

RESPONDENT: 2939064515 – Linda Nixon
SECTOR: Unknown - Individual

Q1 - What are your views of the different census approaches described in the consultation document?

I prefer the one taken every decade like in 2011

Q2 - Please specify any significant uses of population and housing statistics that we have not already identified.

I as a family historian value the information which can be gained from the Census records. I feel if this way is stopped it will ruin the chance of those in the future gaining an insight into their own family's history.

Q3 - Please specify any significant additional benefits of population and housing statistics that we have not already identified.

Q4 - What would the impact be if the most detailed statistics for very small geographic areas and small population groups were no longer available? High, medium, low or no impact?

High

If medium or high, please give further information.

It would stop those researching their own family history and social history in gaining all aspects of the information and knowledge available.

Q5 - What would the additional benefit be if more frequent (i.e. annual) statistics about population characteristics were available for areas like local authorities and electoral wards? High, medium, low or no additional benefit?

Low

If medium or high please give further information.

Q6 - Please specify any significant uses of census information for historical research that we have not already identified.

Q7 - What advantages or disadvantages for genealogical or historical research can you see from a move to a solution based on archiving administrative data sources?

None

Q8 - What are your views of the risks of each census approach and how they might be managed?

Q9 - Are there any other issues that you believe we should be taking into account?
