

RESPONDENT: 2939967098 – **Raymond Riley**
SECTOR: Unknown - Individual

Q1 - What are your views of the different census approaches described in the consultation document?

There is a need for a full census - in it's present form - but with online available extra information can be obtained voluntarily whenever it's needed. So a combination of traditional and modern methods.

Q2 - Please specify any significant uses of population and housing statistics that we have not already identified.

Fully covered.

Q3 - Please specify any significant additional benefits of population and housing statistics that we have not already identified.

Don't know any.

Q4 - What would the impact be if the most detailed statistics for very small geographic areas and small population groups were no longer available? High, medium, low or no impact?

Medium

If medium or high, please give further information.

How many children going to school next year?

Q5 - What would the additional benefit be if more frequent (i.e. annual) statistics about population characteristics were available for areas like local authorities and electoral wards? High, medium, low or no additional benefit?

Medium

If medium or high please give further information.

Better info better planning - hopefully.

Q6 - Please specify any significant uses of census information for historical research that we have not already identified.

If every 5 years more information was available this would be of benefit.

Q7 - What advantages or disadvantages for genealogical or historical research can you see from a move to a solution based on archiving administrative data sources?

None

Q8 - What are your views of the risks of each census approach and how they might be managed?

If people are hiding then none of these would help.

Q9 - Are there any other issues that you believe we should be taking into account?

Take notice of genealogical groups.
