1 . Main points

The following information is for the latest survey period 4 to 15 October 2023, based on adults in Great Britain.

- When asked about the important issues facing the UK today, the most commonly reported issues continued to be the cost of living (90%), the NHS (86%), the economy (72%), climate change and the environment (62%) and housing (57%).
- More than half (52%) of adults reported that their cost of living had increased compared with a month ago, this has decreased from nearly 4 in 5 adults (79%) during a similar period one year ago (29 September to 9 October 2022).
- More than 9 in 10 (93%) adults who reported their cost of living had increased compared with one month ago, reported the price of their food shop had increased, 70% reported the price of their fuel had increased and over half (59%) reported their gas or electricity bills had increased.
- Among those currently paying rent or a mortgage; 4 in 10 (40%) reported that their rent or mortgage payments had gone up in the past six months; this was 33% during a similar period one year ago (29 September to 9 October 2022).
- Among those who are currently paying rent or a mortgage, 43% reported finding it very or somewhat difficult affording these payments; this is up from 30% during a similar period one year ago (29 September to 9 October 2022).
- Of those who pay energy bills, just over 4 in 10 (44%) adults reported it being very or somewhat difficult to afford energy bills; this was around the same (43%) to a similar period last year (29 September to 9 October 2022).
- When asked about any effect from industrial action in the past month, the most commonly reported effects were; not being able to travel for holiday or leisure purposes (9%), having to spend more money on travel (8%), and being unable to take part in leisure activities (7%); however, two thirds of adults (66%) said they had not been affected by industrial action in the survey period.

2 . Public opinions and social trends data

[Public opinions and social trends, Great Britain: household finances](#)

Dataset | Released 20 October 2023

Indicators from the Opinions and Lifestyle Survey (OPN) of people's experiences of changes in their cost of living and household finances in Great Britain.

[Public opinions and social trends, Great Britain: personal well-being and loneliness](#)

Dataset | Released 20 October 2023

Indicators from the Opinions and Lifestyle Survey (OPN) of worries, personal well-being, and loneliness in Great Britain.

[Public opinions and social trends, Great Britain: personal experiences of shortages of goods](#)

Dataset | Released 20 October 2023

Indicators from the Opinions and Lifestyle Survey (OPN) of whether people experienced shortages of goods such as food, medicine, or fuel when shopping in Great Britain.

[Public opinions and social trends, Great Britain: GP practice access](#)

Dataset | Released 20 October 2023

Indicators from the Opinions and Lifestyle Survey (OPN) related to people's experiences of GP practice access in Great Britain.

3 . Measuring the data

This release contains data and indicators from the Office for National Statistics' (ONS's) Opinions and Lifestyle Survey (OPN).

From the 16 June 2023 release onwards, we have made changes that reduce the scope of the release and accompanying datasets. This is based on a routine review of the relevance and usefulness of this release.

Breakdowns by age and sex are no longer provided for fortnightly estimates in our latest [Public opinions and social trends, Great Britain datasets](#). All previous versions of the dataset remain available from this page. Estimates from the OPN by these and other personal characteristics will continue to be provided on a regular basis in other ONS releases. For example, OPN estimates relating to the impact of cost of living among different sub-groups of the population are provided within our regular [Impact of increased cost of living on adults across Great Britain](#) series.

[Confidence intervals](#) are provided for all estimates in the datasets. Where changes in results from previous weeks are presented in this release, or comparisons between estimates are made, associated confidence intervals should be used to assess the [statistical significance](#) of the differences.

Sampling and weighting

In the latest period (4 to 15 October 2023), we sampled 4,990 households. This sample was randomly selected from people who had previously completed the Labour Market Survey (LMS) or OPN. The responding sample for the latest period contained 2,125 individuals, representing a 42.6% response rate.

Survey weights were applied to make estimates representative of the population (based on ONS population estimates). Further information on the survey design and quality can be found in our [Opinions and Lifestyle Survey Quality and Methodology Information \(QMI\)](#).
