please specify any significant uses of census information for historical research that we have not already identified.**

**Q7 - What advantages or disadvantages for genealogical or historical research can you see from a move to a solution based on archiving administrative data sources?**

**Q8 - What are your views of the risks of each census approach and how they might be managed?**

**Q9 - Are there any other issues that you believe we should be taking into account?**
